Foreword

In a democratic form of government like in the Philippines, elections ensure citizens that elected officials render duty only by the authority given them through the ballot. It is, therefore, of import that election results are perceived and accepted as the true expression of the voters' will.

With the implementation of the automated election system, machines were used to count votes in lieu of the previous manual process. The random manual audit was introduced to help ensure that what the voters had marked on the paper ballots were indeed properly recorded by the machines at the clustered precinct level. Since 2010, when for the first time elections were automated nationwide, the audit of the vote counting machines has been an important safeguard in ensuring the credibility of the elections results.

Through this report, the Random Manual Audit Committee (RMAC) offers its findings from the random manual audit conducted on the May 9, 2016 national and local elections.

A. Executive Summary

The random manual audit (RMA) is a feature of the automated election system (AES). It was put into place starting with the National and Local Elections in 2010. By law, ballots from randomly selected clustered precincts, of at least one per legislative district, have to be manually inspected and counted. These ballots would then compared to see if the results match the output from the vote counting machine.

For the 2016 national and local elections, 715 clustered precincts (CPs) were randomly selected for audit, or an average of three for each of the 238 legislative districts. The sampling domain is national and the proportionate sample allocation methodology was used to determine the actual number of CPs in each district. The actual number of CPs ranged from one to six per legislative district. The positions audited were for president, vice president, district representative in Congress, governor and mayor.

Out of the 715 randomly selected CPs, 28 were considered as non-responses, thus leaving 687 CPs as valid samples. Non-responses pertain to samples selected but could not be considered because the ballots were lacking or the ballot boxes could not be retrieved. In order to not unduly delay the verification process and considering that the samples are statistically sufficient as confirmed by the Philippine Statistics Authority (PSA), the Random Manual Audit Committee (RMAC) pushed through with the analysis of the 687 valid samples.

From the actual 687 precinct results that were collected, the data show that the machine and audit counts matched 99.9023 percent of the time. Most variance is due to the difference in how a machine and a human appreciate partly-shaded voting ovals. Based on the specifications by the machine supplier and the Commission on Elections (COMELEC), the threshold for considering a vote is a mark that covers at least 25 percent of the area of the voting oval.

With the audit data, RMAC suggests that parties in current election protests agree on using a standard supplied by the machine provider and used in the audit, to determine whether votes will be counted. However, for efficiency and speed, the parties may agree, and with the strong recommendation of the COMELEC, to use the ballot image and machine interpretation of the votes on each ballot. These data are all contained in the memory cards used in the counting machines.

For future audits, RMAC recommends that precinct-level procedures be made more efficient. It offers for study the idea of bringing all the ballots boxes from sampled precincts to a centralized location for efficiency, economy and enhanced transparency. It also recommends embedding audit features in the design of future automated election systems.

B. Introduction

B.1. Automated Election System (AES)

The declaration of policy in Republic Act (RA) No. 9369 (January 23, 2007), which amended RA No. 8436 (December 22, 1997) or the AES Law, states: “[i]t is the policy of the State to ensure free, orderly, honest, peaceful, credible and informed elections, plebiscites, referenda, recall and other similar electoral exercises by improving on the election process and adopting systems, which shall involve the use of an automated election system that will ensure the secrecy and sanctity of the ballot and all election, consolidation and transmission documents in order that the process shall be transparent and credible and that the results shall be fast, accurate and reflective of the genuine will of the people.” In order to implement the stated policy, Section 5 of the same law authorizes COMELEC “to use an automated election system or systems in the same election, in different provinces, whether paper-based or a direct recording electronic election system as it may deem appropriate and practical for the process of voting, counting of votes and canvassing/consolidation and transmittal of results of electoral exercises...”

Pursuant to said authority, COMELEC deemed it appropriate and practical for the country to adopt a paper based election system², specifically an optical scanning system, for the 2010 national and local elections. This is a system whereby voters mark specific areas in paper ballots to register their choices and optical scanning machines scan the marks to count them as votes. Placed at each polling place, is an optical scanning machine that will read and count the votes.

The COMELEC adopted the same system in the 2013 and 2016 elections.

² Republic Act No. 8046 authorized the COMELEC to pilot-test a computerized system of voting, counting and canvassing of votes in the Autonomous Region in Muslim Mindanao (ARMM) Elections in March 1996. A similar system was used in the 1996 regional elections in the ARMM and in the 1998 national elections (only in the ARMM), but the count was centralized and not made at the precinct level.

B.2. Purpose of the Random Manual Audit (RMA)

In order to help increase public confidence in the results of the elections, the AES Law, as amended, requires the conduct of RMA on the results generated by the machines used. This is specifically provided in Section 29 of RA No. 9369, which states: “[w]here the AES is used, there shall be a random manual audit in one precinct per congressional district randomly chosen by the Commission [on Elections] in each province and city. Any difference between the automated and manual count will result in the determination of root cause and initiate a manual count for those precincts affected by the computer or procedural error.”³

The RMA aims to test the accuracy of the machine count and to determine whether there is systemic error in the automated vote count process, through a manual or visual verification of the ballots from randomly selected sample precincts. The actual process involved examining each ballot and checking the votes against the figures reflected in the election return (ER), the report generated by the counting machine. The resulting difference or variance would then serve as a basis to determine if there’s a systemic or pervasive error in the system.⁴

In some instances where the ERs were not found inside the ballot box, RMAC accessed and printed the data from the Smartmatic-administered website on the COMELEC home webpage <https://www.pilipinaselectionresults2016.com/>.⁵ The data were then matched against the votes counted in the audit.

[COMELEC Resolution No. 10109](#) (May 3, 2016) authorized audits to be done at the municipal or city level and on the day after the voting⁶. This differed from the past practice where audits were held at the polling center of the selected CP and immediately at the completion of the polling closing procedures.

3

<http://www.comelec.gov.ph/?r=References/RelatedLaws/ElectionLaws/AutomatedElection/RA9369#sec24>

⁴ Post-Election Audits: Restoring Trust in Elections, Lawrence Norden, Aaron Burstein, Joseph Lorenzo Hall and Margaret Chen, 2007, cites "xxx Among the goals an audit can fulfil are: creating an appropriate level of public confidence in the results of an election; deterring fraud against the voting system; detecting and providing information about large-scale, systemic errors; providing feedback that will allow jurisdictions to improving technology and election administration in future years; providing additional incentives and benchmarks for elections staff to reach higher standards of accuracy; and confirming, to a high level of confidence, that a complete manual recount would not change the outcome of the race."

⁵ A June 22, 2016 post in the COMELEC website read: “<https://www.pilipinaselectionresults2016.com/> is no longer available to display the Election Day election results as electronically transmitted from all Vote Counting Machines (VCMs) and Consolidation/Canvassing Systems (CCS) nationwide. These same information will be made directly available from inside the COMELEC Website.”

⁶ <http://www.comelec.gov.ph/?r=2016NLE/Resolutions/res10109>

In recommending the change of venue and time, RMAC opined that the RMA members would benefit from a night's rest and the venue will be more central to possibly draw observers especially from the contestants. The more central venue also offered better access to logistics and security.⁷

The RMA consisted of a two-step process: first, the audit of the votes against the machine count, which was done at the municipal or city level; and second, the verification, which was done at the COMELEC office in Intramuros, Manila for audits that reported more than 10 variances. It did not, however, include any aggregation of the precinct results at the municipal or city level.

B.3. Random Manual Audit Committee (RMAC)

RMAC, composed of COMELEC, PSA, and the National Citizens' Movement for Free Elections (NAMFREL), was tasked to conduct RMA for the 2016 national and local elections. It was constituted by COMELEC through [Resolution No. 10078](#).⁸

NAMFREL is represented by its Chairperson, David Balangue, who also chaired RMAC. Tomasa Lipana served as alternative RMAC chair. Telibert Laoc, a member of the NAMFREL national council, provided technical support. COMELEC is represented by Supervising Commissioner, Luie Tito Guia, and NCR Director, Temie Lambino. PSA is represented by Deputy National Statistician Josie Perez of Censuses and Technical Coordination Office (CTCO) and Florante Varona, Chief Statistical Specialist of Census Planning and Coordination Division (CPCD), for and in behalf of National Statistician, Lisa Grace Bersales.

COMELEC provided guidance on the regulations⁹ and statutes, as well as recruited, trained and deployed RMA members. COMELEC supervised and conducted the actual delivery of RMA reports and ballot boxes to the COMELEC office in Intramuros, Manila, for review by RMAC. To expedite the verification of the RMA reports, the verification of some CPs was done in the field, particularly in the cities of Cebu, Iloilo, Dumaguete, Bacolod, Cagayan De Oro, Zamboanga, Lucena, Tarlac, San Fernando (La

⁷ While the past audits were intended to be public, there were instances where, practically no one was present except the RMA members, as has been reported by some NAMFREL observers. The audit, which went well into the evening and until the early hours the following morning proved to be too taxing, and thus error-prone. Deployment, too, posed a challenge, not only to the RMA members, but also to the candidate and party watchers and observers.

⁸ As amended by COMELEC Resolution Nos. [10090](#) (April 13, 2016), [10109](#) (May 3, 2016) and [10133](#) (May 11, 2016). While the resolution was formally promulgated in April and May, the meetings of the members of the Committee started as early December 2015.

⁹ COMELEC issued the necessary Resolutions to formalize and guide the RMA process after consulting the members of the RMAC.

Union), Ilagan, Angeles and Marawi, and in the municipality of Pili. COMELEC covered most of the costs related to the conduct of RMA¹⁰.

In compliance with Section 5 of COMELEC Resolution 10078¹¹, PSA prepared the sample design for the selection of CPs, developed the ARSP and the processing system that allows data encoding and statistical tabulation of RMA results, and computation of variances and accuracy rates.

As chair of RMAC, NAMFREL initiated the design of the verification process and forms, provided oversight and advisory roles, and led in the preparation of the 2016 RMA Report.

The RMAC decided on procedural and policy questions as a collegial body.

B.4. Random Selection of Clustered Precincts (CPs)

Section 5 (b) of [COMELEC Resolution 10078](#) (March 11, 2016), as amended by [Resolution No. 10090](#) (May 3, 2016), mandates that “(a)t least one (1) clustered precinct per legislative district shall be randomly selected for audit, the number of which shall be proportional to the total number of clustered precincts of the legislative district over the total number of clustered precincts nationwide.” It adds that the CPs be randomly selected using an “automated random selection program” to be provided by PSA and the source code of which may be reviewed by political parties and citizens’ groups registered or accredited by COMELEC.

It must be stated at this point that the design of RMA in the 2010 elections provided for five sample precincts per legislative district. While the requirement of law speaks of only one sample per district, COMELEC decided to increase the same with the intention of elevating the level of public confidence in the electoral process. In the 2013 elections, the sample size was pegged at the minimum prescribed by law of one sample precinct per legislative district.

For 2016,¹² pursuant to Section 5 (b) of [COMELEC Resolution 10078](#), as amended, “to make the sample more proportionate to the number of clustered precincts per legislative district”, the number of CPs for audit was set at 715¹³ and allocated to the

¹⁰ NAMFREL covered a few meeting expenses and the costs for its members to deploy to the cities of Cebu, Iloilo, Dumaguete, Bacolod, Cagayan de Oro and Zamboanga to conduct on-site RMA verification in June.

¹¹ Part of the section reads, “The computation for the proportionate allocation of clustered precin[c]ts and the design of the automated random selection program shall be under the control of the Philippine Statistics Authority (PSA).”

¹² In 2010, a total of 1,145 clustered precincts were sampled, or five for each of the 229 legislative districts. In 2013, one clustered precinct was sampled for each of the 235 legislative districts nationwide.

¹³ <http://www.comelec.gov.ph/?r=2016NLE/RandomManualAudit>

238 legislative districts,¹⁴ with at least one CP selected for each legislative district. While that comprised 0.76 percent of the 92,509 nationwide¹⁵, the sample size is statistically sufficient to represent the population.

The actual number of CPs selected (715) was determined using the proportionate sample allocation methodology with legislative districts as the natural stratification variable. To illustrate, the lone legislative districts of Batanes and Siquijor had one precinct each for audit, while Sultan Kudarat 1st Legislative District had five, and Laguna 2nd Legislative District had six.

The table below shows the regional breakdown of cities and municipalities, CPs, and number of voters for the whole country against that from which the RMA sample was obtained.

Region	Dists.	Philippines			RMA Sample		
		Cities/ Municipalities	Clustered Precincts	Voters	Cities/ Municipalities	Clustered Precincts	Voters
NCR	32	32 cities	9,271	6,253,249	16 cities	72	48,146
CAR	7	2 cities; 75 municipalities	1,983	906,162	1 City; 13 municipalities	15	6,314
Region I	12	9 cities; 116 municipalities	5,376	2,950,775	6 cities; 35 municipalities	42	24,440
Region II	10	4 cities; 89 municipalities	3,594	1,920,952	4 cities; 24 municipalities	28	14,708
Region III	21	14 cities; 116 municipalities	9,511	6,056,392	13 cities; 54 municipalities	74	47,401
Region IV-A	26	19 cities; 124 municipalities	12,074	7,619,272	14 cities; 58 municipalities	93	57,603
Region IV-B	8	2 cities; 71 municipalities	2,832	1,589,326	2 cities; 20 municipalities	23	12,716
Region V	16	7 cities; 107 municipalities	5,695	3,121,662	7 cities; 36 municipalities	43	24,003
Region VI	12	3 cities; 95 municipalities	5,102	2,578,691	1 city; 22 municipalities	42	21,028
Region VII	14	10 cities; 97 municipalities	6,026	3,610,691	6 cities; 15 municipalities	43	26,344
Region	12	7 cities; 136	5,754	2,698,880	7 cities; 36	45	22,351

¹⁴ COMELEC Resolution No. 10133 confirmed the authority of the RMAC to make public the allocation of the 715 clustered precincts.

¹⁵ This excludes overseas votes, local absentee votes, and detainee votes from ballots with votes for local candidates

VIII		municipalities			municipalities		
Region IX	9	5 cities; 67 municipalities	3,410	1,931,795	3 cities; 19 municipalities	25	13,011
Region X	14	9 cities; 84 municipalities	4,341	2,541,331	9 cities; 21 municipalities	34	20,483
Region XI	11	6 cities; 43 municipalities	4,108	2,659,704	5 cities; 18 municipalities	32	20,079
Region XII	8	5 cities; 45 municipalities	3,438	2,086,112	4 cities; 22 municipalities	28	16,914
CARAG A	9	6 cities; 70 municipalities	2,669	1,547,093	4 cities; 15 municipalities	20	12,614
ARMM	8	2 cities; 116 municipalities	3,747	1,863,230	3 cities; 25 municipalities	29	13,927
NIR	9	19 cities; 38 municipalities	3,578	2,428,527	13 cities; 14 municipalities	27	17,000
Total	238		92,509	54,363,844		715	419,082

Probability proportional to size (PPS) sampling, with the number of CPs as measure of size, was first applied to select the cities or municipalities (first stage elements). On the second and final stage of the randomized selection process, the CPs (second stage elements) within the selected city or municipality were randomly drawn. The outputs from the procedure are the: 1) priority list of sample CPs; and 2) contingency list of sample CPs.

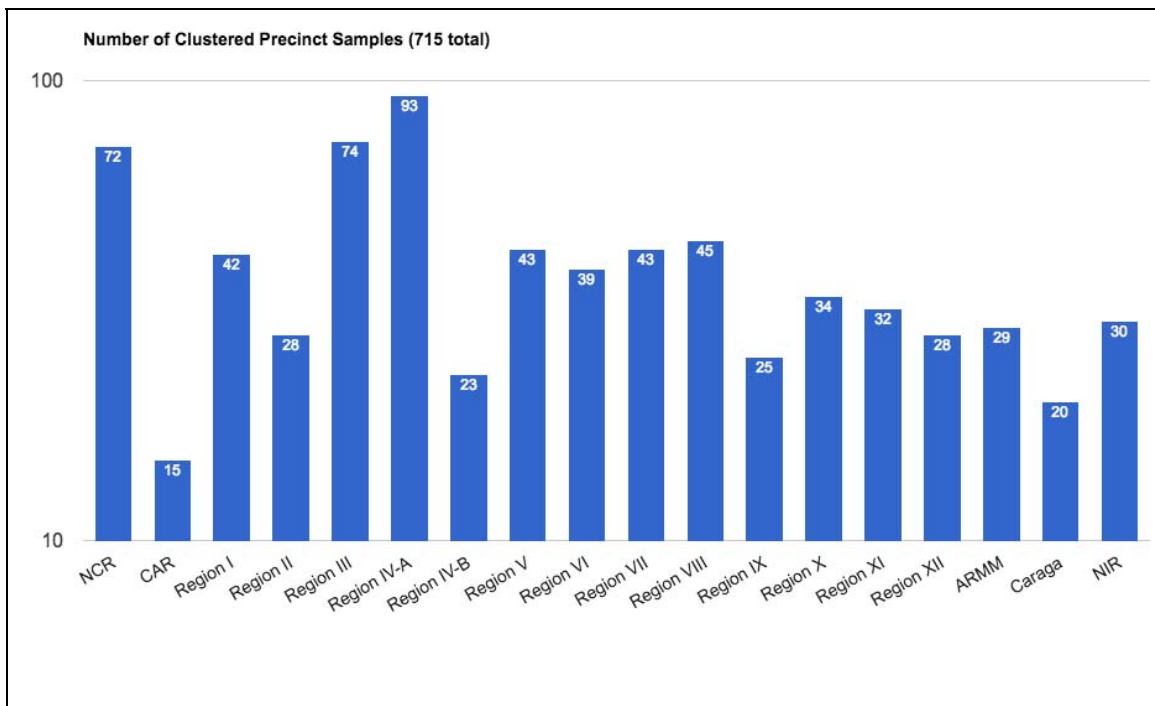

The priority sample contains the list of randomly selected priority cities/municipalities and the corresponding priority list of 715 randomly selected CPs. The contingency sample contains the list of randomly selected contingency cities/municipalities and the corresponding randomly selected contingency CPs. The contingency list was used to replace samples where audit could not be carried out in selected CPs because they were inaccessible or security posed an issue.

PSA used the ARSP to draw the lists. On May 9, 2016 at 12:00 o'clock noon, random selection of the cities and municipalities from which the CPs for audit would be drawn began. At 6:00 o'clock in the morning of the following day, the actual CPs to be subjected to RMA were selected. The list of 715 precincts for audit is at this link: <http://bit.ly/28JbKQW> or at <http://bit.ly/293tEkc>.

The selections were done in public at the COMELEC National Canvassing Site at the Philippine International Convention Center with representatives from the political parties, media and other observers.

The ARSP is a computer application that has routines, functions, and algorithms developed with Visual Basic 6 and MySQL database system. The program code was offered for review by registered political parties and COMELEC accredited citizens’ group from the third week of April, 2016. On May 7, 2016, Parish Pastoral Council for Responsible Voting representative, Professor William Yu, conducted an actual review of the code. After said review, the ARSP was installed in a COMELEC computer which was sealed before it was actually used on May 9, 2016.

The distribution of CPs by region is shown in the chart below. The figures above each bar represent the number of CPs selected for audit.

B.5. Random Manual Audit Teams (RMAAT)

The RMAATs were recruited by COMELEC giving preference to former BEIs who were not assigned to serve in the May 9, 2016 elections. The teams were composed of five members each tasked with reading and verifying the votes on the ballot, or recording them on the audit returns and on the tally board.¹⁶

COMELEC standardized the training and provided a manual (at this link: <http://bit.ly/1NK2IWq>) and an audiovisual material (at this link: <http://bit.ly/1pDh9jq>) for the teams during training. RMAATs were also provided with a “Guide on Appreciation of Markings” (shown below) prepared by Smartmatic, supplier of the vote counting

¹⁶ The actual audits took between five and six hours per precinct depending on the number of ballots in a box.

machines and software provider. This Guide was used to help ensure uniformity in the appreciation of the votes during the audit and the verification.

Random Manual Audit – Guide on Appreciation of Markings

STRICTLY FOR RMA USE ONLY.
Any form of dissemination of information provided herein is strictly prohibited.

Mark Type	Shading Marks NOT COUNTED by VCM					Shading Marks COUNTED by VCM				
Shaded oval										
Checkmark										
"X" mark										
Vertical line										
Horizontal line										
Circle around the voting target										
Half-moons										

Mark Type	Shading Marks NOT COUNTED by VCM					Shading Marks COUNTED by VCM				
Shaded oval										
Checkmark										
"X" mark										
Vertical line										
Horizontal line										
Circle around the voting target										
Half-moons										

The machine will record as a vote any marks (in the grayscale) to the right of the center vertical line. The COMELEC has specified to Smartmatic that marks that cover at least 25 percent of the area of the voting oval be read as a vote. It can be gleaned from the rows marked "Circle around the voting target" that marks just outside of and touching the ovals will be counted as votes. The voting oval (also voting target) is smaller than the area that is actually scanned for marks by the machine, which is referred to as "read area". The latter is a square that has the voting oval inscribed in it.

Page 13 of 47

RMAC trained COMELEC provincial election supervisors (PES) or city/municipal election officers (EOs) on April 18, 2016 in Quezon City to be trainers of the RMATs. The training was then cascaded by these officials to their respective RMATs in the days that followed.

The EOs and PES chose and prepared the venues for the actual RMA. The locations of RMA in each of the 238 districts are at this link: <http://bit.ly/28IYxGO>.

A provincial election supervisor tries her hand in accomplishing the RMAT forms at their trainers' training.

B.6. Positions Audited

Pursuant to Section 10 (a) of Resolution No. 10078, the positions audited were president, vice president, district representative to Congress, governor, and mayor. Focusing on these positions facilitated the manual audit process and the findings from counting the marks on said positions statistically reflected the overall accuracy rate¹⁷.

If imaginary grid lines were drawn on the ballot, the voting ovals for candidates for president and vice president will always be on the same location on all the ballots.

¹⁷ PSA opines that presence of systemic errors can be detected by examining a sufficient number of randomly drawn representative sample precincts. Auditing all positions would be unnecessary as the exercise would not significantly improve the reliability of the estimated statistics (i.e. percentage variance and accuracy rates) because the machine will not make any significant distinctions to behave differently when reading and counting votes for different positions. Thus, in a normal condition, the estimated accuracy rate is expected to be nearly the same in all positions.

Therefore, variances and accuracy rates could be associated to the candidates. But, the voting ovals for district representatives, governors and mayors will not always be located on the same grids. They move up and down the ballot depending on the number of candidates of the preceding positions. In this latter case, the variances and accuracy rates could not be associated to the candidates but to the generic positions (of governor, representative and mayor).

B.7. Variance

Variance is any difference between the machine generated count shown in the ER and the RMA count. This is determined for all the five positions (positional variance) and for each candidate for national positions. Variance could be positive or negative, and the sum of which would be the net variance. It is also expressed in absolute value in order to determine the magnitude of the difference between the two counts. The sum of the absolute values of the positional variance is the total variance in a CP.

B.8. Allowable Margin of Variance

The allowable margin of variance is at most 10 per clustered precinct. This is based on an assumption made prior to the audit that the machine should have an accuracy rate of at least 99.6 percent.¹⁸ The 0.4 percent error rate translates to an absolute variance of four for every 1,000 votes. At this accuracy level, any variance would be too small that it can only be attributed to a random error, or that which can only occur by chance rather than by a systemic or introduced (manipulated) error. In the latter case, the error would be apparent as it would pervade the sample and would be detected in the audit.

RMAC rules are: for CPs with a total variance of 10 or less, only the audit returns (AR) and audit minutes/report (AM/R) will be brought to RMAC; and for CPs with a total variance of more than 10, the ballots will also be brought to RMAC for verification.

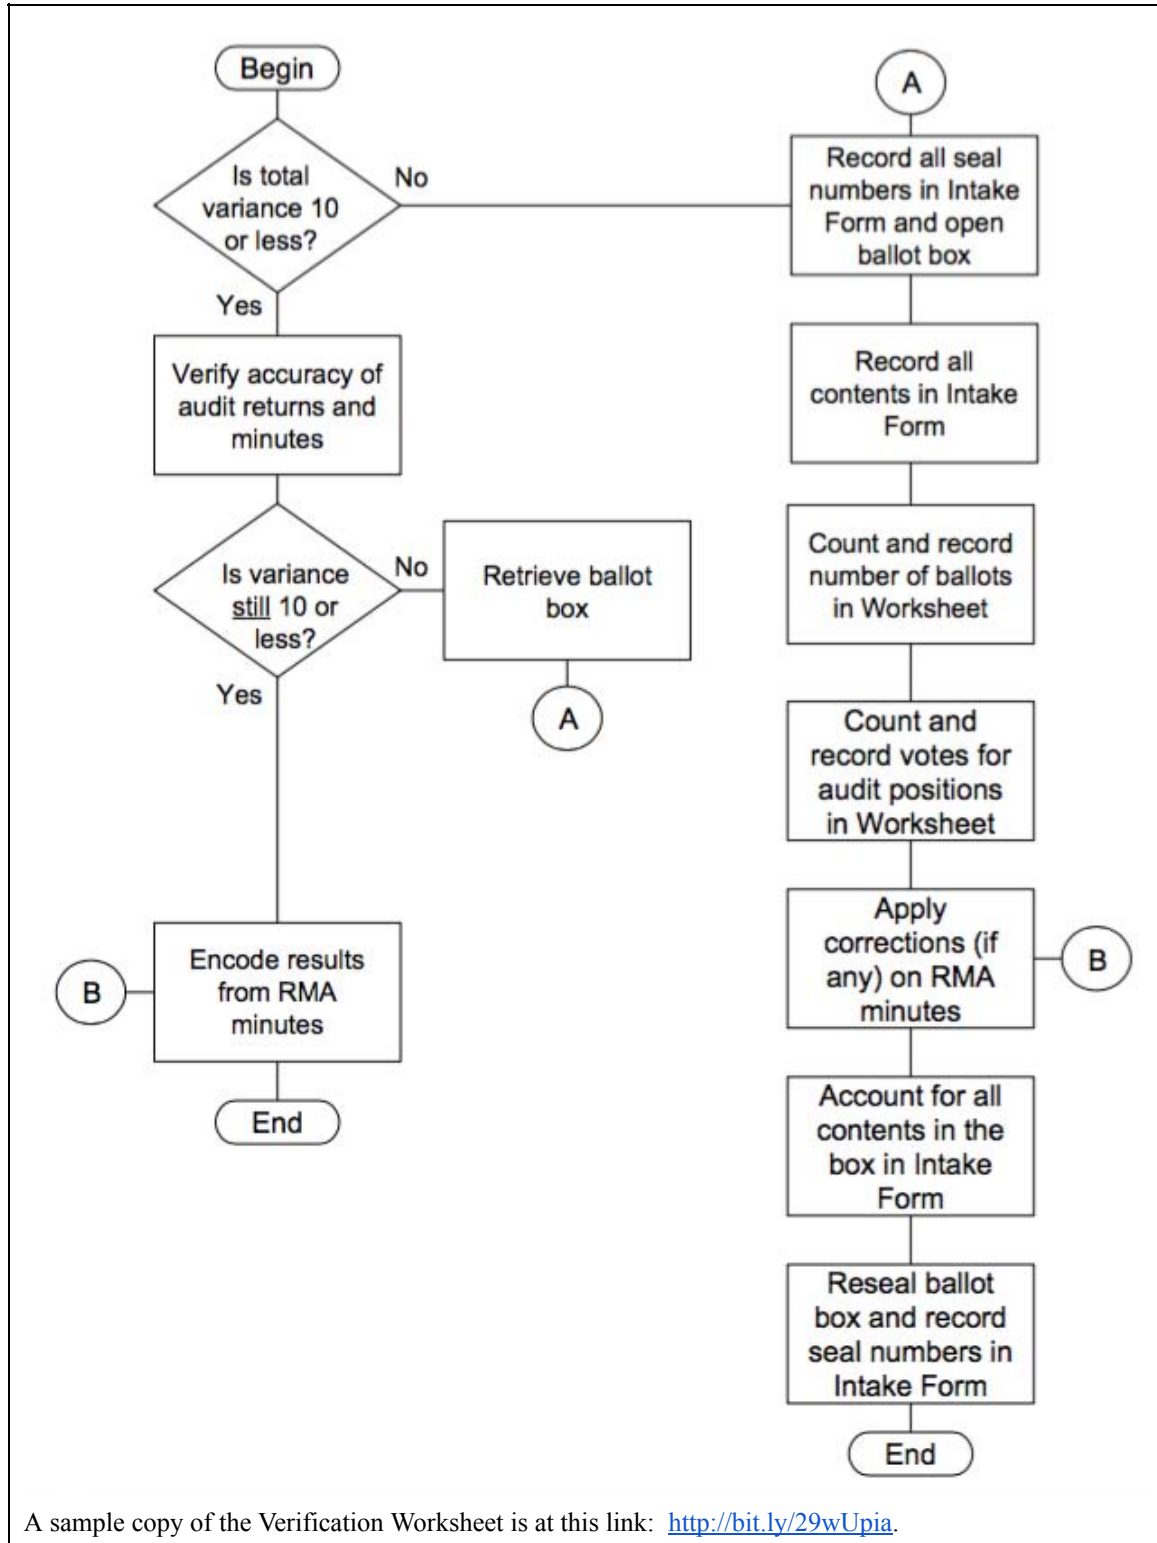

B.9. Verification Process

COMELEC supervised and conducted the actual delivery of RMA reports (AR and AM/R) and ballot boxes to the COMELEC office in Intramuros, Manila, for review by RMAC.

Verification initially checked if the recording of votes and summing up of figures on the ARs and AM/Rs documents by the RMA reports are accurate. This process ensures that mathematical or transposition errors are corrected so that they could not be wrongly attributed as variance.

¹⁸ In 2010 and 2013, the assumption was the machines are 99.0 percent accurate. The RMA reported an actual accuracy rate of 99.70 and 99.97 percent, respectively. Gaining more confidence in the machines from the previous results, a higher accuracy rate of at least 99.6% was applied in 2016.

For CPs with variance of more than 10, verification continued with manually recounting the votes and comparing the results with those in the AM/R. The appropriate corrections, if any, were entered into the AM/R before the latter was forwarded to the PSA RMA Team for encoding. A copy of a verified AM/R is at this link: <https://goo.gl/3gQYht>. The flowchart of the verification procedure is shown below.

B.10. RMAC Verifiers

Verifiers consisted of COMELEC staff and NAMFREL volunteers. The latter assisted in verifying ARs and AM/Rs, for which teams of two were assigned. For verification procedures that included ballots, teams of four from COMELEC were assigned.

Verifiers were informed and oriented on the RMA processes and forms prior to engaging them. Supervisors from COMELEC and NAMFREL were on hand to provide guidance in the actual verification process.

B.11. Data Encoding

Verified AM/Rs were handed to the on-site PSA RMA Team for processing, tabulation and analyses. Encoders input the data in their corresponding workstations and uploaded them to MySQL Database.

The verification and data encoding were done at the 3rd Floor of the Palacio del Gobernador, a few floors below COMELEC's national offices. While entry to the verification venue was controlled to ensure security and orderly proceedings, media and representatives of political parties and candidates were allowed to witness the process.

B.12. Technical Evaluation Committee (TEC)

The determination of root cause in the event of a finding of systemic error caused by valid discrepancies would be conducted by the [Technical Evaluation Committee](#) (TEC) under the applicable COMELEC rules.

B.13. Information to Electoral Stakeholders

To keep key electoral stakeholders abreast on RMA procedures, RMAC invited and held briefings for accredited political parties, media, civil society organizations and a partner government agency¹⁹. Briefings were held on May 2, May 17, May 30 and June 10. Key Committee members were also able to orient the local media on RMA procedures in the cities of Cagayan de Oro, Cebu, and Bacolod in early June.

¹⁹ A representative of the Commission on Human Rights (CHR) attended the May 2 briefing. *Bantay Karapatan sa Halalan*, a CHR-supported civil society-led project, also has a partnership with the COMELEC for the 2016 polls.

C. Timeline

Date/s	Activities
April 18	Training of RMA trainers for COMELEC PES and some EOs as RMA trainers
April 19 onwards	Cascade training of RMATs at the provincial/district levels
May 2	Briefing on the RMA for political parties, government agencies and members of the media and civil society
May 9, afternoon of election day	Public draw and announcement of municipalities and cities where clustered precincts would be selected for audit at the National Canvassing Center of the COMELEC, at the Philippine International Convention Center
May 10, early	Public draw and announcement of the actual clustered precincts and conduct of the actual RMA
May 11 onwards	Retrieval of RMA reports, i.e. AR and AM/R
May 16	Orientation/training of COMELEC and NAMFREL RMAC verifiers
May 17 to June 9	Verification; first orientation on the verification process for political parties and the media on May 17
May 30 and June 10	Media briefing on the RMA process and findings

At the RMAC media briefing on the audit process and preliminary findings at Palacio del Gobernador.

D. Coverage

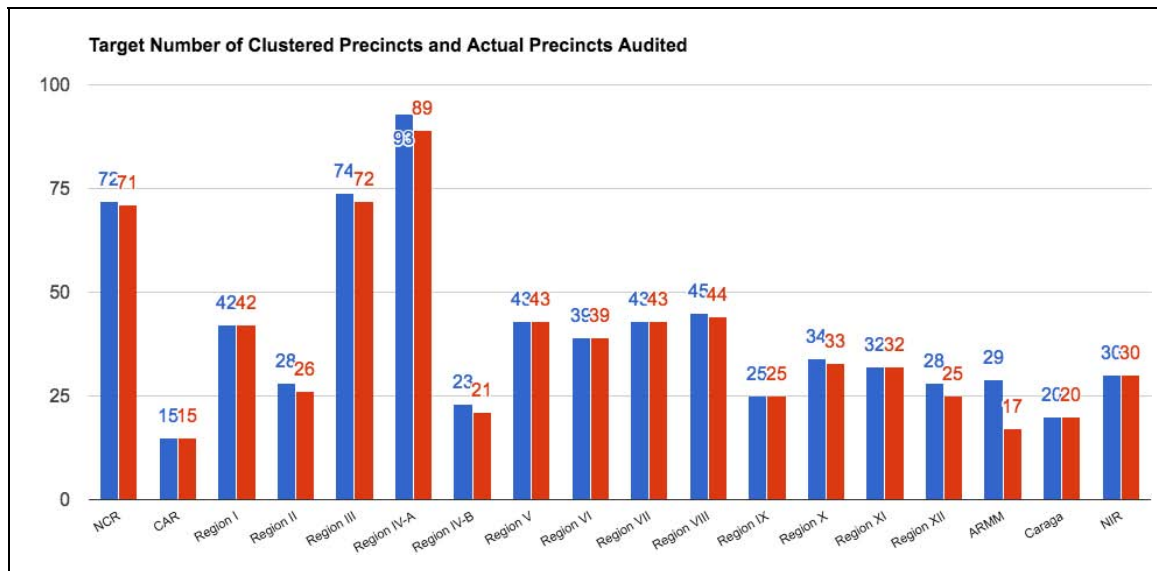

RMAC was able to conduct the audit and verify the results from 687 out of the 715 CPs, as shown in the table below. Audit and verification in 28 CPs could not be done because ballot boxes could not be retrieved or some were lacking ballots (refer to table on page 19). These reasons likewise account for the low coverage in ARMM.

RMA Coverage	Number of Clustered Precincts			Coverage Rate (Percent)
	Population (N)	Sample (n)	Verified (n')	
Philippines	92,509	715	687	96.1
NCR	9,271	72	71	98.6
CAR	1,983	15	15	100.0
Region I	5,376	42	42	100.0
Region II	3,594	28	26	92.9
Region III	9,511	74	72	97.3
Region IV-A	12,074	93	89	95.7
Region IV-B	2,832	23	21	91.3
Region V	5,695	43	43	100.0
Region VI	5,102	39	39	100.0
Region VII	5,764	43	43	100.0

Region VIII	5,754	45	44	97.8
Region IX	3,410	25	25	100.0
Region X	4,341	34	33	97.1
Region XI	4,108	32	31	96.9
Region XII	3,438	28	25	89.3
ARMM	3,747	29	17	58.6
Caraga	2,669	20	20	100.0
NIR	3,840	30	30	100.0

NCR = National Capital Region; CAR = Cordillera Administrative Region; NIR = Negros Island Region

The chart below shows the resembling regional distribution or profiles of the sampled number of CPs (blue bar) and the actual number of CPs that were audited (red bar).

D.1. Intake of Reports

Field reports on May 12 showed that of the 611 CPs that were tracked then as audited, only 84 CPs, or 14 percent had variance of more than 10. However, in the succeeding days when RMAC received and verified the RMAC ARs, the actual number of CPs with variance of more than 10 went up to 433 from the entire sample of 715. This was primarily because instead of summing up all the positional variance and reporting the total variance, the RMACs reported a variance of 10 or less so long as none of the positional variance exceeded 10.

This scenario required RMAC to retrieve more ballot boxes than what was earlier expected. To address the situation where more ballots would have to be subjected to the more tedious verification process, verifier teams were added. As mentioned earlier, some

verifiers, along with RMAC members, flew to different regions to conduct the verification together with some local RMA members who were re-engaged by COMELEC.

D.2. Non-responses

Of the 28 CPs that were not included in the audit, 12 lacked between 23 and 102 ballots in the box. RMAC decided not to proceed with the verification of these CPs since no conclusive results can be derived from auditing them. Moreover, there are already enough samples that will allow a statistically acceptable conclusion. COMELEC, nevertheless, is conducting an inquiry as to why there were lacking ballots in these CPs. It is interesting to note, however, that during the process of verification in Iloilo, it was discovered that the lacking ballots were caused by the RMA's inadvertent failure to deposit said ballots in the box prior to sealing thereof²⁰ during the first level audit. The subject ballots were eventually brought to the verification venue and included in verification.

Verification of the following CPs could not be completed because of reasons stated below:

Clustered Precincts Which Could Not Be Verified					
Legislative District		City/ Municipality	Barangay	Precincts in the Cluster	Reason for Non-Verification
1	Romblon, Lone District	Alcantara	Gui-ob	0010A, 0010B, 0010E	Ballots could not be retrieved**
2	Sultan Kudarat, 2nd	Palimbang	Kraan	0056B, 0058A, 0058B, 0059A	Ballots could not be retrieved
3	Basilan,Lone	Maluso	Tubigan	0036A, 0037A, 0038A	Ballots could not be retrieved
4	Lanao del Sur, 1st	Masiu	Matao Araza	0041A, 0041B	Ballots could not be retrieved
5	Lanao del Sur, 1st*	Marawi City		0143A, 0144A, 0145A)	Ballots could not be retrieved
6	Maguindanao, 1st	Upi	Borongotan	0034B, 0035A, 0035B	Ballots could not be retrieved
7	Maguindanao, 1st	Parang	Guiday T. Biruar	0040A, 0040B, 0040C, 0041A	Ballots could not be retrieved

²⁰ Due to ambiguous marks, over-votes and under-votes segregated by the RMA in envelopes provided to them.

8	Maguindanao, 1st	Cotabato City	Bagua I	0178A, 0178B, 0179A, 0180A, 0181A, 0181B	Ballots could not be retrieved
9	Maguindanao, 1st	Cotabato City	Rosary Heights VIII	0388B, 0389A, 0390A, 0391A	Ballots could not be retrieved
10	Sulu, 1st	Jolo	San Raymundo	0181B, 0181C, 0182A, 0182B	Ballots could not be retrieved
11	Cavite, 2nd	Bacoor	Molino IV	0326A, 0326B, 0326C, 0326D	Cluster audited not among sample
12	Samar, 2nd	Santa Rita	Magsaysay	0061A, 0061B, 0062A, 0063A	Cluster audited not among sample
13	Lanao del Sur, 2nd	Bayang	Lalapung Upper	0027A, 0027B, 0027C	Cluster audited not among sample
14	Laguna, 1st	San Pedro City	Cuyab	0048A, 0048B, 0049A, 0049B	Valid ballots all torn in half lengthwise
15	Lanao del Sur, 1st	Ditsaan-Ramain	Dado	0020A, 0020B, 0020C, 0020D	Wet ballots; marks cannot be read
16	Tawi-Tawi, Lone District	Sibutu	Hadji Mohtar Sulayman	0038A, 0038B, 0039A, 0039B	Big crack on ballot box cover; authenticity of ballots cannot be ascertained

*Replaced CPs 0074A, 0074B, 0074C, 0074D, Wao municipality, barangay Milaya.

** The phrase “Ballots could not be retrieved” was attributed to those randomly selected CPs wherein security and logistical constraints were existing at the time of conduct of the verification process. For example in Masiu, local canvassing was still on-going at the time of conduct of the verification process and a stand-off between local candidates was reported. The RMAC notes that 11 out of the 16 areas are located in ARMM. However, since sampling is based on a national domain, no conclusion can be derived from such fact. The RMAC considered the statistical sufficiency of valid samples on the affected legislative district in treating the above samples as “non-responses”.

The 28 CPs were treated as “non-responses” and represented 3.92 percent of the entire sample. The number is not sufficiently large to result in a sampling bias.²¹

²¹ Sampling bias refers to the tendency of a sample statistic to systematically over-estimate or under-estimate the population parameter, which in this case refers to the variance and accuracy rate. Thus, the resulting sample size of 687 CPs is more than sufficient to come up with valid and reliable estimates of population parameter.

E. Results and Conclusions

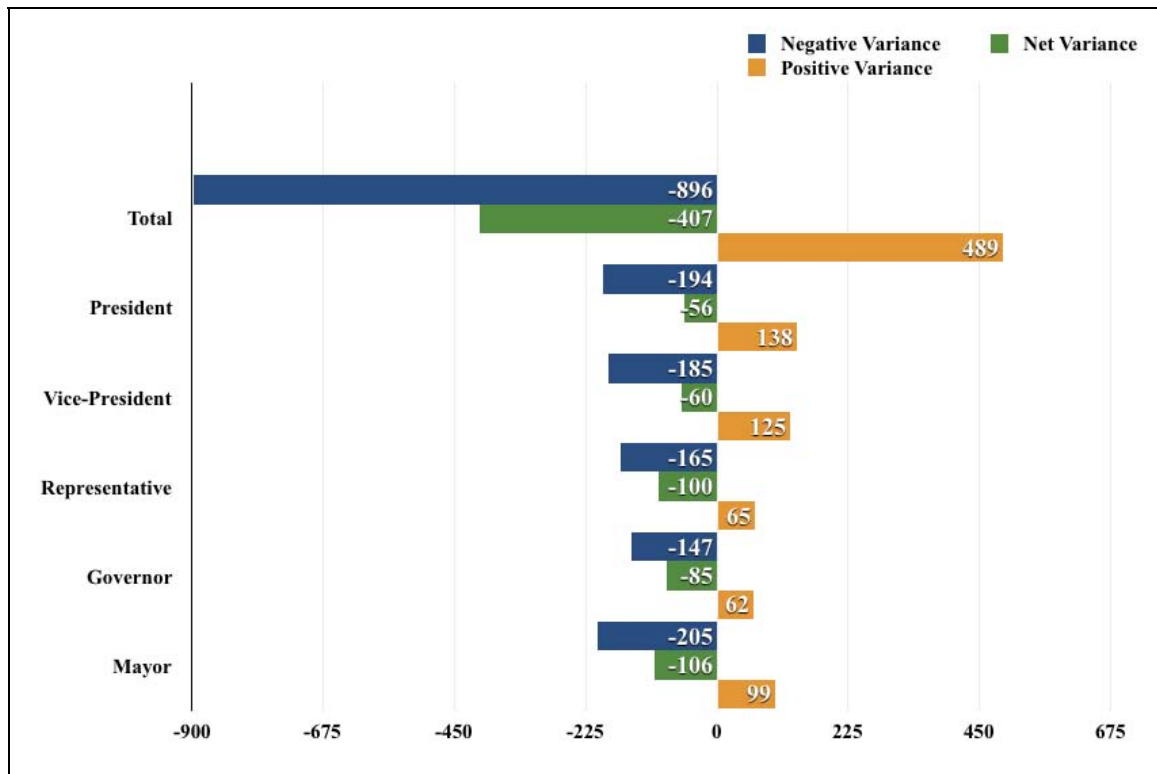

E.1. Variances Per Position and Accuracy Rates

The actual (unweighted) variances and the accuracy rates based on 687 verified CPs are as follows:

Unweighted Variance	Votes		Variance				Accuracy Rate**
	per ER	per RMA	Negative	Positive	Absolute	Percent per ER*	
Total	1,416,898	1,417,751	-896	489	1,385	0.10%	99.9023%
President	313,794	313,850	-194	138	332	0.11%	99.8942%
Vice president	302,874	302,934	-185	125	310	0.10%	99.8976%
Representative	279,223	279,323	-165	65	230	0.08%	99.9176%
Governor	221,154	221,465	-147	62	209	0.09%	99.9055%
Mayor	299,853	300,179	-205	99	304	0.10%	99.8986%
*Percent of Absolute Variance in Votes per ER.							
**Accuracy rate is Absolute Variance divided by Votes per ER.							

The net variances are all negative (shown in the chart below), which could only mean that the RMA Ts and verifiers tended to consider marks that were not fully shaded but in the borderline of those which would be recognized by the machine as votes.

The graph below shows data on negative, positive and net variances.

E.2. Impact of the verification

The total variance in 254 CPs (687 less 433), as reported by the RMATs, did not exceed 10. Therefore, the verification only involved examining ARs and AM/Rs. The corresponding accuracy rates from 254 CPs are shown in the table below. In these sample CPs, the reported variances were no longer verified and were assumed to be accurate for purposes of coming up with a statistically valid conclusion.

For the presidential position, 104 or 41 percent of precincts have zero variance, and 147 or 57 percent of precincts have between one and five. Two precincts have a variance of seven and one precinct had a variance of nine. The distribution of variances shows no indication of systemic error.

RMA Position	Total		Variance (Difference between ER and RMA)			Accuracy Rate
	Per ER	Per RMA	Negative	Positive	Absolute	
President	110,490	110,537	-179	132	311	99.7185
Vice President	107,692	107,752	-177	117	294	99.7270
Representative	98,709	98,808	-160	61	221	99.7761
Governor	71,562	71,643	-139	58	197	99.7247
Mayor	104,715	104,812	-187	90	277	99.7355
From 254 of 687 or 37 percent of precincts					Average Accuracy	99.7380

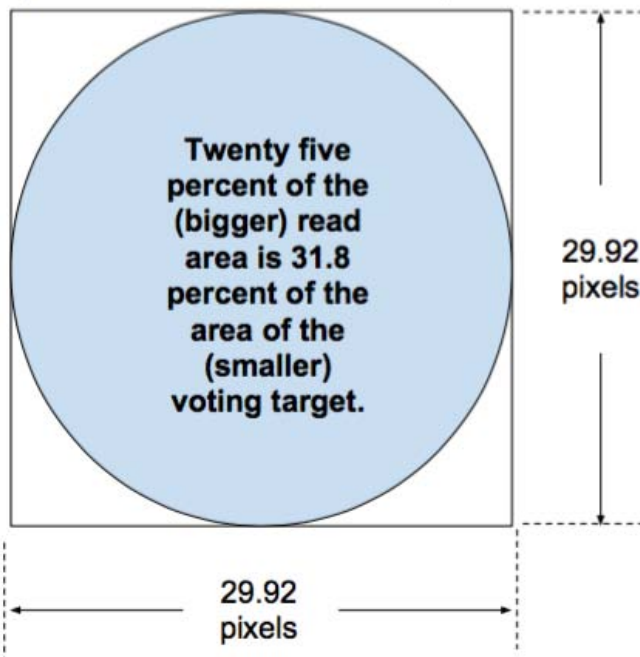

The total variance in each of the 433 CPs, as reported by the RMATs, exceeded 10. Following RMAC rules, the votes on the ballots in these CPs were validated or verified. The corresponding accuracy rates from 433 CPs, after verification or validation, are shown in the table below.

RMA Position	Total		Variance (Difference between ER and RMA)			Accuracy Rate
	Per ER	Per RMA	Negative	Positive	Absolute	
President	203,304	203,313	-15	6	21	99.9897
Vice President	195,182	195,182	-8	8	16	99.9918
Representative	180,514	180,515	-5	4	9	99.9950
Governor	149,592	149,596	-8	4	12	99.9920
Mayor	195,138	195,147	-18	9	27	99.9862
433 of 687 or 63 percent of precincts				Average Accuracy		99.9920

E.3. Sources of variance

COMELEC had stressed in their voter education campaigns that voters should completely shade or fill the voting ovals. However, there were instances where the ovals were partially shaded, requiring the RMAT and the verifiers to resort to interpretation on whether these were votes counted.

The "voting target", which is the shaded oval, is inscribed in the "read area", which is a square and is 896 pixels. Twenty-five percent of the read area is 224 pixels.

One of the sources of variance, therefore, is the difference between humans and machines in distinguishing if a partially shaded oval is a vote or not. To determine with machine exactitude if a mark covers 25 or 30 percent of a voting oval is impossible for a human eye; and to consistently interpret such judgment over a number of instances is another impossibility. Presented with a situation wherein a mark borders between a vote and no-vote, the auditor is likely to decide in favor of the former.

The visualization on the “voting target” and “read area”²² (enlarged and not drawn to scale) was from a [query by the RMAC to Smartmatic](#). (The link to that email is here: <http://bit.ly/297JeNU>).

The machine feature to prompt and return the ballot to a voter if there are any under-votes and ambiguous marks, was deactivated to give way to the printing of the voters verifiable audit paper trail (VVPAT). Therefore, to ensure that the chances of a mark would be read as a vote, COMELEC adjusted the threshold from 50 to 25 percent.

Despite the public information, some voters did not fully shade the oval, which required the RMATs and verifiers to exercise discretion. Some examples are shown below.

²² <https://www.youtube.com/watch?v=DbQAIHSOLUo> and <https://www.youtube.com/watch?v=Ibn9PVws9YE>

PRESIDENT / Vote for 1		
<input checked="" type="radio"/> 1. BINAY, JOJO (UNA)	<input checked="" type="radio"/> 3. DUTERTE, RODY (PDPLBN)	<input checked="" type="radio"/> 5. ROXAS, MAR DAANG MATUWID (LP)
<input checked="" type="radio"/> 2. DEFENSOR SANTIAGO, MIRIAM (PRP)	<input checked="" type="radio"/> 4. POE, GRACE (IND)	<input checked="" type="radio"/> 6. SEÑERES, ROY (WPPPMM)

If the mark of candidate number 6 is a vote, then this position would be over-voted. If not, the vote would go to candidate number 5.

The oval for mayoral candidate number 1 (left) is fully shaded. However, the ink from the marking on the reverse side of the ballot blotted through to smear the voting oval for mayoral candidate number 2 (right), potentially making the position as over-voted.

The appreciation of inadequately shaded or ambiguously marked ovals also differed during the audit and the verification. The audits at the municipal level are akin to the pre-automation manual appreciation of votes, the primary feature of which is transparency -- the process including the marking of *taras* per vote count is visible to the public.

At the local level audit the RMA teams would first verify if the number of valid ballots (and rejected ballots, if there are any) equal the number of voters who voted.²³ They would then stack the ballots by 100. From each ballot, the vote for president is read, and a tally is added for the candidate on the tally sheet and on the AR. An over-vote or an under-vote/no vote would be recorded on the appropriate sections on the audit returns. For ambiguous marks, the RMATs would decide if they would count them and record the same in the ARs.

Still on the same ballot, the process is repeated for the vice president and for the rest of the positions. There are separate tally sheets and ARs for each position. RMATs

²³ Any discrepancy would be noted. This would then be addressed during the verification.

would ensure that when the votes on each ballot are read, candidate or party watchers and observers would get to see if they recorded correctly on the tally sheet and on the AR.

After each stack, subtotals for each candidate are computed, including the number of over-votes, under-votes and no votes. If they do not tally 100, the process is done all over again before moving on to count the next stack of 100 ballots.

The process would end by transposing the totals into the AM/R and the determination of the variance.

Transparency is likewise observed during verification. However, the process differs from that of the RMA Ts, as verifiers have more time and opportunity to scrutinize more exhaustively the ballots. After checking that the ballots are of the same number as the voters who voted, the verifiers would then start with the president position and examine each ballot for fully-shaded marks, over-votes, under-votes and no votes. Ballots with valid marks are stacked for each of the six candidates. Those that are over-voted, under-voted and with no marks are each stacked separately.

Those with ambiguous marks are also stacked separately. Each mark is re-examined before it is categorized as a vote, an over-vote or an under-vote. At times, the ambiguous marks for a candidate are spread side-by-side each other allowing verifiers a more uniform appreciation of whether the marks are read by the machine through a closer examination. Supervisors were also readily on hand to assist the teams in dealing with ambiguous marks, recording of the results, and checking that the figures are reconciled.

The verifiers then count the ballots in each stack for valid votes for each candidate, over-voted ballots, and under-voted ballots. If the total do not tally with the number of ballots in the box, the process is repeated. If they do, the results are entered in the Verification Worksheet. Then they move to the next position and repeat the entire process.

Just like in the local level audit, the process ends with recording the totals in the same AM/R used by the RMA T and the variance is rechecked or recomputed.

The RMA C believes that the more tedious and restrictive ballot-handling situation at the local level discouraged the RMA Ts to check and recheck if the subtotals, totals and other figures tally. If a count of a batch of 100 ballots is off by even one, the penalty of going back to each ballot would be time-consuming. In the verification, it is a lot easier to recount ballots that are already stacked according to votes by candidates.

At the RMA level, only one person actually handles the ballot. The rest of the members are checking or tallying the votes. During verification, all four members help in sorting the ballots and in counting the marks or votes. The verification process, therefore, is more thorough and each member is more or less equally putting in the same effort as the others. Checking and rechecking of the marks and reconciling the figures with the support of supervisors during the verification are not as tedious as in the local level audit. As a testimony to this and depending on the number of ballots, the five-member RMATs took between five and six hours, while the four-member verifier teams took between two and three hours, on the average, to complete a box of a CP.

Verification team members examine marks on the few remaining ballots. All the other ballots have been sorted and stacked according to position and candidate.

In the course of the verification, the RMAC deemed it appropriate to quantify the specific causes of variance, i.e. the inadequately shaded or ambiguous marks, misplaced marks and the abstentions. As the modification was done in midstream of the process, such detailed data were captured from only 406 CPs. These precincts had a total of 867,336 marks where 12,677, or 1.46 percent, were found to be inadequately shaded or ambiguous. This is equal to about 15 marks for every 1,000. This percentage is broken down into: those that were counted as votes by the RMA but not by the machine at 1.1 percent; and those counted by the machine but not by the RMA at 0.4 percent.

Misplaced marks are those outside the read areas, therefore not considered as votes. They accounted for about 0.22 percent, or about two in every 1,000 marks.²⁴ These two types of marking accounted for 1.68 percent of the total marks that were examined.

Ambiguous and Misplaced Marks	Ambiguous marks counted		Misplaced Mark	Count of total marks	
	by RMA not by VCM	by VCM not by RMA		per ER	per RMA
Total	10,212	2,465	1,914	867,336	867,398
President	2,221	621	424	190,644	190,649
Vice President	2,098	542	402	182,801	182,822
Representative	1,964	458	300	168,835	168,853
Governor	1,815	328	389	142,205	142,215
Mayor	2,114	516	399	182,851	182,859

From 406 out of 433 clustered precincts which ballots had undergone verification.

Examples of ambiguous or inadequately shaded marks, misplaced marks and others are shown below.

²⁴ In a few instances, the RMATs were confused on how to appreciate the mark. The RMATs either considered the mark as a vote or marked the ballot that had the misplaced shading as "Disputed". These, however, were corrected during verification.

E.4. Examination of Voter Verified Paper Audit Trails (VVPATs)

It is worth noting that VVPATs were used in the elections for the first time. Sample examination revealed that the total number of votes per the VVPATs exactly matched with the ER data. For a few other CPs, the verifiers counted the number of VVPATs and matched them with the number of valid votes. The results were uneven and inconclusive. In precincts wherein the VVPAT containers were found inside the box, some precincts had all the VVPATs while some were lacking a few or a good number. There were, however, a number of precincts where the VVPAT container was not placed inside the box. The audit did not aim and could not provide any firm findings if the rule for voters to drop the receipts in the receptacles provided before leaving the polling station was followed or enforced by the boards of election inspectors.

E.5 Fill-up Rate

The table (below) reveals how voters voted across various positions. If the ratio of ambiguous and misplaced marks against total marks reviewed from this subset of 406 CPs could be validly applied to the fill-up rates, those that could potentially be converted into a vote, would be in the range of 1.68 percent.

Fill-Up Rate	Voters Actually Voted	Total valid votes per ER	Fill-Up Rate*
President	330,813	313,794	94.9%
vice president	330,813	302,874	91.6%
Representatives	330,813	279,223	84.4%
Governor**	264,601	221,154	83.6%
Mayor	330,813	299,853	90.6%

* Number of voters who voted for the position expressed in percentage

** NCR and chartered cities do not vote for governor

The other component of the difference between the number of voters who voted and the valid votes (the reciprocal of the fill-up rate) are the over-votes and the no votes or abstentions. From the 406 of the 433 clustered precinct that underwent verification, these are disaggregated below:

Over-votes and Abstentions (406 precincts)	Voters		Fill-up Rate	Over-votes		No Votes/ Abstentions		Over-votes and Abstentions	
	Voted	ER Count		Total	%	Total	%	Total	%

President	203,428	190,644	93.72%	4,269	2.10	5,974	2.94	10,243	5.04
Vice President	203,428	182,801	89.86%	3,112	1.53	14,867	7.31	17,979	8.84
Representative	203,428	168,835	82.99%	1,856	0.91	29,729	14.61	31,585	15.53
Governor	172,819	142,205	82.29%	2,281	1.32	25,309	14.64	27,590	15.96
Mayor	203,428	182,851	89.88%	1,176	0.58	15,837	7.79	17,013	8.36

E.6. Weighted Estimates

Weighted estimates are done after all the audit data have been collected. It looks into th

Weighted estimates are done after all the audit data have been collected. It looks into the probability of inclusion²⁵ of each of the 687 verified CPs in the computation to represent all the 92,509 CPs. Weights vary across legislative districts depending on the number of CPs drawn.

It is important to understand that the numbers, as shown in the succeeding tables below, are estimates based on the results of the audit of 687 CPs (out of the 715 samples) then extrapolated to the 92,509 CPs. These numbers therefore are not actual results, as recorded by the counting machines in the 92,509 CPs. Only weighted estimates can be presented due to the sampling methodology applied.

The over-all weighted accuracy rate for all positions is 99.903 percent, and the accuracy rates by position are shown in the table below. Weighted accuracy rates are estimates for the total number of voters who actually voted from the 92,509 CPs.

²⁵ The probability of inclusion is computed as the chance of a unit to be included in the sample. For example in the 1st Legislative District of Manila there are 338 total clustered precincts (N), of which three sample clustered precincts are drawn (n). Therefore, the probability of inclusion of the three precincts in the sample is three divided by 338 or 0.8896 percent.

Weighted Variance²⁶ and Accuracy Rate	Total Weighted ER Count	Total Weighted Audited Count	Absolute Variance	Accuracy Rate	Standard Error ²⁷	95% Confidence Interval ²⁸	
						Lower Limit	Upper Limit
President	42,237,968	42,245,845	44,211	99.8953%	0.0094	99.8769	99.9137
Vice President	40,770,783	40,777,984	42,014	99.8970%	0.0086	99.8801	99.9139
Representative	37,455,701	37,469,337	31,150	99.9168%	0.0082	99.9007	99.9329
Governor	30,074,604	30,086,356	28,670	99.9047%	0.0101	99.8849	99.9245
Mayor	40,468,623	40,483,596	40,663	99.8995%	0.0087	99.8824	99.9166
			Overall accuracy rate	99.9027%	0.0040	99.8947	99.9106

The table below shows the effect when the variance is applied in the ranking of candidates of the national positions.

Weighted Net Variance	Weighted ER Count	Weighted Audit Count	Total Variance	Negative Variance	Positive Variance	Net Variance
	(a)	(b)	(d)	(e)	(f)	(e) + (f)
President: Total	42,237,968	42,245,845	44,211	-26,044	18,167	-7,877
Duterte, Rody (PDPLaban)	16,380,789	16,384,605	12,528	-8,173	4,356	-3,817
Roxas, Mar Daang Matuwid (LP)	10,029,088	10,029,087	9,422	-4,711	4,711	0
Poe, Grace (Ind)	9,158,098	9,160,817	12,945	-7,832	5,113	-2,719

²⁶ The weighted “variance” is the difference between weighted ER counts and weighted RMA counts. Weights are computed at each legislative districts. The weight is the inverse of the probability of inclusion, and in the above example of the 1st Legislative District of Manila, it is computed as 338 divided by three or 112.667. This means each sample clustered precincts in this district represents about 113 clustered precincts.

²⁷ The standard error is the standard deviation of the sampling distribution of a statistic. Here, the statistic refers to the computed “Accuracy Rate” from only one of many possible sample of size 715. There are “N” number of possible ways or combinations to select sample of the same size (715) from a total 92,509 clustered precincts nationwide. Therefore we can have N possible computed “accuracy rate” statistics. The variation of these N statistics is estimated by the standard error. Higher standard error implies that the computed “accuracy rate” is not stable and may drastically change from sample to sample. The standard error of the accuracy rate is computed using statistical software STATA (<http://www.stata.com/>) version 12 applying the Taylor series of linear approximation.

²⁸ The standard error of the accuracy rate of 99.8953 for the presidential count is 0.0094 with a confidence interval of 99.8769 to 99.9137. It implies that if the process is repeated several times and the same sample size is drawn, the resulting accuracy rate will not vary within the computed interval and there will always be an overlap within each of the computed interval 95 percent of the time. Confidence interval is the point estimate (99.8953) plus (to get the upper limit) or minus (to get the lower limit) the margin of error. The margin of error is the product of the z-value or 1.96, and the standard error of 0.0094. The z-value of 1.96 corresponds to the 95% confidence interval. The lower limit is 99.8953 minus 1.96 (0.0094) or 99.8769, while the upper limit is 99.8953 plus 1.96(0.0094) or 99.9137.

Marcos, Bongbong (Ind)	14,131,937	14,131,051	34.65%	11,815	99.92%	0.13
Cayetano, Alan Peter (Ind)	5,623,250	5,625,633	13.80%	7,262	99.87%	0.08
Escudero, Chiz (Ind)	5,217,294	5,218,249	12.80%	8,047	99.85%	0.09
Trillanes, Antonio (Ind)	823,689	823,251	2.02%	2,191	99.73%	0.02
Honasan, Gringo (UNA)	768,325	769,038	1.89%	2,336	99.70%	0.03
Position audited						
Representative	37,455,701	37,469,337		31,150	99.92%	0.34
Governor	30,074,604	30,086,356		28,670	99.90%	0.31
Mayor	40,468,623	40,483,596		40,663	99.90%	0.44

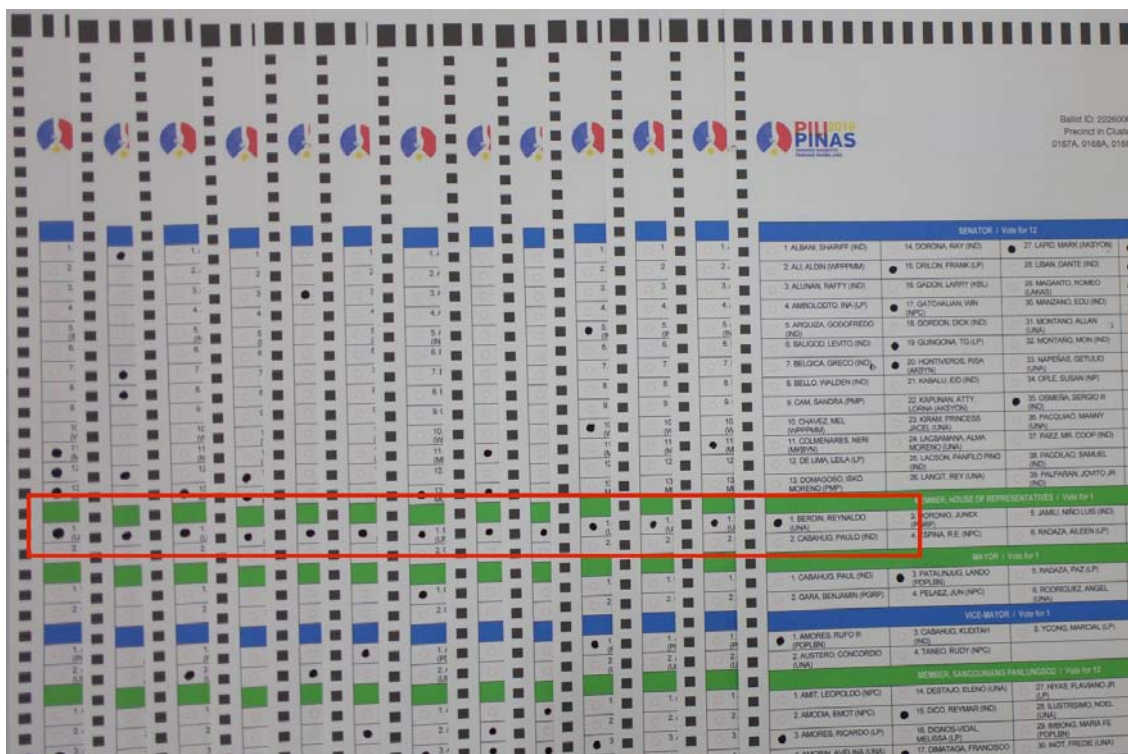

* Estimated variance per position/candidate per clustered precinct (e) is Total variance per candidate/position (d) divided by the total number of clustered precincts or (e) = (d) / 92,509. For Representative, 31,150 (cumulative variance) is divided by 238 legislative districts, which equals 130.88 variance per district. With an average of 388.70 clustered precinct per district, the variance per precinct is

0.34. For Governor, the cumulative variance of 28,670 is divided by the total number of provinces, which is 81. The result when divided by 1,142.10, which is the average number of clustered precincts per province, is 0.31. For Mayor, the figures applied are 1,634 cities/municipalities and 56.61 average number of clustered precincts per city/municipality, which result to a 0.44 variance per precinct.

E.7. Other Findings

E.7.a. Fully-shaded Marks that May Not have been Counted by the VCM

There are 13 ballots showing fully-shaded marks for congressional candidate “1. Berdin, Reynaldo (UNA)” in CP No. 0167A, 0168A, 0168B (cluster number 22260015) of Barangay Basak, Lapu-Lapu City in the province of Cebu. However, the ER showed 12 votes for the candidate, and there were no record of rejected ballots from the cluster. There is a need to examine the results in this precinct and find out how the machines actually read the marks.

A high resolution photo is at this link: <http://bit.ly/29enL65>

E.7.b. Votes Cast Allegedly Not Reflected in the VVPAT

Five voters registered before the BEIs their protests that the votes they had cast were not the same ones that appeared in the VVPAT. This is in CP No. 0001A, 0002A and 0002B (cluster number 4615001) in Barangay Poblacion, Manjuyod in the province of Negros Oriental.

The notes on the Voter Receipt Complaints, a form (below) designed by the EO, show:

“1. Voter 1 (signed) - complaint that his vice president is Bong Marcos but in the receipt was Honasan, Gringo (UNA). Precinct No. 0002B - 71 at 6:35am”.

“2. Voter 2 (signed) - complaint that is member House of Representative is Josy Limkaichong but in receipt was Paras, Jing (NUP) at 6:51am.

“3. Voter 3(signed) - ballots rejected by with receipt all was undervoted at 7:03am.

“4. Voter 4 (signed) - complaint undervote all candidates in his receipt - his president was Duterte/Vice Pres - Marcos / Senators: Pacquiao, Gatchalian, Guingona, Villanueva, Osmena / House of Representatives: none / Governor: Roel Degamo / Mayor: Dr Sy / Vice Mayor: Abuso / Member Sangguniang [sic] Bayan: Apollo Abarca, Abrasaldo, Acab, Andaya Jr., Resty Baldado, Mila K. at 9:12am.

“5. Voter 5 (signed) - complaint undervote president / 4 senators undervote / Mayor undervote / 2 members Sangguniang [sic] Panlalawigan undervote / 3 undervote member, Sangguniang [sic] Bayan in his receipt. Where President was Roxas, Mar / Mayor Dr. Sy / 3 Member Sangguniang [sic] Bayan: Francis Abrasaldo, Acab M, Abarca A. 0001A - 90 at 9:30am.”

VVPATs that were attached to Voter Receipts Complaints. The high resolution photo is at this link: <http://bit.ly/29ewi90>.

This is noteworthy because only 42 votes separates the winning and the losing candidate for mayor.²⁹ It appeared that an election protest might have already been filed at the time of the verification on June 3. The expected revision and recount of the ballots as well as examination of the decrypted image of the ballot, if properly sought, in the course of the election protest will shed light as to how the machines actually read the marks.

E.7.c. Rejected Ballots

There were three rejected ballots noted in the Minutes of Voting and Counting of CP No. 0001A, 0002A, 0002B in Poblacion, Manjuyod, Negros Oriental. During verification, the RMAC found three ballots marked “Rejected”. Upon close visual and repeated inspection of the ballots, the RMAC could not find any indications why the ballots should be rejected. The barcode information from each of the ballots are:

	Rejected ballot front side sequence no.	Rejected ballot back side sequence no.
1	46150001 133 3424 01 0	46150001 133 3424 02 0

	Photo: http://bit.ly/29bWCvs	Photo: http://bit.ly/29gDqhp

Photos of the rejected ballots and some valid ballots (at this link: <http://bit.ly/29qGUii>) were taken during the verification with the intent of bringing the case up to the TEC.

E.7.d. Lacking Unused Ballots

The RMAC found during the course of verification that some unused ballots were either not deposited inside the relevant box or are lacking in number. An investigation on the matter should be pursued.

E.7.e. How Some Voters Marked their Votes

The RMAC found out that some voted by marking the ballots differently. Sample photos of such ballots are accessible at this link: <http://bit.ly/29bFFFj>.

F. Conclusion

Based on the 99.60 threshold accuracy rate, the RMAC concludes that there is no systemic error with an actual finding of a 99.9023 accuracy rate.³⁰ The machine counts were statistically equal to the counts that resulted from the audit.

Although the COMELEC Resolution provides that root cause analysis shall be done by TEC upon a finding of systemic error, the RMAC endorses to the TEC the cases cited for precinct cluster 0167A, 0168A, 0168B (cluster number 22260015) of barangay Basak in the lone legislative district of Lapu-Lapu City in the province of Cebu, and precinct cluster 0001A, 0002A and 0002B (cluster number 4615001) in barangay Poblacion in the town of Manjuyod in the province of Negros Oriental.

G. Recommendations

Section 33 of Republic Act 9369 instructs the Joint Congressional Oversight Committee to conduct a comprehensive assessment and evaluation of the performance of

³⁰ The resulting accuracy rate is based on the audit of 687 randomly selected clustered precincts. The 28 clustered precincts (715 less 687) were treated as non-responses due to several issues, as explained in the body of this report, after determination of statistical sufficiency of valid samples in the affected legislative districts. 12 of the 28 clustered precincts are from ARMM. However, since sampling is based on a national domain, no conclusion can be derived from such fact.

the different AES technologies implemented and make appropriate recommendations to Congress, including “an evaluation of their [AES’] accuracy through a comparison of a random sample of the AES election results with a manual tabulation, and the conduct of similar tests.”³¹

RMAC submits recommendations, as discussed below, to COMELEC, the TEC and the Joint Congressional Oversight Committee.

G.1. For Further Action

- a. For COMELEC to decrypt the digital picture images of the ballots stored in the SD (secure digital) cards from CPs where marks, which were clearly votes, may not have been counted by the machine. The purpose is to determine how the machine actually read and recorded the marks. Should variances remain after checking the digital images, these should be referred to the TEC for root cause analysis. The machine provider would also be furnished a copy and asked for its explanation.

G.2. Addressing Election Protests

RMAC is aware that the results of this audit, while would not affect the results of the elections, could offer ways to improve the steps, guidelines and procedures related to election protests. Moreover, the protesters could take specific cues from the audit procedures and results. The magnitude of the ambiguous or inadequately shaded marks and the variance could help guide the parties on whether to pursue the protest cases that they have already filed. In the event that they decide to, RMAC would like to offer these recommendations:

- b. The same “Guide on Appreciation of Markings” be used in the review or revision of ballots.³² This will make the appreciation of markings uniform and preserve the standards under which a vote is deemed counted or not.
- c. The more efficient process of carrying out the revision, however, would be to refer to the ballot image and the interpretation of the vote by the machine. The emphasis would be that election protests be decided based on how the machines read the votes and that voter intent can only be expressed according to the threshold fixed for the system. These pieces of information are contained in each of the SD cards used in each of the counting machines. The Committee, therefore,

³¹ <http://www.comelec.gov.ph/?r=References/RelatedLaws/ElectionLaws/AutomatedElection/RA9369>

³² This is the term used by the COMELEC when the votes of candidates are reviewed and appreciated in an election protest.

recommends that protesting parties agree to use the data from the SD cards for the revision process.

- d. That the same reference be used and the same standard apply before all tribunals hearing election protests.

G.3. Reducing Uncounted Votes

The automation in 2016 is a third iteration and voters are expected to be more familiar on how to correctly mark a vote. The audit revealed that around 1.68 percent of the marks examined from a subset of the sample are ambiguous, or inadequately shaded and misplaced marks. This is an area where improvements could potentially be made and RMAC recommends:

- e. That political parties and candidates during their campaign, emphasize to their voters on how to correctly cast or mark their votes.
- f. That COMELEC inform the election contestants and voters of the actual threshold for marks to be read and counted as a vote.
- g. That the COMELEC consider introducing a step in the voting process prior to casting the vote to similar to the one offered by Douglas W. Jones of the University of Iowa. In his book "On Optical Mark-Sense Scanning" (page 186), he suggests that "a voting target be printed in the pollbook next to the name of each eligible voter. On signing the pollbook, the voter can be asked to properly mark this oval. Doing this would give pollworkers an opportunity to observe any difficulty people have making an appropriate mark in a context where there is no threat to the voter's right to a secret ballot."
- h. That COMELEC consider, if the same or similar optical mark reader-counting machine set-up will be used in future elections, a process of allowing the voter to correct inadequately shaded marks and under-votes prior to the casting of the ballots.
- i. That COMELEC, political parties and organizations representing voters, e.g. those from civil society, discuss either lowering the threshold of detection of a valid mark by the machine, or require that only fully-shaded marks be recognized as a vote. The latter would need to be emphasized in the voter information content and materials.
- j. Synchronized election and the high number of contestants, particularly in the party-list elections, present its own set of challenges and limits in the design of a

single-sheet paper ballot. However, it could be worth for COMELEC to look into specifying the kind of paper and ink used to mark the votes so that marks will not blot and unintentionally create marks on the opposite side of the ballot.

- k. That voters, candidates, media, and civil society organizations institutions be made aware of the abstention rates for purposes of learning from voters about the conditions that encourage and discourage voters from casting a vote for certain positions. This will aid academic institutions in providing advocates of voter participation informational materials derived from comprehensive research.

G.4. On Policy Reform

Clarify the requirement of law

- l. If that which are being audited are results of national positions only or local positions, as well.
- m. If adverse audit findings should cause correction of the official election results even after proclamation and independent of election contests, or if the audit is merely intended to improve future processes.
- n. If, depending on the policy intent, the sampling policy be redefined from one precinct per legislative district.
- o. If the audit would be made more credible if it were to be conducted by a third party.

G.5. Setting-up Future Audits and Inputs to Consider

Past audits and this current one revealed that verification is a necessary procedure. It ensures that errors in recording and transposing of results by the RMATs are caught and corrected. To minimize the possibility of errors at the RMAT level, RMAC recommends the evaluation of the following suggested procedural improvements:

- p. Instead of counting and recording results of batches of 100 ballots, the RMAT instead do the same for a batches of 50 ballots. After each batch is completed, the total votes should be matched with the number of ballots counted. There might be a penalty in time but accuracy will be improved.
- q. That future Committees consider optimizing sample size while maintaining a high degree of accuracy and economy in the number of samples. When the size of the

sample for a national domain is reduced, there should be better systems to ensure that all samples will be collected.

- r. That future Committees consider holding the audit at the national level. All ballots boxes from the sample precincts would be collected and brought to a central location where the audit will be publicly performed.
- s. That the COMELEC consider commissioning the RMAC or similar committee to audit the consolidated canvassing or similar systems that aggregate vote results, and do a system audit.
- t. That COMELEC consider in the design of an automated election system to already embed post-election auditable components, procedures and reports that will make the audit transparent, accurate and more efficient. Features such as generation of statistical reports and others should already be specified in the terms of reference for the procurement of the technology.

Results of the 2016 Random Manual Audit

Philippine Statistics Authority

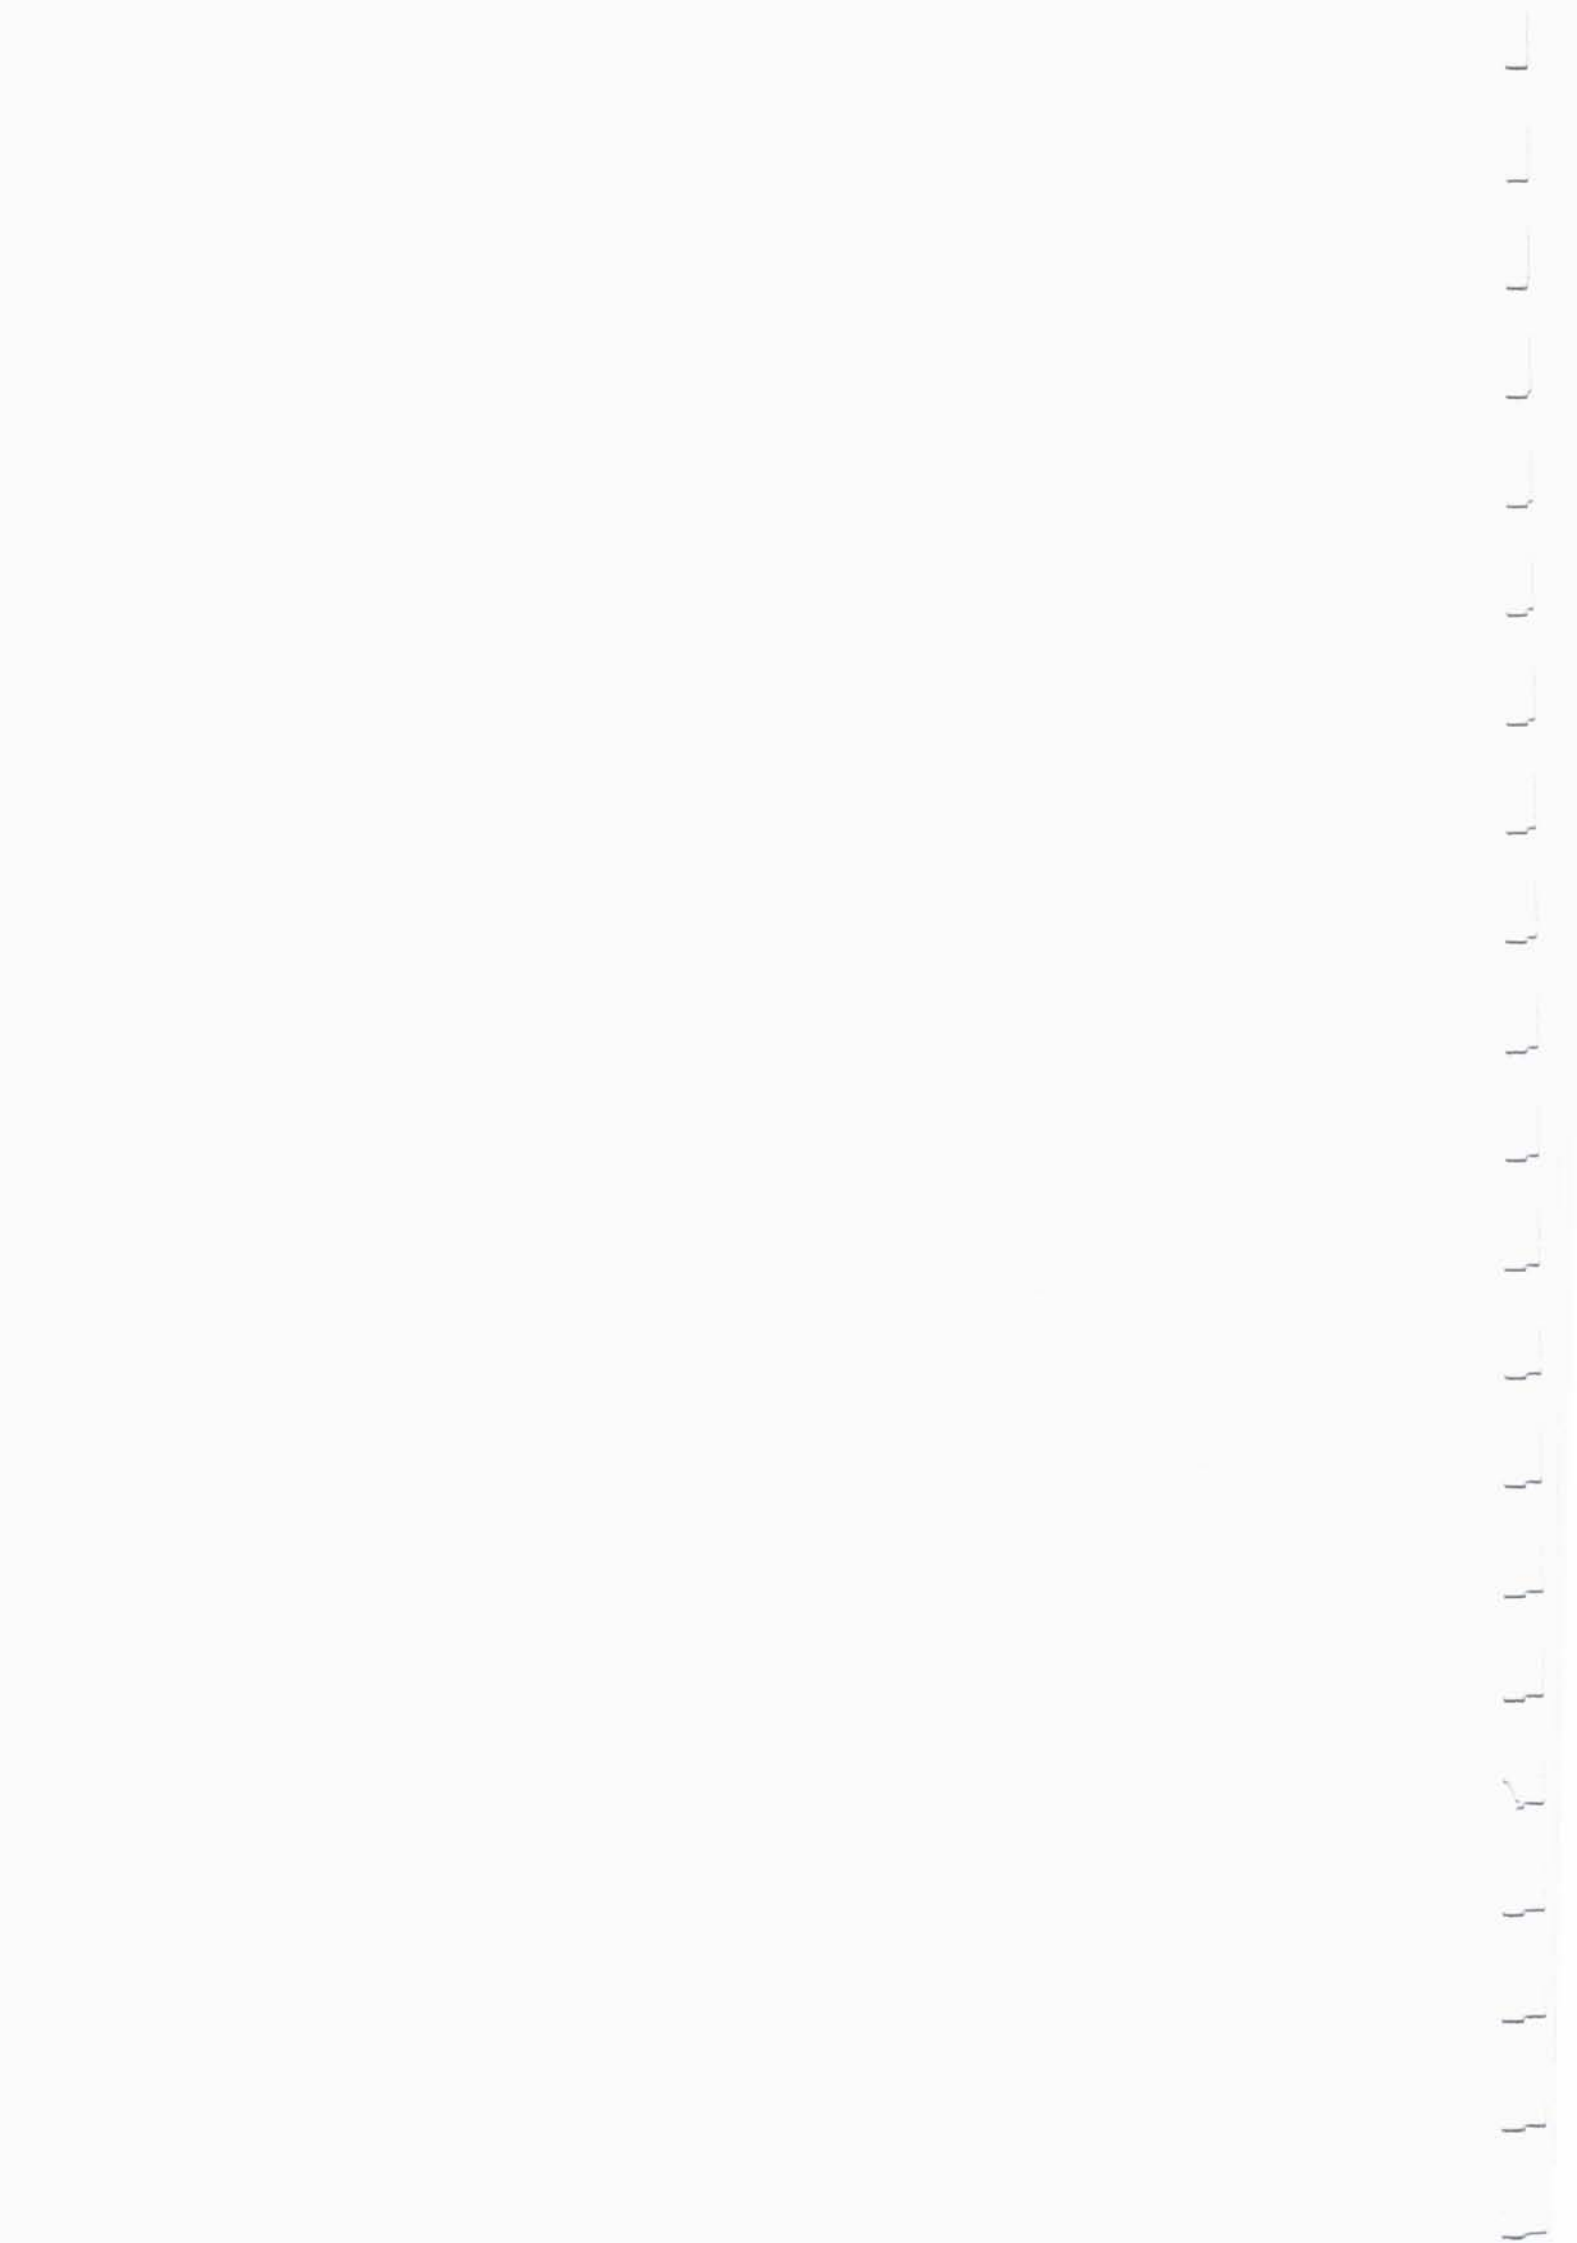

Summary Report

1. Introduction

The Philippine Statistics Authority (PSA) is one of the three members of the technical working group formed by the Commission on Election (COMELEC) primarily assigned to do the random manual audit on the results of the 2016 national and local election. The random manual audit as mandated by law under Section 24 of Republic Act No. 9369 is the process of determining the accuracy of the results of Automated Election System (AES) for the National and Local elections in the country held last May 11, 2016. The manual audit process includes the comparison of the number of votes counted by Vote-Counting Machine (VCM) or the Automated Election System (AES) against the number of votes manually counted by the Random Manual Audit Team (RMAT) for every sample clustered precinct for the positions of President, Vice-President, Member of House of Representatives, Governor and Mayor. The difference between the AES count and RMA count, which is also referred to as the "variance" was expected to be computed for each candidate from a total of 715 sample clustered precincts distributed proportionately according to the measure of size or number of precincts in a legislative district in the Philippines.

2. The Role of the PSA

The PSA as member of Random Manual Audit Committee (RMAC) was involved particularly in the following activities: (1) Preparation of Sample Design for the selection of 715 clustered precincts; (2) Development of the Automated Random Selection Program (ARSP); (3) Development of Data capture (with full verification feature) and RMA processing and tabulation systems to facilitate the computation of "variance" for identified national and local positions (President, Vice-President, Member, House of Representatives, Governor, and Mayor; (4) Preparation of summary tables on

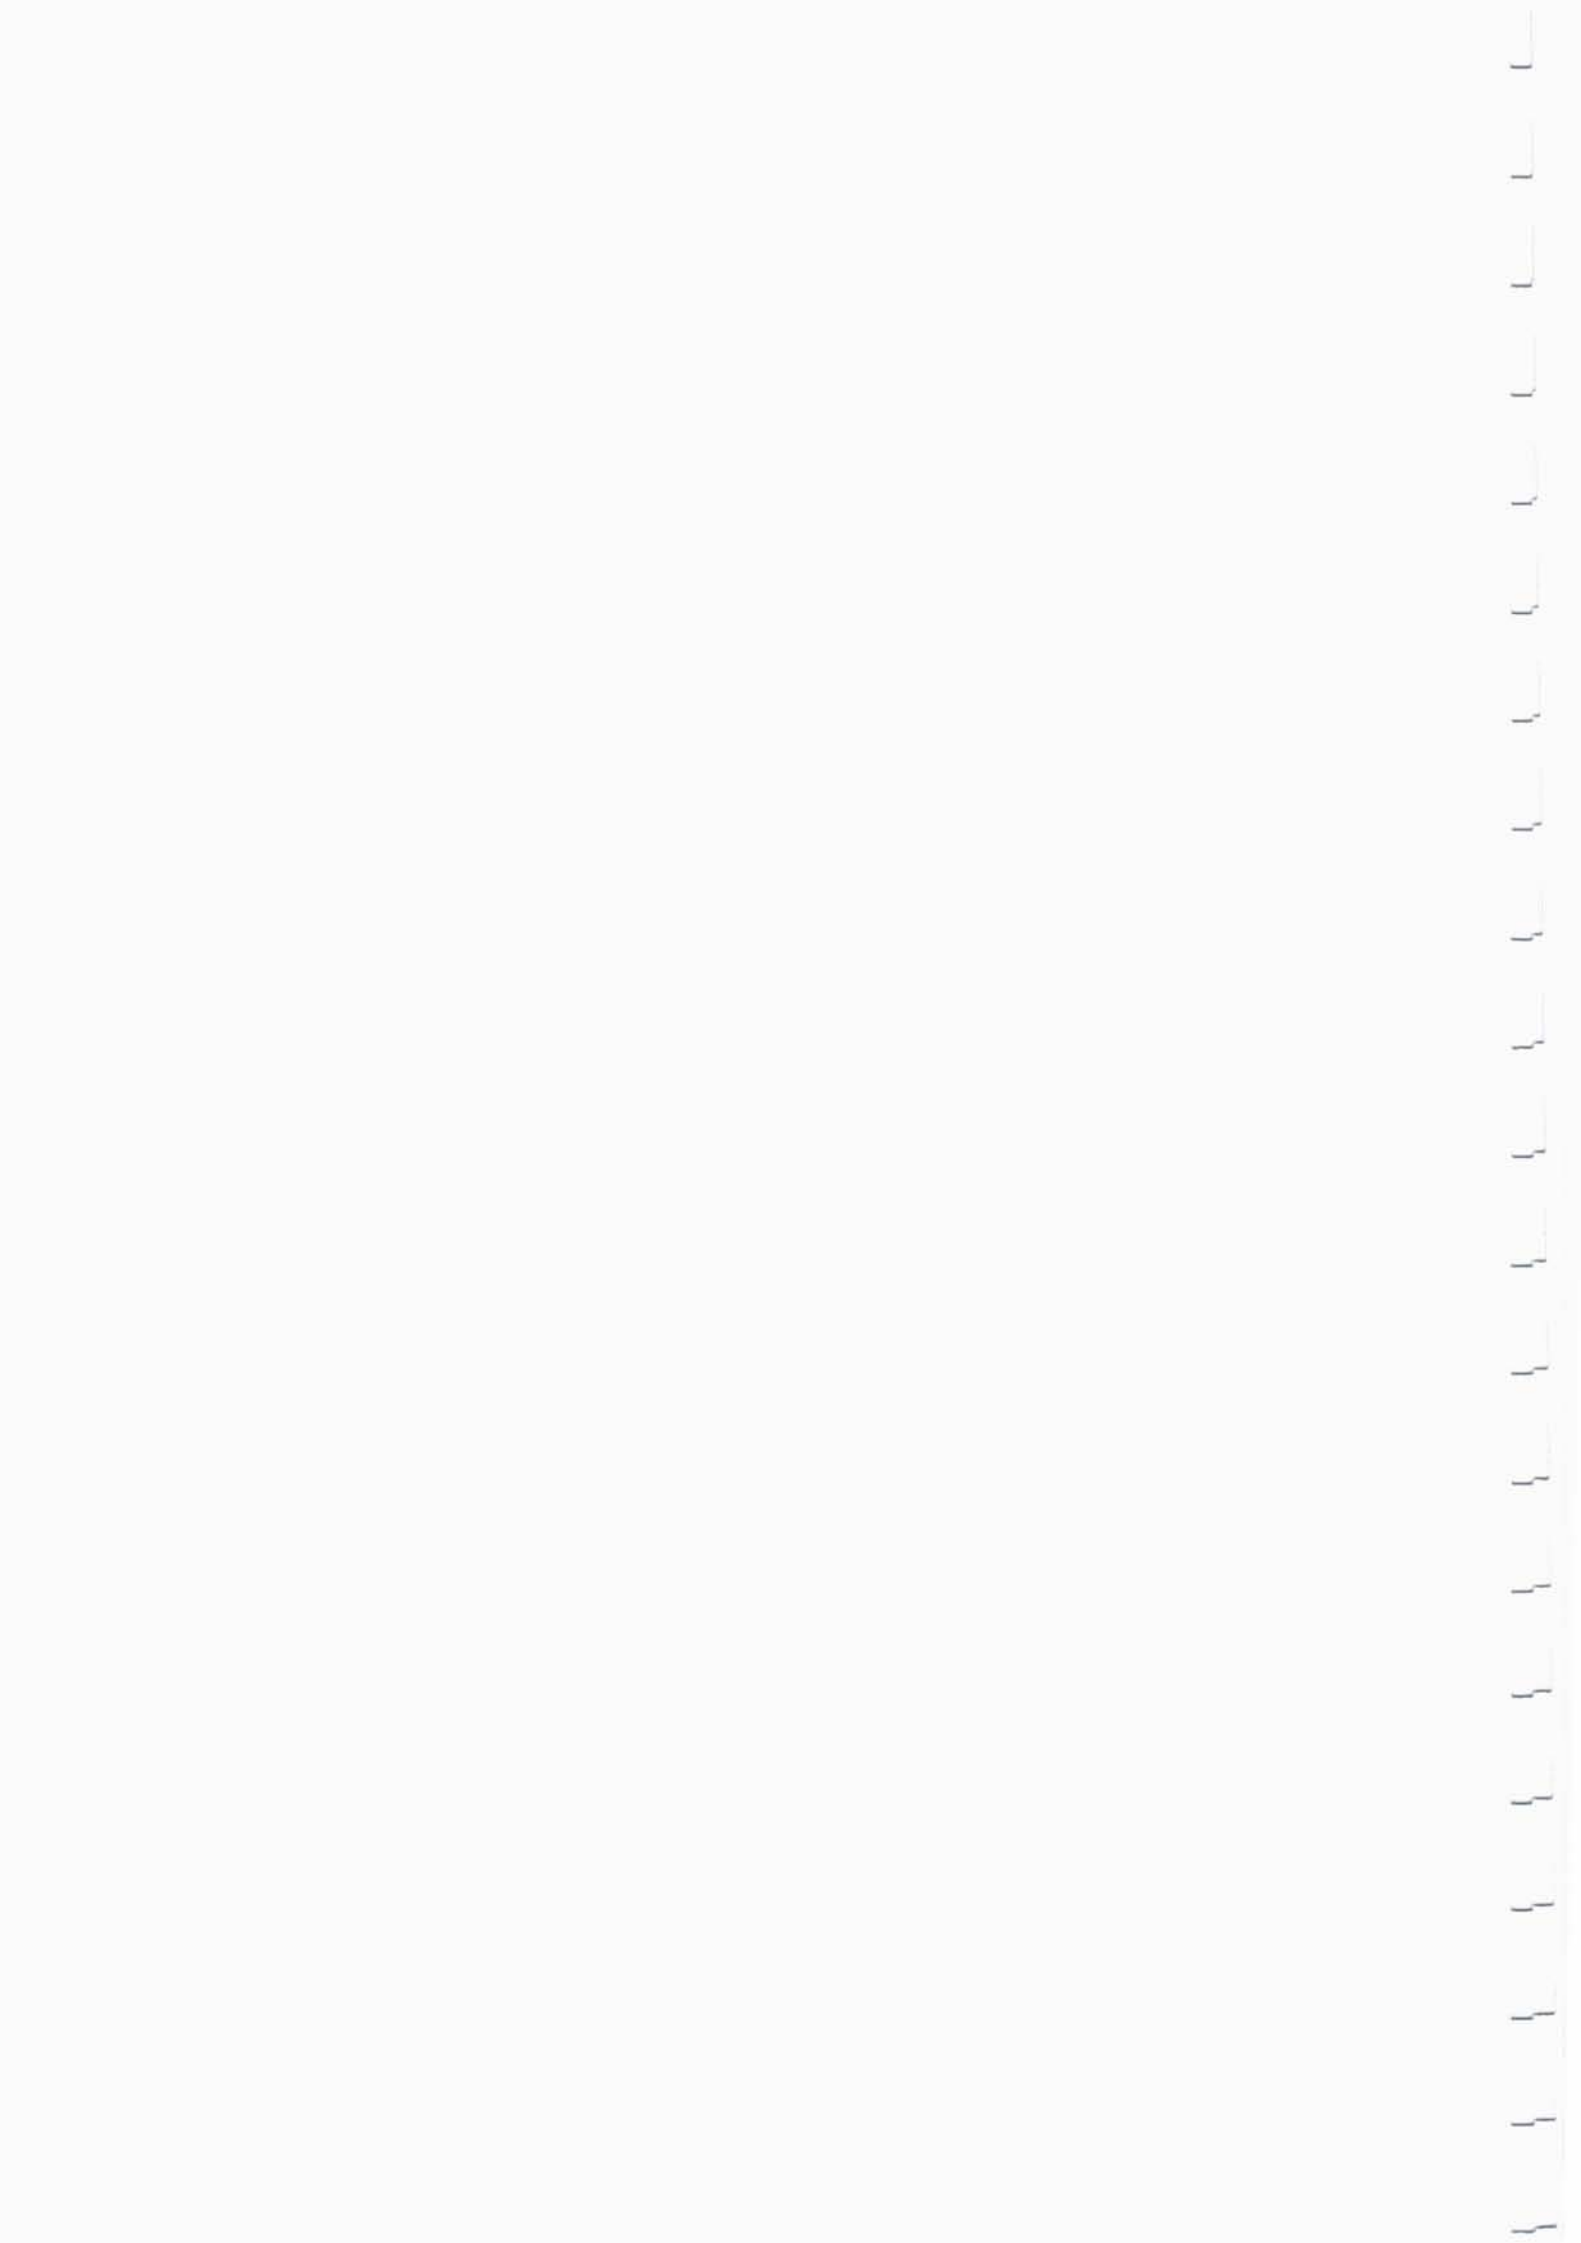

variances; (5) Determination of allowable margin of "variance"; and (6) Preparation of summary report.

This report includes only the activities done by the PSA team and does not represent the complete results of the random manual audit as other activities specifically done by the other teams of the Random Manual Audit Committee (RMAC) are not included in this report.

3. The Automated Random Selection Program (ARSP)

The random selection procedure was done in two stages; (1) Selection of cities/municipalities on May 9, 2016 at the COMELEC Command Center at the Philippine International Convention Center (PICC) and; (2) Selection of clustered precincts on May 10, 2016 at the Philippine International Convention Center (PICC). Using an automated random selection program (ARSP) developed by the Random Manual Audit Committee (RMAC), the 715 sample clustered precincts were successfully selected. The list of sample clustered precincts is shown in Annex A.

The Automated Random Selection Program (ARSP) is a computer application system that contains routines, functions, and algorithms developed in visual basic 6 environment and MySQL database system. The same program was subjected to source code review by Registered Political Parties and Accredited Citizens' Arm Groups. The ARSP is developed to speed-up and automate the sample selection process. Figure 1 shows the screenshot of the program that was used to facilitate random selection process.

ABS-CBN News

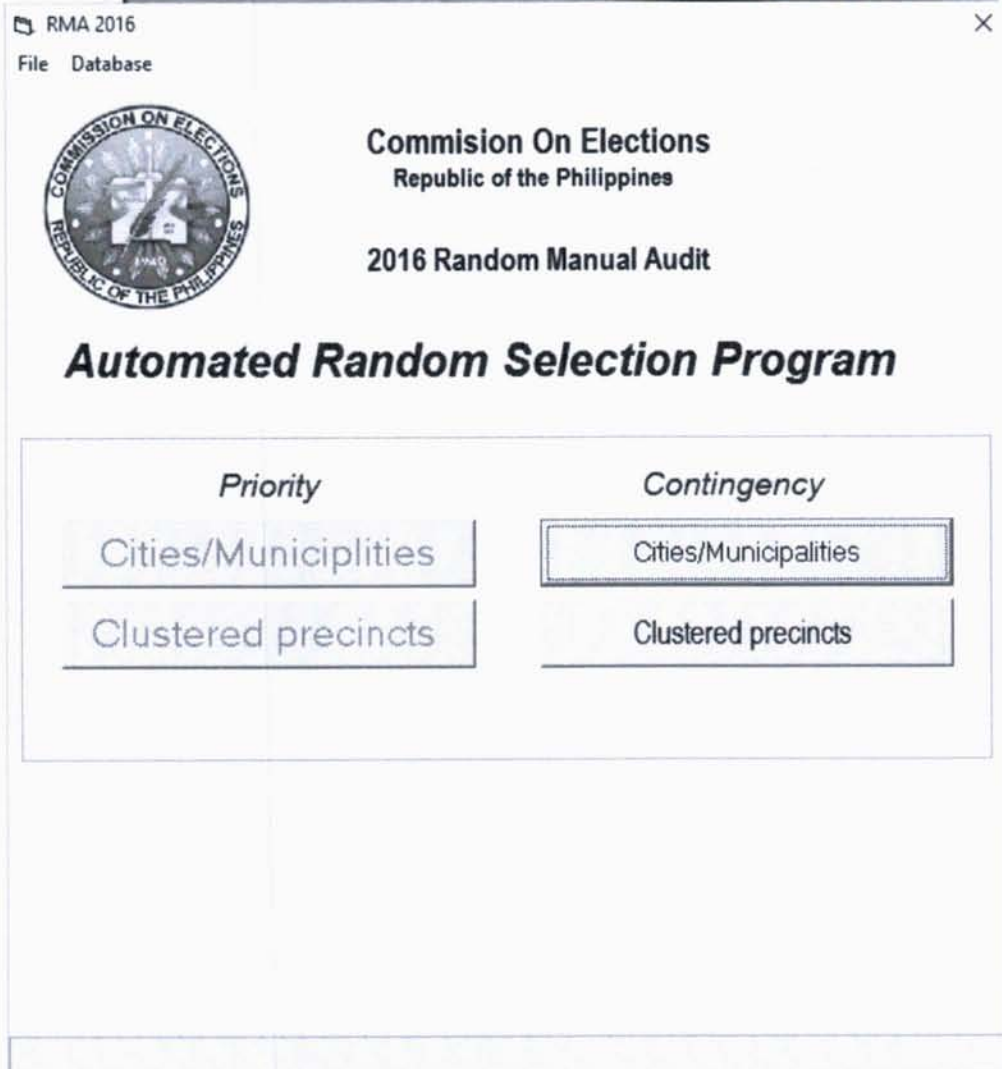

@ABSCBNNews · 1 week

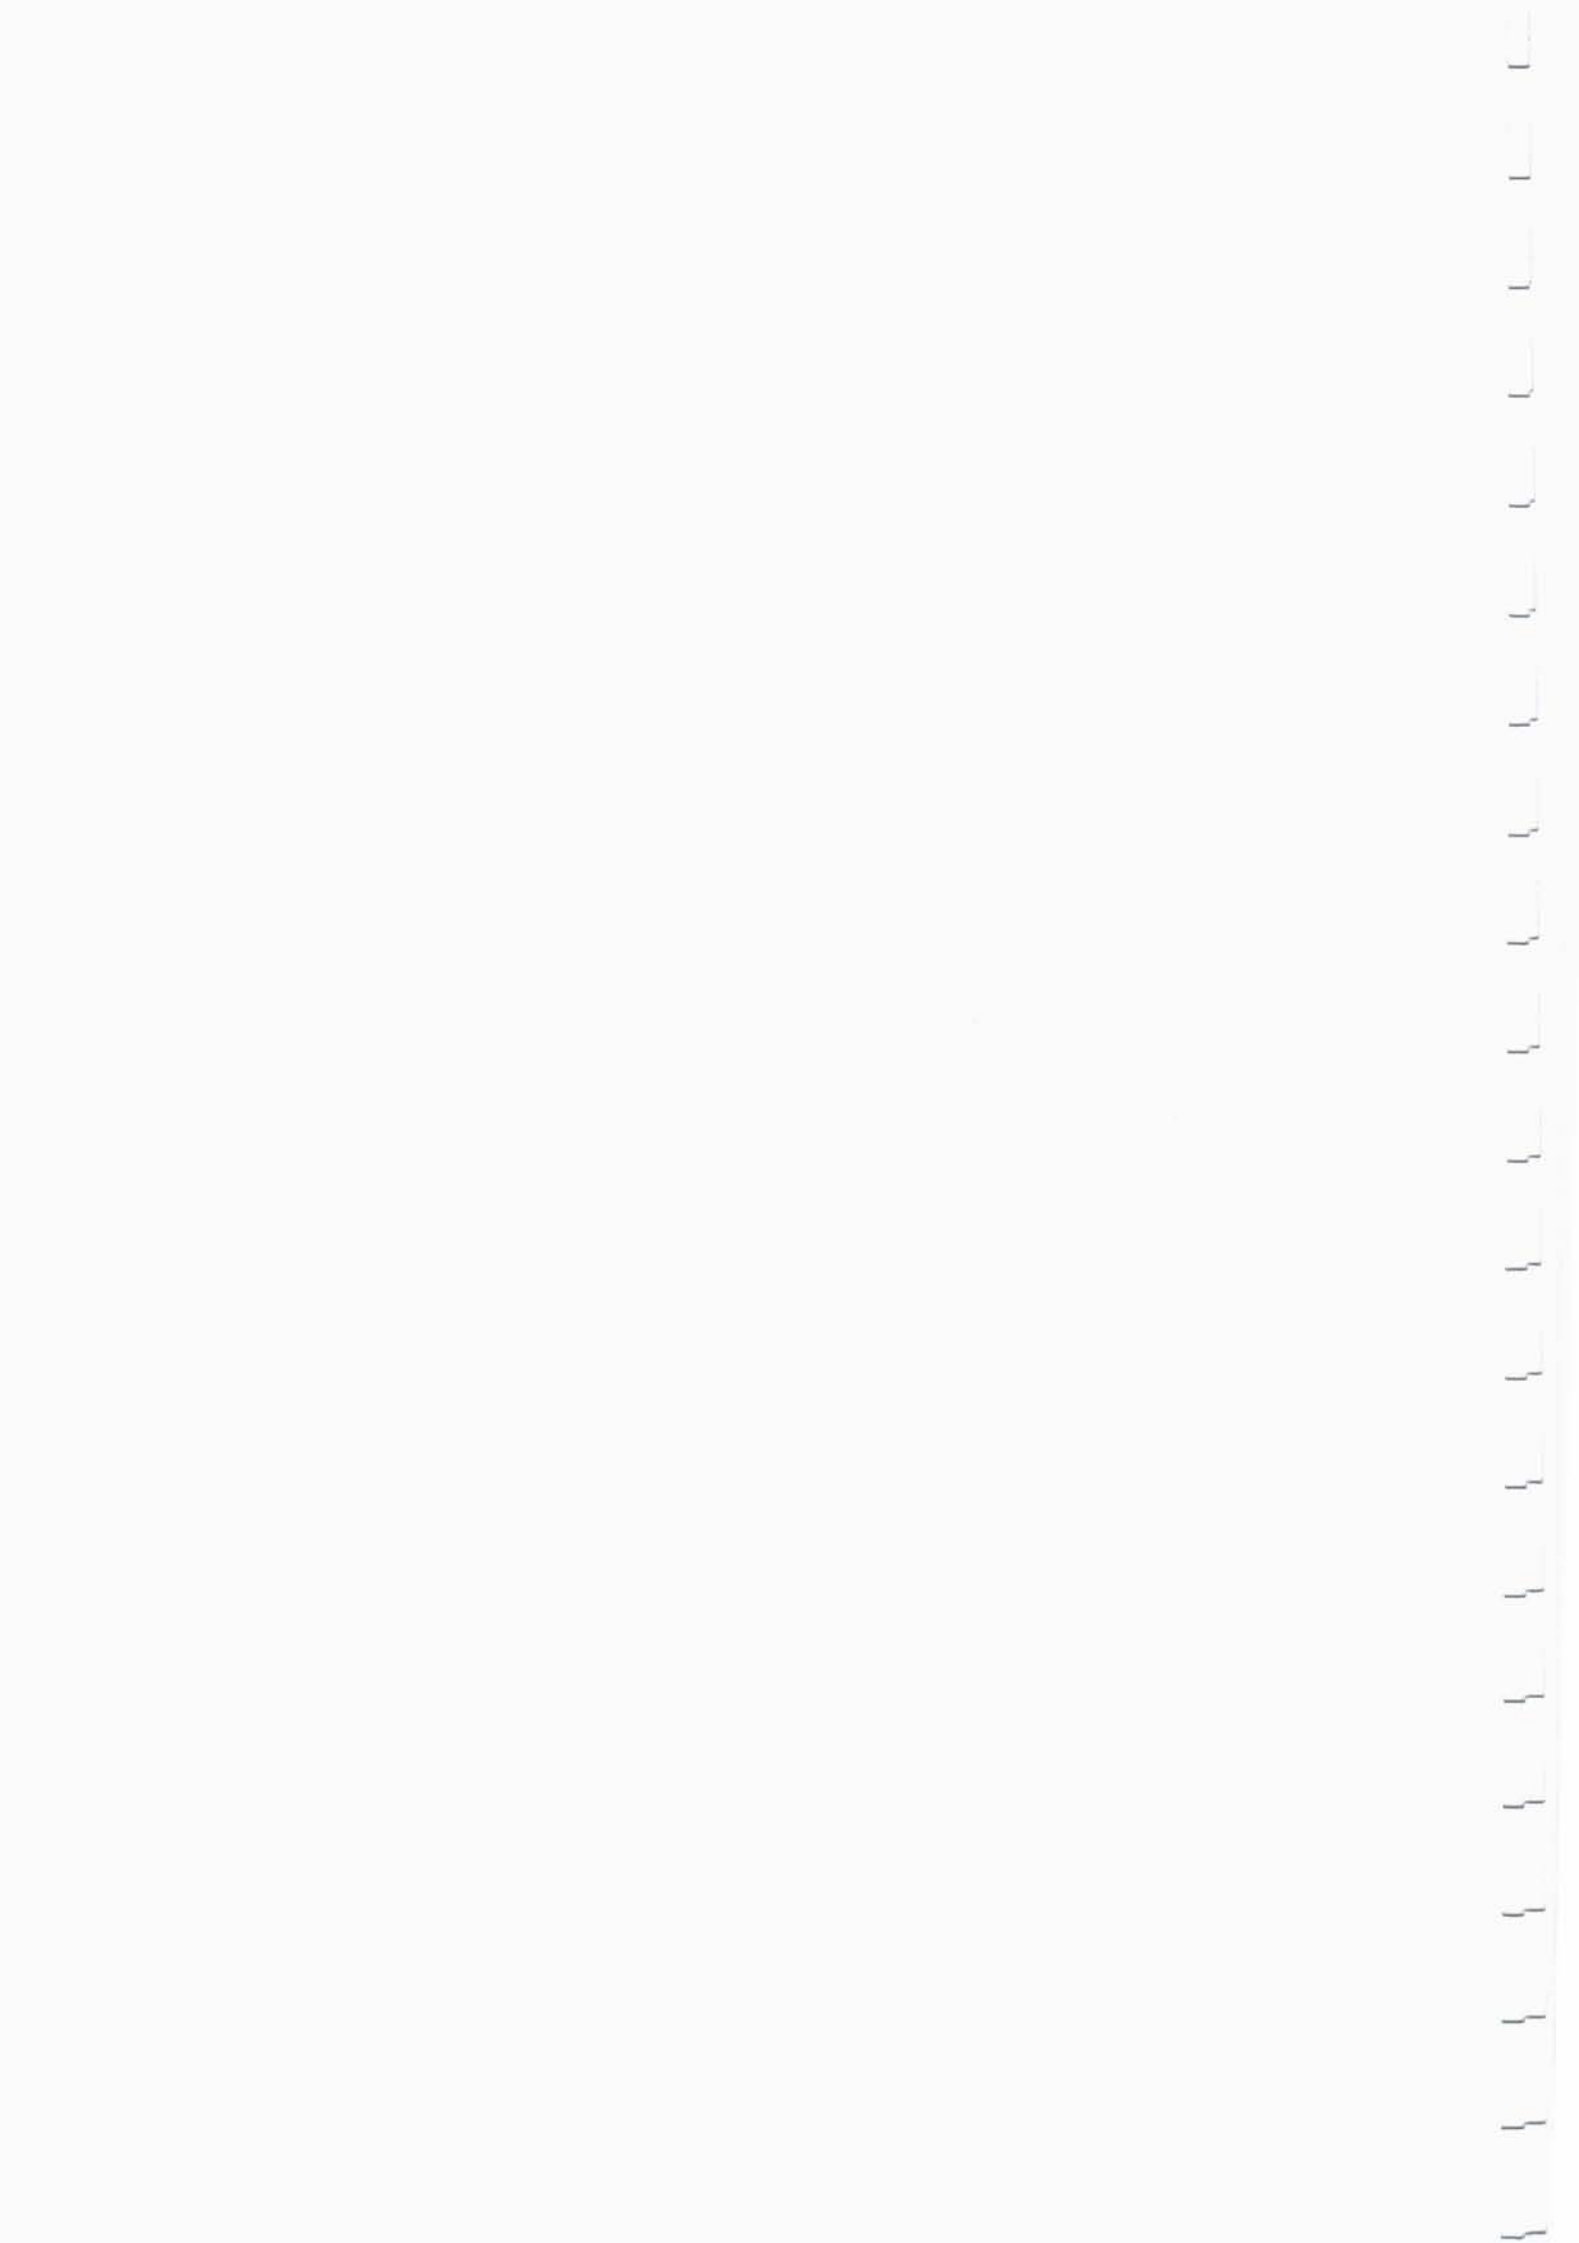

The Nat'l Statistics Authority explains selection process of precincts that will undergo Random Manual Audit.

Figure 1. Screenshot of Automated Random Selection Program (ARSP)

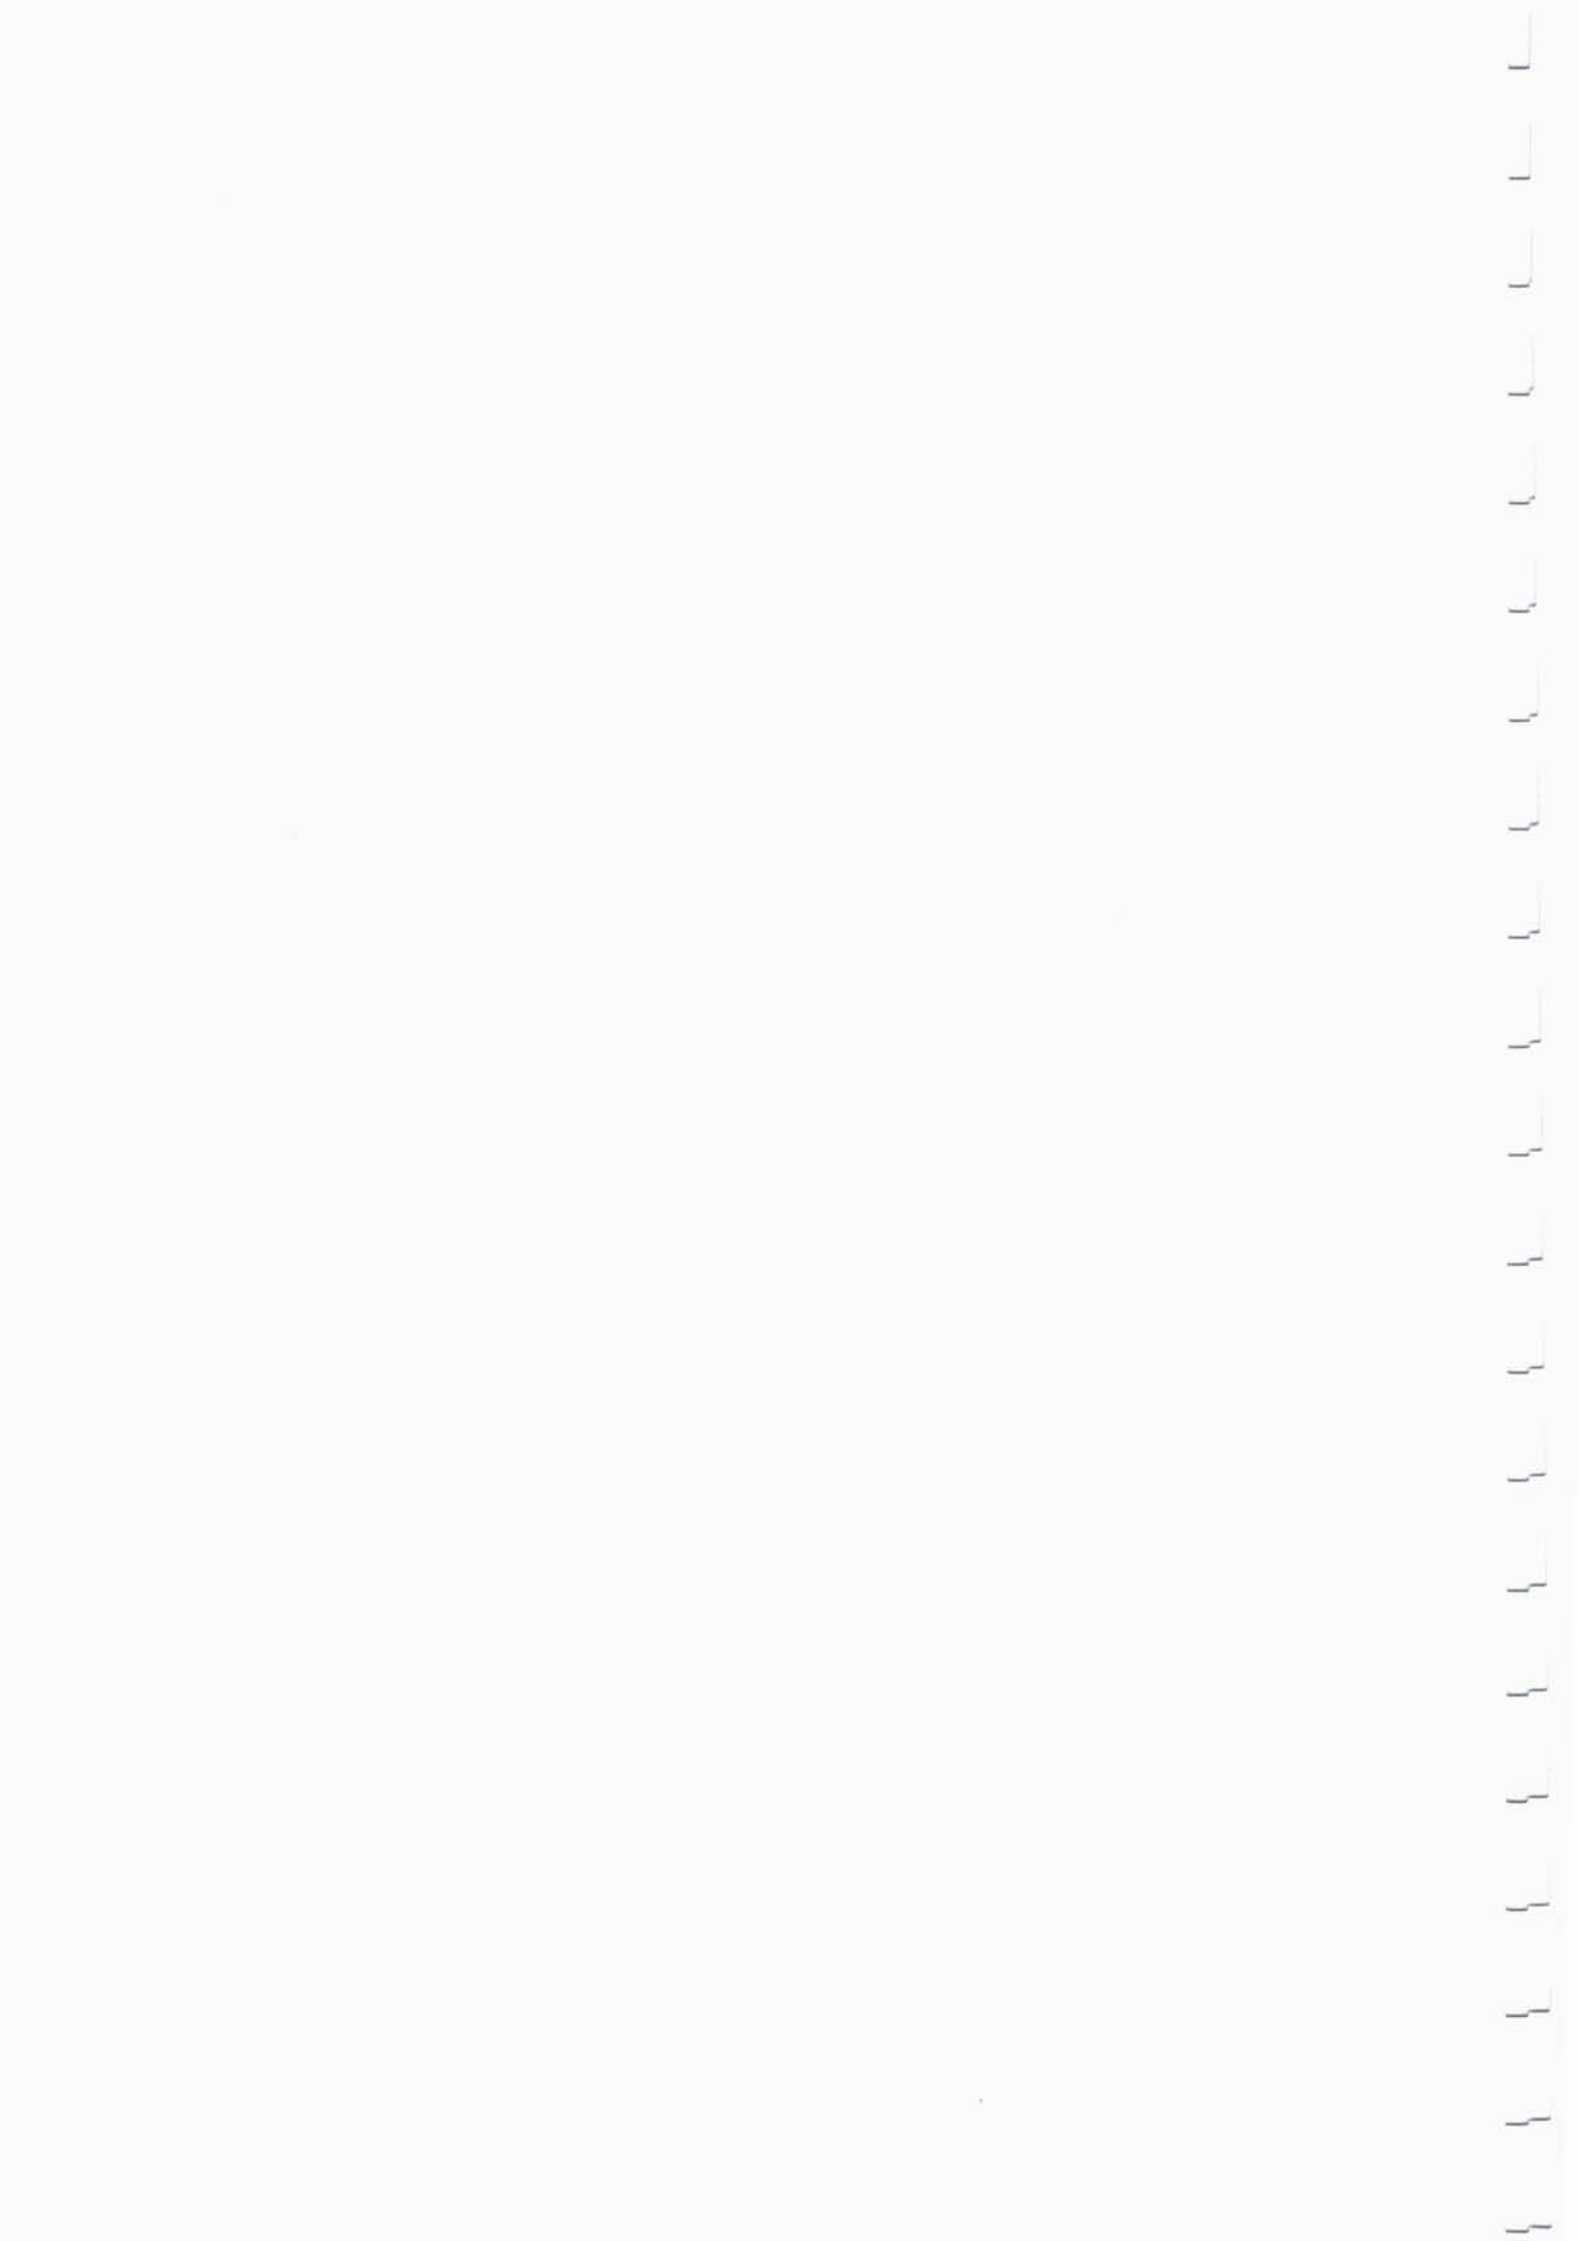

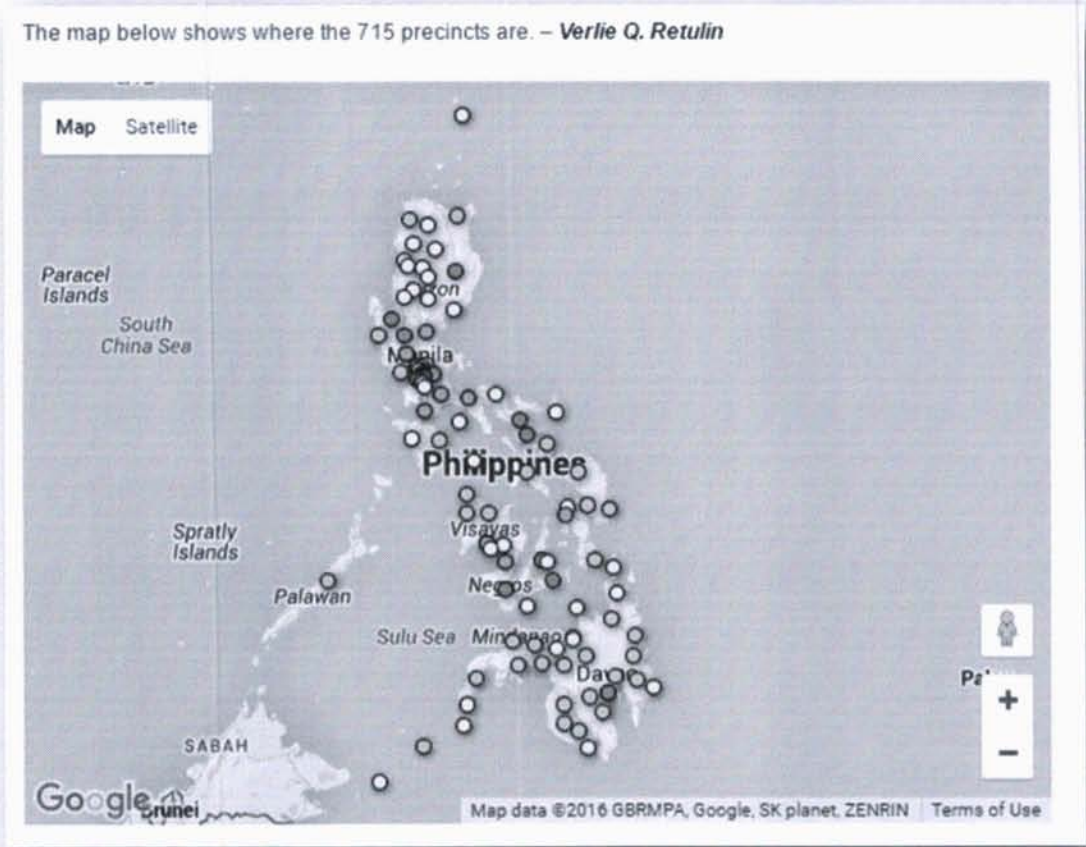

3.1. Sample Selection Procedure

In a probability sampling, every element in the population has a known chance of being selected. At the initial stage, Probability Proportional to size (PPS) sampling is applied to select the first stage elements. The term "element" here refers to the "cities/municipalities" within a legislative district. Likewise, during the second and final stage of randomized selection, the term "element" also refers to the "clustered precincts" within the selected city/municipality. The random selection procedure is designed to draw two sets of sample (i.e., (1) *the priority list of sample* and (2) *the contingency list of sample*).

The priority set of sample contains the list of randomly selected priority cities/municipalities and the corresponding priority list of 715 randomly selected clustered precincts. On the other hand, the contingency list of sample contains the list of randomly selected contingency cities/municipalities and the corresponding randomly selected contingency clustered precincts. The contingency list of sample is used as replacement in case of a failure of random manual audit (RMA) in any of the priority sample due to accessibility and peace and order problems. The map below shows the distribution of

715 sample clustered precincts across the country. The number of sample clustered precincts for each region is also shown in Figure 2.

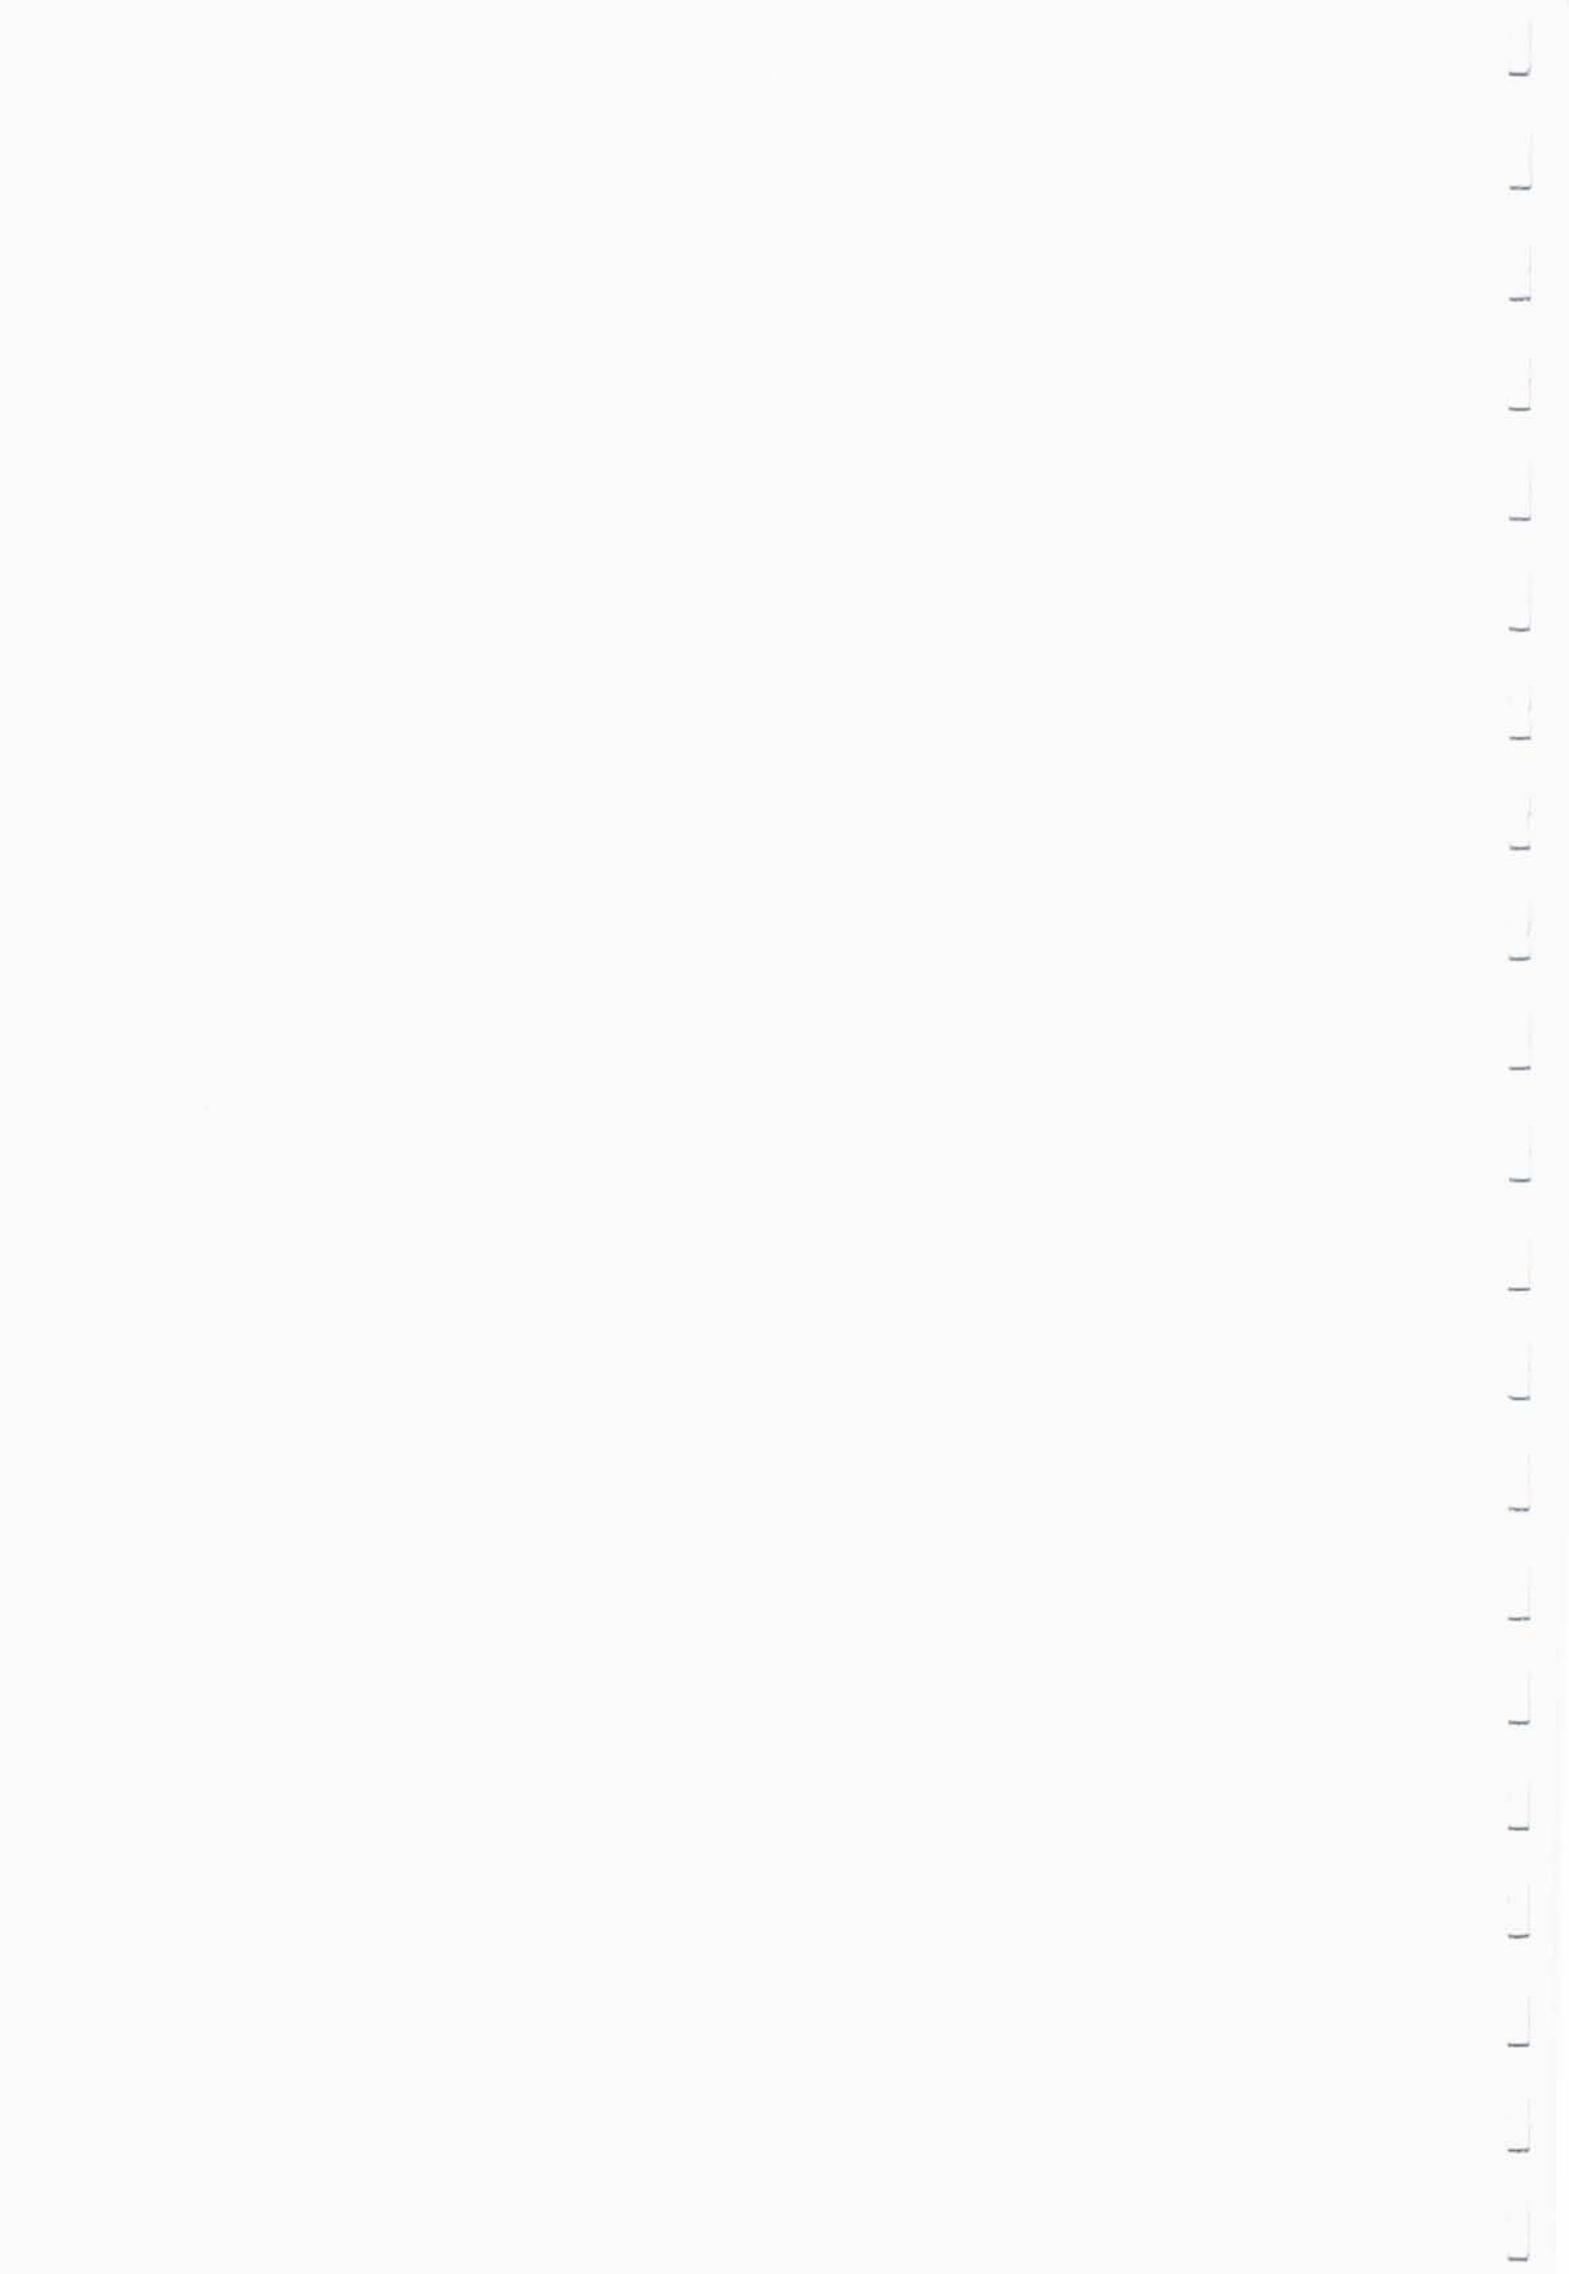

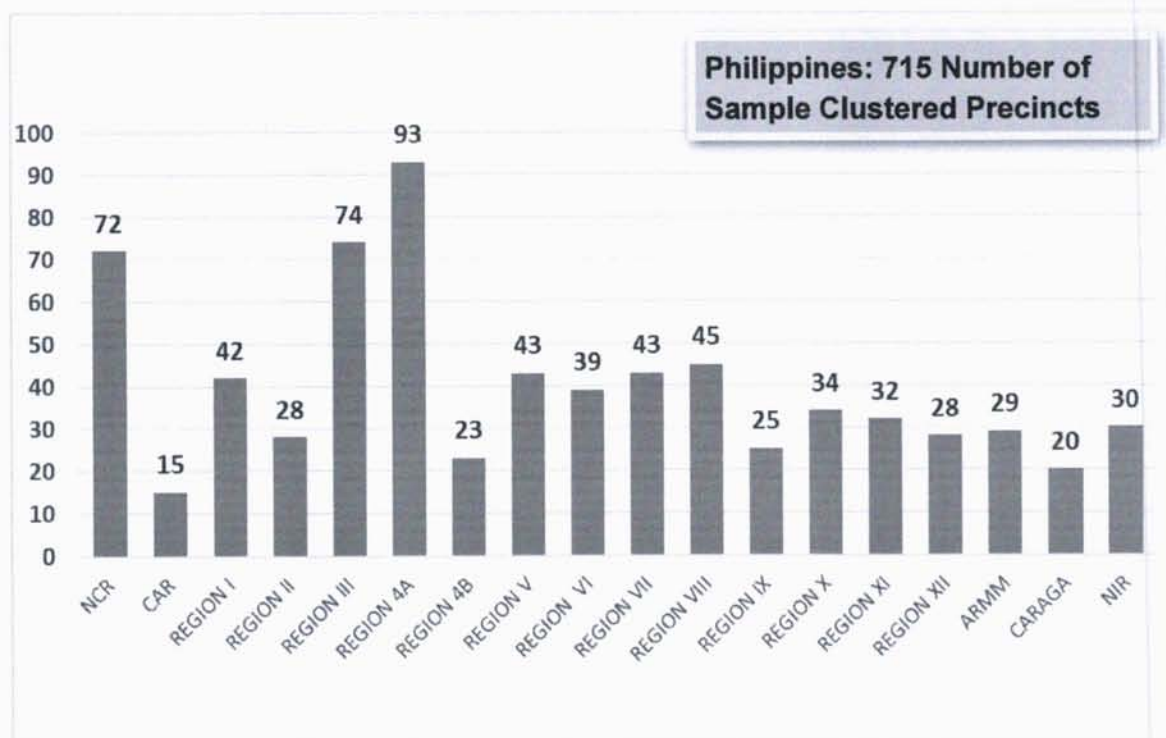

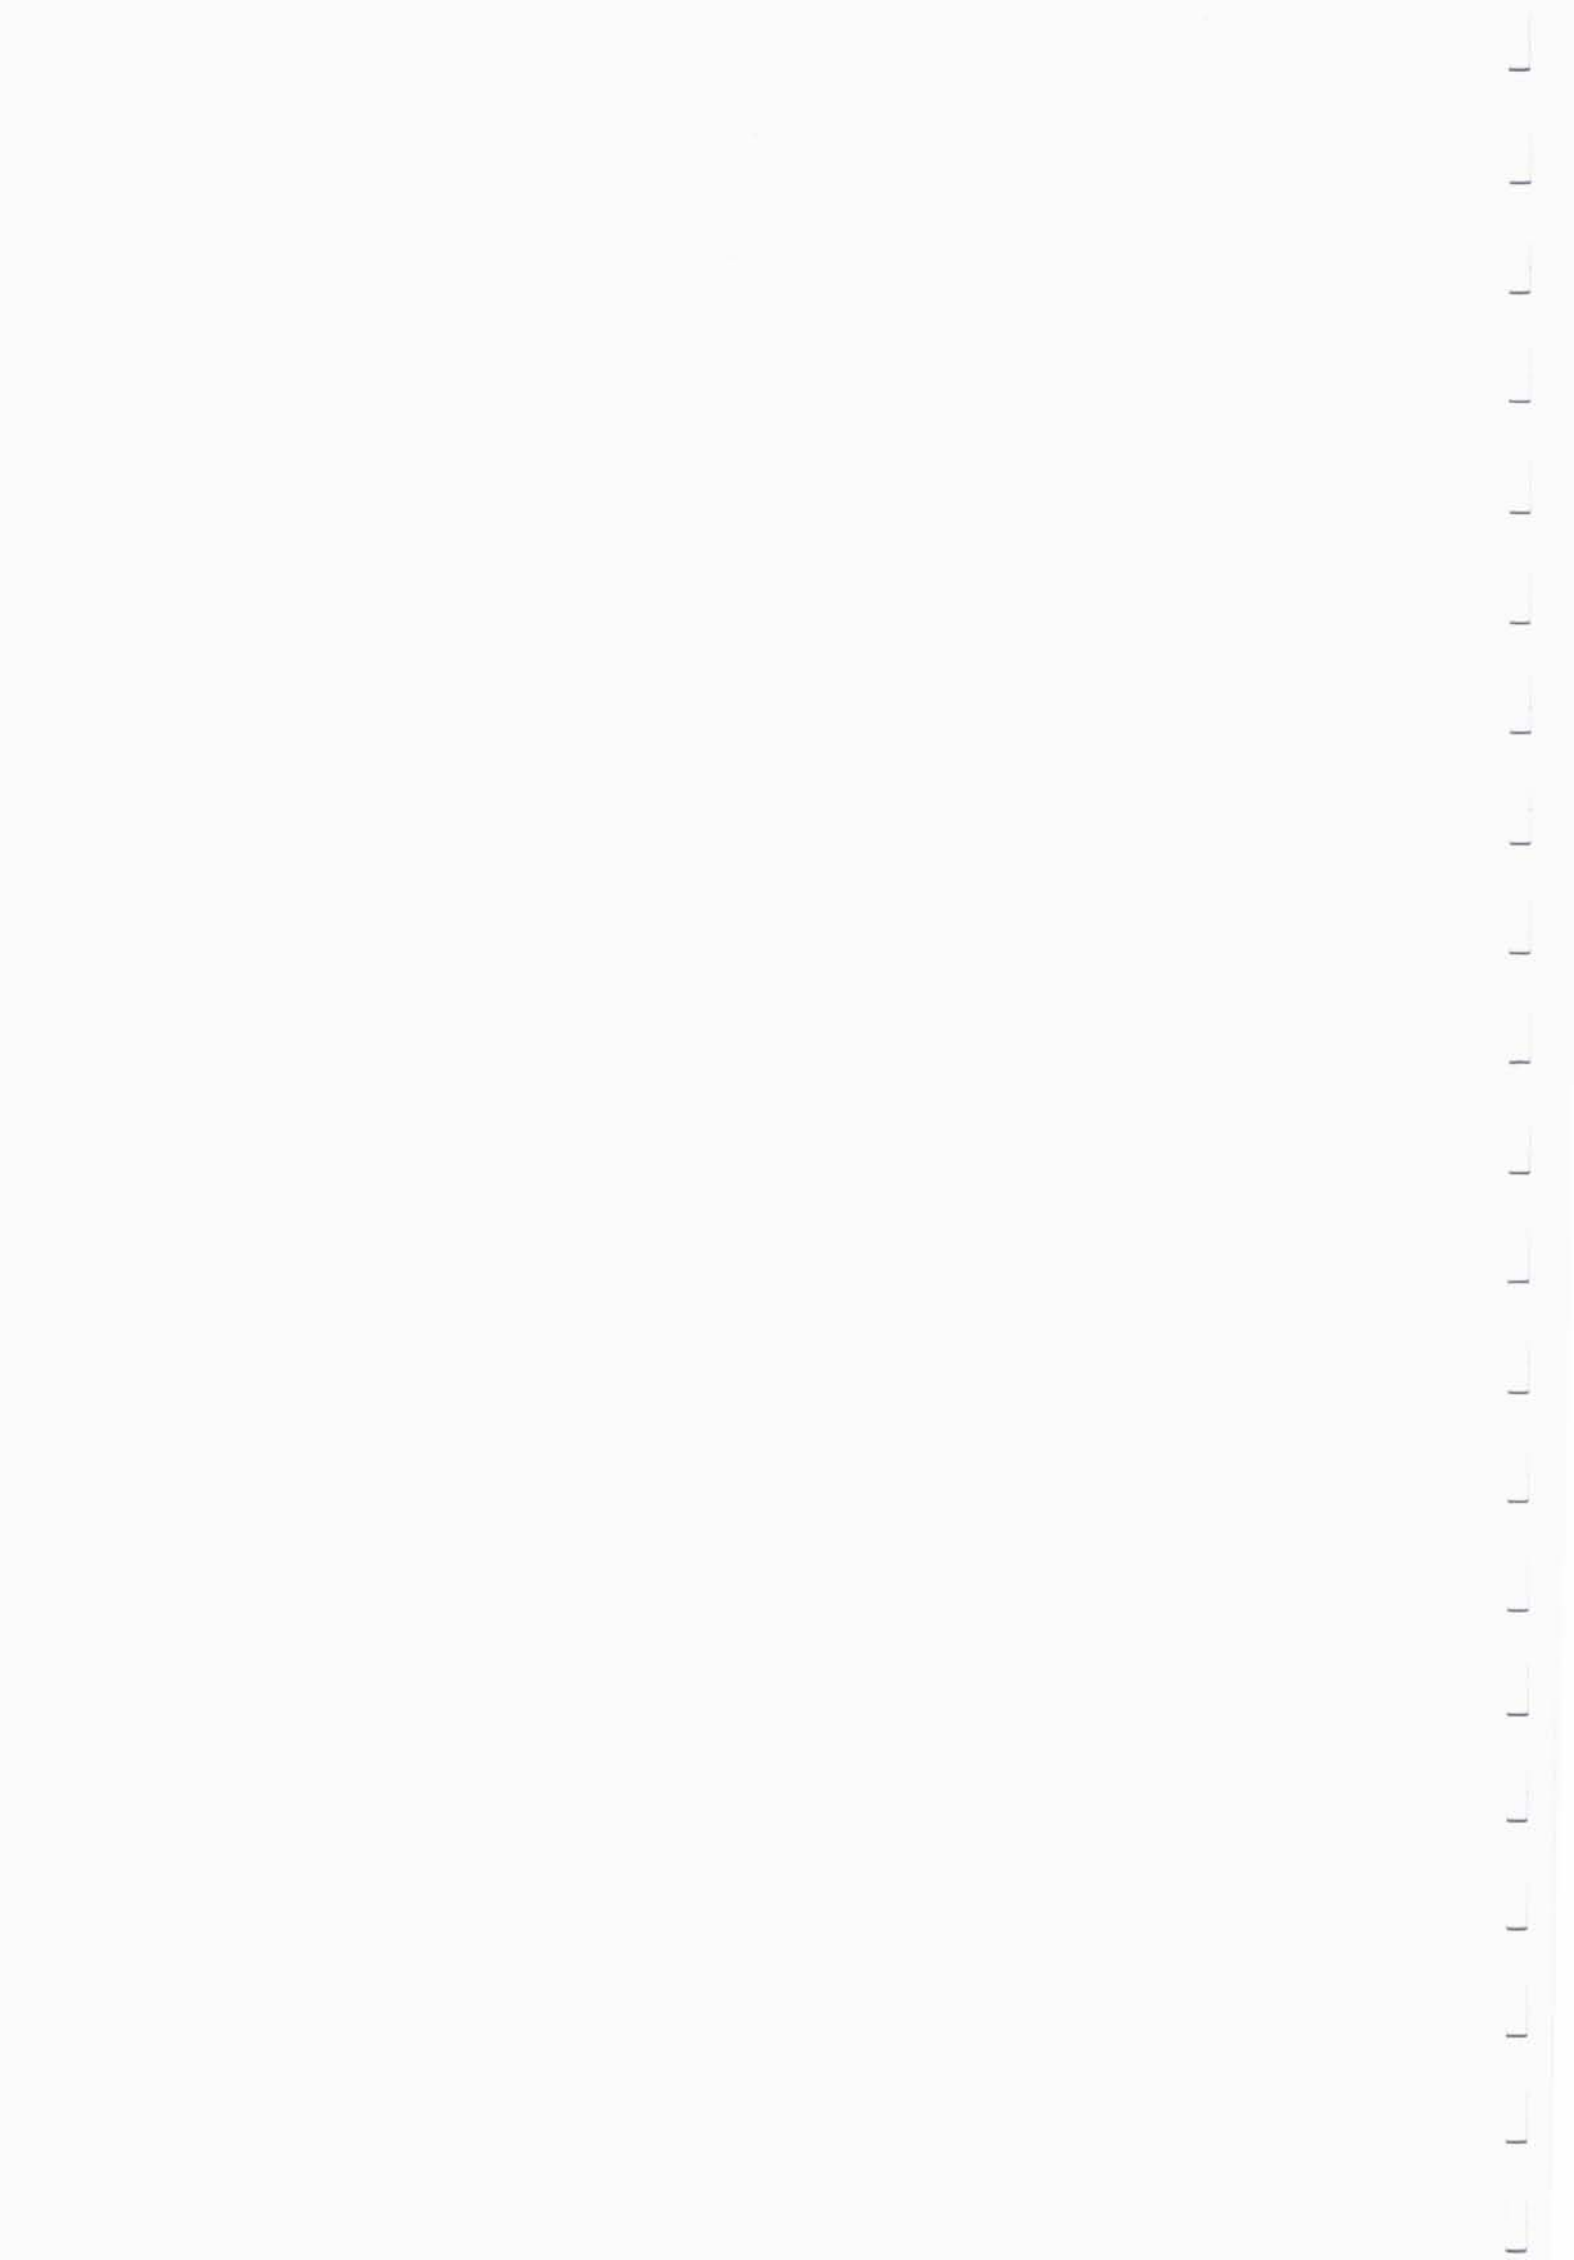

Figure 2. Number of Sample Clustered Precincts

4. PSA-RMA Processing Network Configuration Setup

The 2016 PSA-RMA processing system was configured using a network environment with 1 MySQL server and 8 workstations. The RMA processing system consists of 3 (three) modules (i.e., (1) *Receipt, Control and Monitoring Module*, (2) *Data Capture Module*, and (3) *Query and Reports Module*). The data capture module of the system utilized web-based application using PHP server scripting language. Figure 3 illustrates the Network Configuration setup of the RMA processing system.

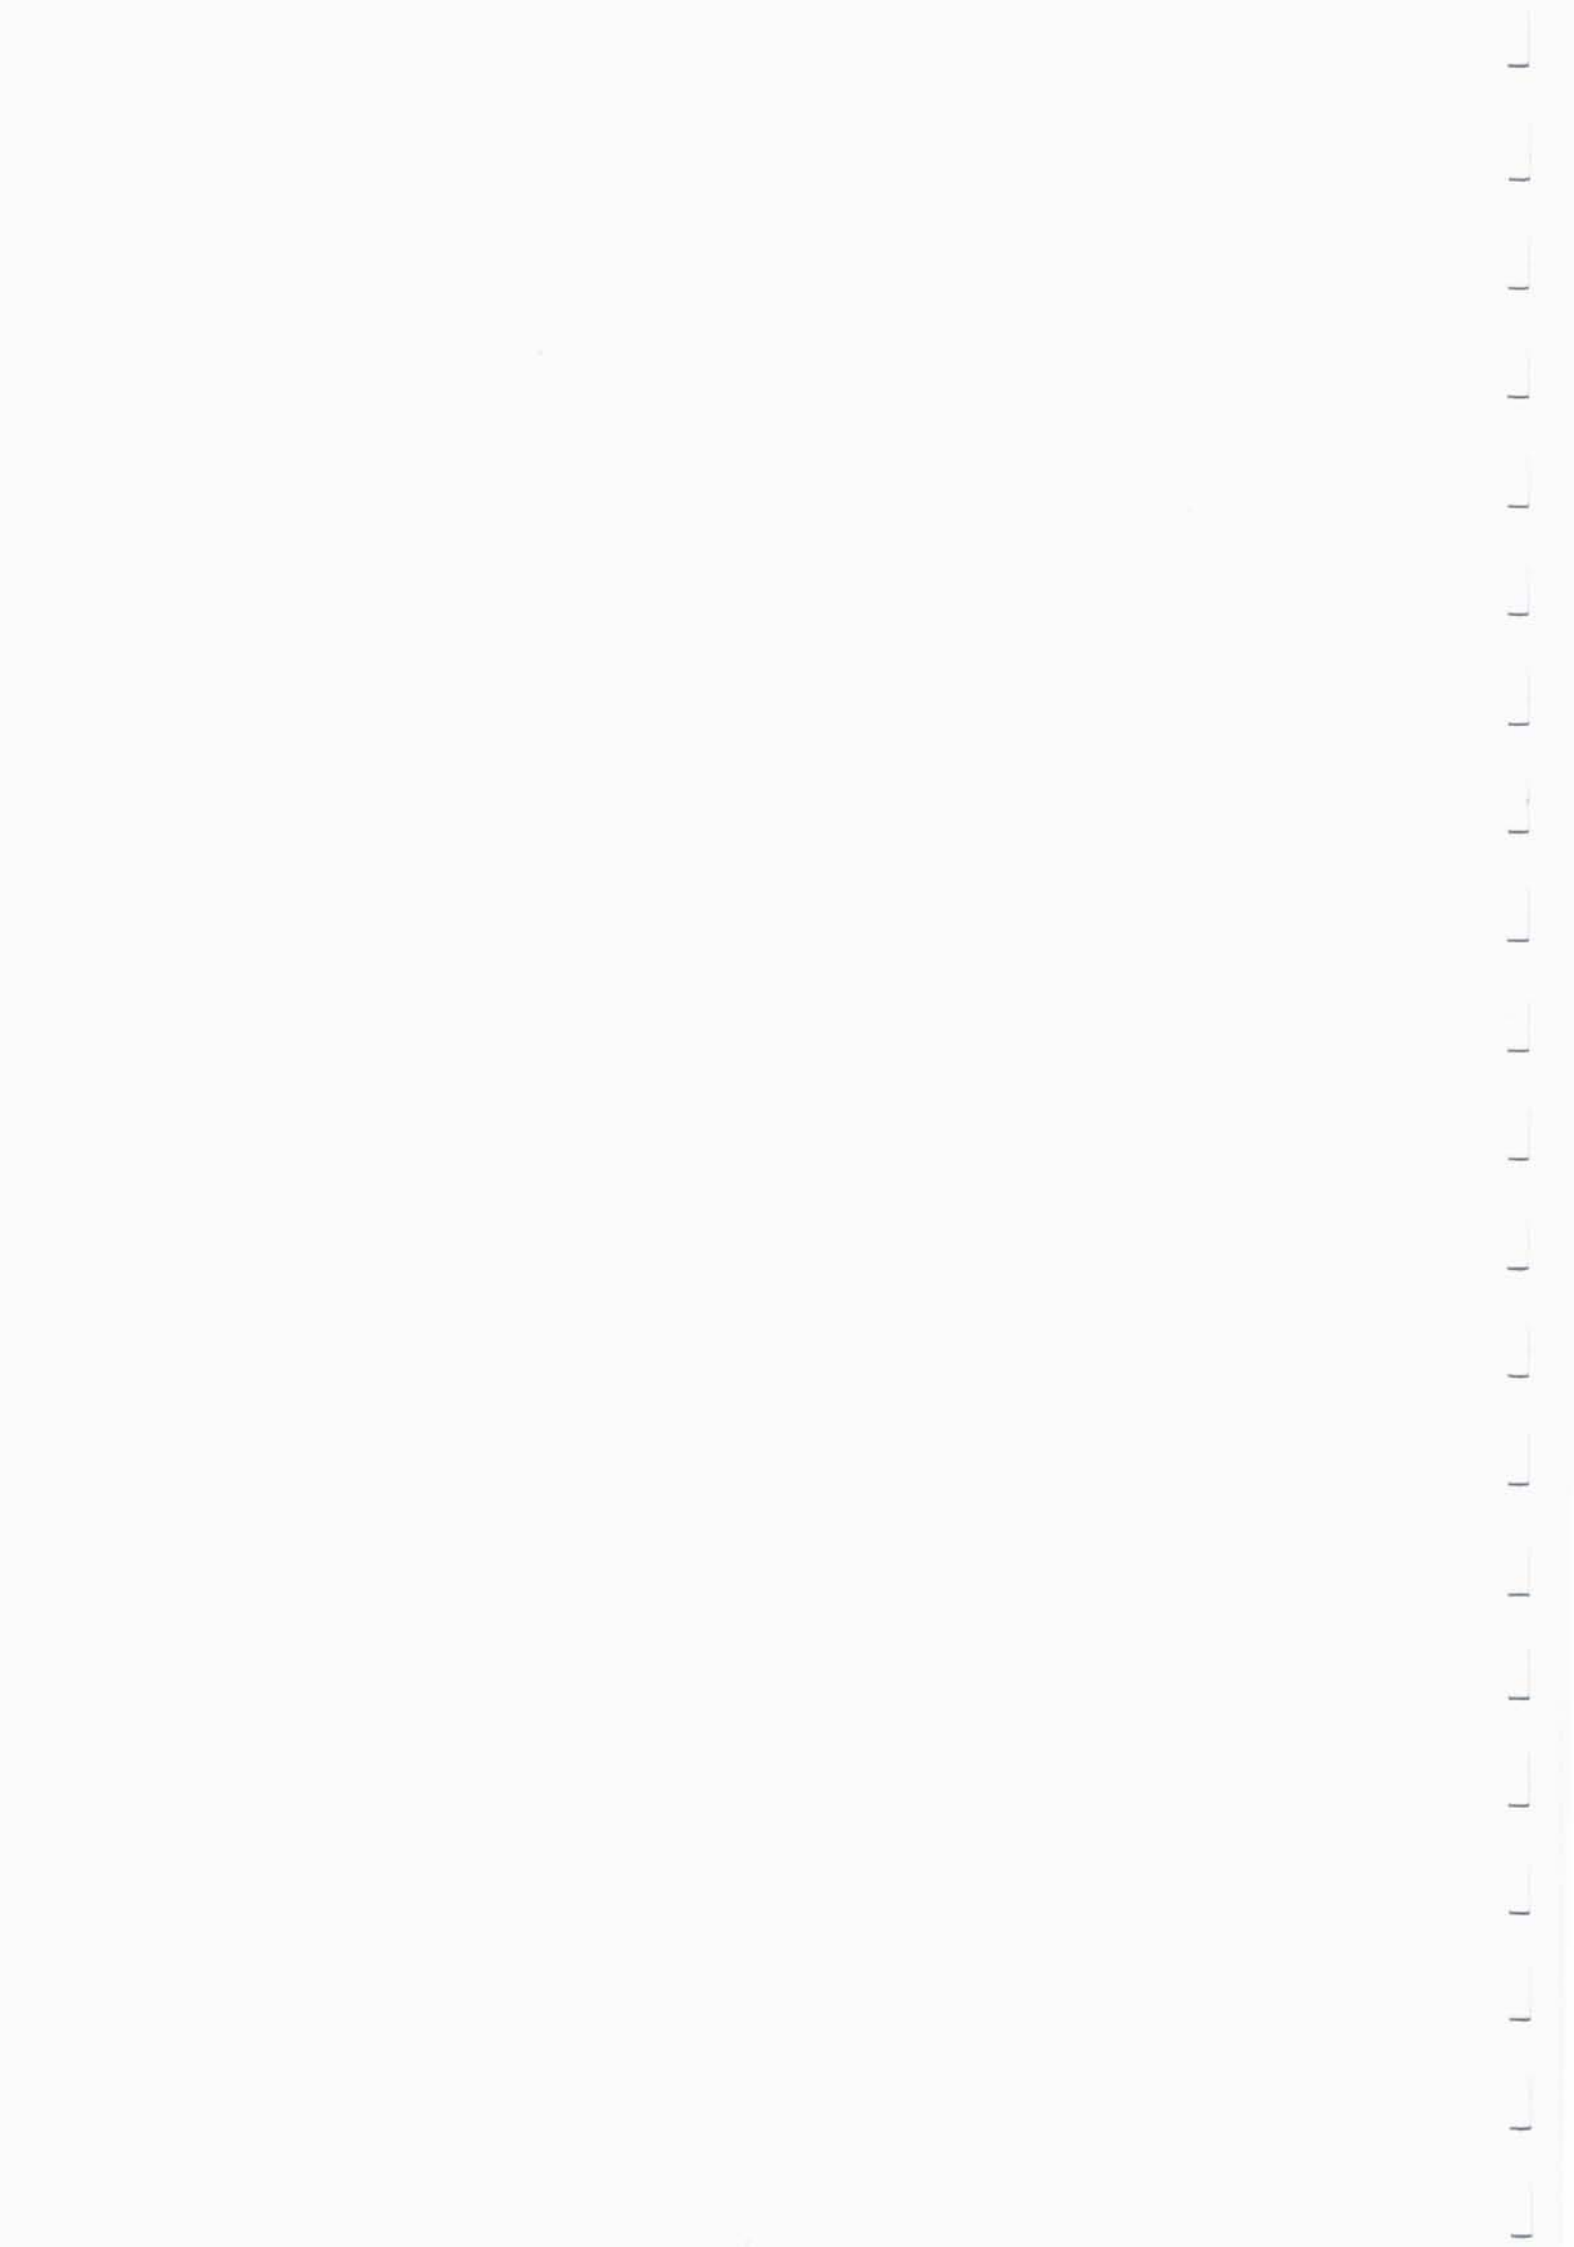

Figure 3. 2016 PSA-RMA Network Configuration

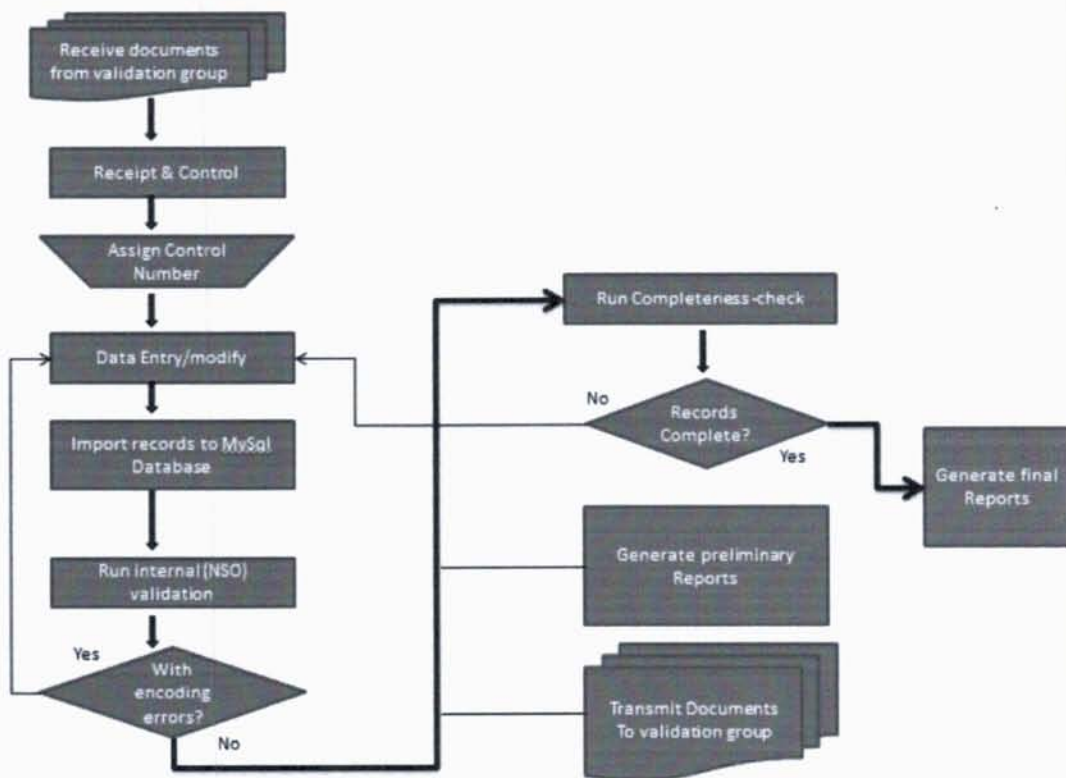

5. PSA-RMA Processing Flow

Validated RMA reports are transmitted by the RMA validation group of the RMAC to the PSA-RMA team for processing, tabulation and analysis. An internal and unique identification control number is assigned to each RMA report received. The assigned PSA encoders input the data in their corresponding workstation. The encoded data are then uploaded to MySQL Database. These data went through internal validation to check for possible encoding errors and to tag if those processed RMA reports has more than 10 votes' difference or "variance" between marked votes counted by the Vote-

Counting Machine (VCM) for further validation. The system is capable generating completeness report and tabulations to generate preliminary reports anytime or in real time. Figure 4 shows the detailed process flow of the PSA-RMA processing system.

Figure 4. 2016 PSA-RMA Processing Flow

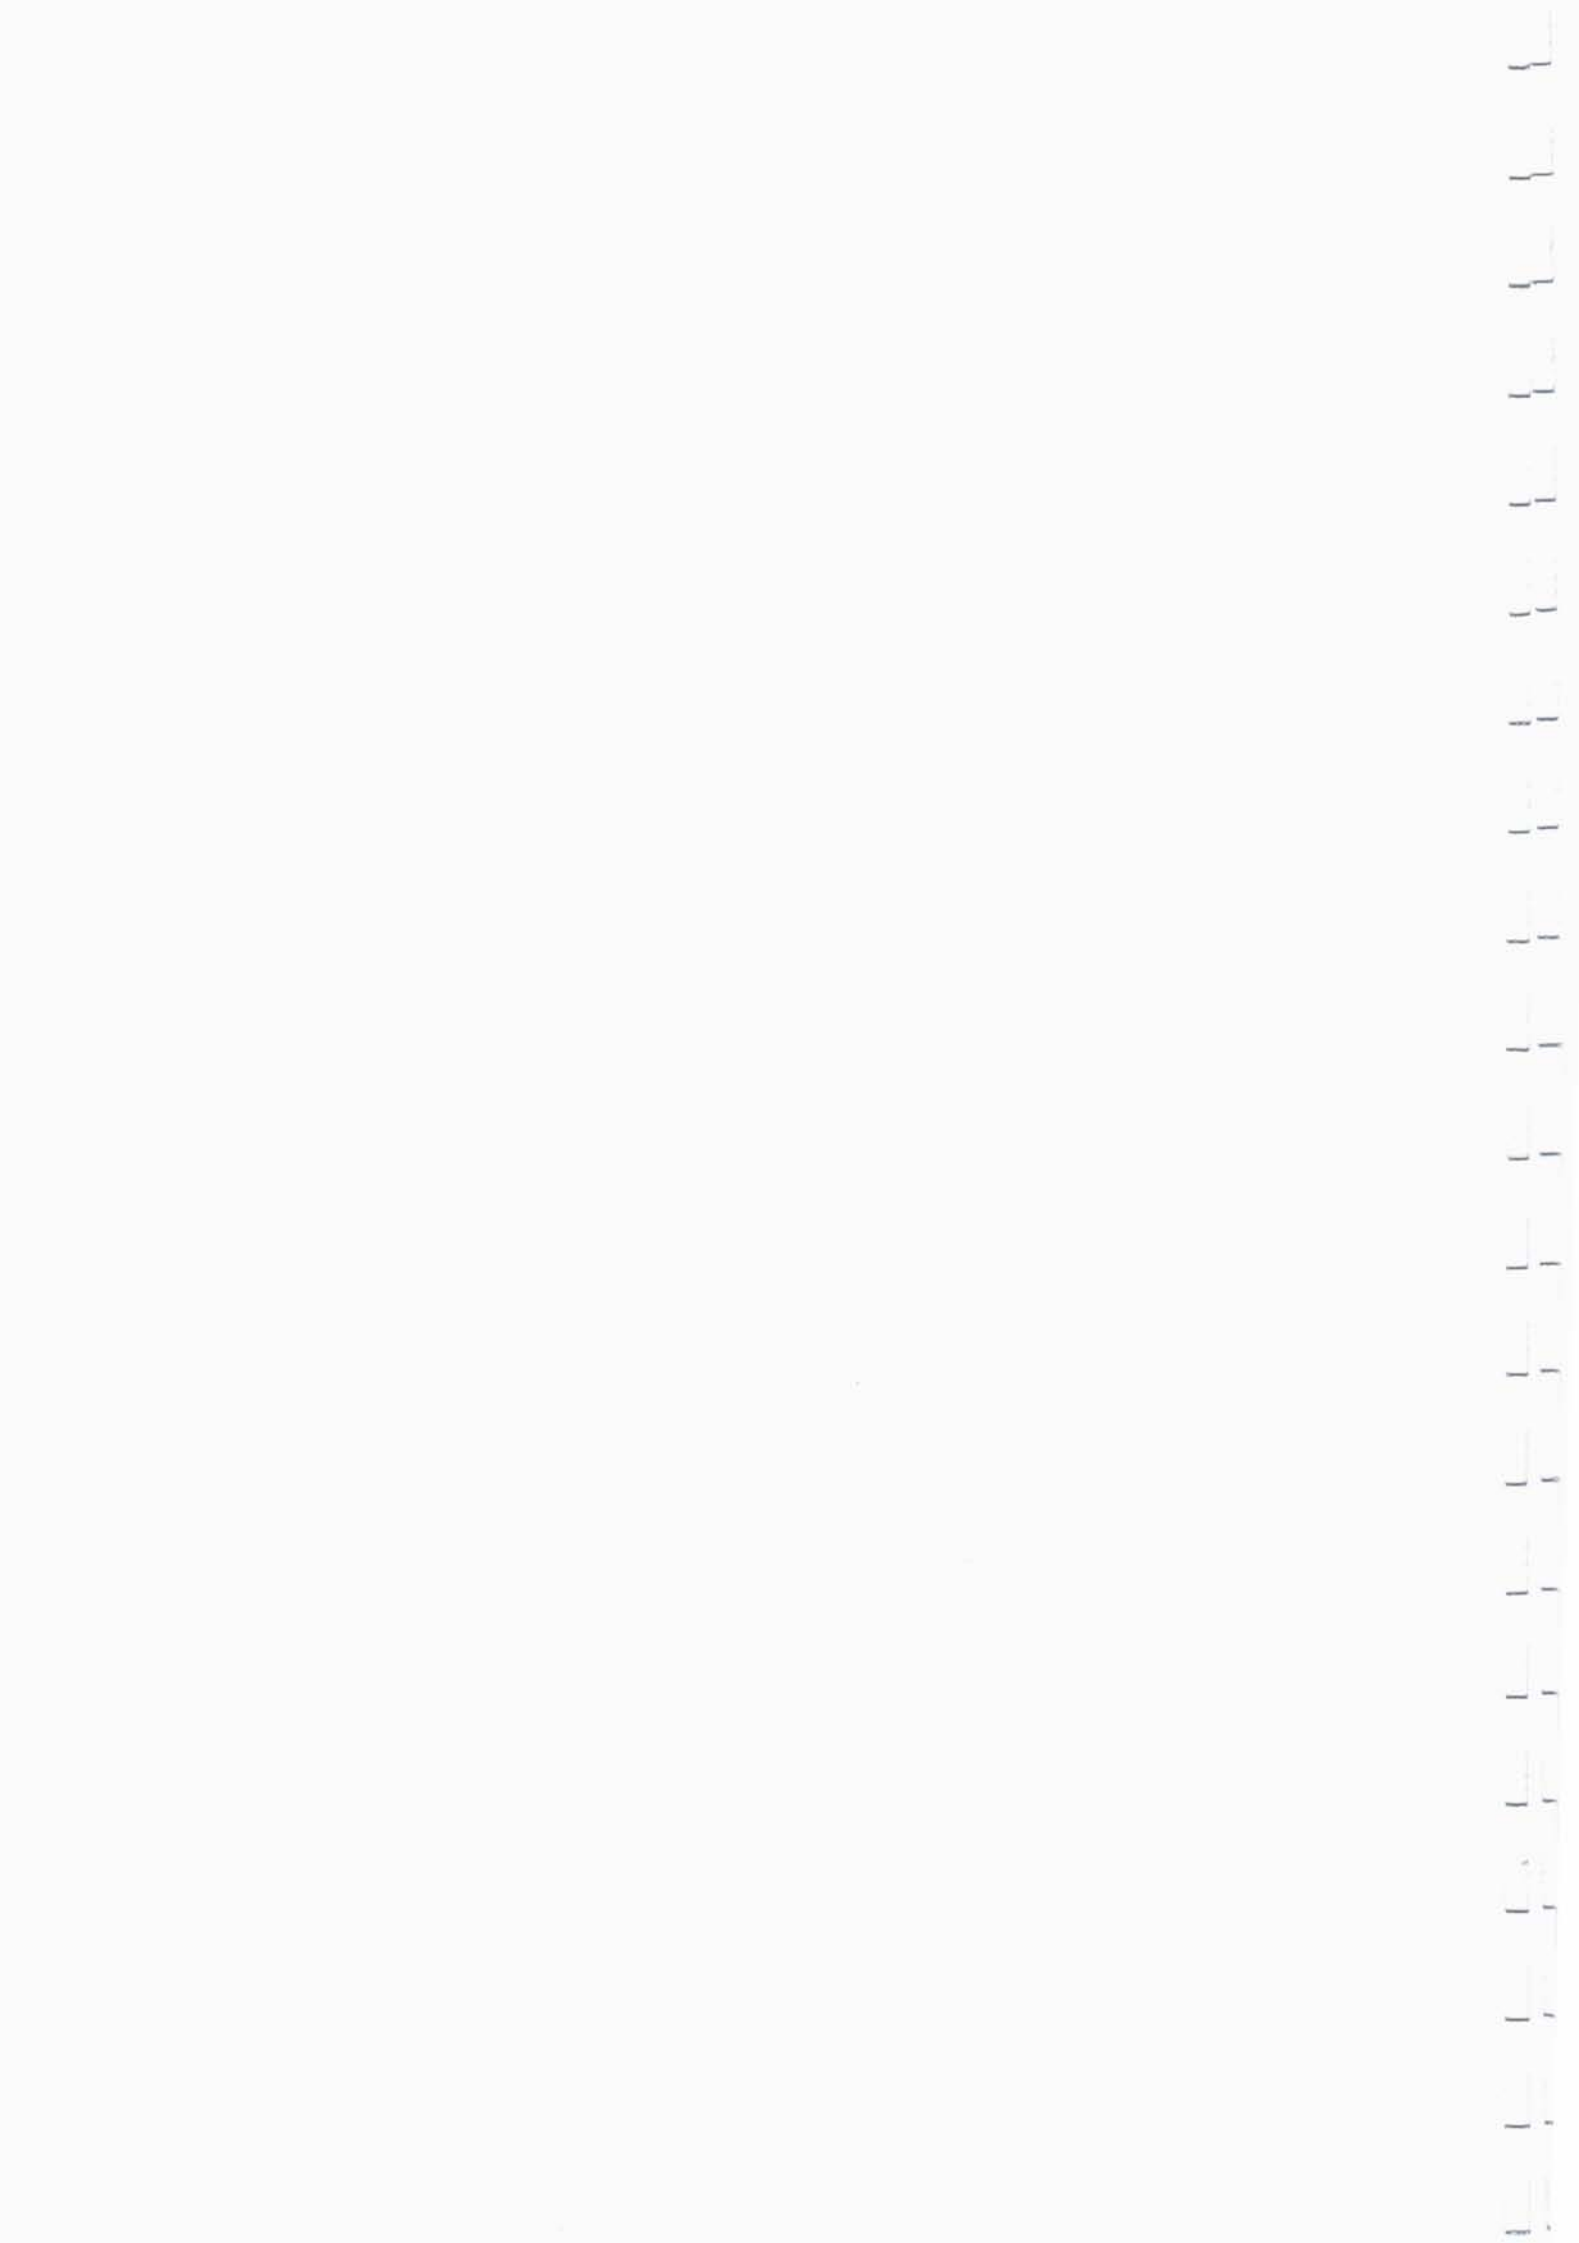

6. Number of Sample Clustered Precincts with Complete RMA Reports

As of June 15, 2016, a total of 687 completed RMA reports or 96.2 percent of the 715 total sample clustered precincts were received and processed by the Philippine Statistics Authority (PSA) for analysis and processing to generate “variance” summary report. An RMA minutes/report for a given sample clustered precincts is considered complete if the number of votes per Election Return (ER) and per Random Manual Audit (RMA) are available and further validations can be made to review the initial audit results submitted by the Random Manual Audit Team (RMAT) to the COMELEC. The distribution of 686 sample clustered precincts with complete and validated RMA reports by region is shown in Table 1.

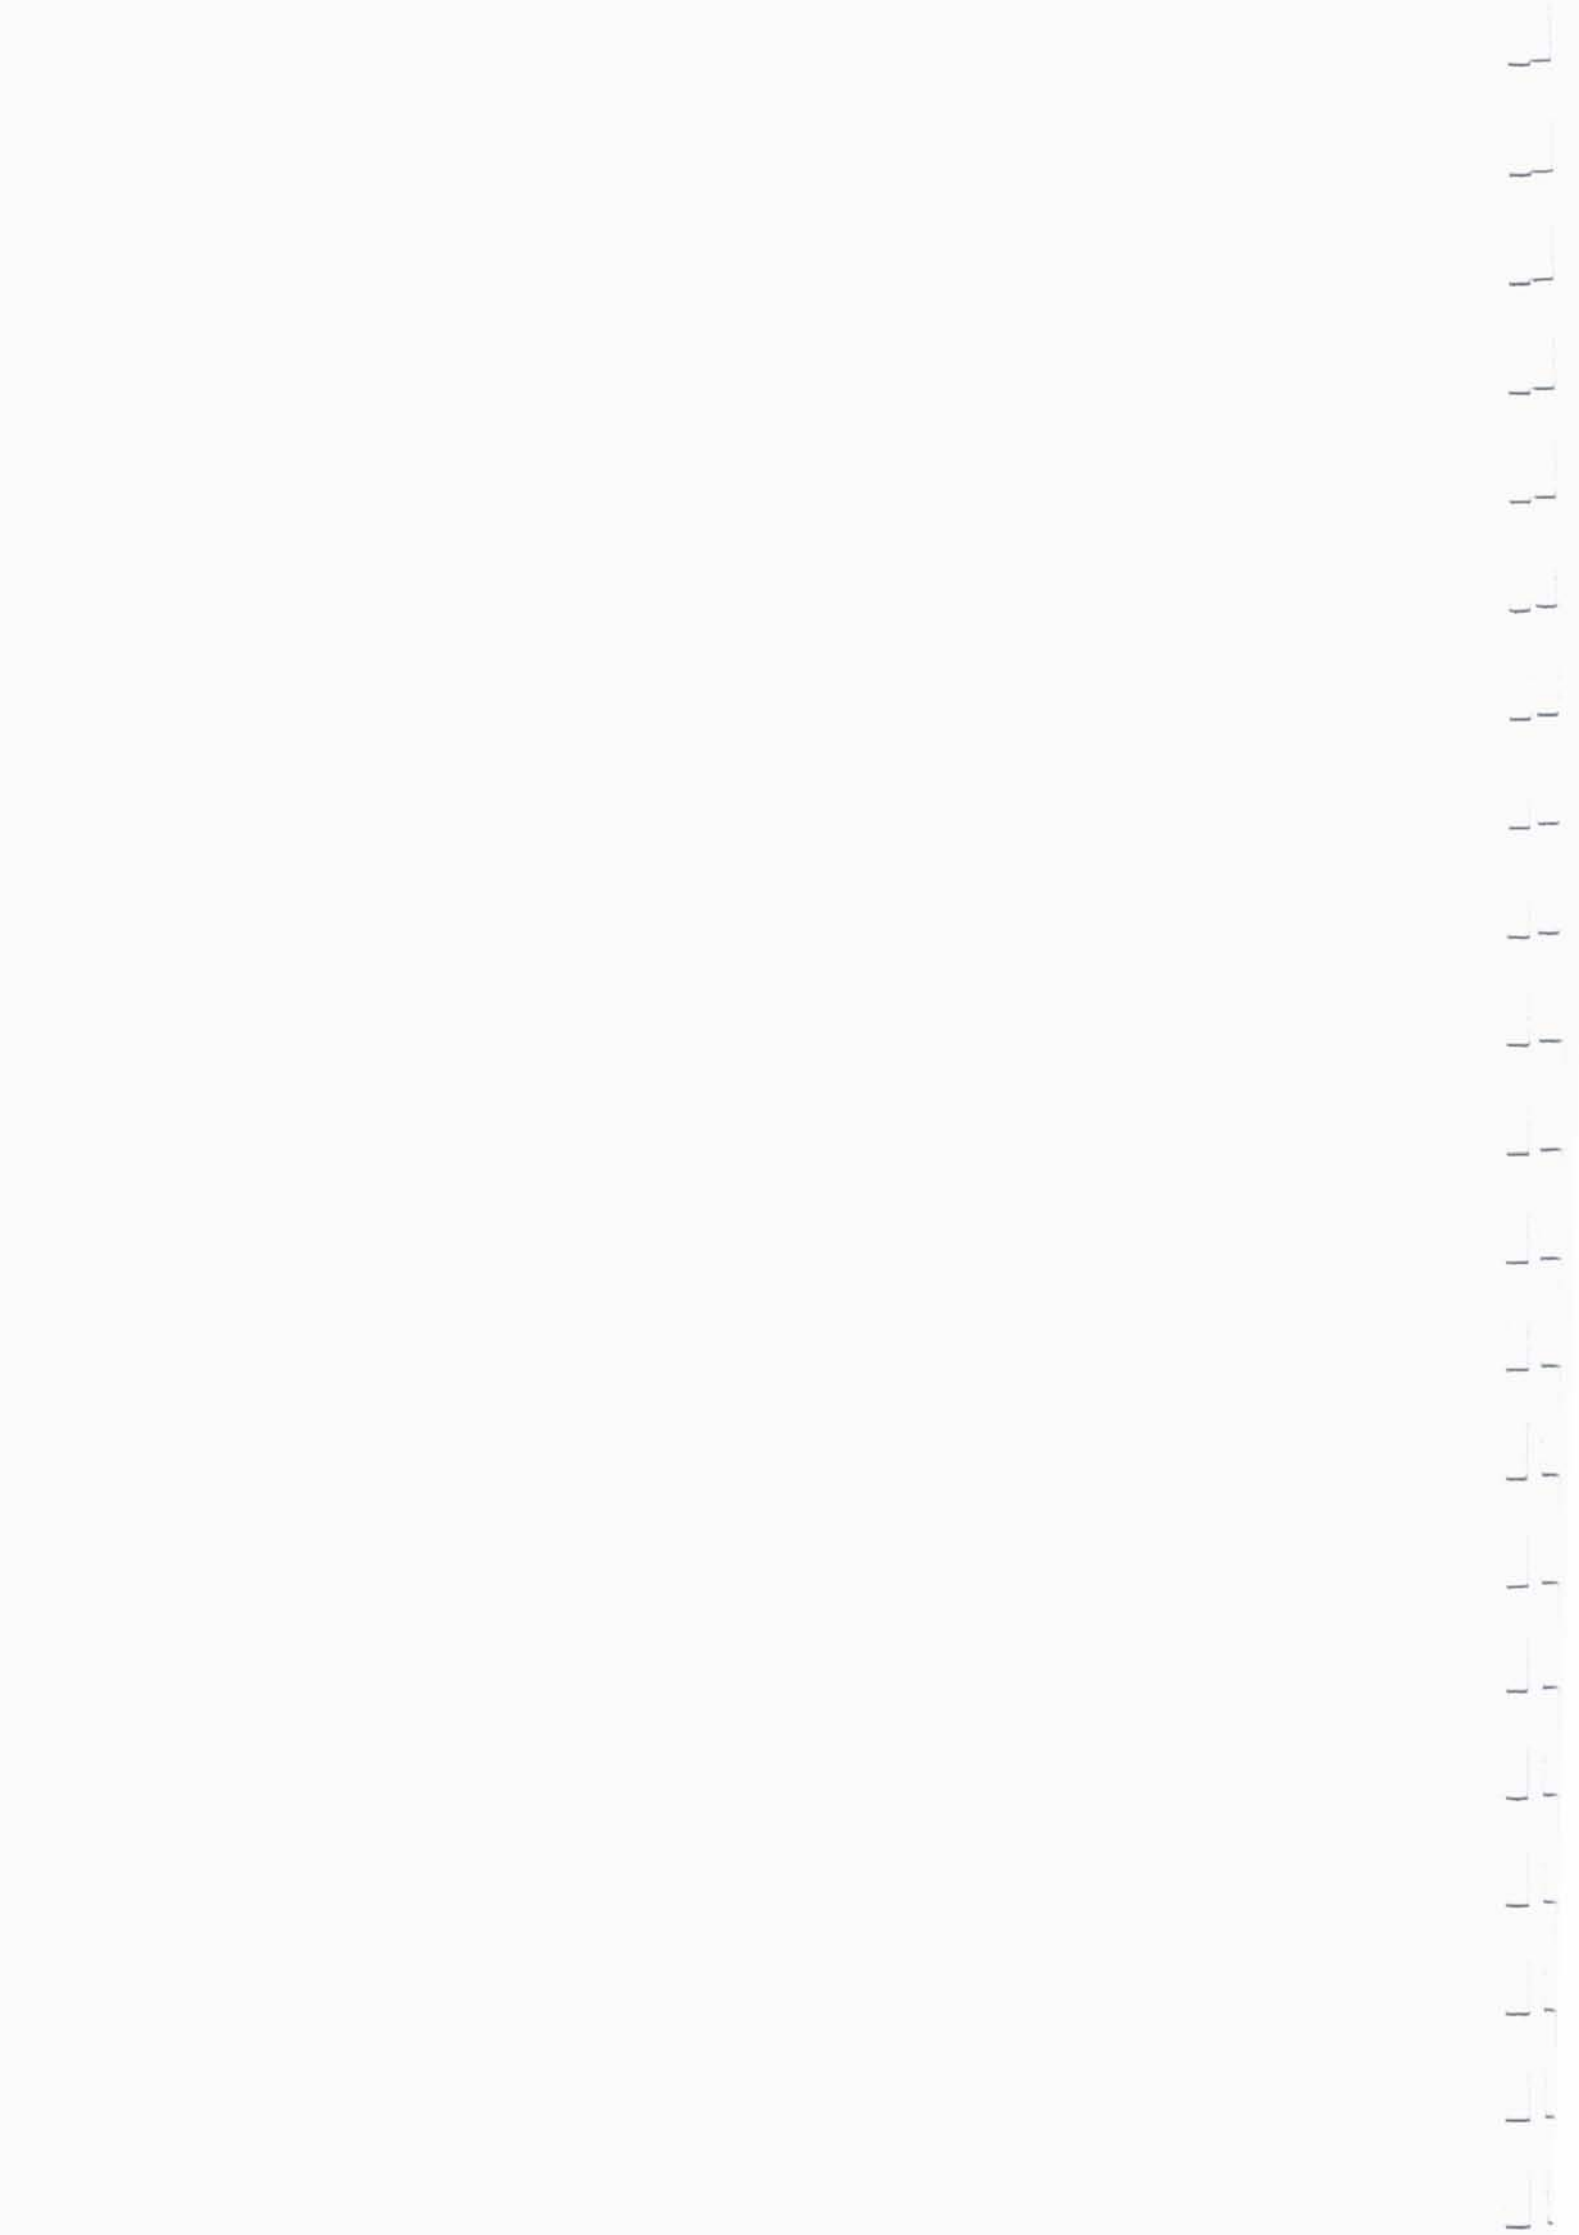

Table 1. Distribution of Sample Clustered Precincts with Complete and Validated RMA Reports by Region: Philippines 2016

Area	Number of Clustered Precincts			Completion Rate (In Percent)
	Population (N)	Sample (n)	Complete and Validated RMA Reports (n')

7. Allowable Margin of “Variance”

Section 12 of COMELEC Resolution No. 8837 dated April 30, 2010 stated that *“In the event the results of the AES exceed the allowable margin of variance, Section 24 of RA 9369 shall apply”*.

Of the 688 complete and processed sample clustered precincts, a total of 330,813 persons have actually voted using the Vote-Counting Machine (VCM). The results of the automated count were then compared to the results using the manual count. Ideally, the number of votes counted by the machine should not be different from the number of votes counted manually. However, after correcting for clerical errors (errors in transposition) and/or mathematical errors (errors in counting and adding of *taras*), discrepancies may still occur due to difference between human and machine appreciation of the marked votes that are considerably ambiguous and/or inadequately shaded.

Assuming a 99.6% accuracy rate, the allowable margin of “variance” is equivalent to at most 0.4 percent (*i.e., equivalent to at most 4 votes’ difference in absolute value for every 1,000 valid votes counted*). This is also equivalent to at most 2 “variance” per position or at most a cumulative 10 “variance” per clustered precinct. At this level, the observed occurrence of “variance” would be too small that can be attributed to a random error that can only occur by chance rather than a systemic error (manipulated error) or error that are not determined by chance

Since most of the verified “variance” can be attributed to human appreciation of the ambiguously/misplaced shaded votes, aiming for a higher accuracy rate to as high as 99.995 percent could be statistically improbable, that is, 1 vote difference in absolute value for every 20,000 valid votes counted which is also equivalent to finding at least 1 “variance” in about 8 clustered precincts combined.

Table 2 shows the Allowable Margin of “Variance” for the positions President, Vice-President, Member, House of Representatives, Governor and Mayor based on the

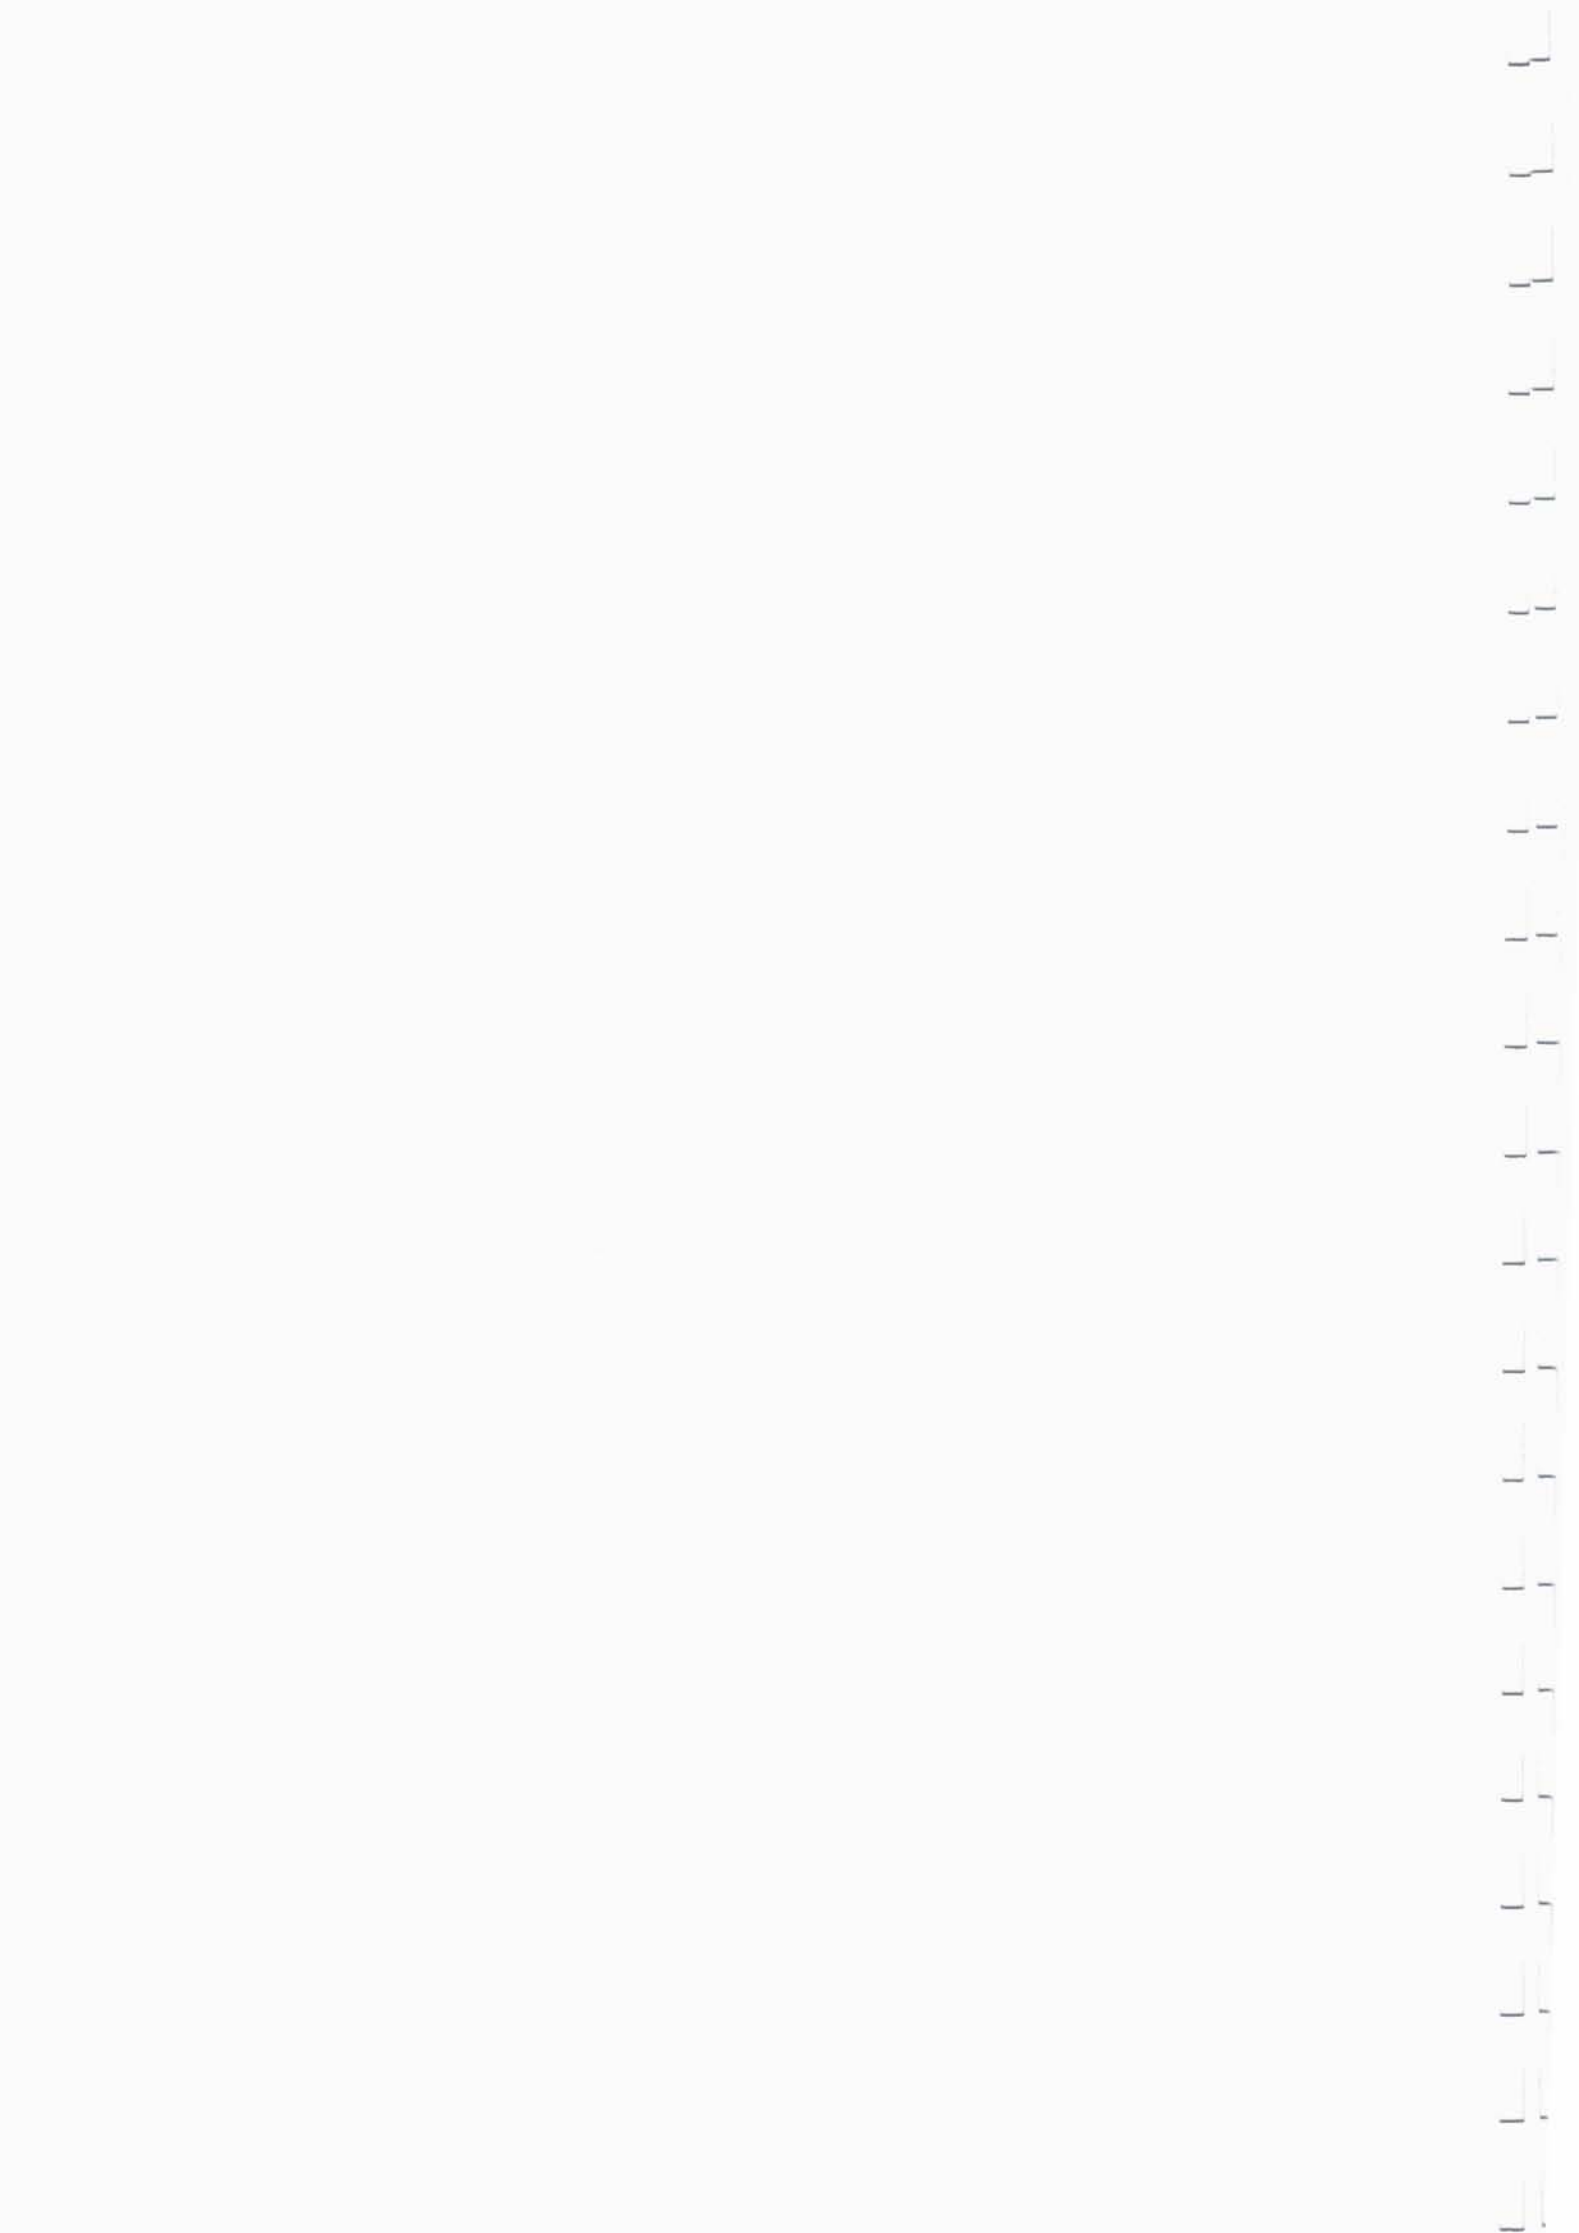

received and processed RMA reports from 688 sample clustered precincts. The term "sample" here refers to the number of clustered precincts drawn randomly from a total of 92,509 clustered precincts in the country.

**Table 2. Allowable Margin of "Variance" for National and Local Positions:
Philippines 2016**

Position	Number of Persons Actually Voted	Number of Valid Votes Counted as per Election Return (ER)	Allowable Margin of "Variance" (0.4 Percent)
President	330,813	313,794	1,255
Vice-President	330,813	302,874	1,211
Member, House of Representatives	330,813	279,223	1,117
Governor	264,601	221,154	885
Mayor	330,813	299,853	1,199

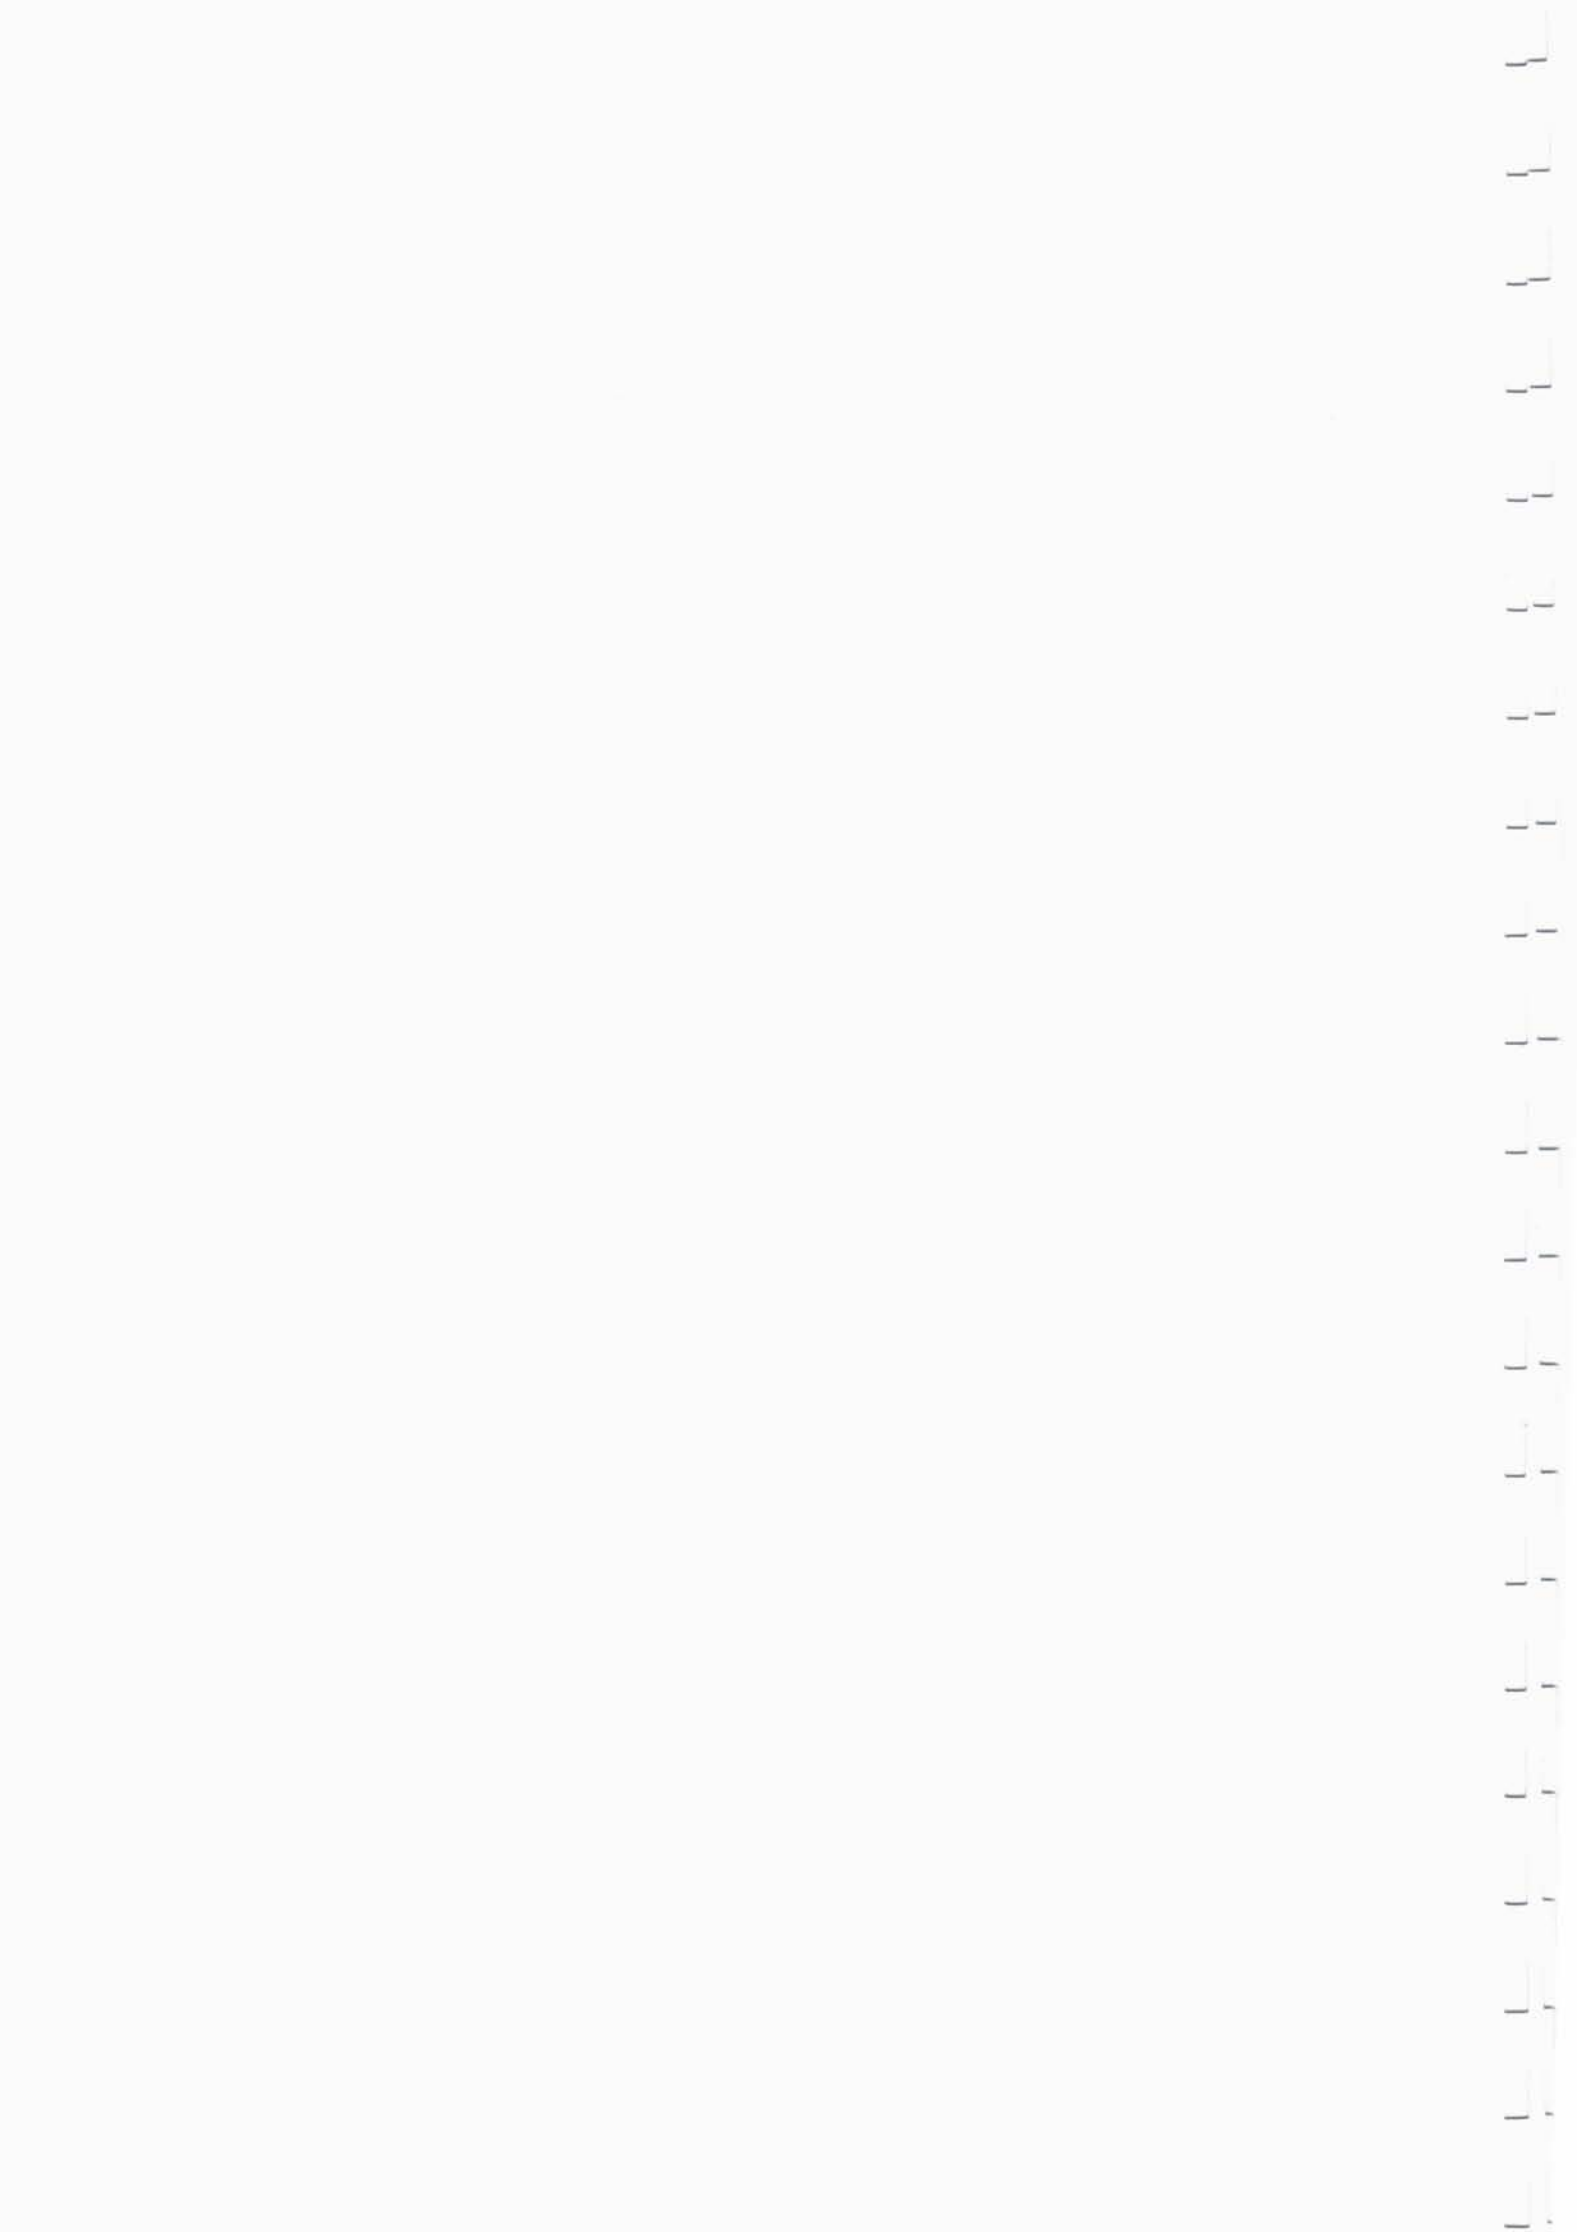

Source: 2016 Random Manual Audit Results as of June 15, 2016

8. Variance Summary Results

The term “variance” here refers to the absolute difference between the number of votes as per ER and RMA. The “variance” was computed at the sample clustered precinct level. The sum of “variance” at the regional level was computed by adding all the “variance” computed at the legislative districts within the region. The national total “variance” is the sum of the “variance” of all the regions. *Table 3a* shows the variance summary results.

Table 3a. Variance Summary Results: Philippines, 2016

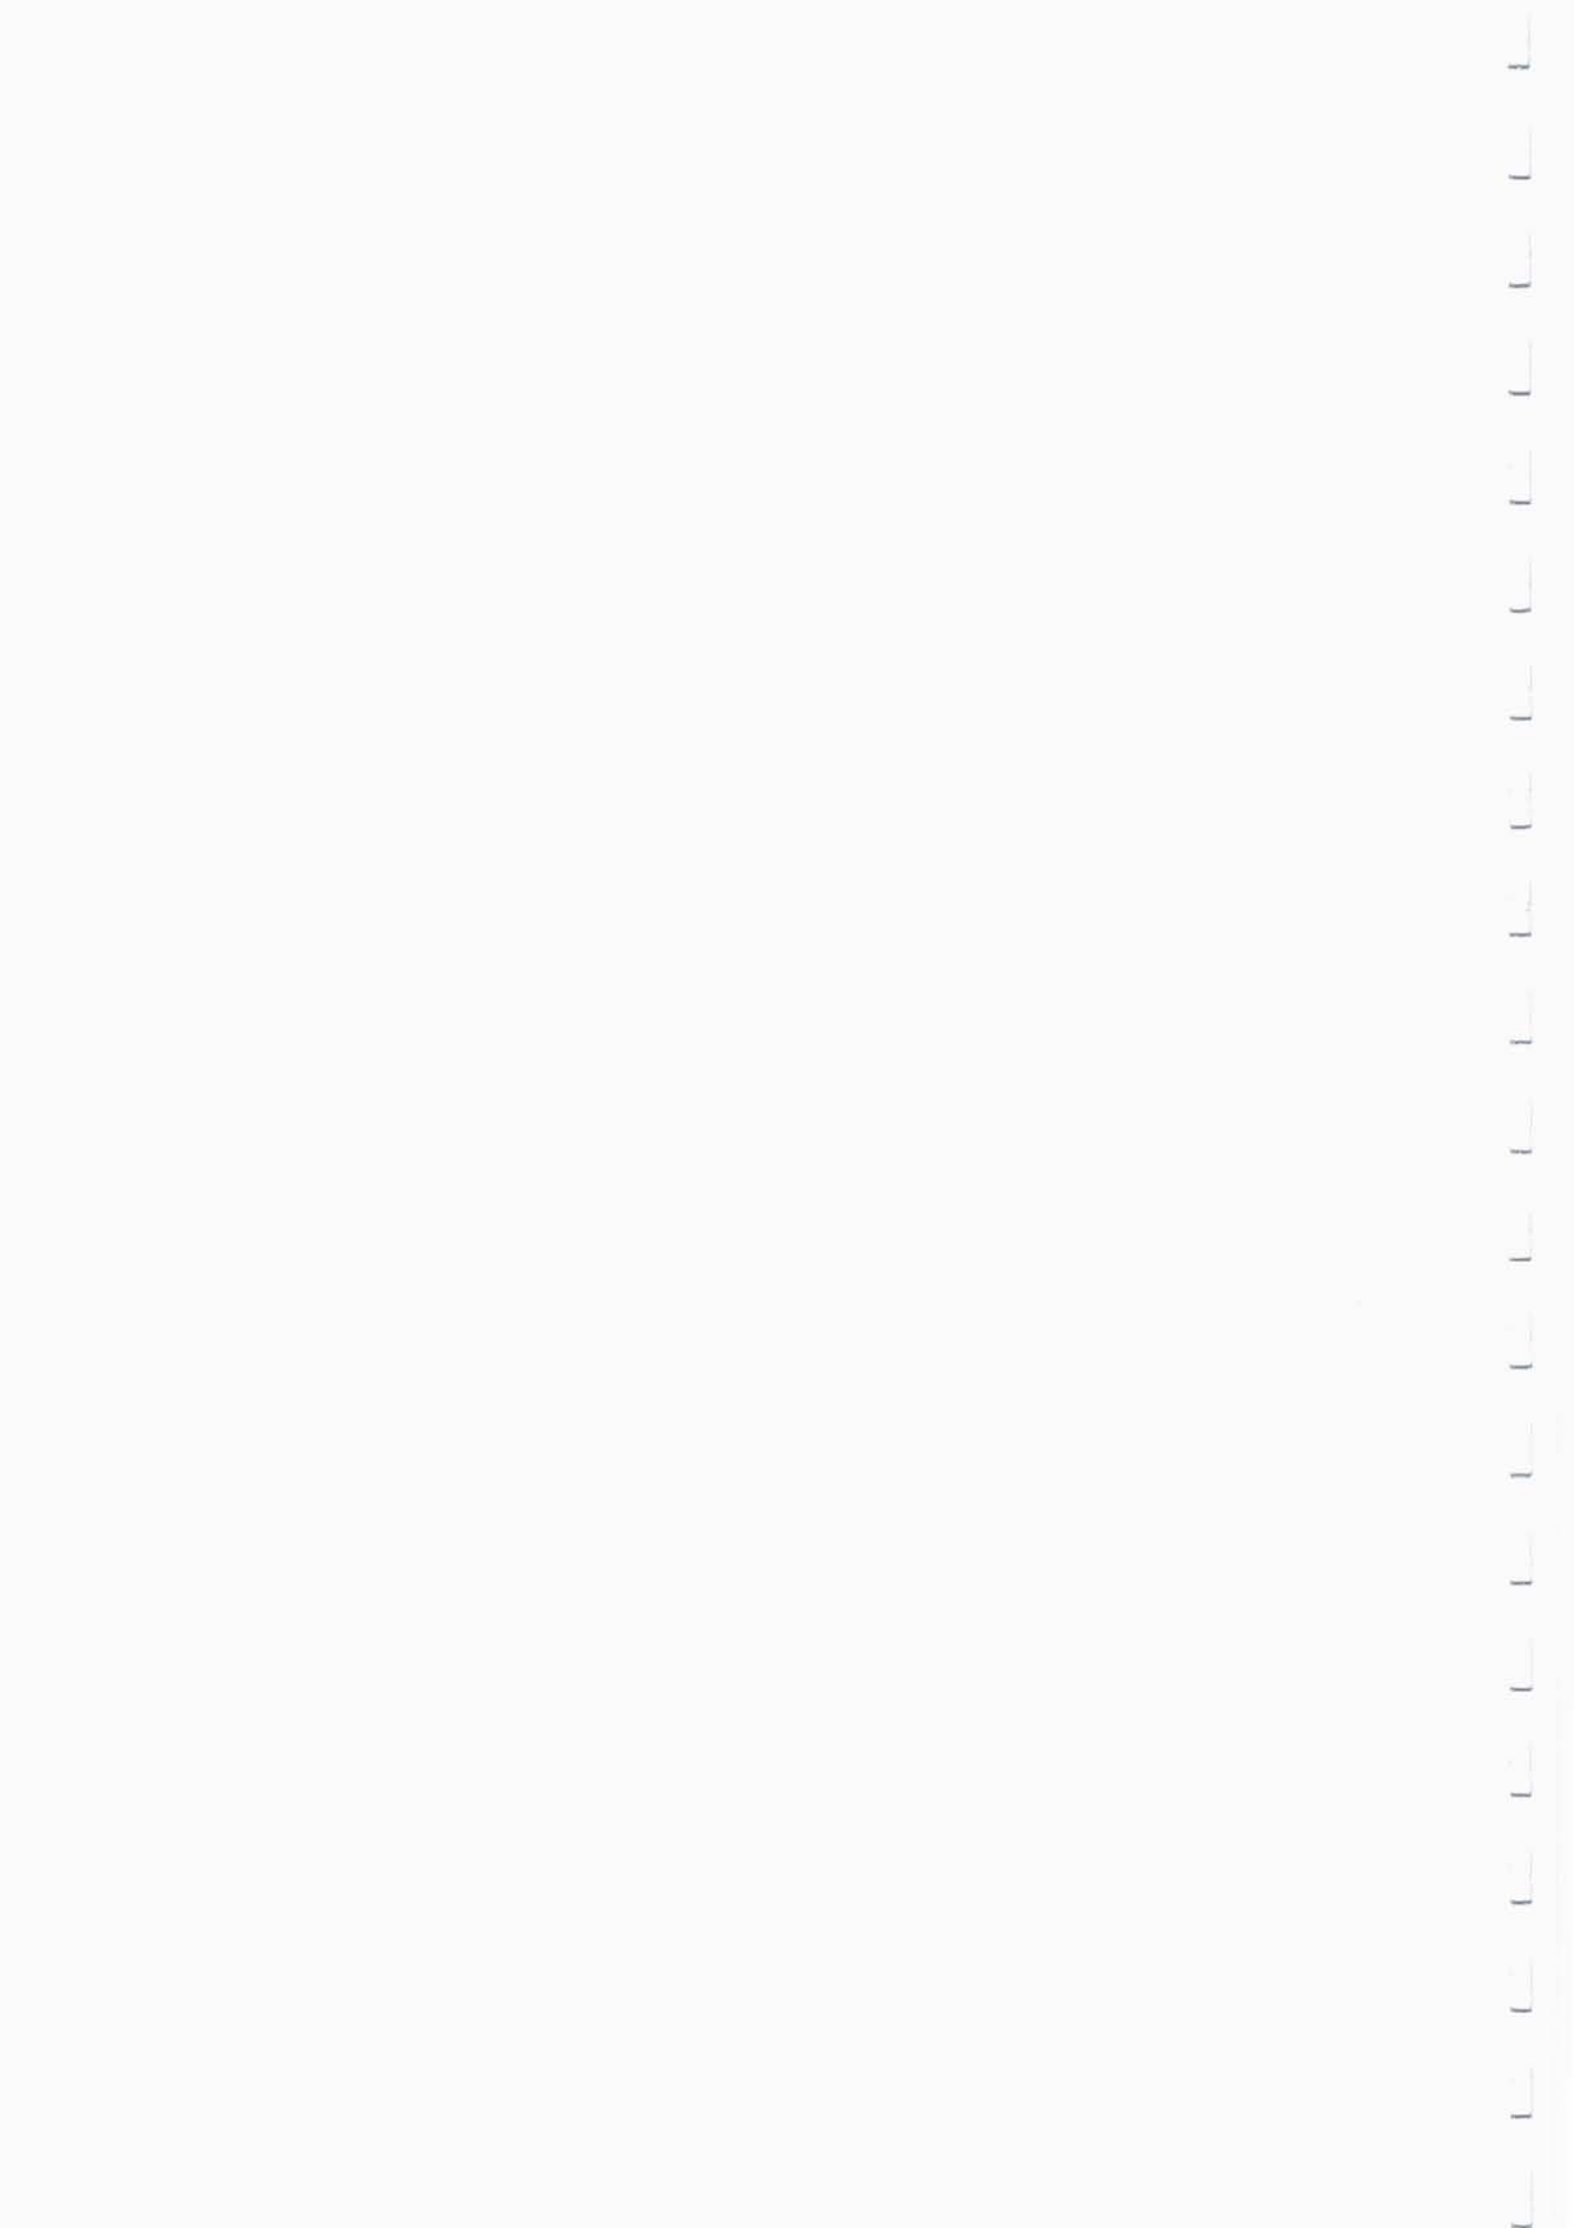

Area	Total Variance (In Absolute Value)				
	President	Vice-President	Member, House of Representatives	Governor	Mayor

8.1 Distribution of Clustered Precinct that Underwent Further Validation Process

Clustered precincts with large “variance” were identified for further validation. In a particular clustered precinct, a “variance” is considered large if the cumulative variance for all candidates in all five positions (i.e., President, Vice-President, Member of House of Representatives, Governor, and Mayor) is more than 10. The validation includes the determination of the possible source of discrepancies. Variances found due to clerical/mathematical errors were immediately corrected and reflected in the variance summary results. However, errors other than clerical/mathematical will be referred to the Technical Evaluation Committee.

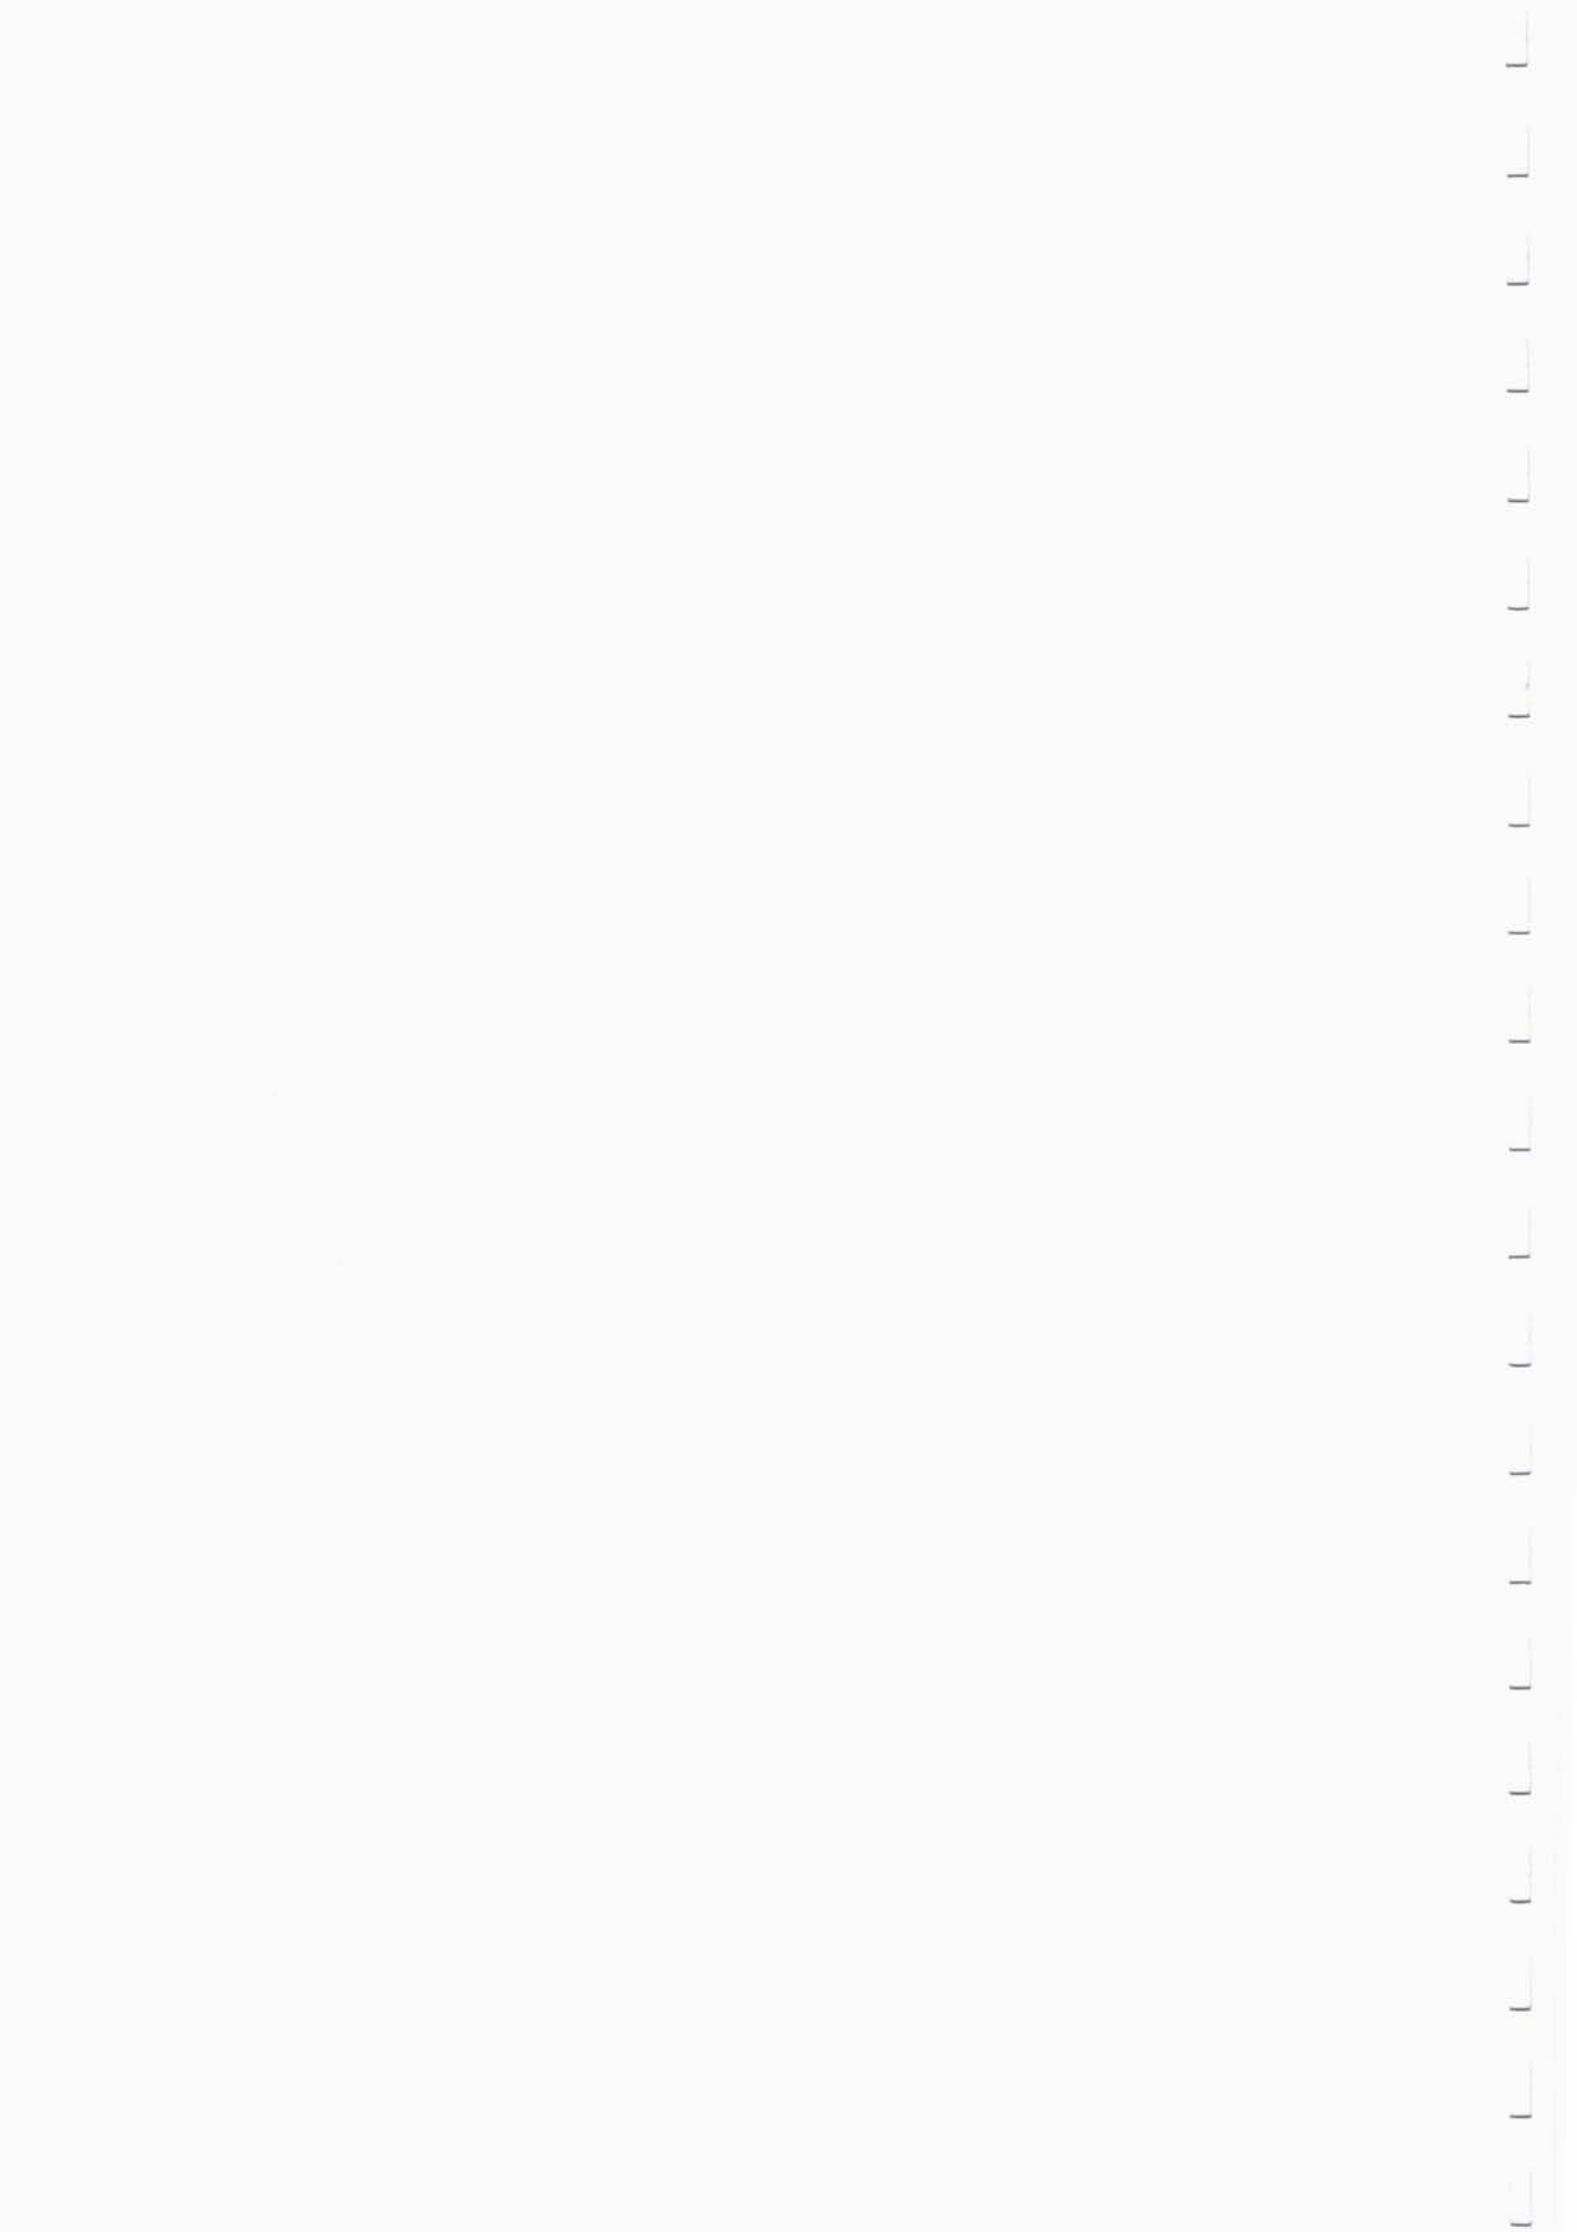

Of the 687 completed sample clustered precincts, 433 or 63 percent underwent the validation process because these clustered precincts have a large "variance". After the validation process, 403 clustered precincts with previously large "variance" were corrected resulting into zero "variance" while 30 clustered precincts still has "variance".

Table 3b. Distribution of Clustered Precincts with Large "Variance" that Underwent Validation by Region

Area	Number of Sample Clustered Precincts with Large "variance"		
	With zero "variance" after validation	With at most 10 "variance" after validation	Total

8.2 Variance for Presidential Position

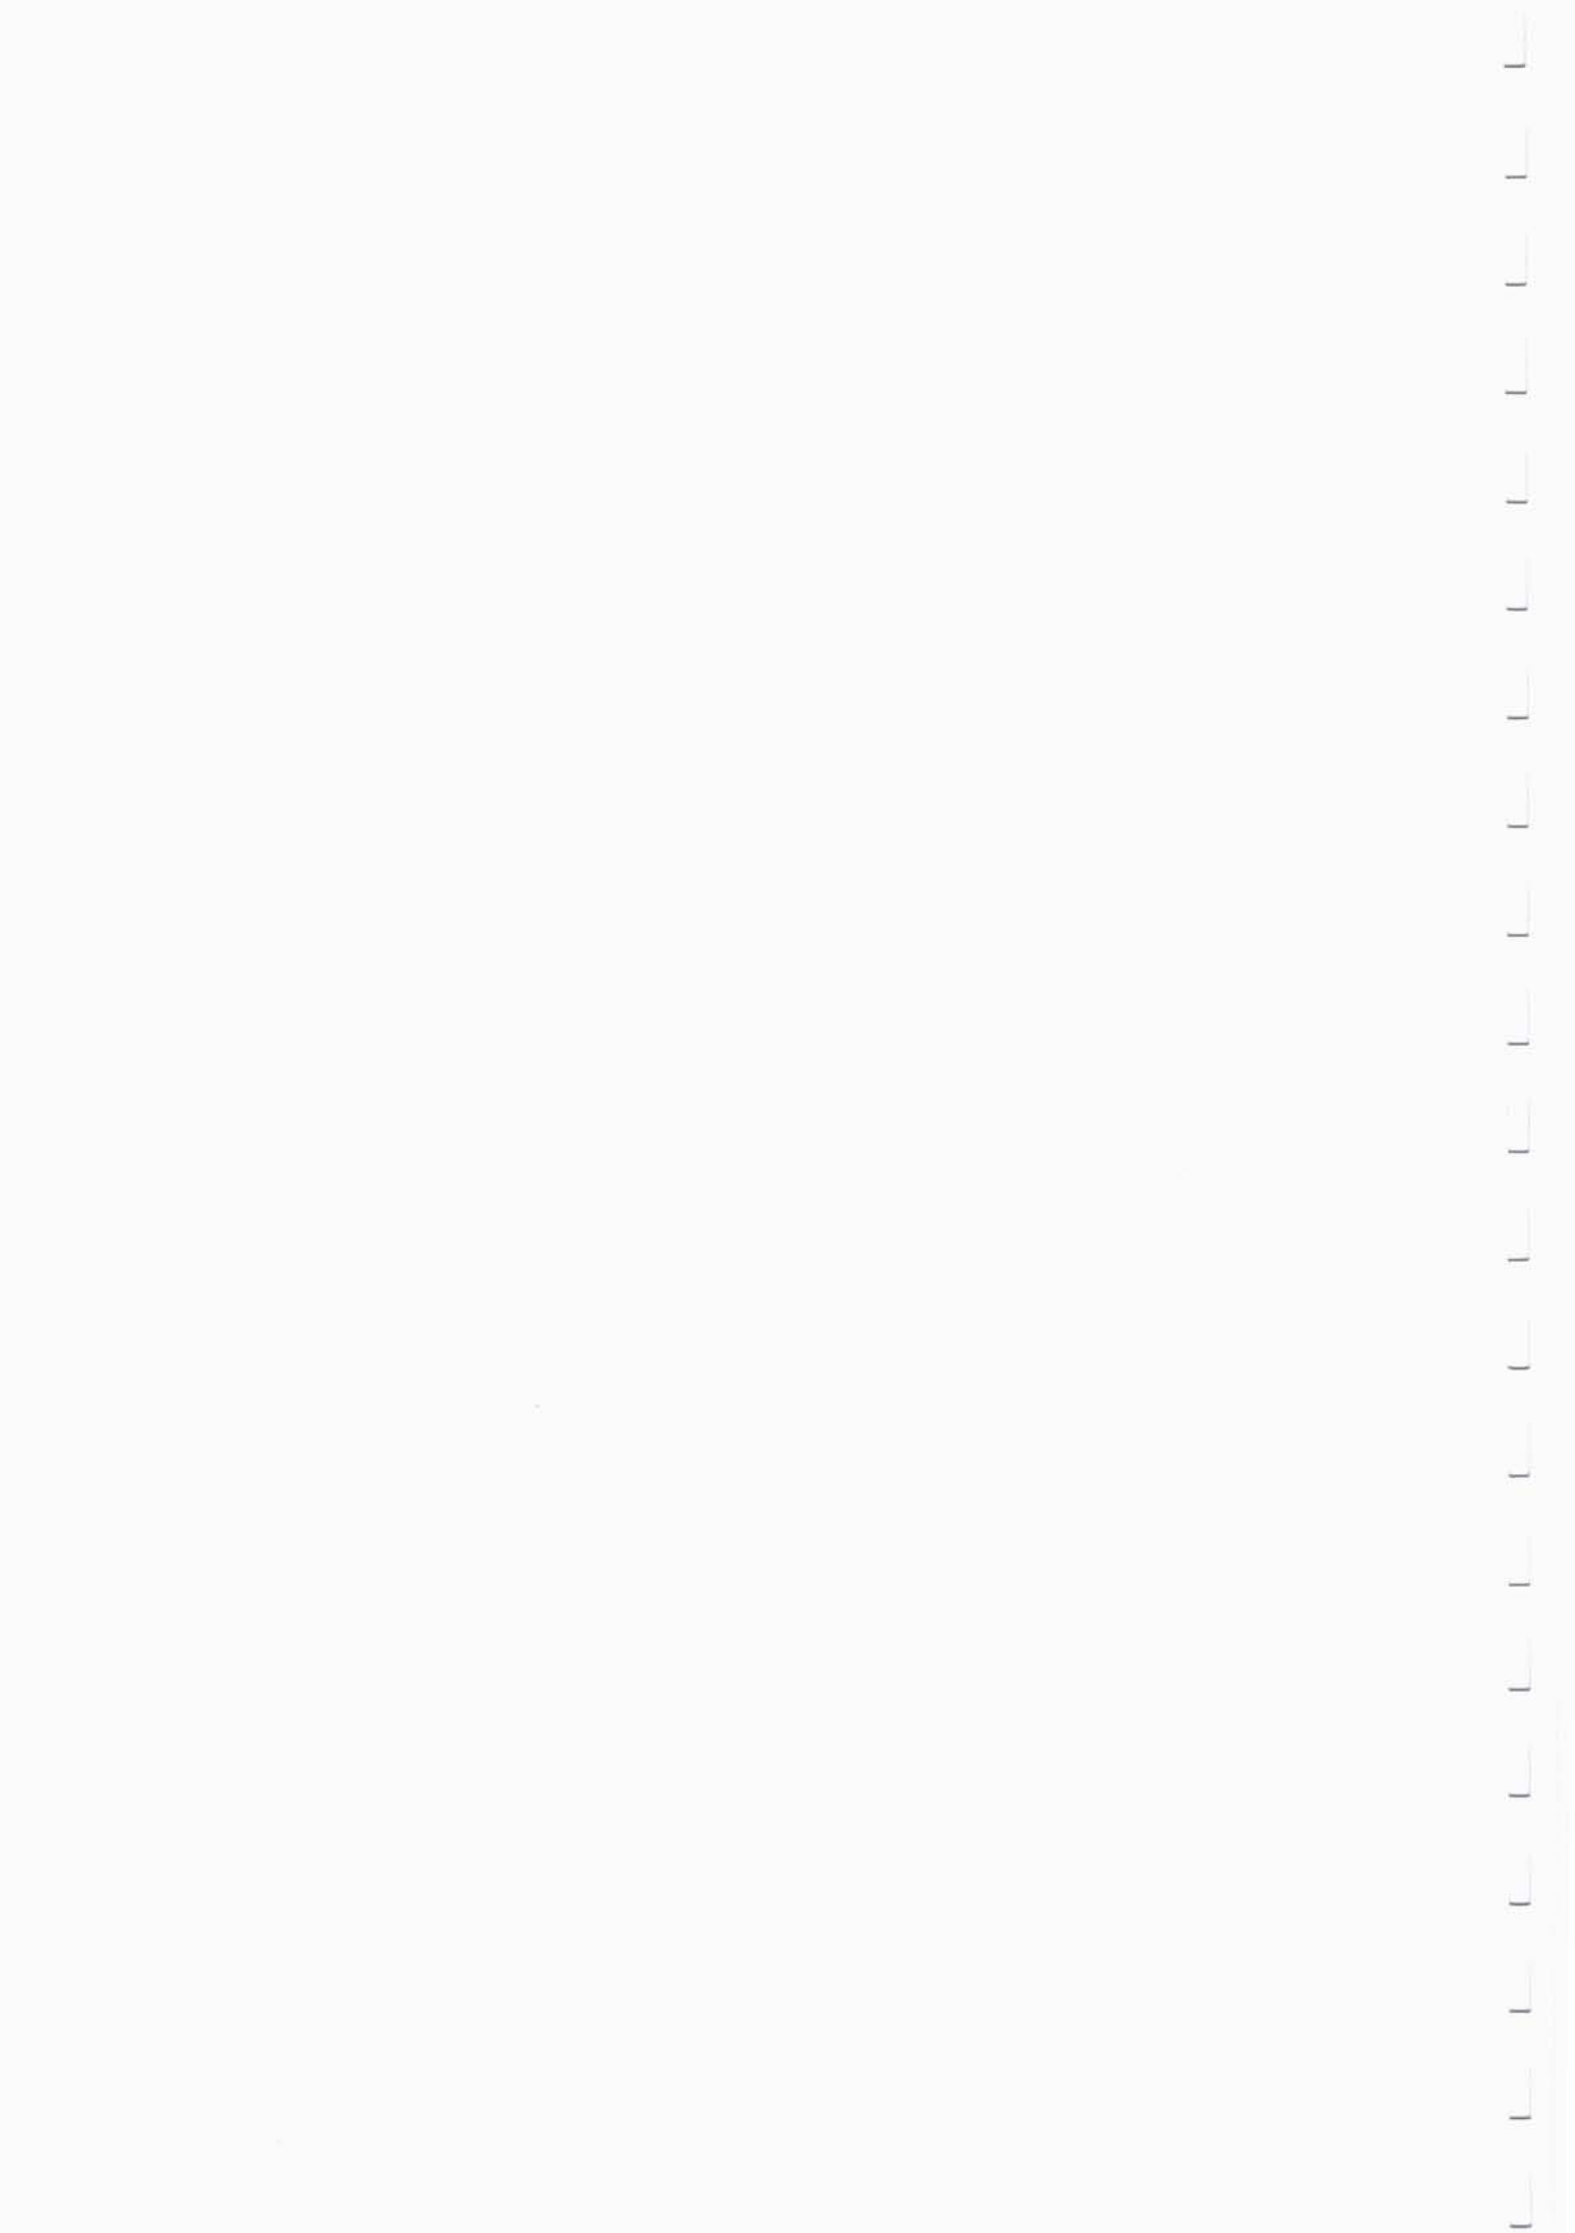

The cumulative "variance" or votes' difference for presidential position at the national level was tallied at 332 votes. The computed percentage variance was at 0.1058 percent that resulted to 99.89 percent accuracy rate. The percentage variance is the ratio between the total "variance" and the total number of valid votes as per ER.

Among the regions, Region 3 registered the largest "variance" of 68 votes' difference. This was followed by NCR (43 votes' difference) and Region 4A with 35 votes' difference. Only 3 votes' difference as per ER and RMA was noted in CAR. Table 4a shows the regional distribution of total variances for presidential position.

Table 4a. Variance Summary Results for Presidential Position: Philippines 2016

8.3 Variance for Vice-Presidential Position

The “variance” for the Vice-Presidential position that had a cumulative total of 310 votes’ difference resulted to 0.1024 percentage variance. Region 3 tallied 50 votes’ difference while Region 4A had 49 votes’ variance. It was followed by NCR with 44 votes share to total “variance”. Caraga had only 2 votes’ difference between automated and manual count, the lowest cumulative variance among the regions. Table 4b shows the regional breakdown of total variances for Vice-Presidential position.

**Table 4b. Variance Summary Results for Vice-Presidential Position: Philippines

8.4 Variance for Member, House of Representatives

A total cumulative "variance" of 230 votes was tallied for member, house of representative position out of the 279,223 valid votes counted by the machine. The resulting percentage variance was computed at 0.0824 percent. The highest tallied votes' difference (47 votes) was observed in National Capital Region. It was followed by Region 3 and Region 4A (29 votes' difference), and Region 8 (20 votes' difference).

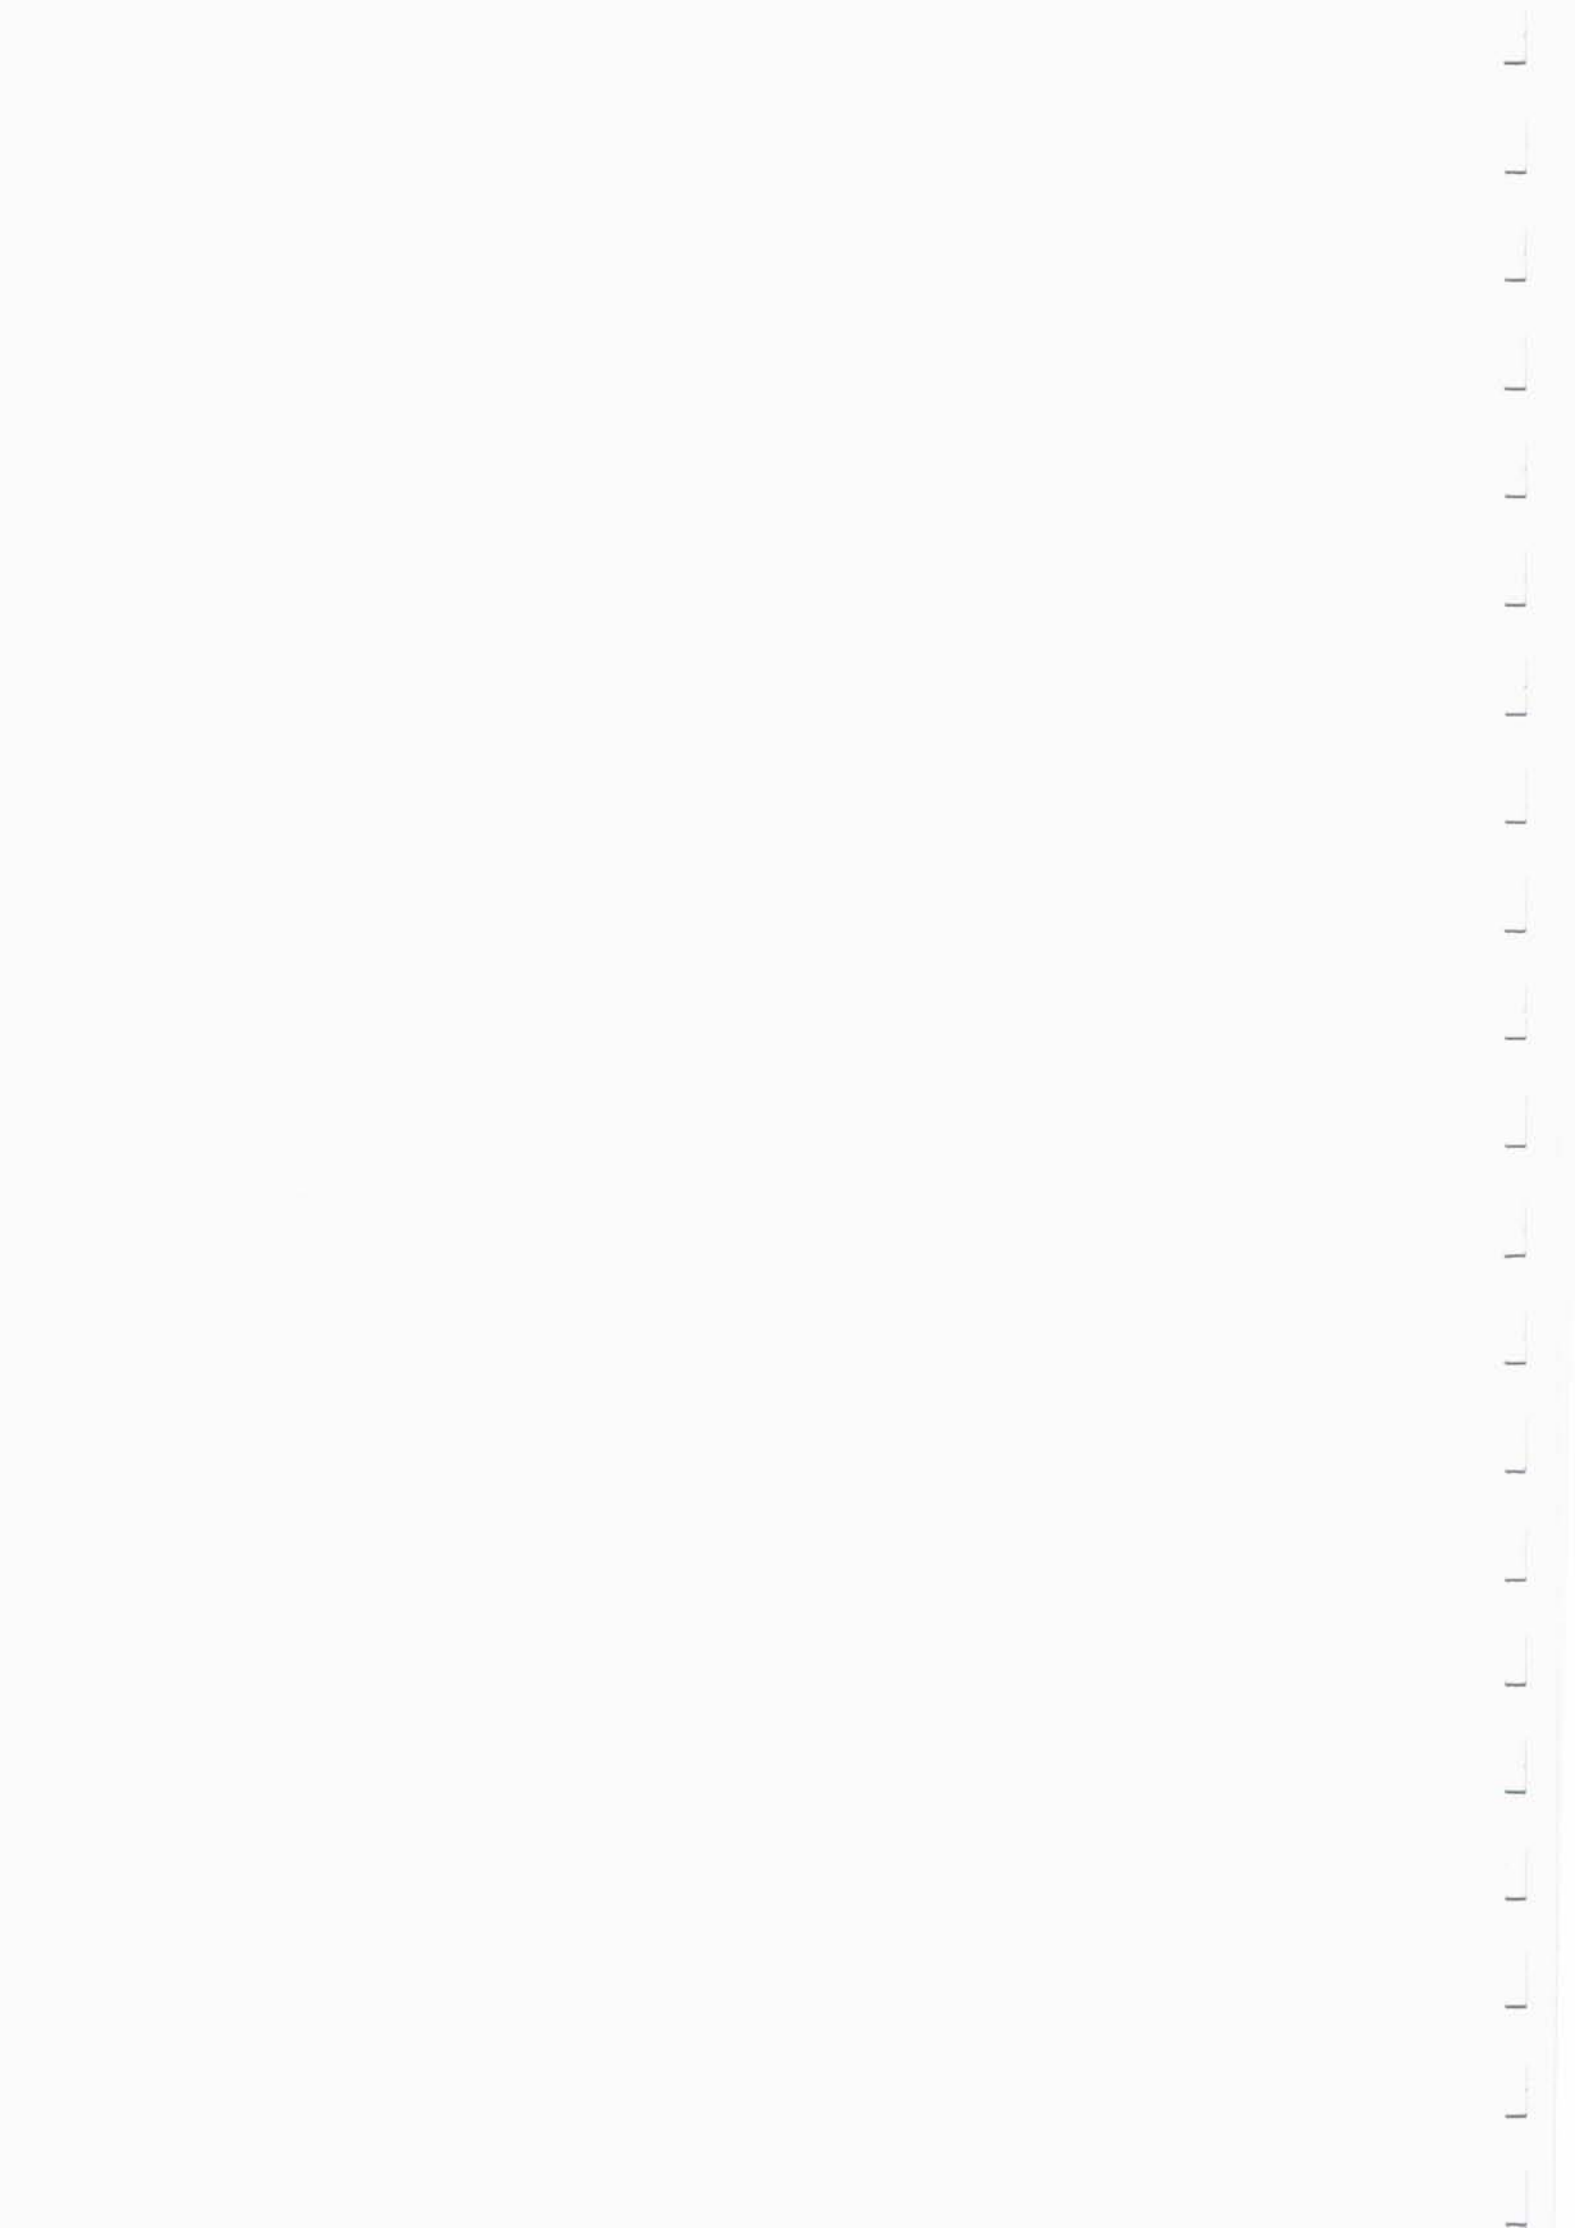

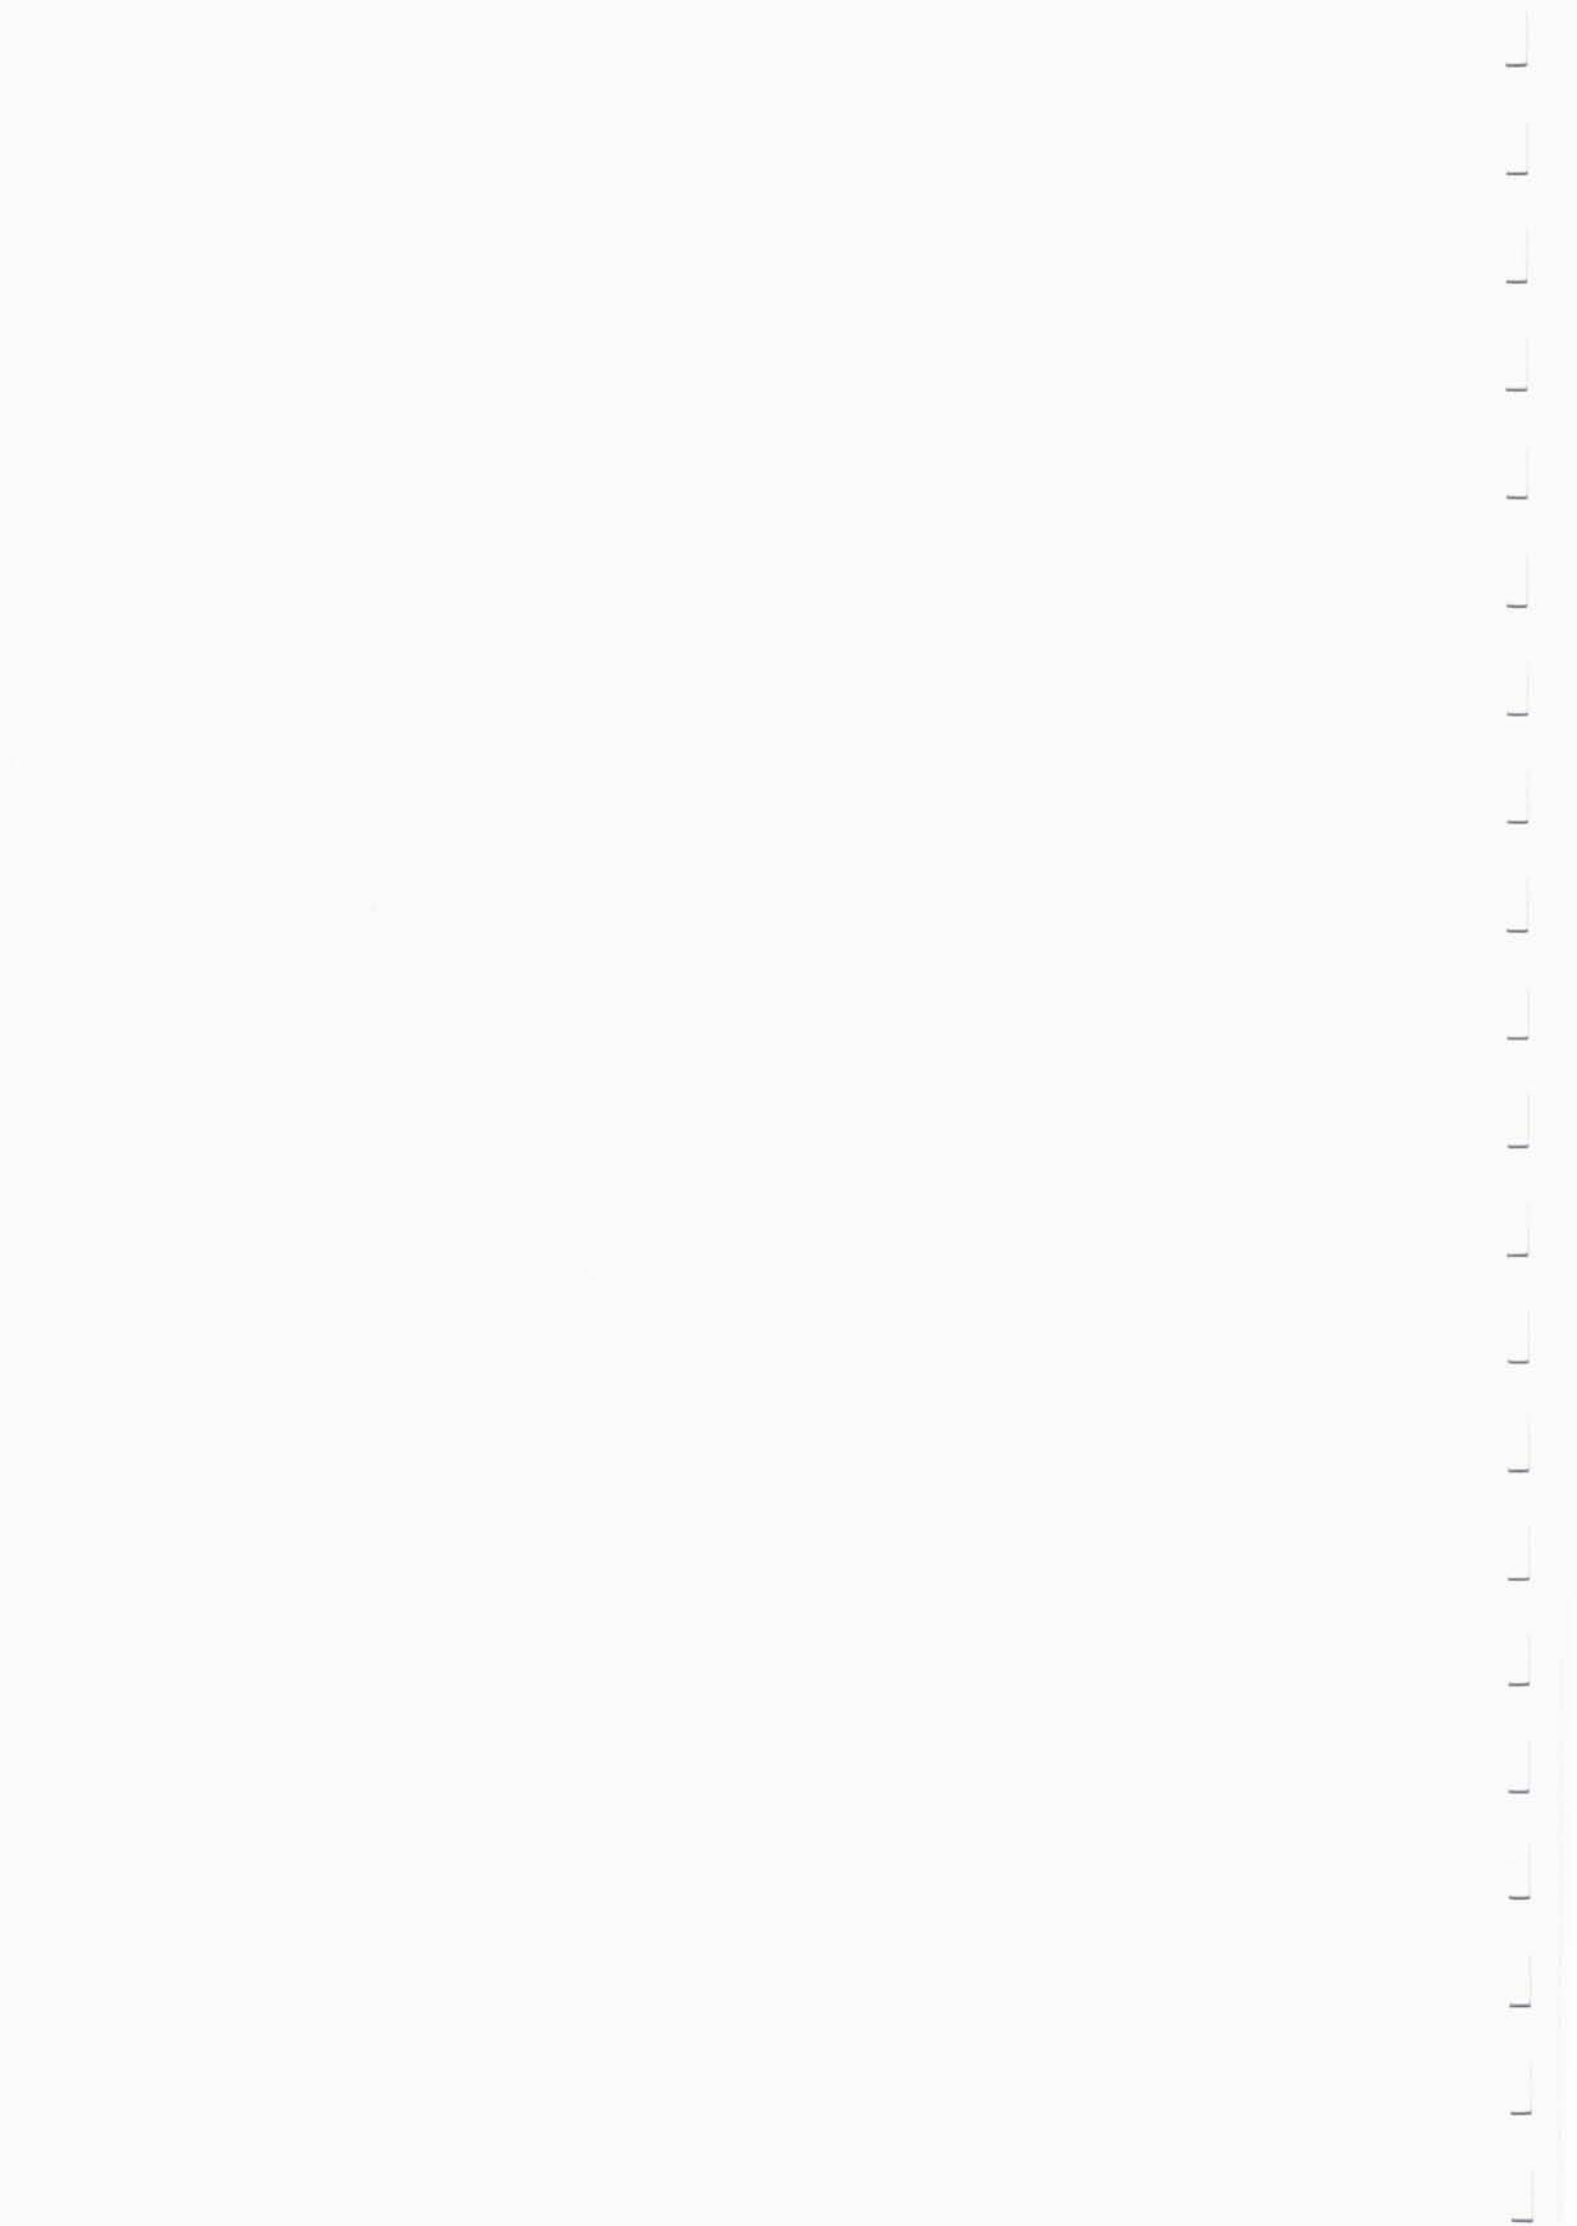

Table 4c shows the distribution of total variances for Member, House of Representatives position by region.

Table 4c. Variance Summary Results for Member, House of Representatives Position: Philippines 2016

8.6 Variance for Mayoralty Position

The Mayoralty Position had a cumulative total of 304 votes' difference that resulted to 0.1014 percentage variance. The National Capital Region had the highest cumulative variance tallied at 47 votes' difference each while Region 4A followed with 43 votes' variance. Table 4e shows the regional breakdown of total variances for the Mayoralty position.

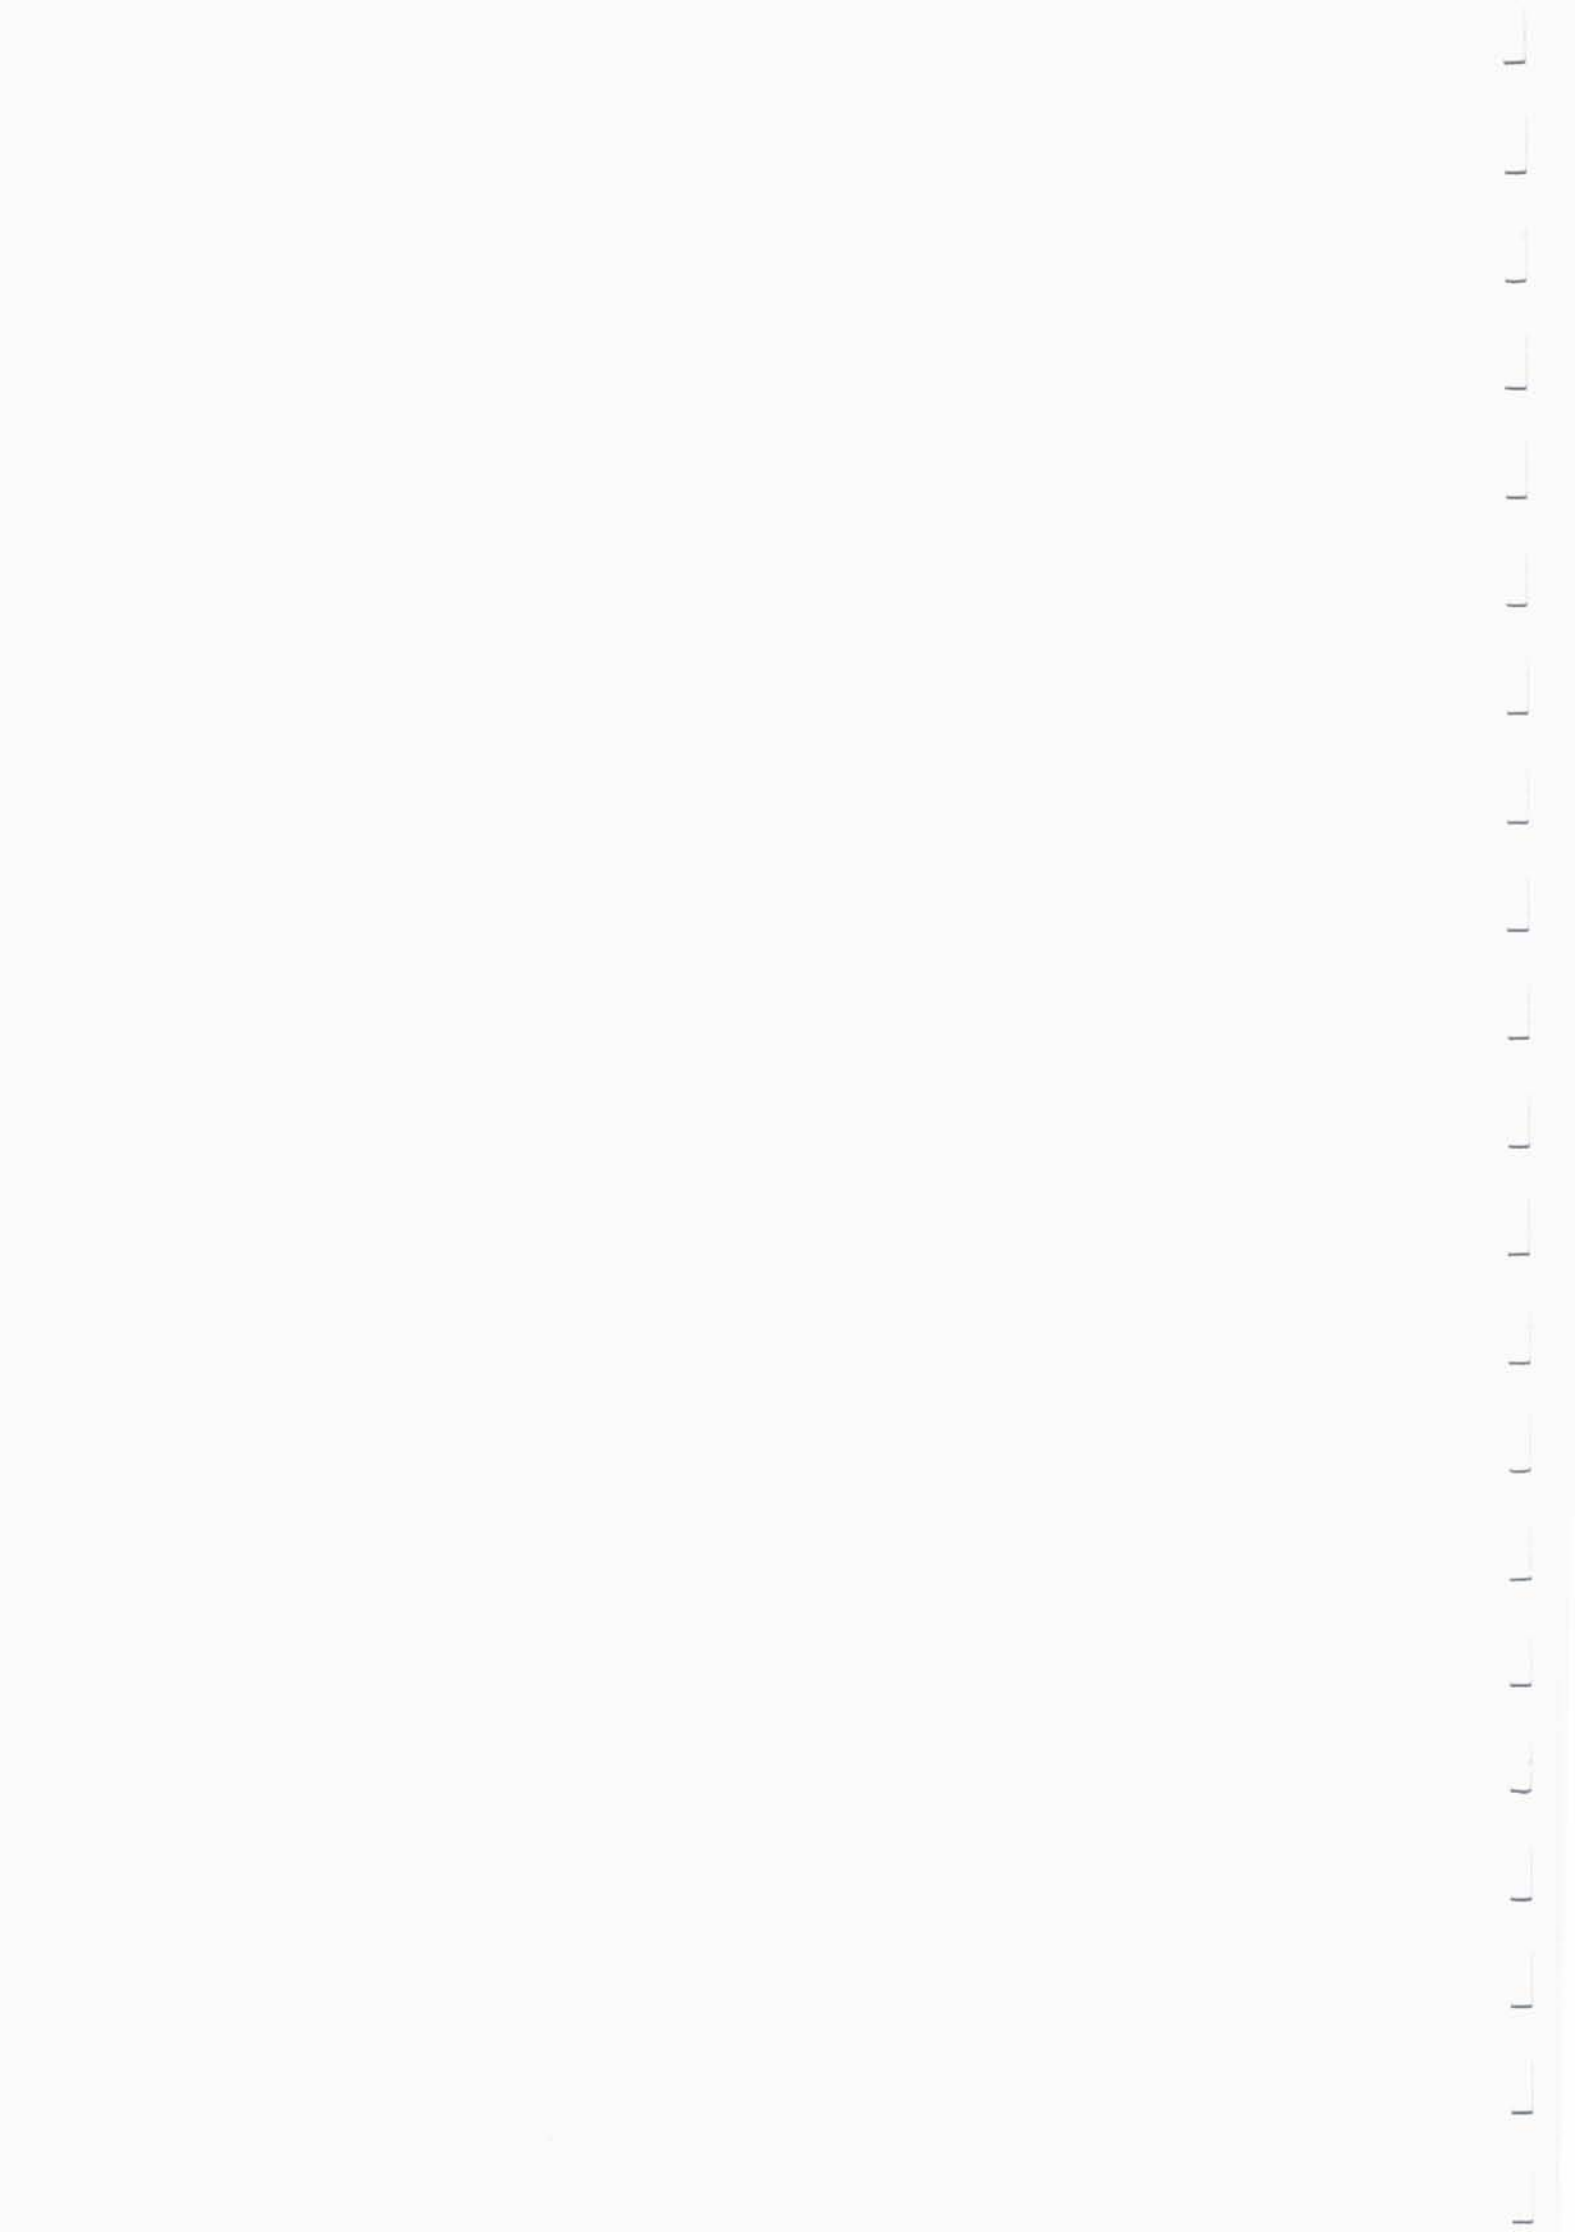

Table 4e. Variance Summary Results for Mayoralty Position: Philippines 2016

9. Accuracy Rate

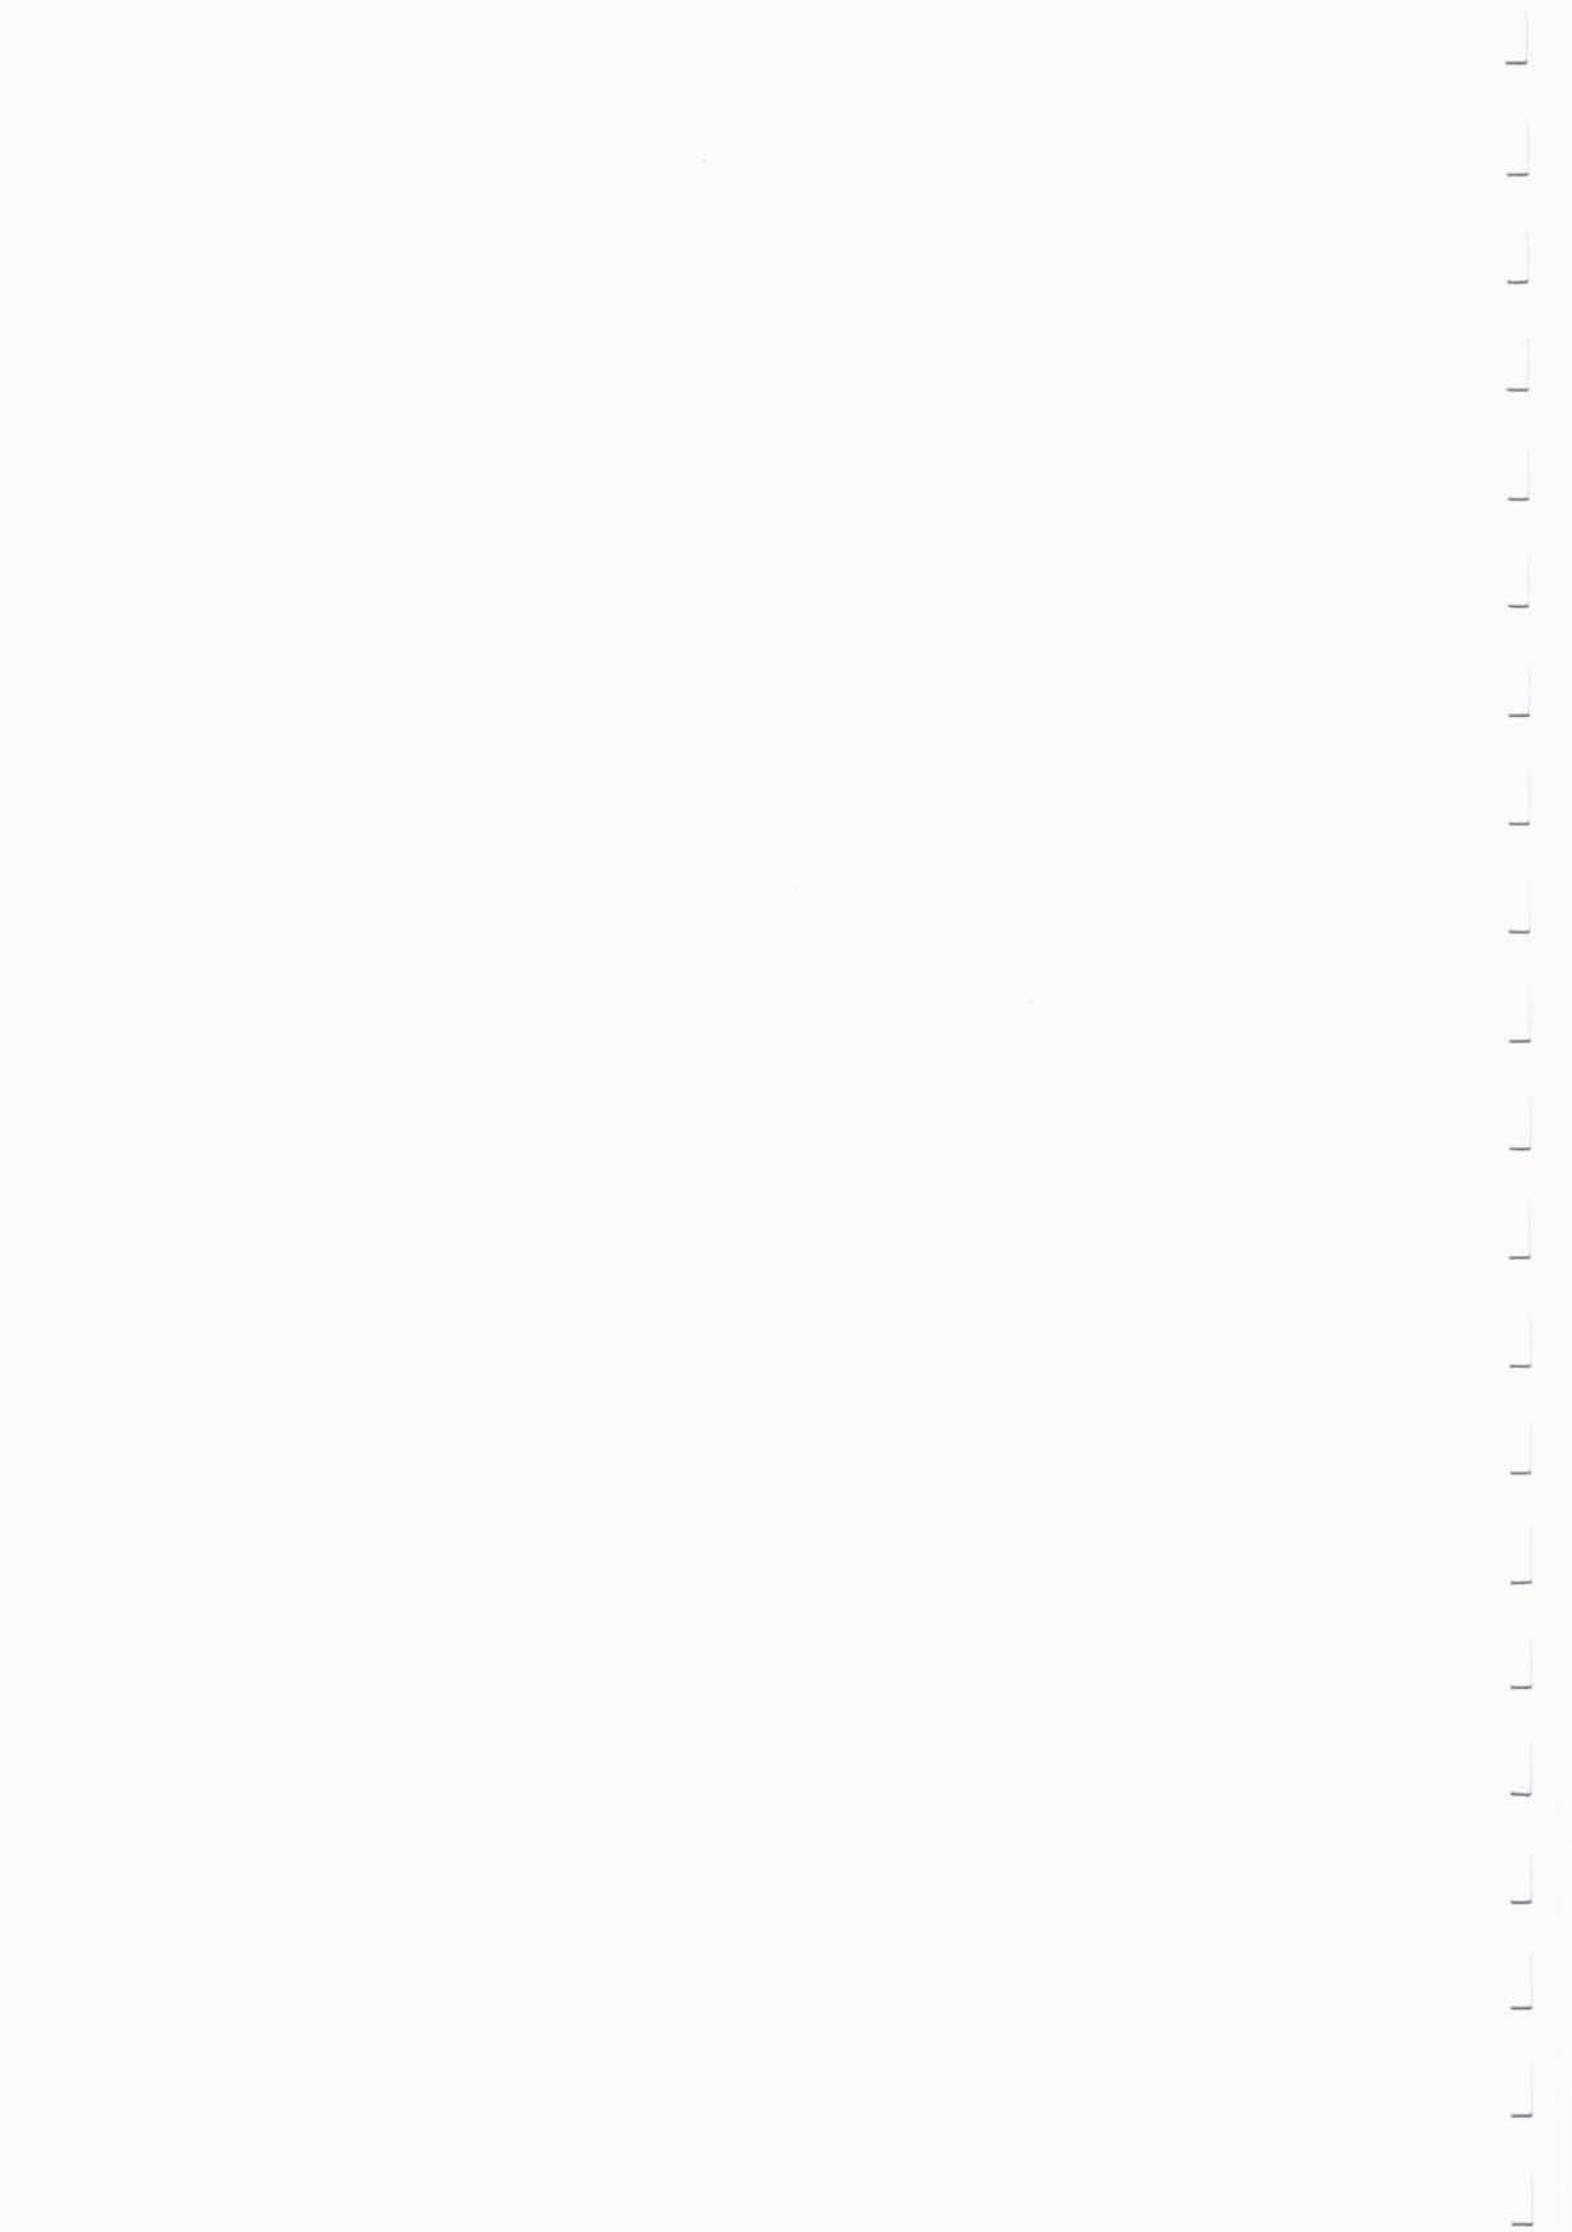

The accuracy rate for each RMA position is computed as the ratio between the cumulative "variance" and the total votes per ER. This can also be determined as the complement of percentage variance.

At the national level the overall accuracy rate for all positions was estimated at 99.9 percent. (Table 5a).

Table5a. Summary Report on Variance and Accuracy Rate

RMA Position	Total		Variance (Difference between ER and RMA)			Accuracy Rate
	Per ER	Per RMA	In absolute value	Negative	Positive	
President	313,794	313,850	332	-194	138	99.8942
Vice President	302,874	302,934	310	-185	125	99.8976
Member, House of Representatives	279,223	279,323	230	-165	65	99.9176
Governor	221,154	221,239	209	-147	62	99.9055
Mayor	299,853	299,959	304	-205	99	99.8986
Based from 687 of 715 or 96.08% of total clustered precincts			Average Overall Accuracy			99.9027

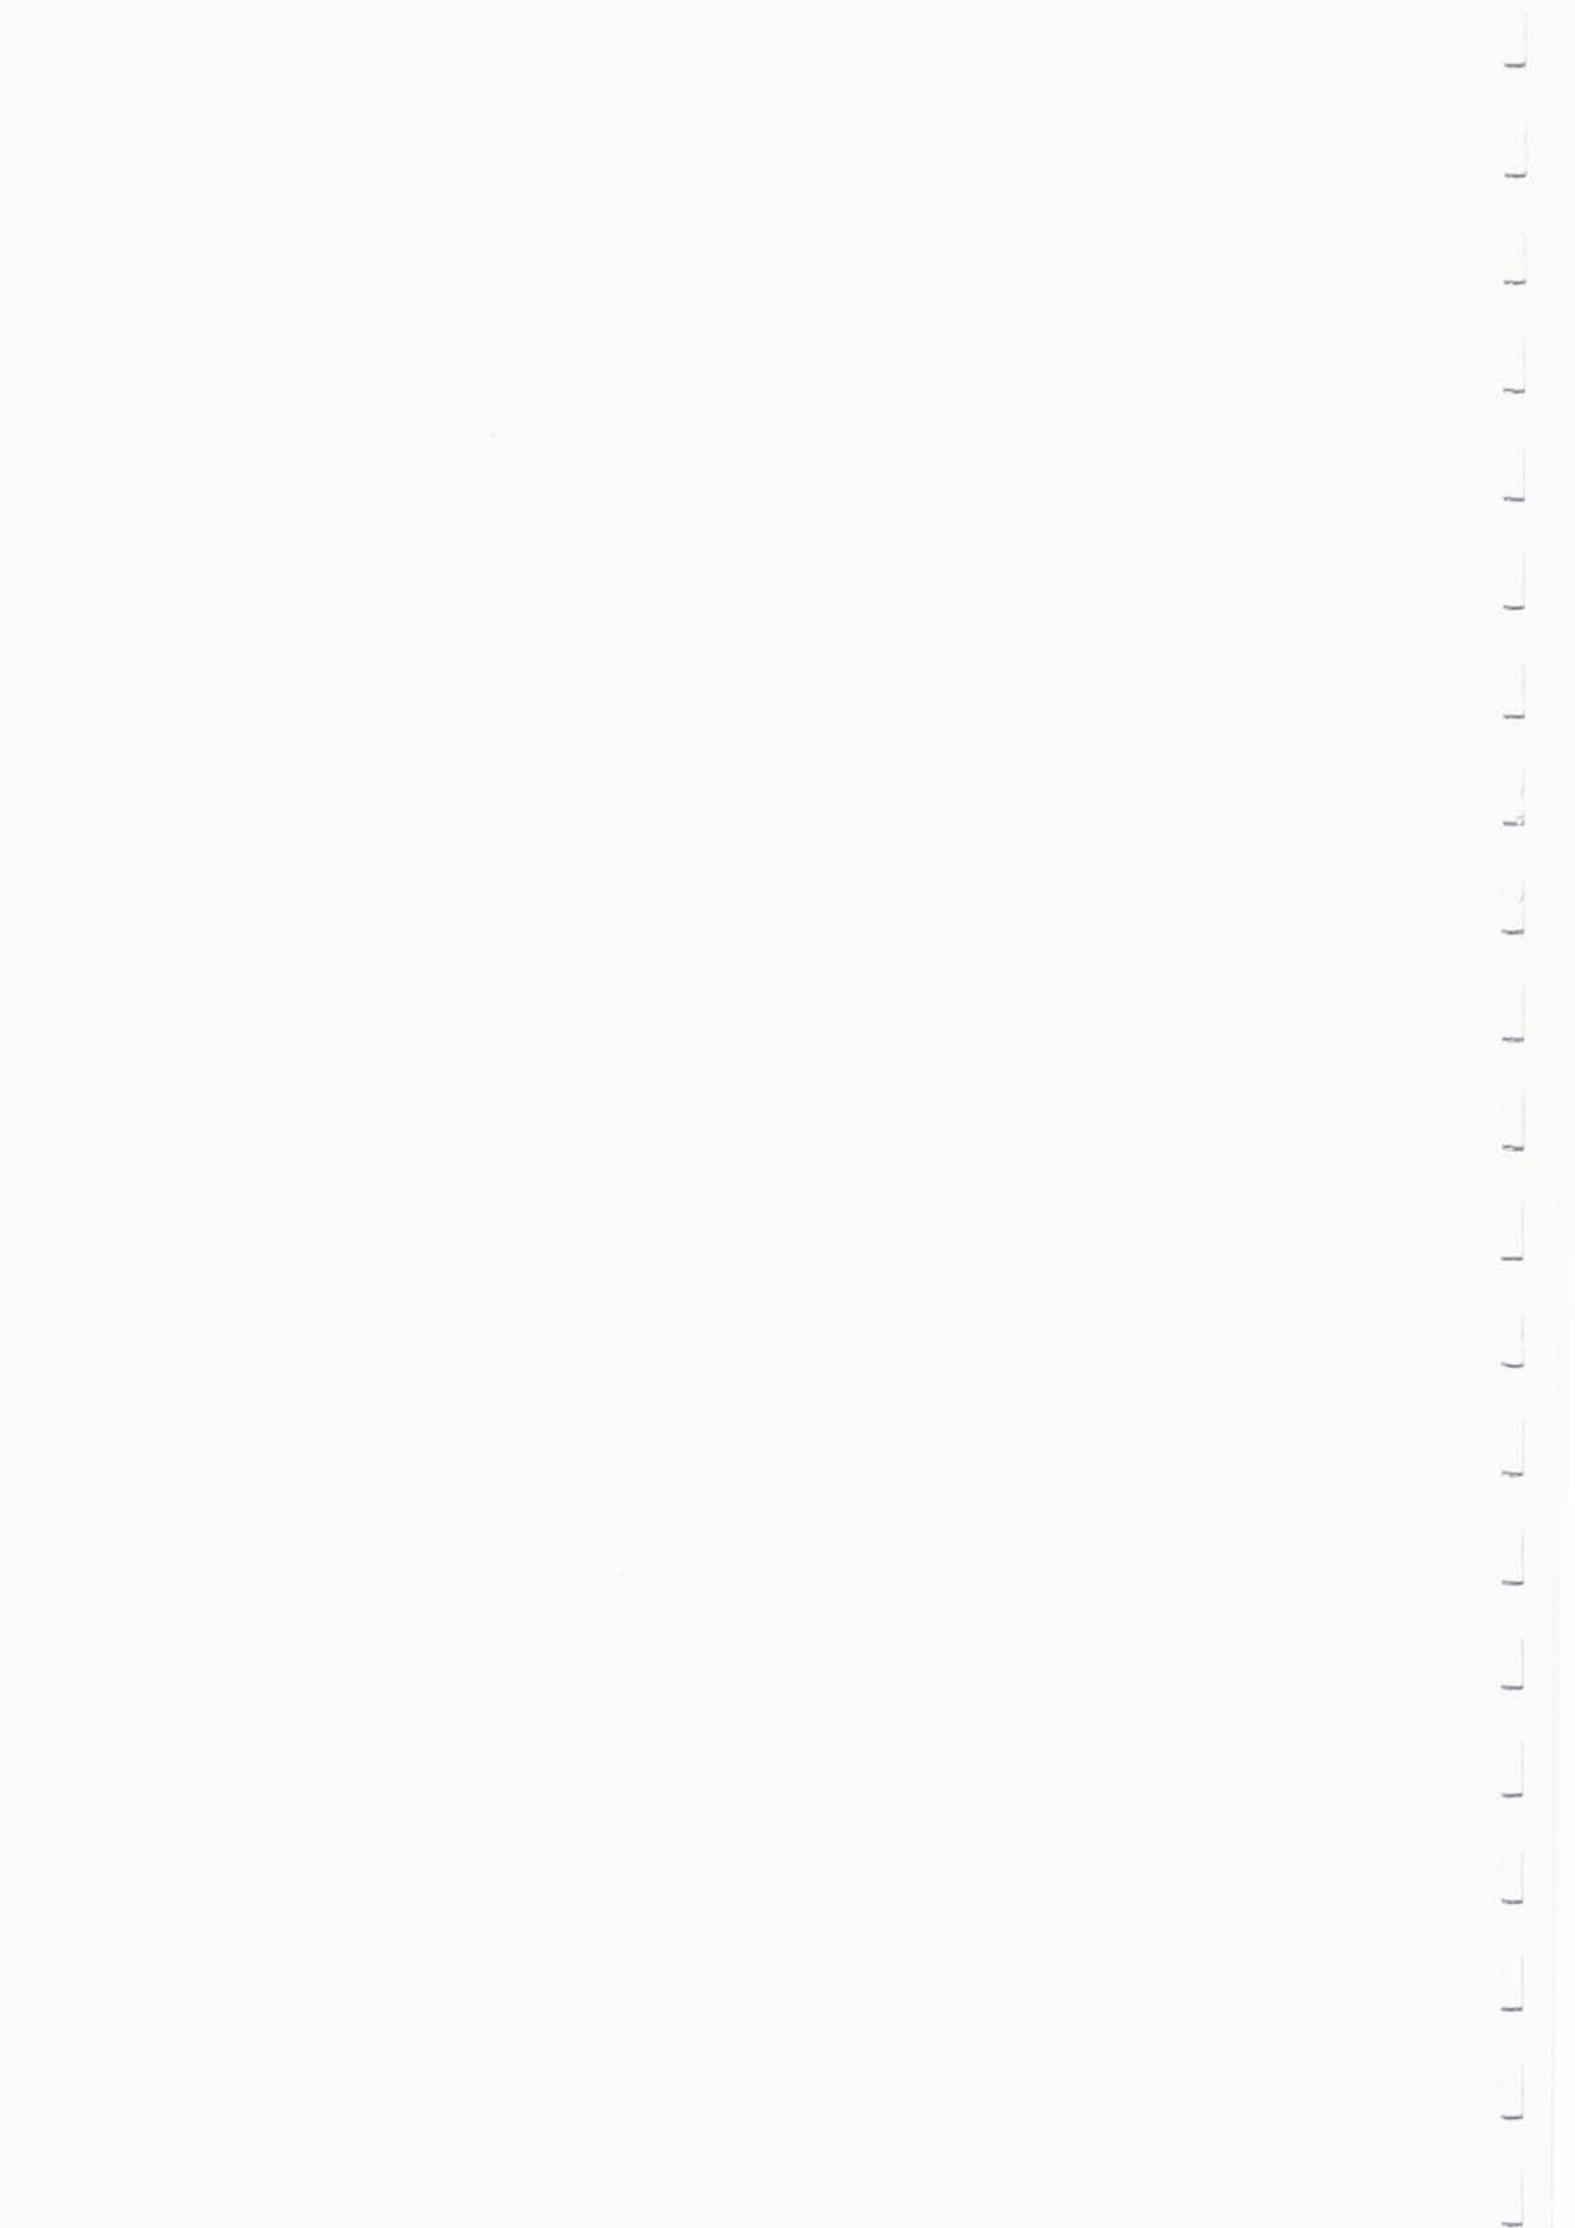

Across regions, the highest overall accuracy rate for all positions was registered in Caraga (99.9658%). The lowest was registered in Region 6 (99.8506%). The regional breakdown of accuracy rate for the five positions is shown in Table 5b.

Table 5b. Accuracy Rate by Region: Philippines, 2016

Area	Accuracy Rate (in Percent)					
	President	Vice-President	Member, House of Representatives	Governor	Mayor	Average
Philippines	99.8942	99.8976	99.9176	99.9055	99.8986	99.9027

10. Accuracy Rate (Weighted)

Weighted estimates are obtained by considering the inclusion probability of each of the 687 completed sample clustered precincts in the computation to represent the total 92,509 clustered precincts in the country. Weights varies across legislative districts depending on the number of clustered precincts drawn.

At the national level the overall weighted accuracy rate for all positions was at 99.9027.percent. The weighted accuracy rates indicate the estimates for the total number of persons who actually voted from the 92,509 clustered precincts in the Philippines. Table 6a shows the weighted estimates of total as per ER and RMA, total "variance", the accuracy rate for the five positions and the corresponding standard error and the 95% confidence interval.

Table6a. Summary Report on Variance and Accuracy Rate (Weighted)

RMA Position	Total		Variance (Difference between ER and RMA) in absolute value	Accuracy Rate	Standard Error	95% Confidence Interval	
	Per ER	Per RMA				Lower Limit	Upper Limit
President	42,237,968	42,245,845	44,211	99.8953	0.0094	99.8769	99.9137
Vice President	40,770,783	40,777,984	42,014	99.8970	0.0086	99.8801	99.9139

Governor	30,074,604	30,086,356	28,670	99.9047	0.0101	99.8849	99.9245
Mayor	40,468,623	40,483,596	40,663	99.8995	0.0087	99.8824	99.9166
<i>Based on 687 of 715 or 96.08% of total clustered precincts</i>			Overall Accuracy Rate	99.9027	0.0040	99.8947	99.9106

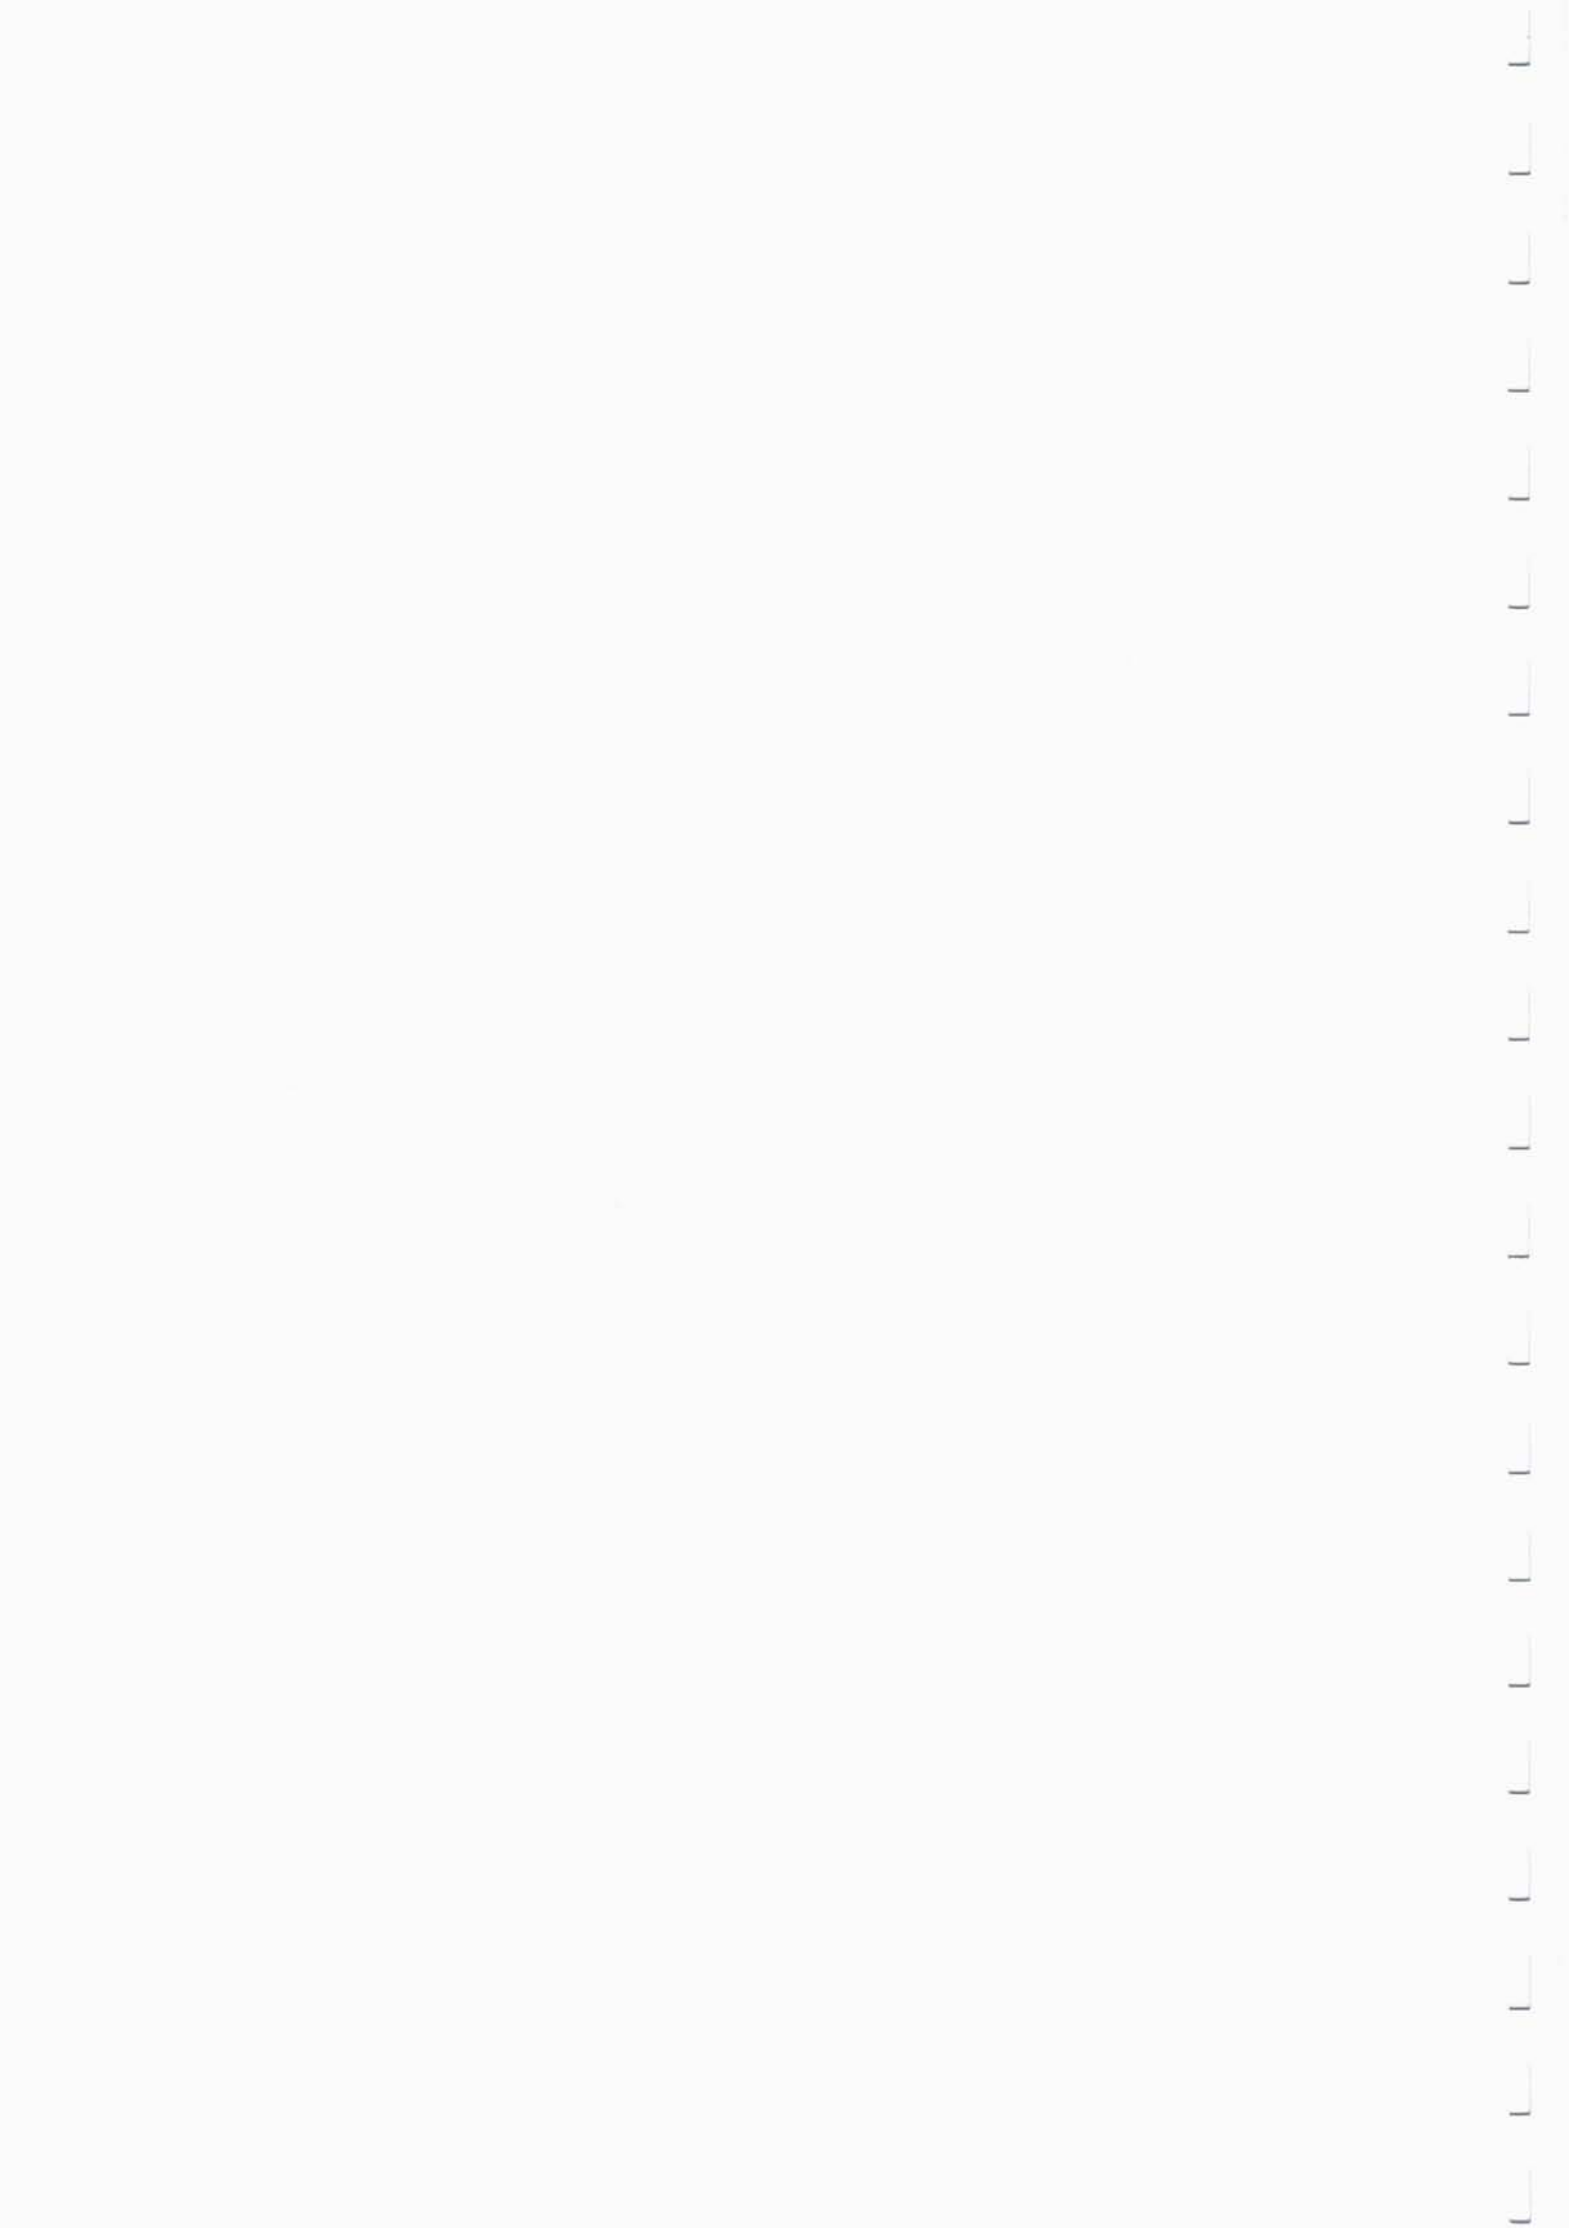

11. Cause/Nature of Variance

Clustered precincts with large “variance” underwent further validation process. The process includes the determination of the cause or nature of variance. These variances are mostly attributed to clerical/mathematical errors and the disparity in appreciation of ambiguous marks and misplaced shading.

The RMAC were able to determine the probable source of “variance” in 406 clustered precincts or 59 percent of 687 completely processed RMA reports. Around 1.5 percent (i.e., 12,677/ 867,336) of the total marks reviewed are considered ambiguous. The same percentage of ambiguous marks are also found per position (i.e., 1.5% or 15 for every 1,000 mark votes reviewed). Ambiguous marks counted by RMA but not by VCM shared about 1.1 percent while 0.4 percent are ambiguous marks counted by VCM but not by the RMA.

Variance found due to mathematical error comprised of only 0.01 percent or 1 in every 10,000 vote marks reviewed. Misplaced shading shared about 0.2 percent or 2 in every 1,000 vote marks reviewed.

Table A. Cause/Nature of Variance

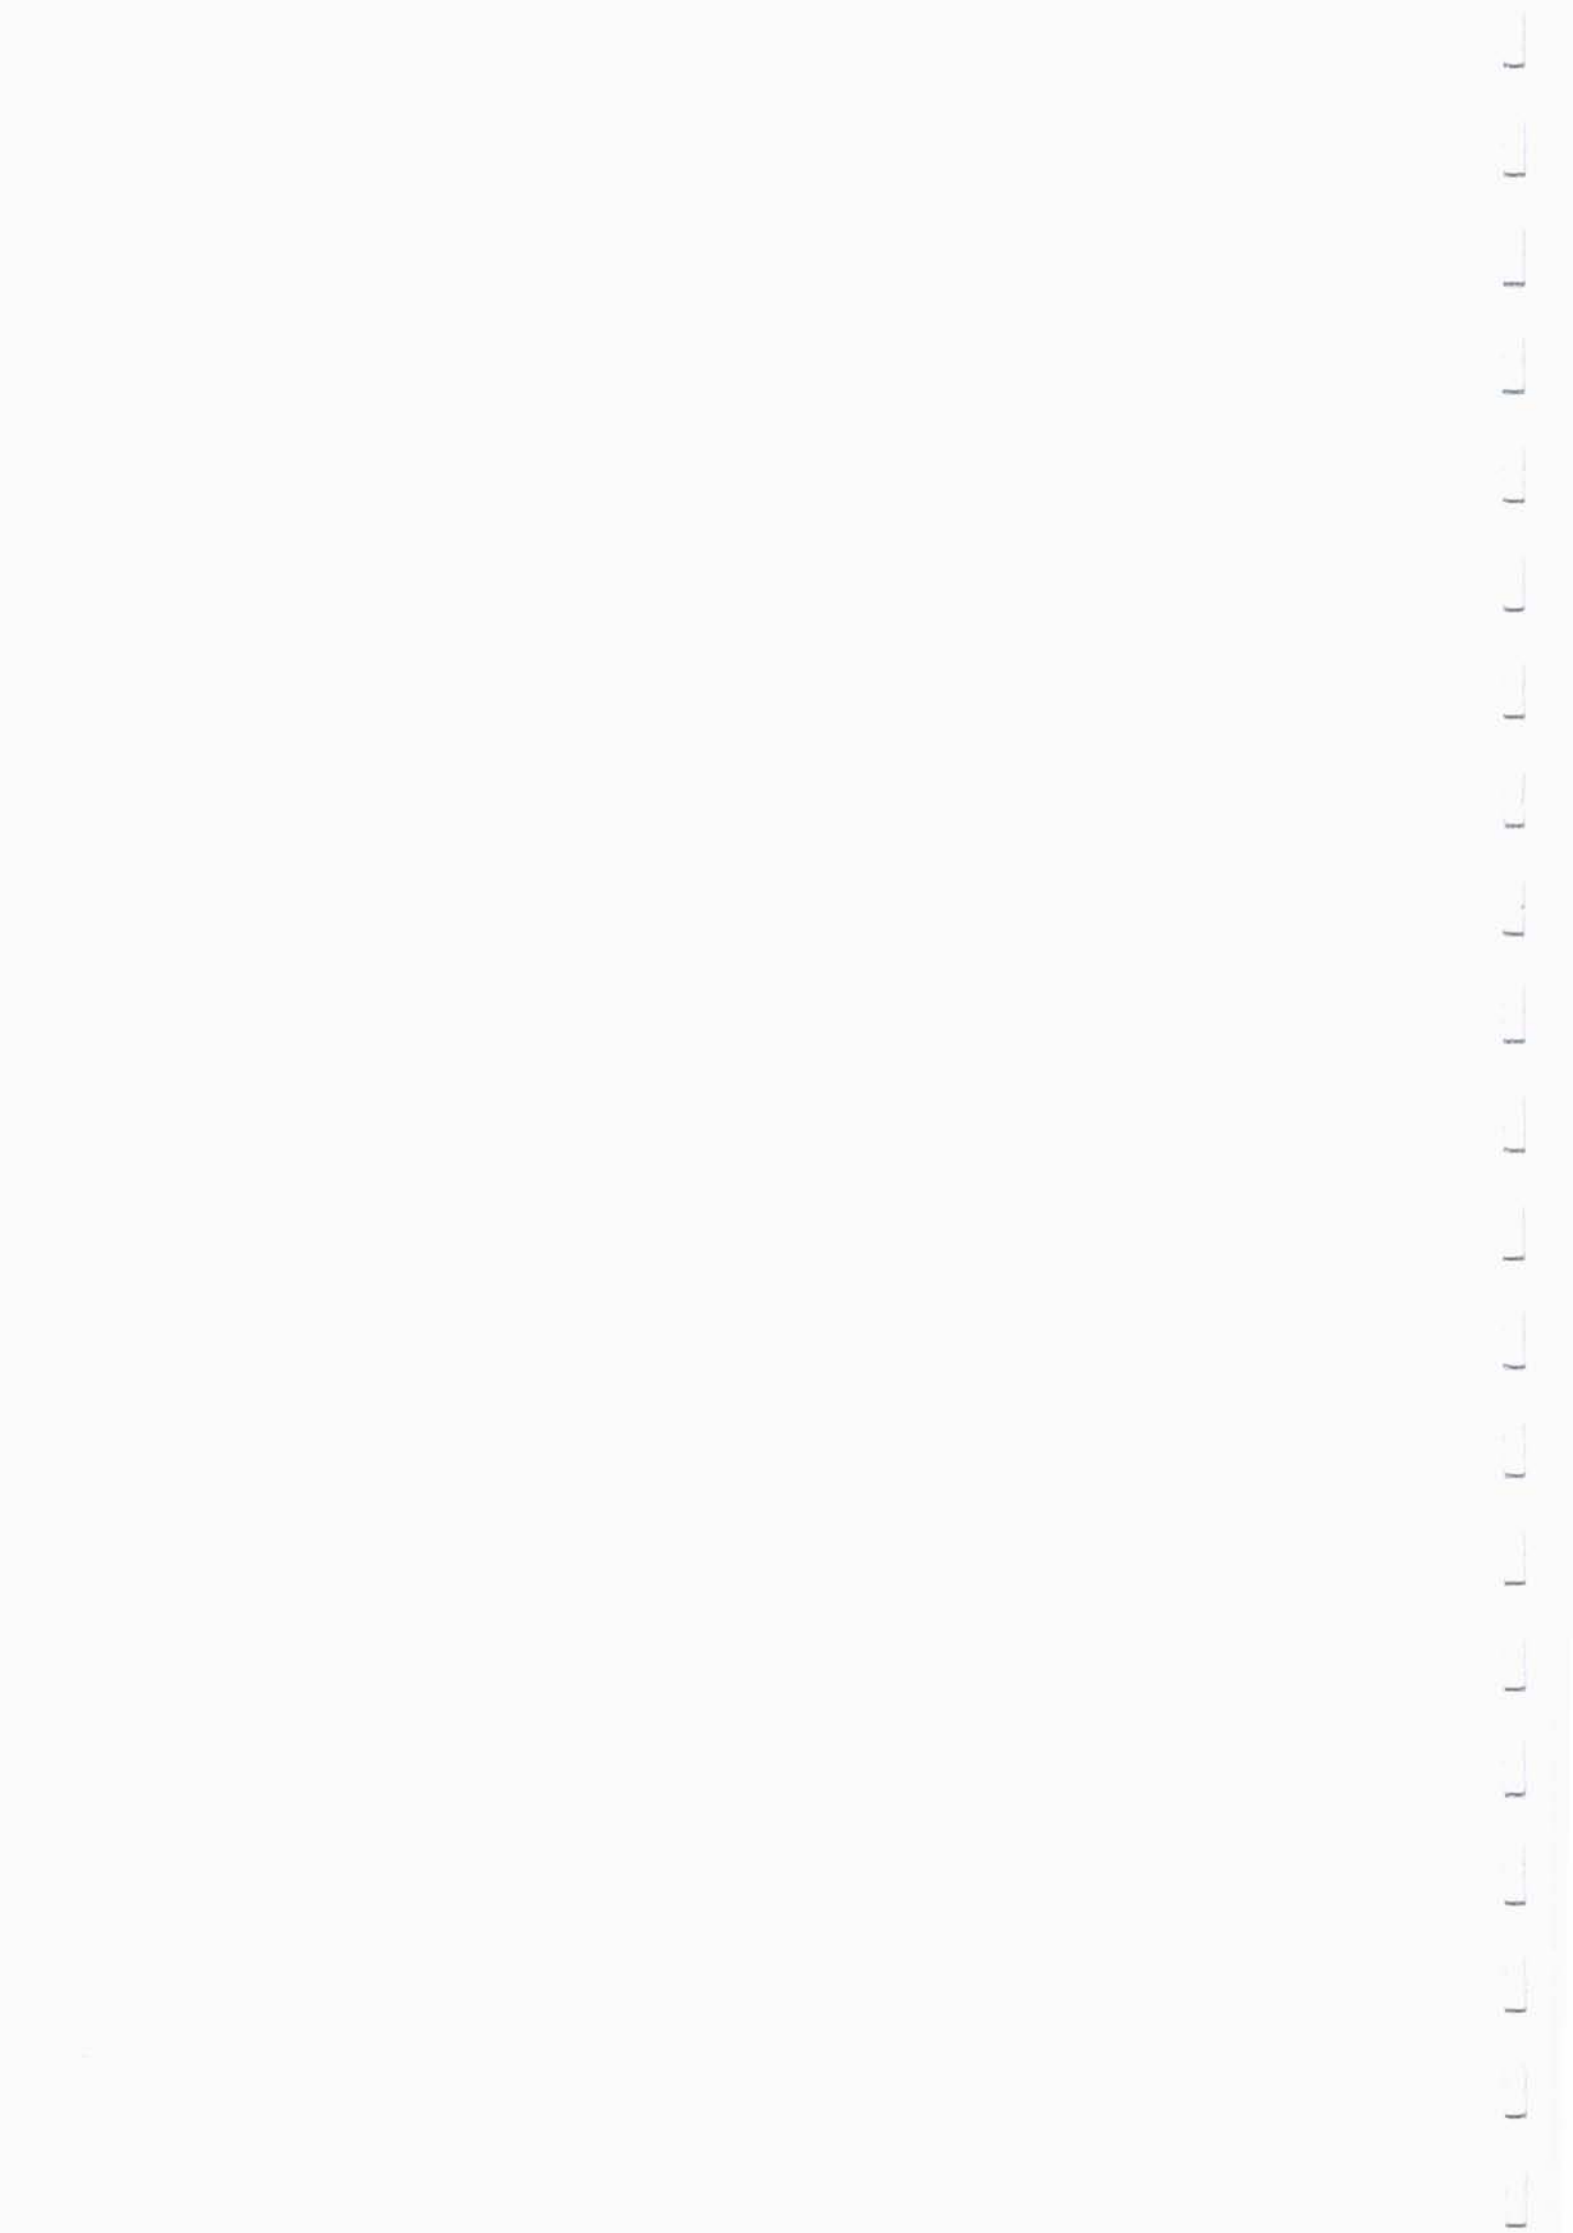

POSITION	CAUSE/NATURE OF VARIANCE			MISPLACED SHADING	Count per ER	Count per RMA
	AMBIGUOUS MARKS		Math Errors/Others			
	Counted by RMA not by VCM	Counted by VCM not by RMA				
PHILIPPINES	10,212	2,465	102	1,914	867,336	867,398

Based on 406 out of 434 Precincts that underwent validation

12. Variance by Province and Legislative District

Variance by Province for Presidential Position

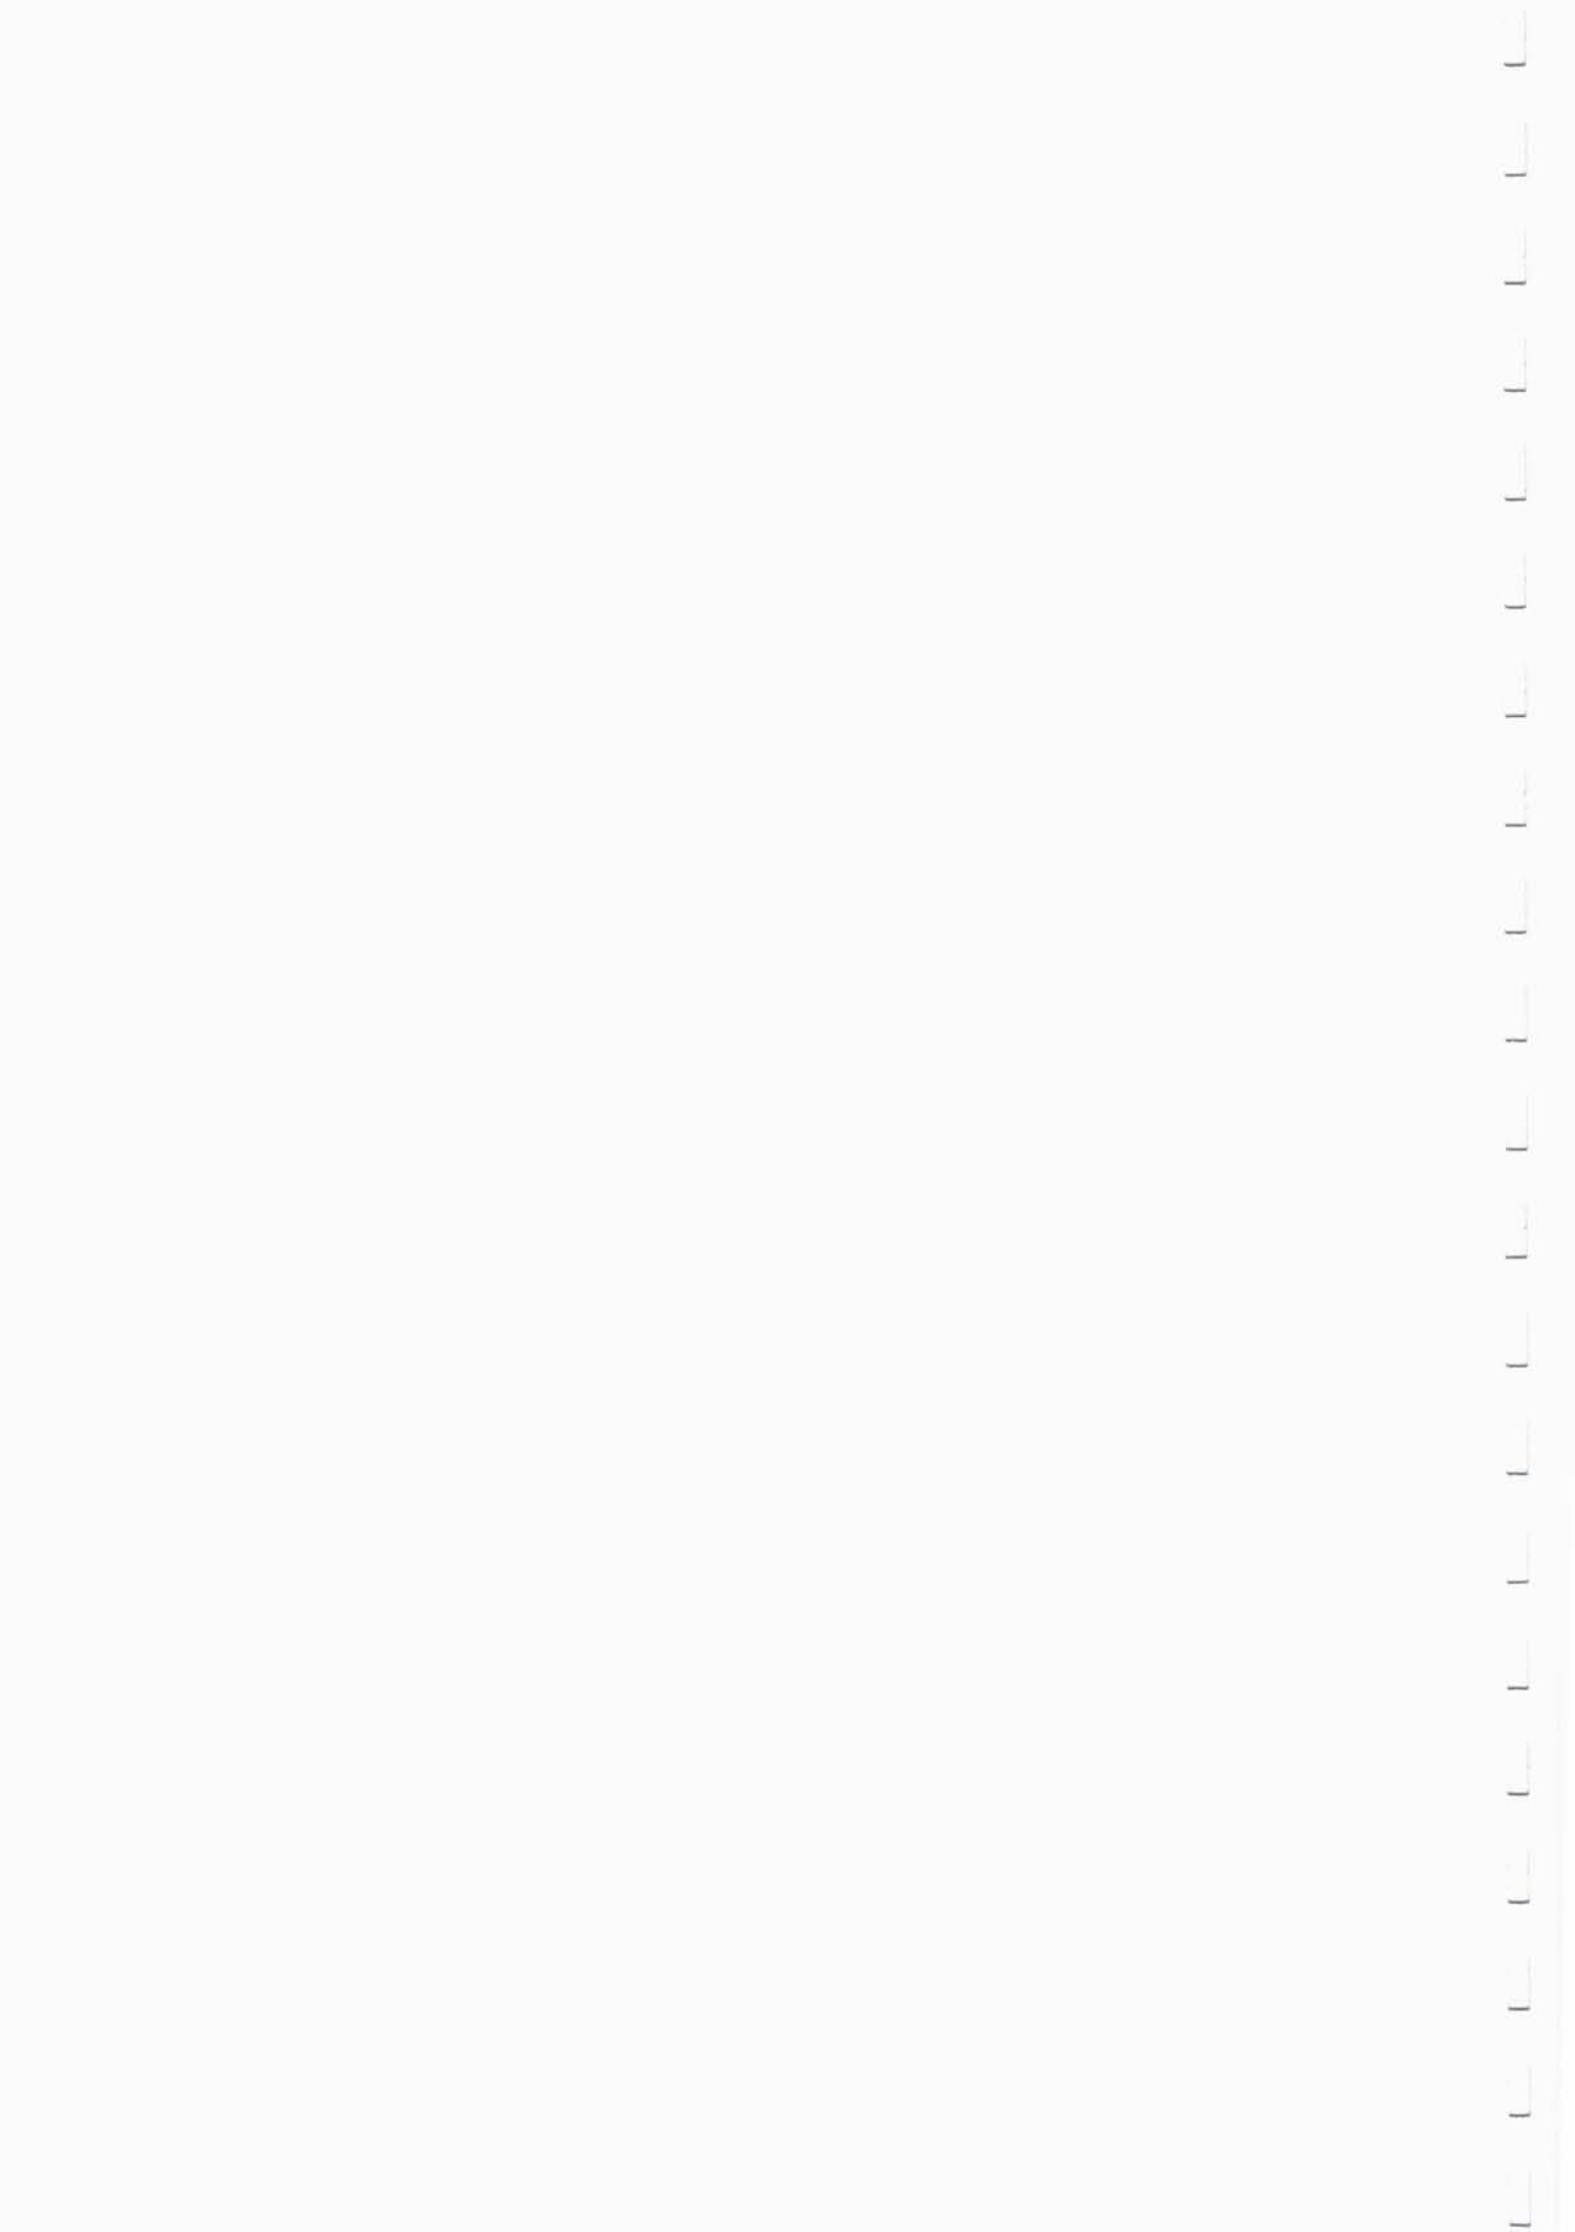

The total "variance" or votes' difference for presidential position at the national level was tallied at 332. Higher variances were registered in the following areas: NCR (43); Pampanga (20); Nueva Ecija (16); Cavite (16); and Iloilo (13).

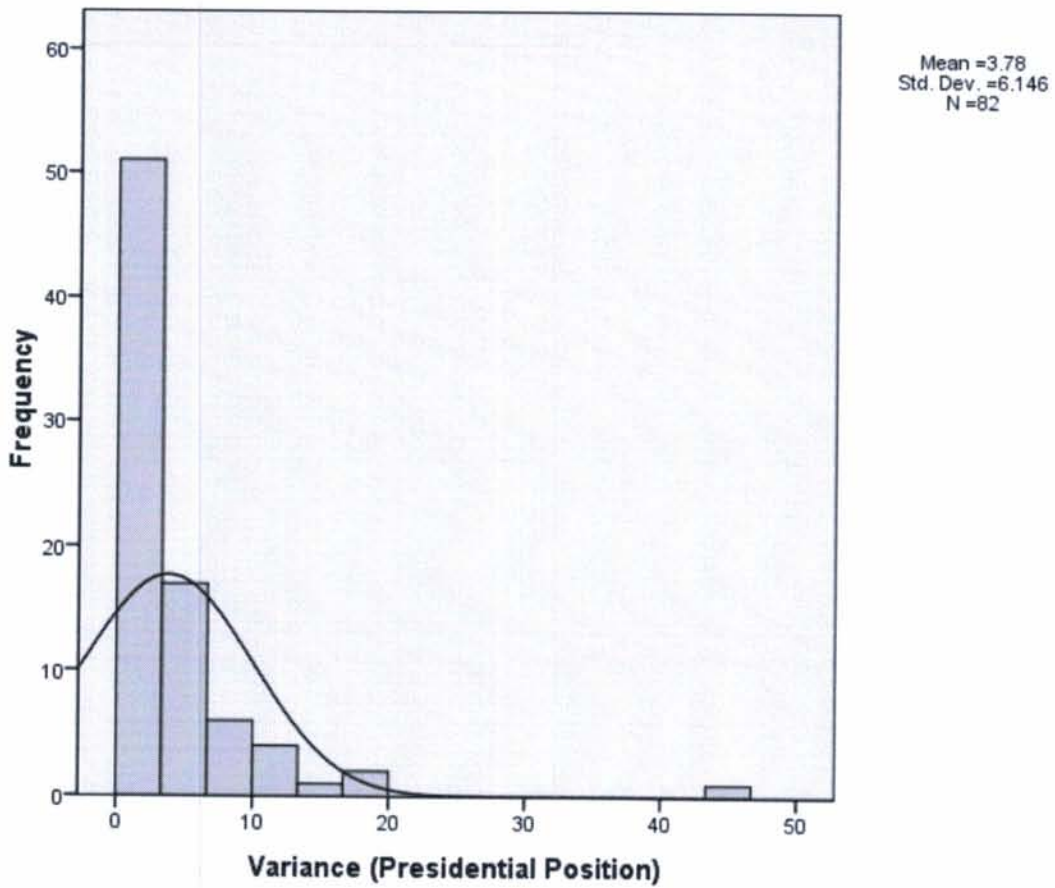

The average variance per provinces is 3.78 with a standard deviation of 6.146. About 31 of 82 provinces have zero variance. Majority or 90% of these provinces has less than 10 variance. Figure A shows the histogram of variance for presidential position by province.

Figure A Histogram of Variance for Presidential Position by Province

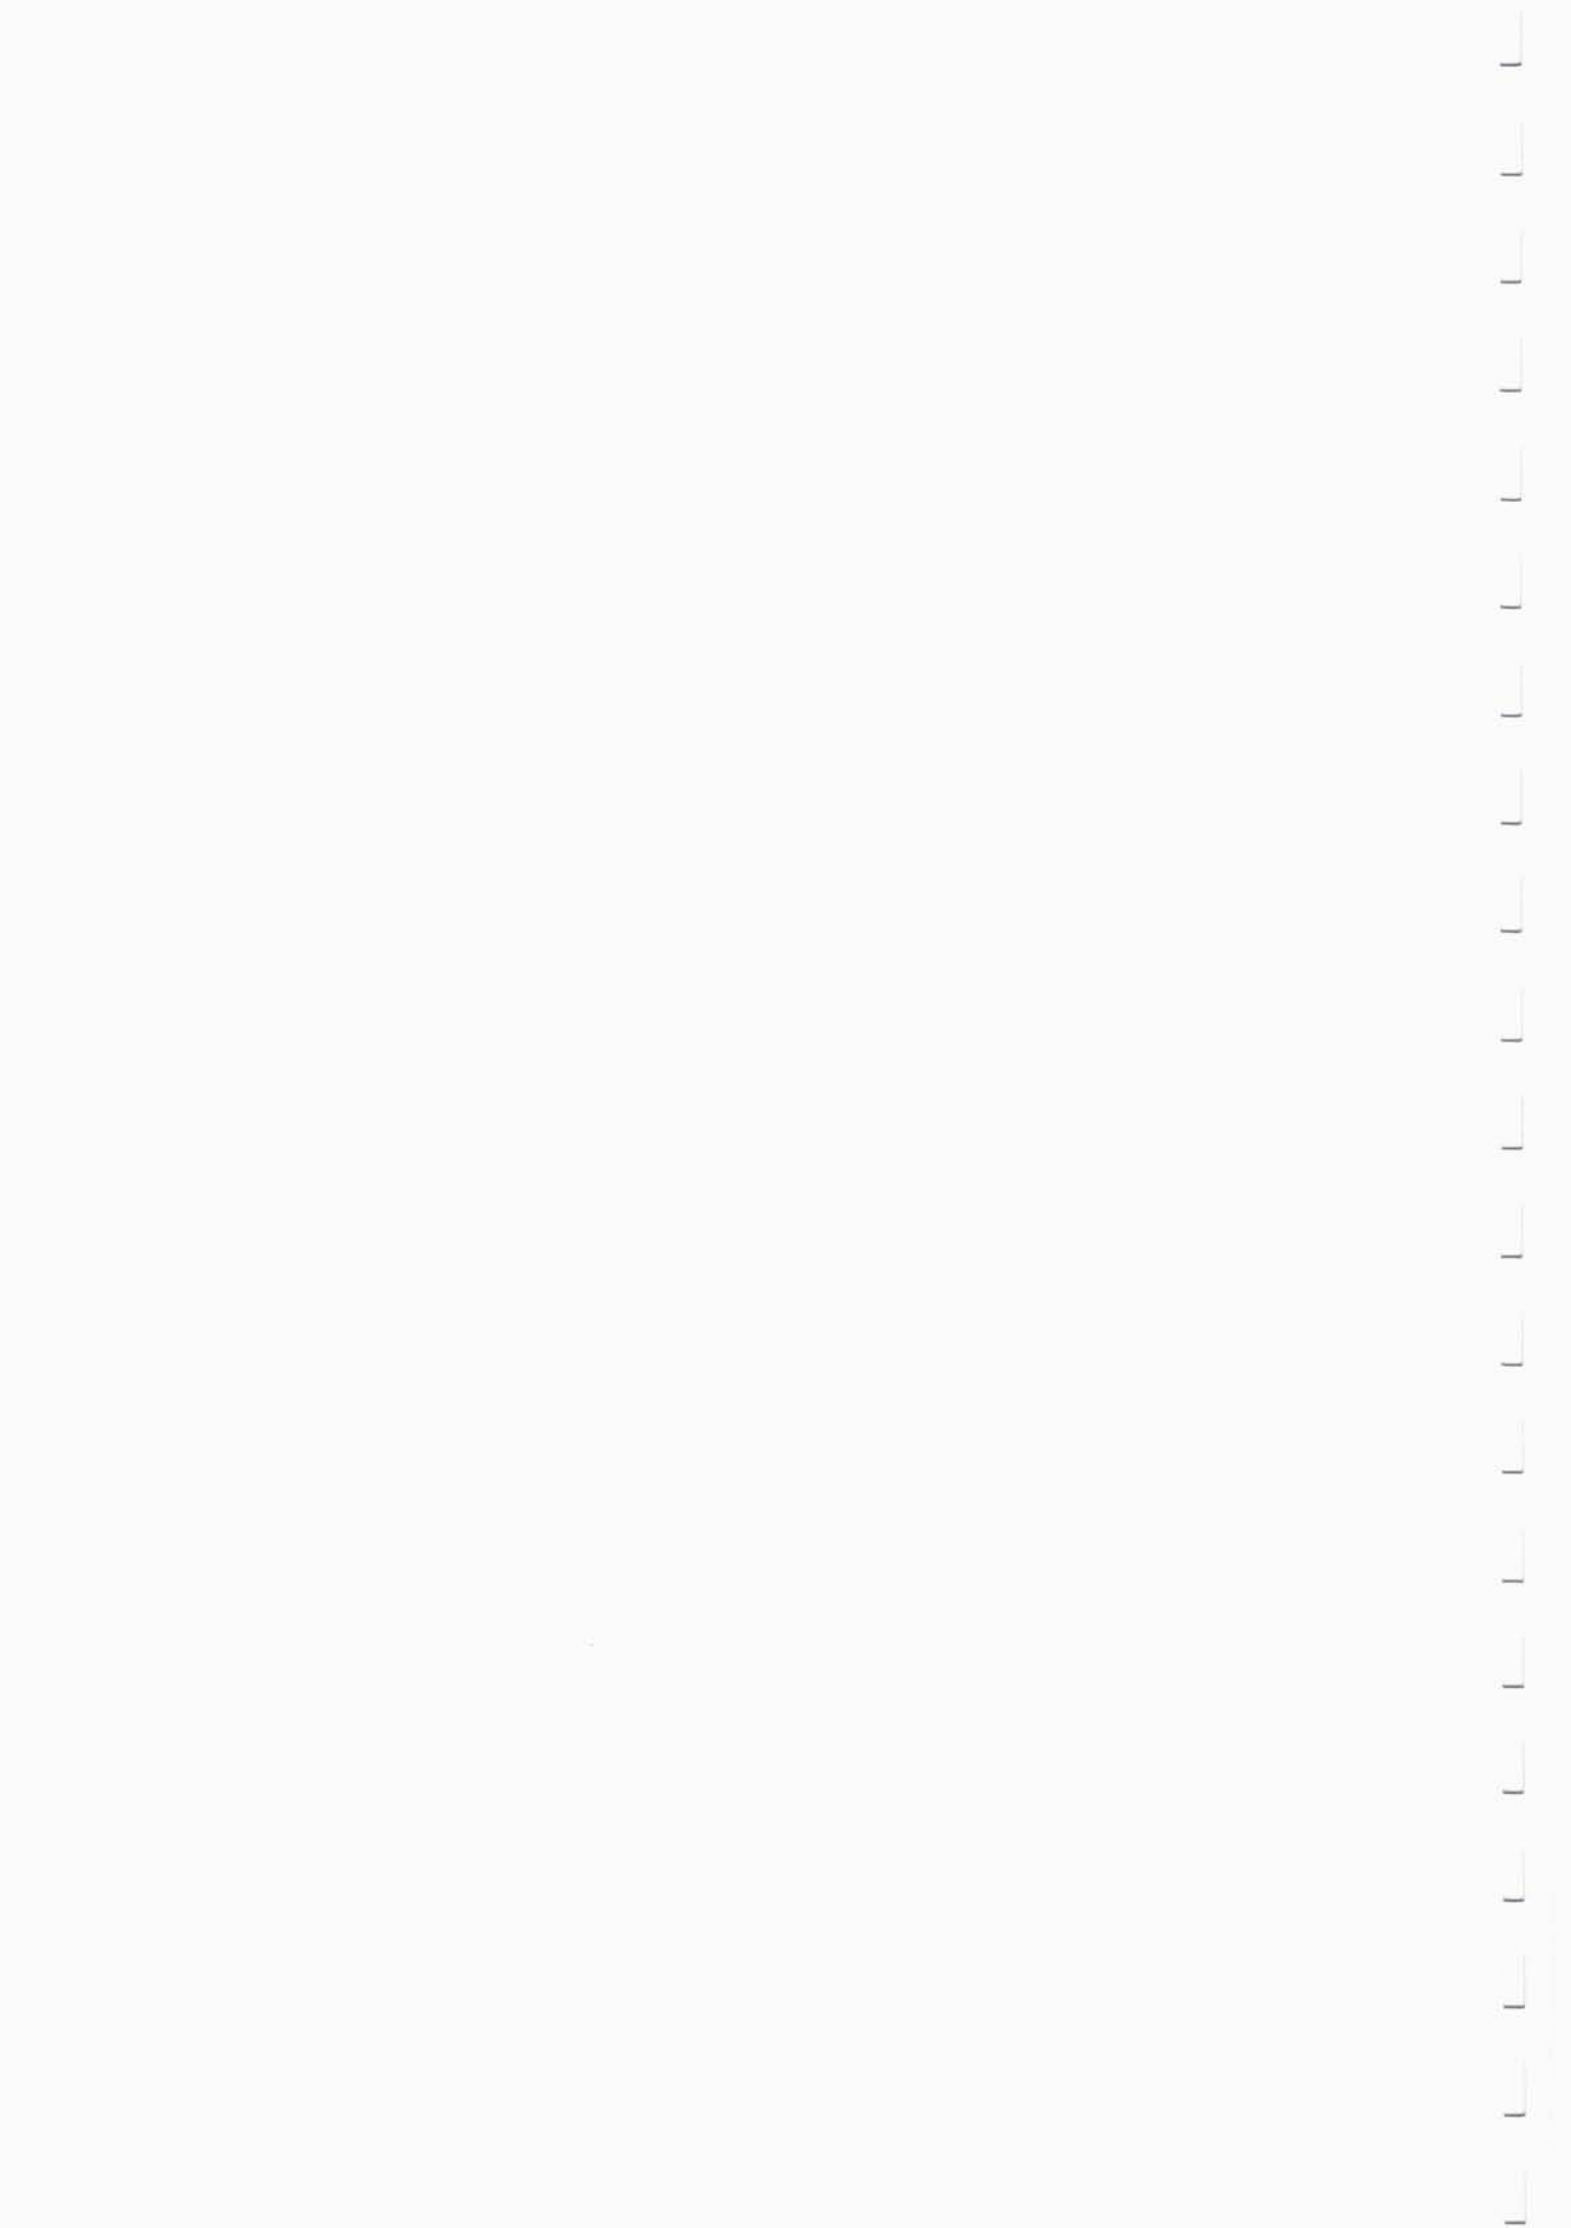

Variance by Province for Vice-Presidential Position

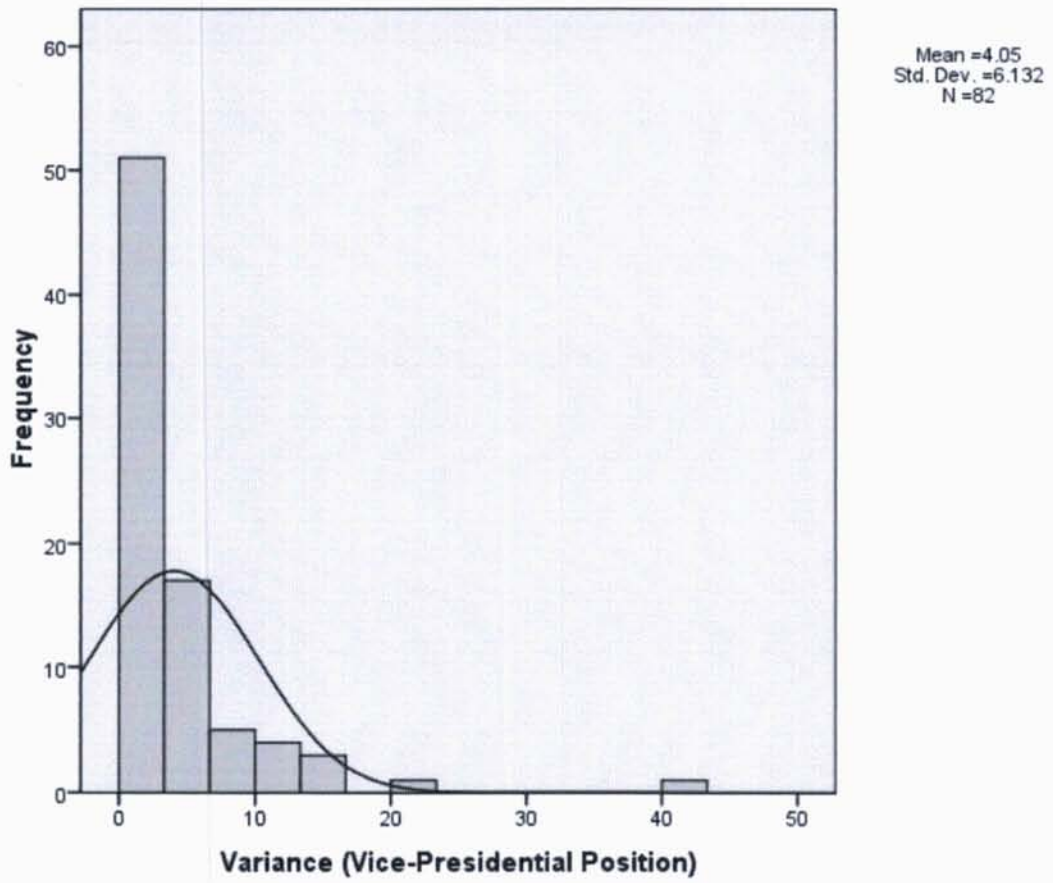

For the vice-presidential position, provinces with relatively large variance are the following: NCR (44); Davao del Sur (19); Cavite (17); Iloilo (14); and Negros Occidental (13).

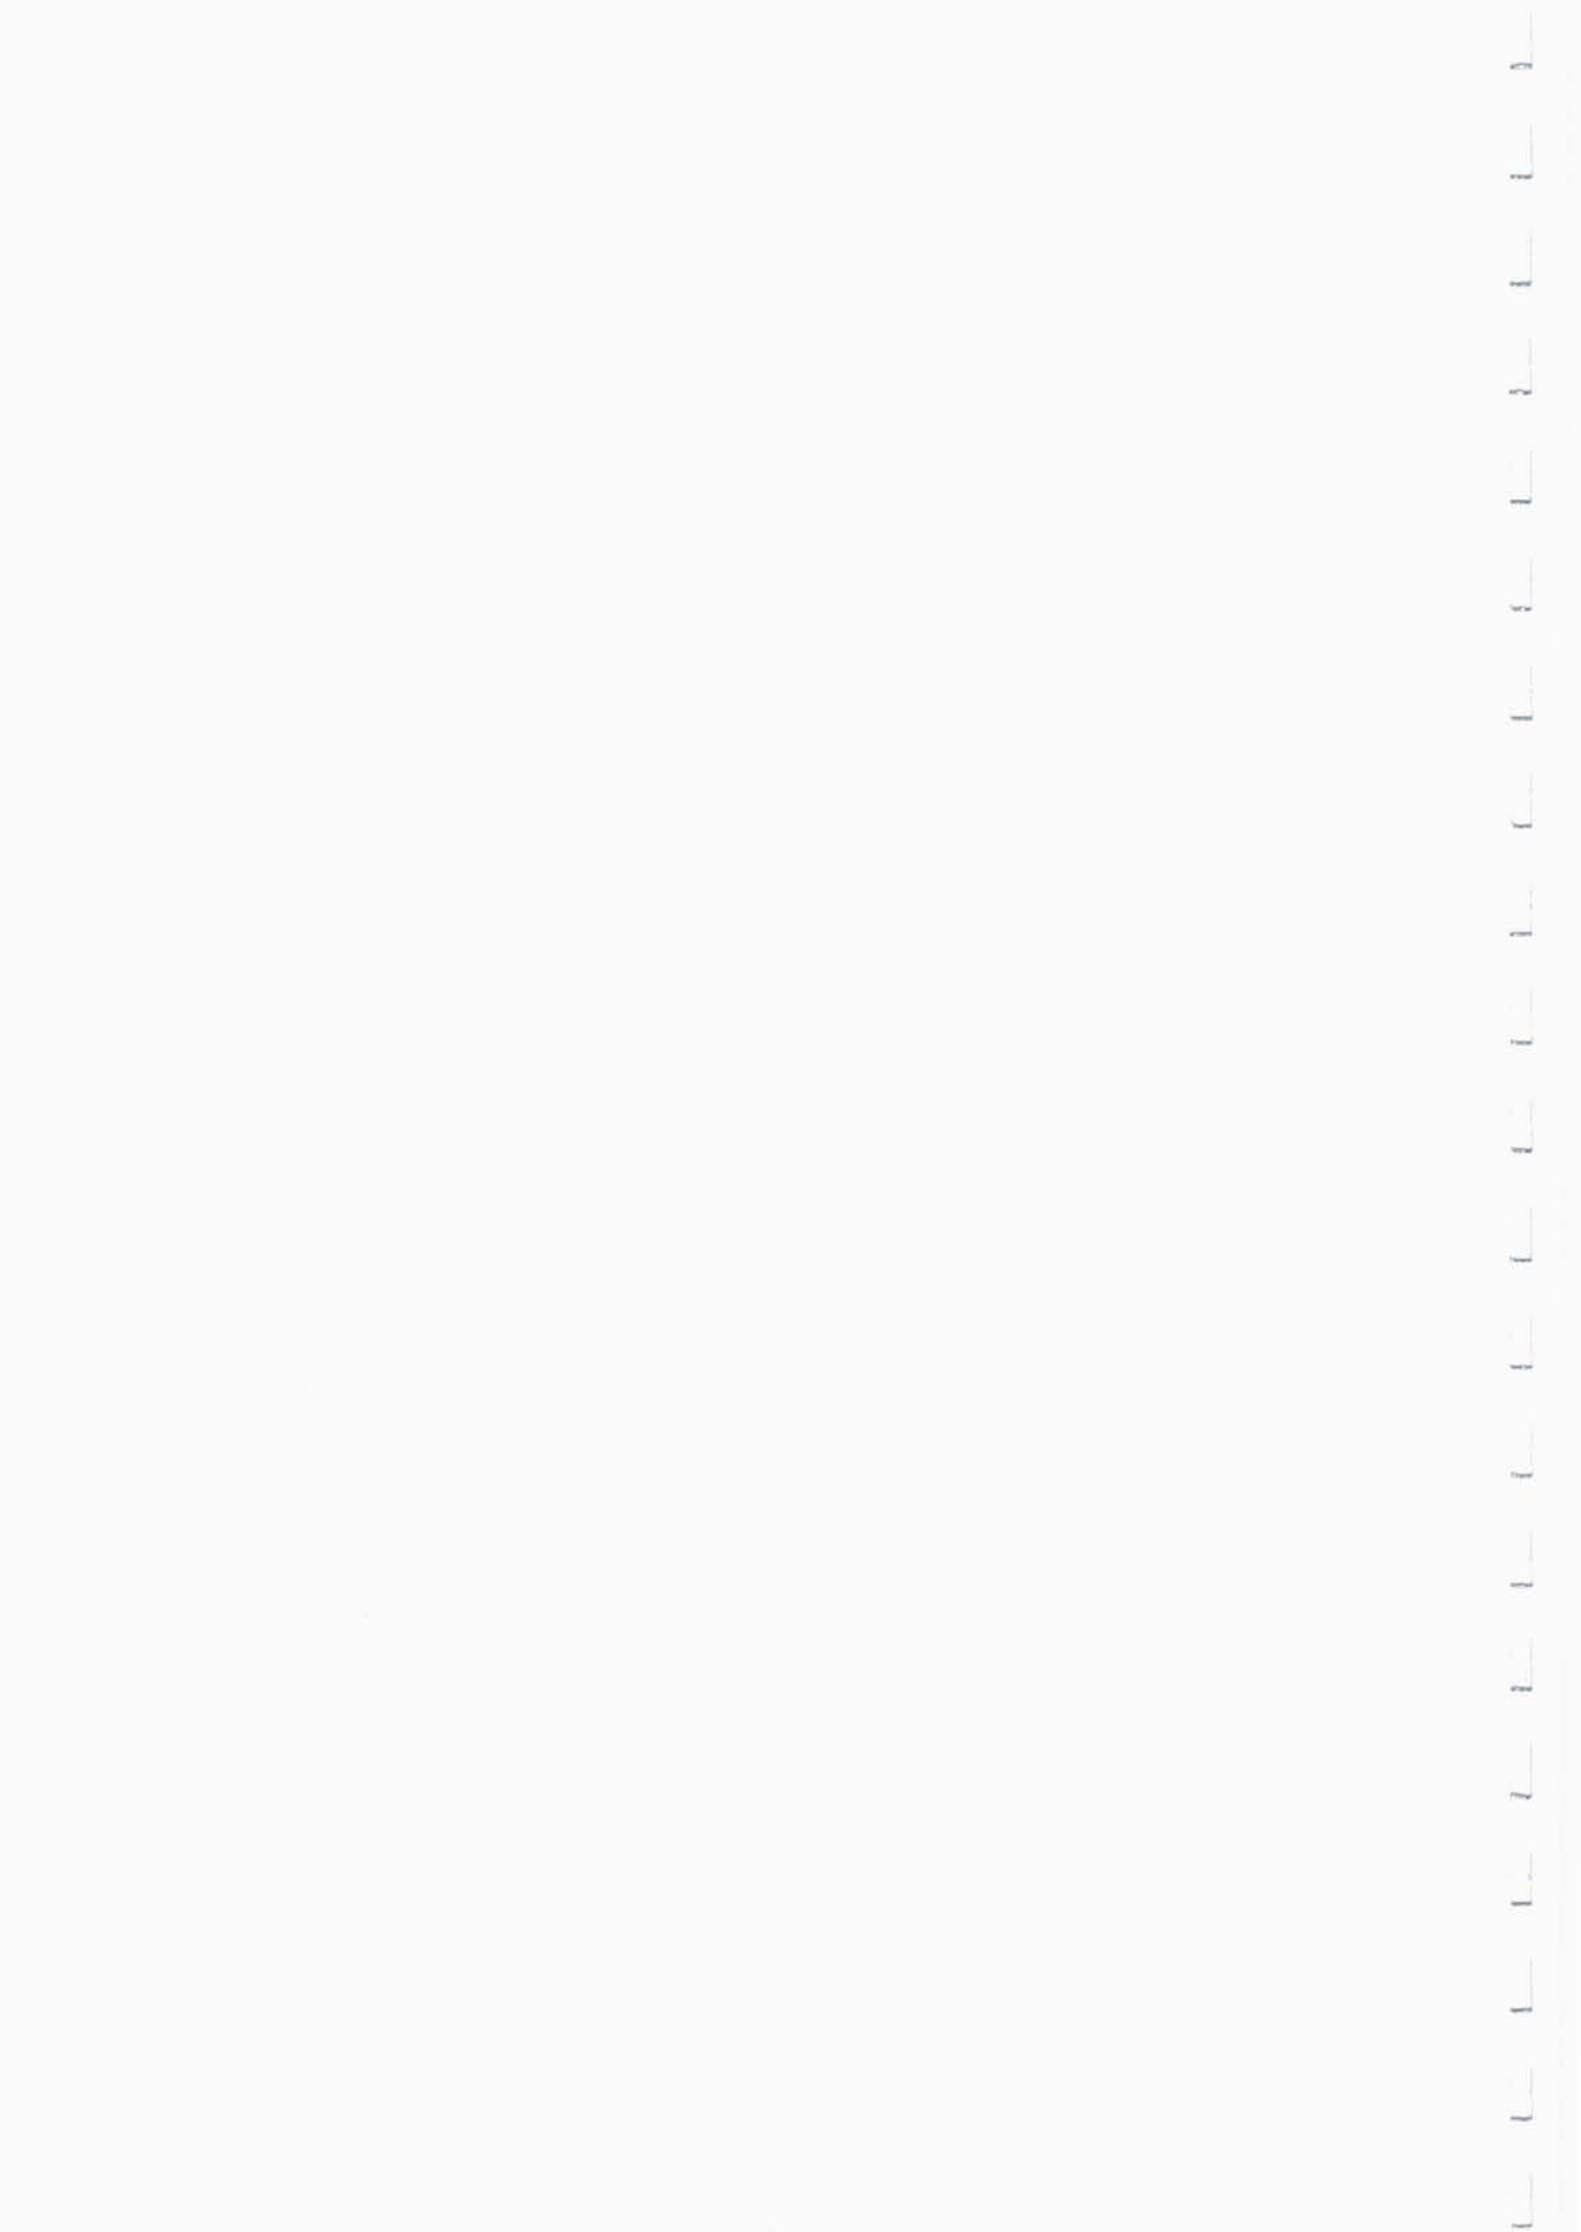

For the vice-presidential position, the average variance per provinces is 4.05 with a standard deviation of 6.132. There are 30 provinces with zero variance. About 75% of these provinces has less than 5 variance. Figure B shows the histogram of variance for vice-presidential position by province.

Figure B Histogram of Variance for Vice-Presidential Position by Province

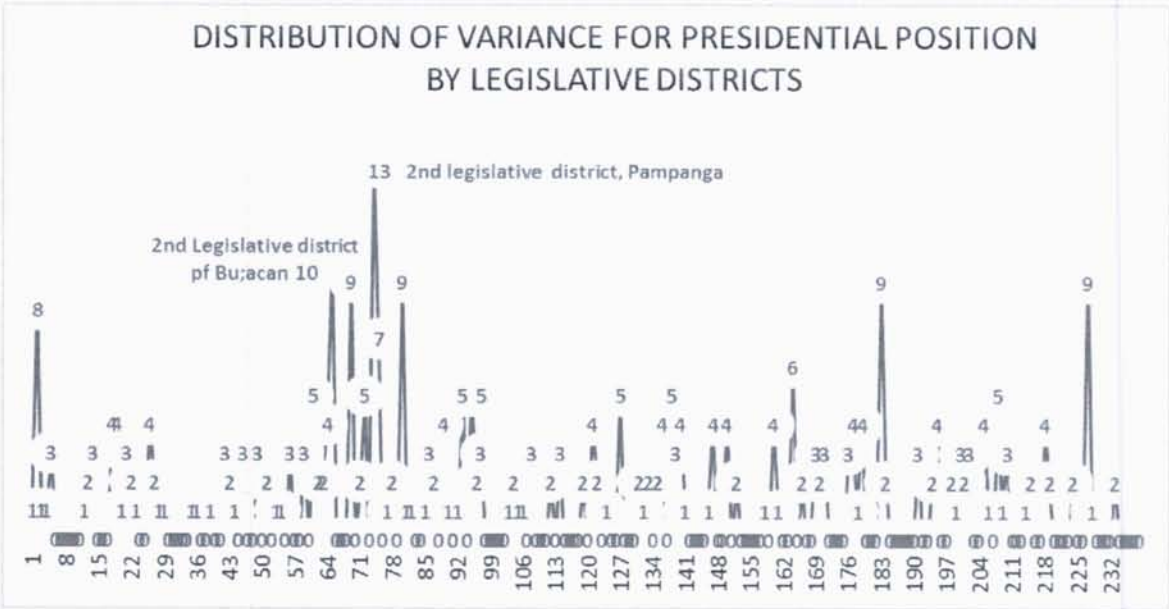

Variance by Legislative District for Presidential Position

At the national level, the total variance or votes' difference for presidential position was recorded at 332. Among the 238 legislative districts, the highest was recorded in the 2nd Legislative district of Pampanga with 13 cumulative variance from 4 sample clustered precincts. It was followed by the 2nd legislative district of Bulacan with 10 cumulative variance from 4 sample clustered precincts

The average variance per legislative district is 1.39 with a standard deviation of 2.096. Of the 238 legislative districts, 122 or about half (51%) has zero variance and 96.2% has 5 or less variance. Figure C shows the histogram of variance for presidential position by legislative district.

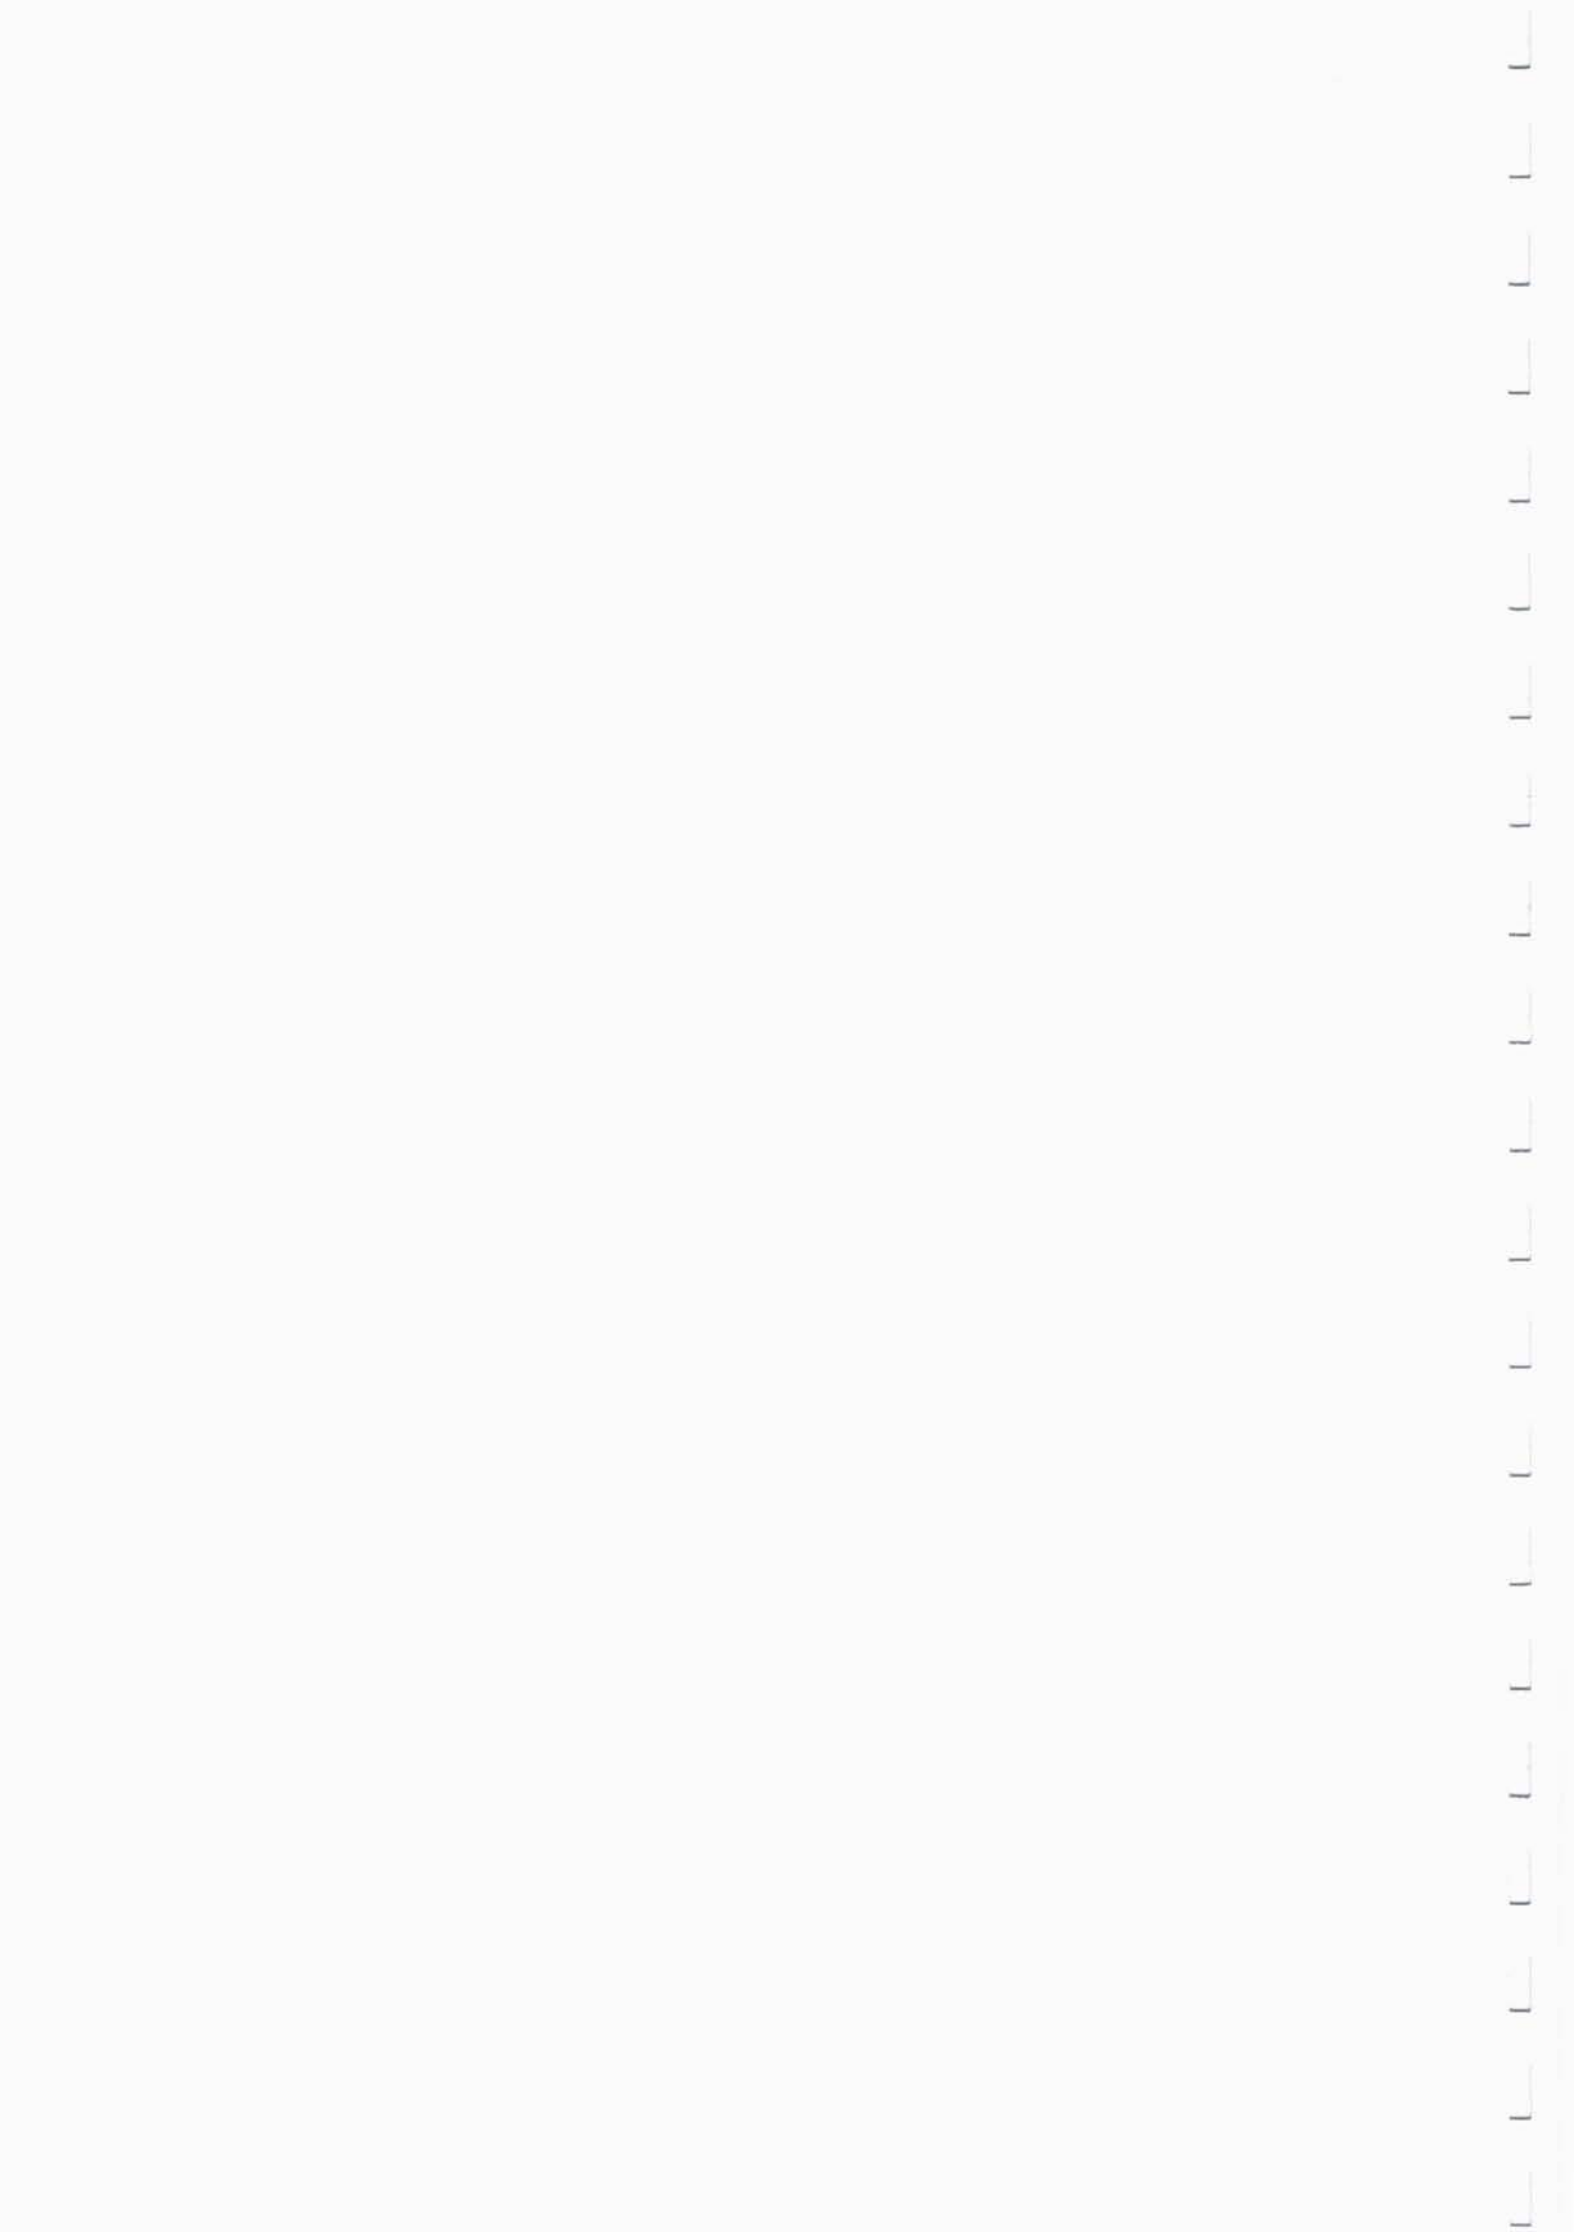

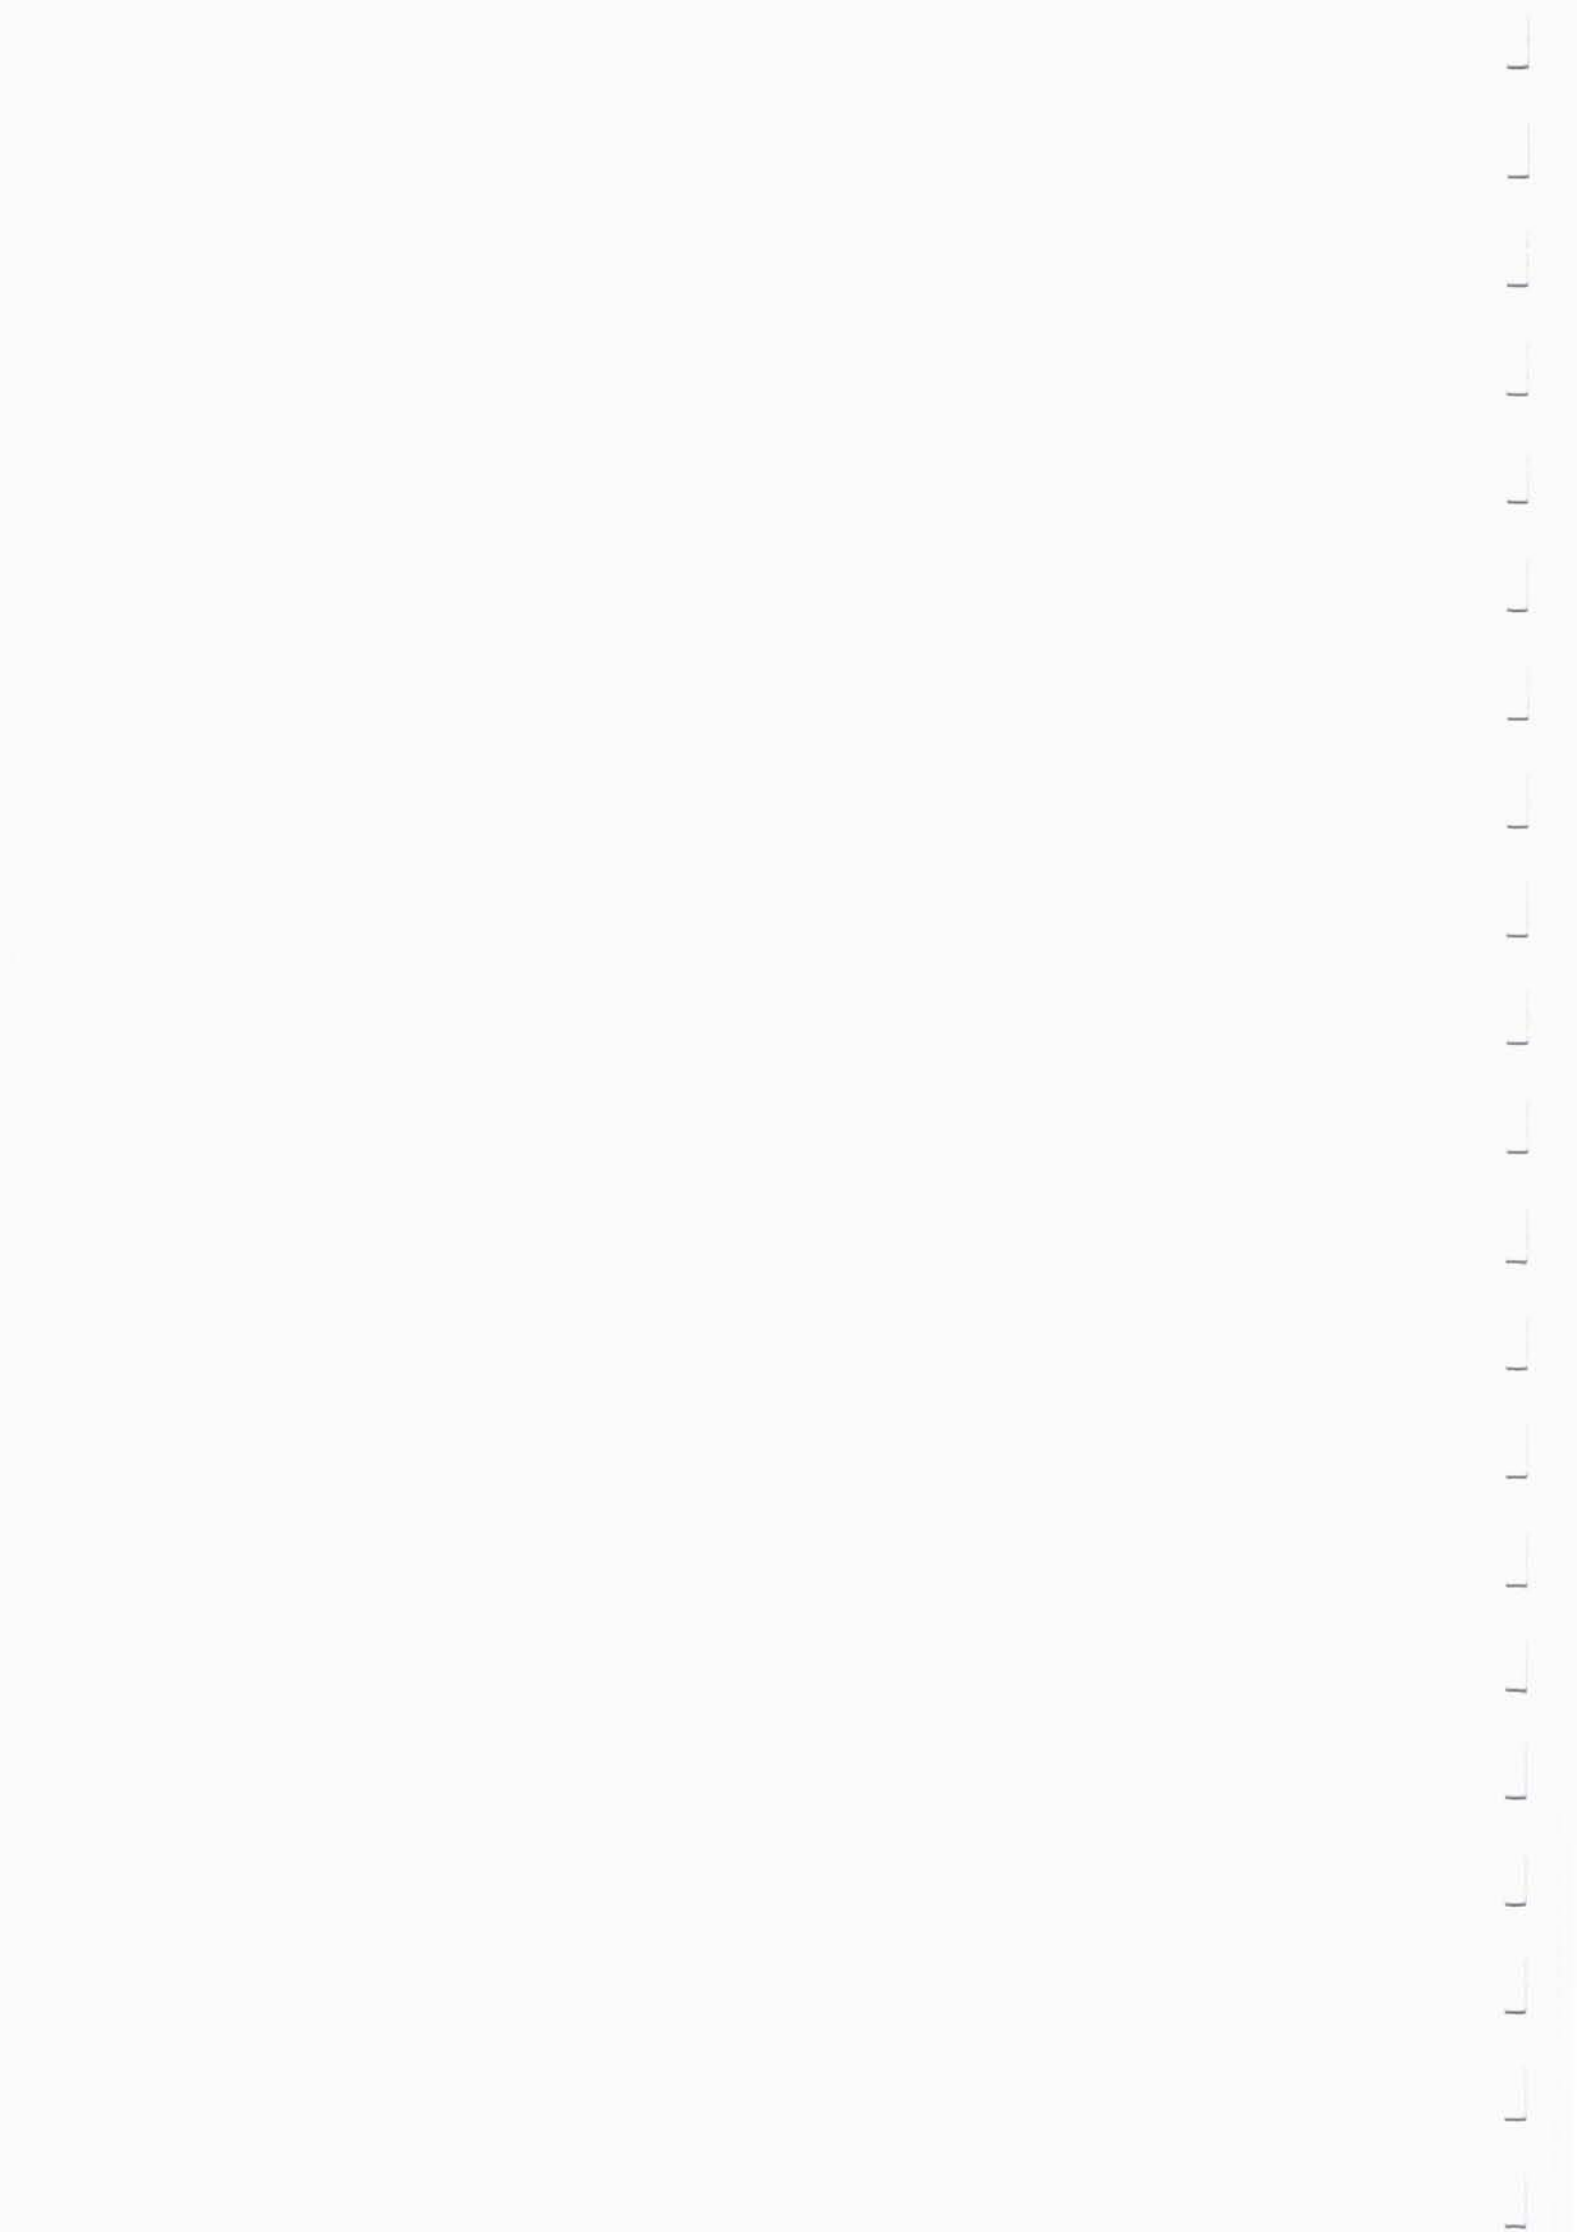

Figure C Histogram of Variance for Presidential Position by Legislative District

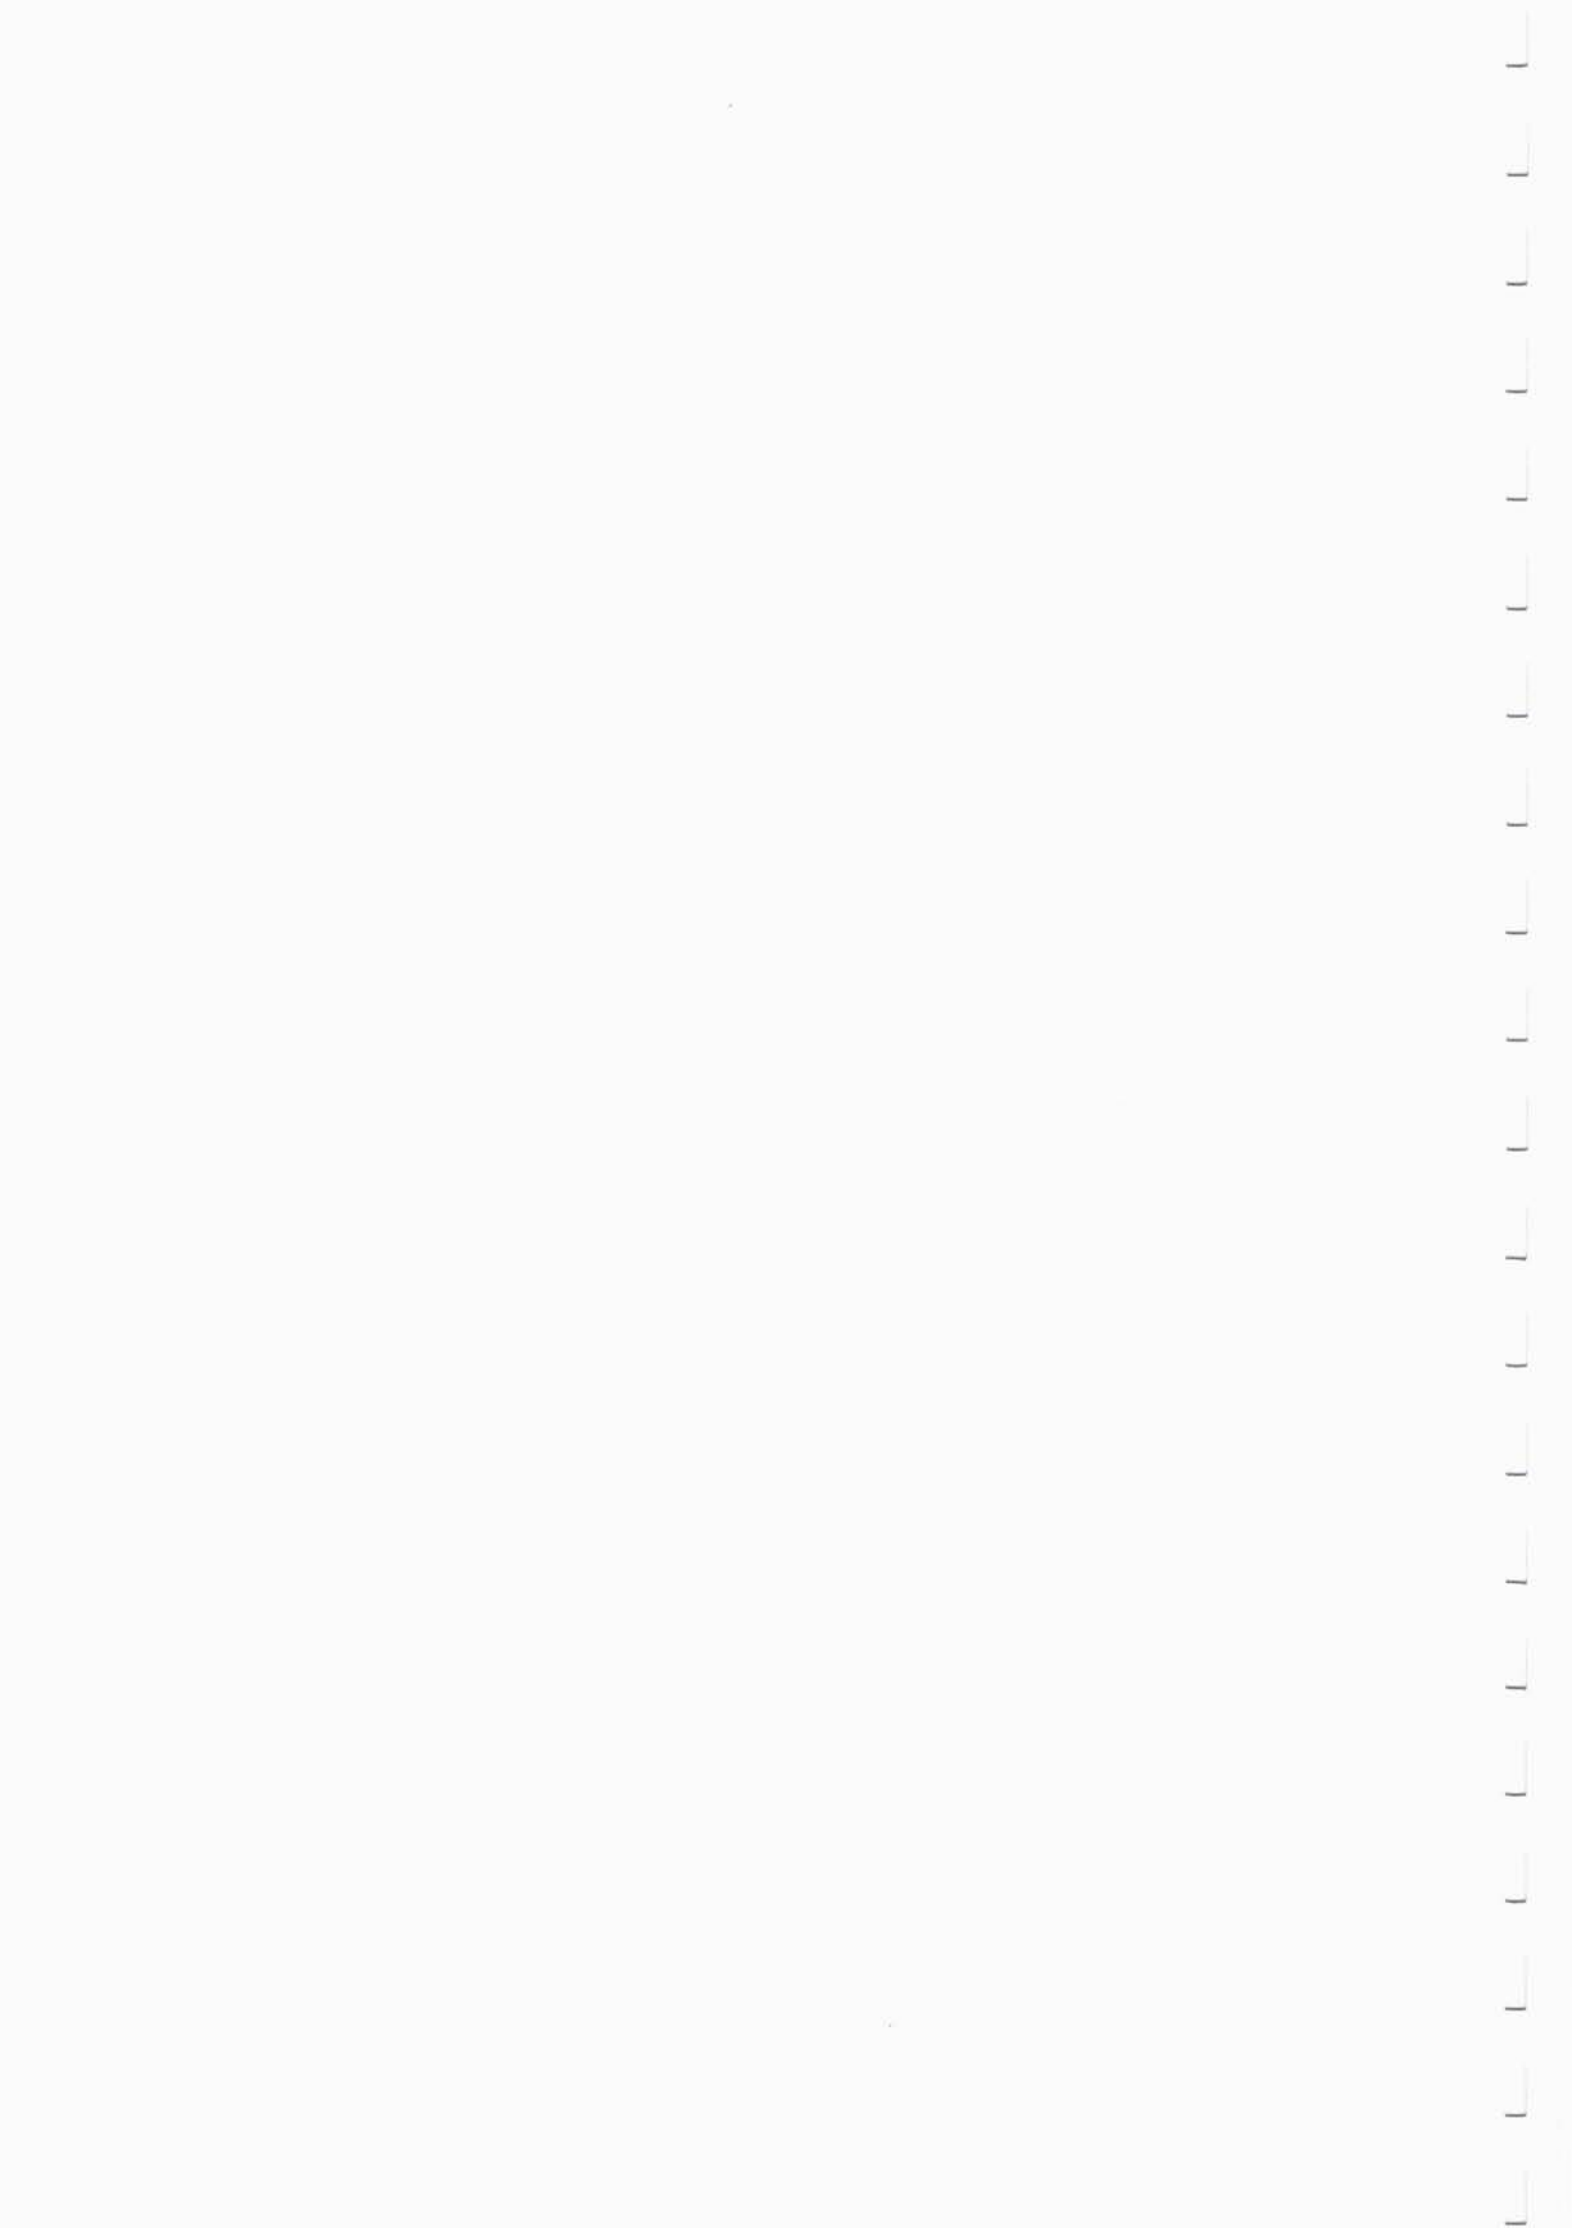

Variance by Legislative District for Vice-Presidential Position

Among the 238 legislative districts, the highest cumulative variance for vice-presidential position was registered in the Lone district of Benguet with 8 cumulative variance from 3 sample clustered precincts.

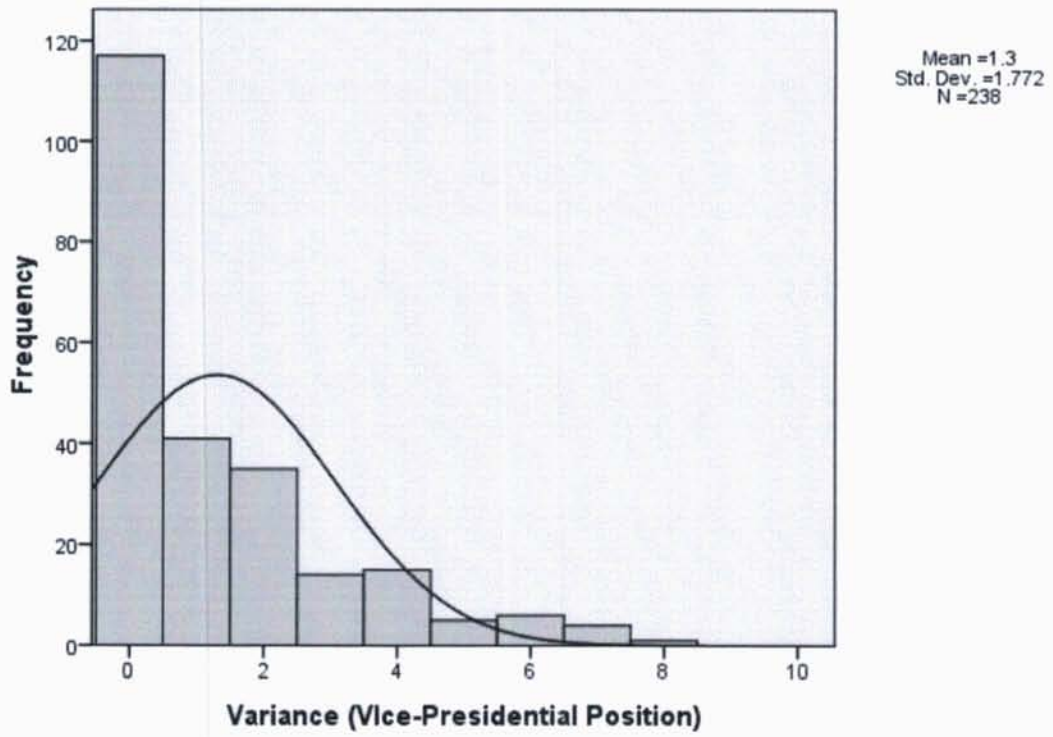

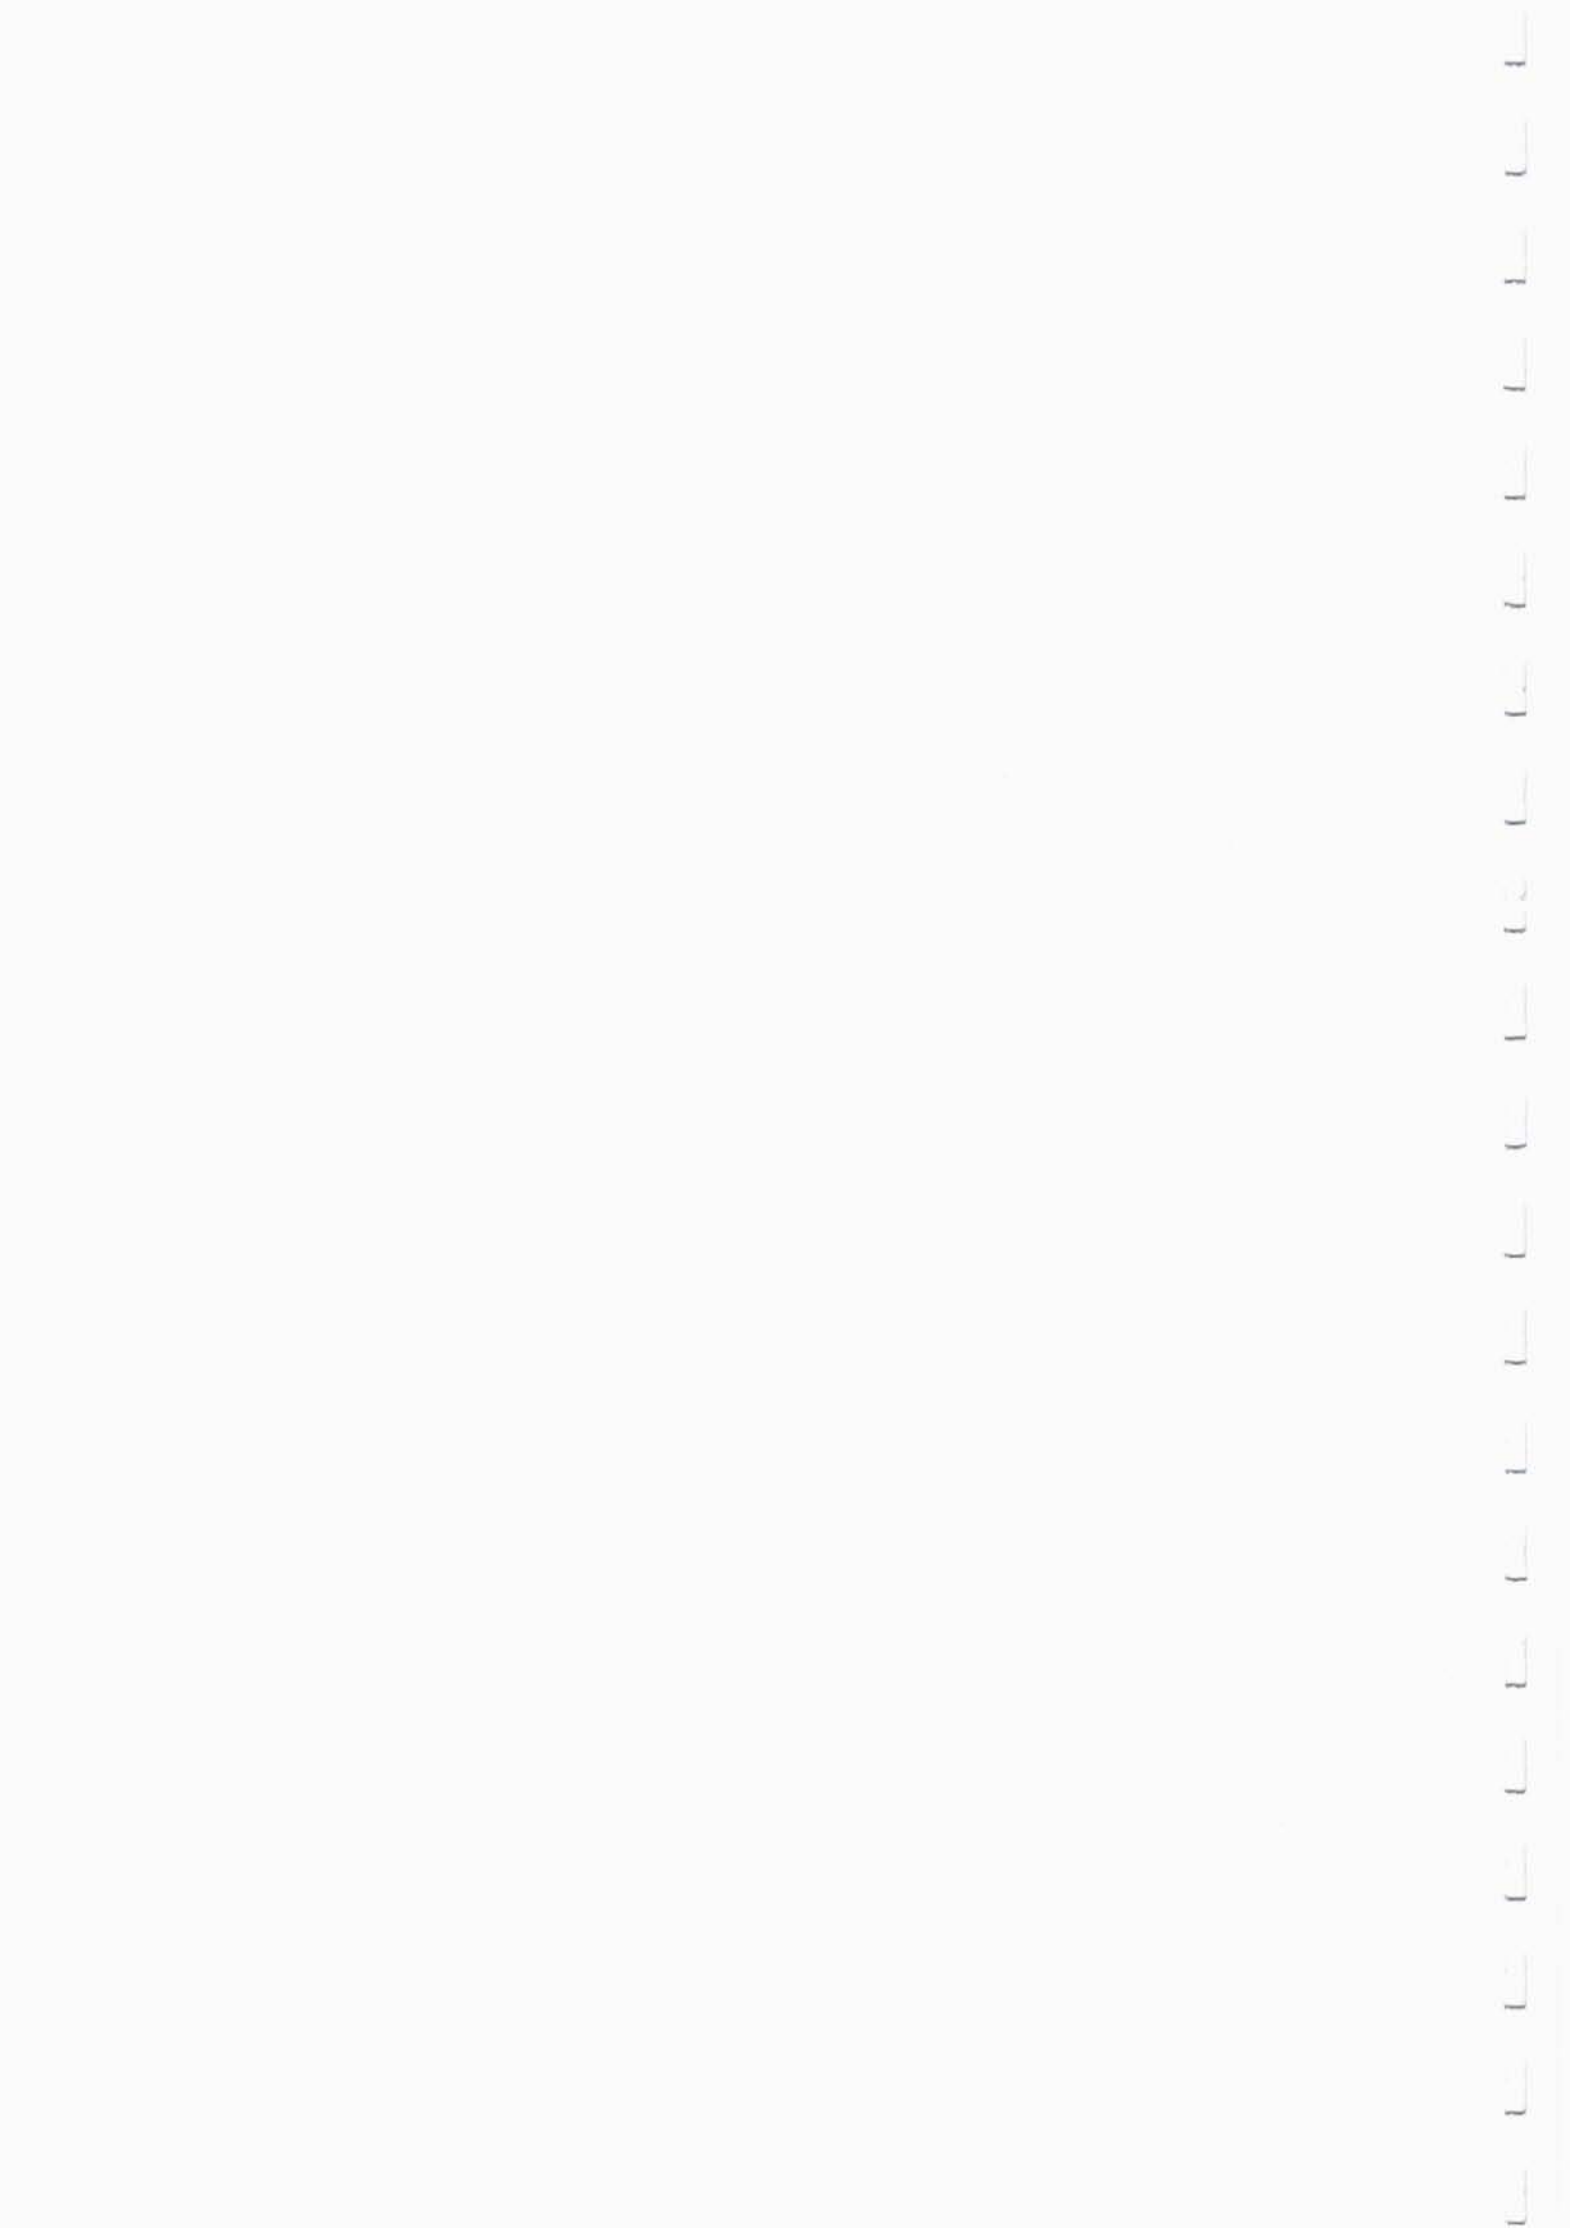

Almost half (49.2%) or 117 the 238 legislative districts has zero variance. The average variance per legislative district for vice-presidential position is 1.3 with a standard deviation of 1.772. Figure D shows the histogram or distribution of variance for vice-presidential position across the legislative districts

Figure D Histogram of Variance for Vice-Presidential Position by Legislative District

Variance (Vice-Presidential Position)

13. Accuracy Rate for Areas without the need for RMAC Validation

The random manual audit system allows a cumulative margin of variance of at most 10 votes at the clustered precinct level. This figure can be translated to at least 99.6% accuracy rate. For the 254 clustered precincts with at most 10 reported cumulative variance, RMAC validation has not been made. However, RMA reports coming from these areas still went through verification for clerical and/or mathematical errors.

At the national level the overall accuracy rate for these areas was at 99.7380 percent. This figure is still within the expected accuracy rate of at least 99.6%. Table B shows the accuracy rate and the cumulative "variance" in absolute values and in original form for all five positions audited in areas with no RMAC validation made.

RMA Position	Total		Variance (Difference between ER and RMA)			Accuracy Rate
	Per ER	Per RMA	In absolute value	Negative	Positive	
President	110,490	110,537	311	-179	132	99.7185
Vice President	107,692	107,752	294	-177	117	99.7270
Member, House of Representatives	98,709	98,808	221	-160	61	99.7761
Governor	71,562	71,643	197	-139	58	99.7247
Mayor	104,715	104,812	277	-187	90	99.7355
Based from 254 of 687 or 36.97% of total clustered precincts processed			Average Overall Accuracy			99.7380

Table B. Variance and Accuracy Rate for areas without RMAC Validation

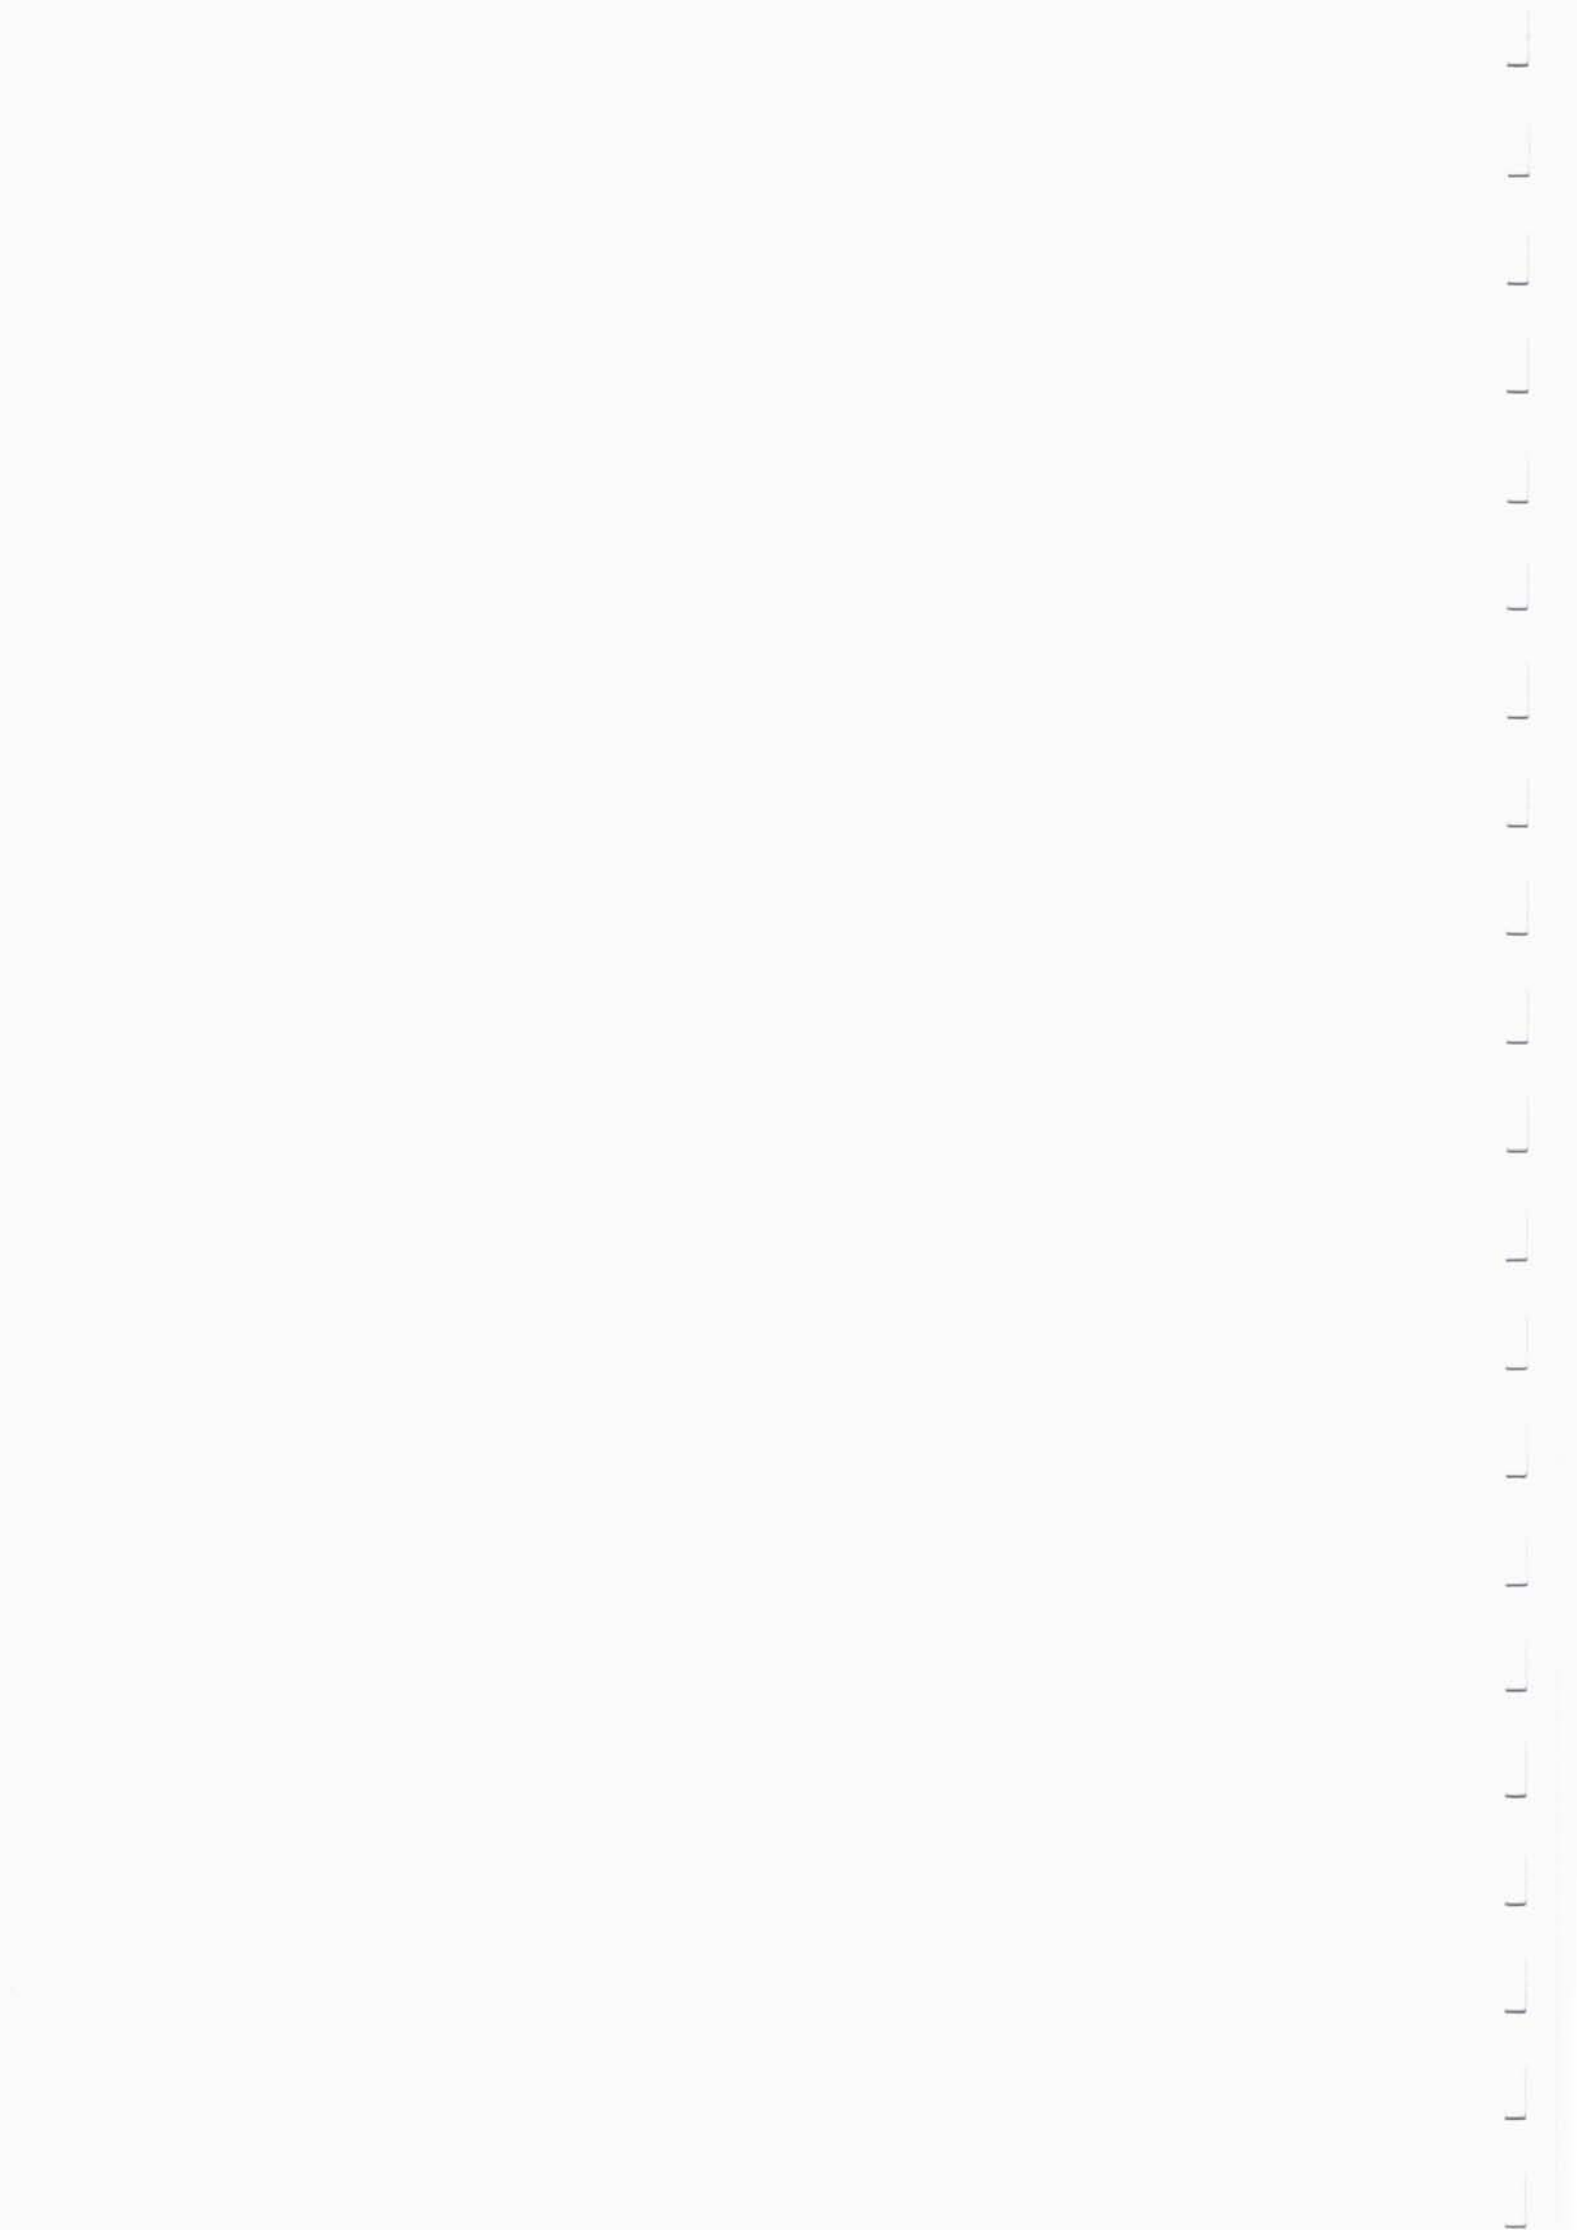

14. Accuracy Rate for Areas with Required RMAC Validation

For clustered precincts with a reported cumulative variance of 10 or higher, further RMAC validation has been made. Of the 687 processed RMA reports, 433 or 63.03% went through RMAC validation.

At the national level the overall accuracy rate after validation was at 99.992.percent. This figure is 0.254 percentage point higher than the computed accuracy rate of 99.7380 for areas with no RMAC validation requirement. Table C shows the accuracy rate and the cumulative “variance” in absolute values and in original form for all five positions audited for areas with RMA reports submitted to RMAC validation.

Table C. Variance and Accuracy Rate for Areas that Required RMAC Validation

RMA Position	Total		Variance (Difference between ER and RMA)			Accuracy Rate
	Per ER	Per RMA	In absolute value	Negative	Positive	
President	203,304	203,313	21	-15	6	99.9897

RESOLUTION NO. 10133 *update*

This pertains to the Memorandum dated May 2, 2016 of Commissioner Luie Tito F. Guia relative to the composition of the Random Manual Audit (RMA) Committee and allocation of clustered precincts per legislative district.

The Memorandum of Commissioner Guia reads:

"The undersigned respectfully [reports to] the members of the Commission En Banc the details of the above-stated subjects.

First, on the membership of the RMA Committee, the undersigned submits herewith that the following organizations and its representatives make up the committee:

Alternate Chairpersons: Mr. David L. Balangue, CPA
 Ms. Tomasa H. Lipana, CPA
 National Citizens' Movement for Free Election
 (NAMFREL)

Members: Atty. Terrie P. Lambino
 Commission on Elections (Comelec)

Deputy National Statistician Josie B. Perez
 Philippine Statistics Authority (PSA)

Second, on the allocation of clustered precincts per legislative district for RMA purposes, the undersigned attaches herewith the specific computation made by PSA. Allocation per legislative district was based on the total number of clustered precincts per legislative district over the total number of clustered precincts nationwide. The RMA Committee wishes to make public the number of clustered precincts allocated per legislative district upon authority of the members of the Commission En Banc.

For Your Honors' consideration,

AB

The Commission **RESOLVED**, as it hereby **RESOLVES**, as follows:

1. to **note** the report on the membership of the RMA Committee; and
2. to **approve** the request of/**confirm** action taken by the RMA Committee in making public the number of clustered precincts allocated per legislative district.

Let the Random Manual Audit Committee implement this Resolution.

SO ORDERED.

RESOLUTION NO. 10109

WHEREAS, the Commission promulgated Resolution No. 10078 on 11 March 2016 entitled *In the Matter of the General Instructions for the Conduct of Random Manual Audit (RMA) for the 9 May 2016 Automated Synchronized National and Local Elections and Subsequent Elections Thereafter*;

WHEREAS, the Commission promulgated Resolution No. 10090 on 13 April 2016 entitled *In the Matter of the Amendments to the General Instructions for the Conduct of Random Manual Audit (RMA) for the 9 May 2016 Automated Synchronized National and Local Elections and Subsequent Elections Thereafter* for purposes of encouraging increased public participation in the conduct of RMA through a change of venue from the polling place of the randomly selected clustered precinct to an RMA Center;

WHEREAS, for purposes of increasing efficiency, securing quality of results, and focused public participation in the conduct of RMA, the time of conduct of RMA has been moved to the morning of the day after Elections;

WHEREAS, in order to streamline the process of the conduct of RMA due to the amendments herein contained and in Resolution No. 10090, there is a need to amend relevant parts of Resolution No. 10078;

NOW THEREFORE, pursuant to the powers vested in it by the Constitution and other existing laws, the Commission RESOLVED, as it hereby RESOLVES to further promulgate the following amendments to the General Instructions for the conduct of Random Manual Audit relative to the 9 May 2016 National and Local Elections and subsequent elections thereafter:

SECTION 1. Section 3 is hereby amended to read as follows:

SECTION 3. *Powers and Functions of the RMA.* -

a) Conduct the RMA in the RMA Center to which they were assigned by the Coordinator at 7:00 o' clock in the morning the day after Elections; provided that RMAT may so choose upon majority vote conduct the RMA at a later time in accordance with Section 6 hereof.

xxx xxx xxx

c) During the conduct of the RMA, maintain peace and order within the RMA Center and its premises, keep access thereto open and unobstructed, and enforce obedience to its lawful orders. If any person refuses to obey the lawful orders of the RMAT, or conducts himself/herself in a disorderly manner in its presence or within its proceeding, or interrupts or disturbs the same, RMAT may issue an Order in writing directing any peace officer to take such person into custody until adjournment of the RMA.

xxx xxx xxx

SECTION 2. Section 4 is hereby amended to read as follows:

SECTION 4. *Honoraria of the RMAT Members.* - The honorarium for each RMAT member shall be Three Thousand Pesos (Php3,000.00) which shall cover their remuneration for services rendered in performing the RMA, in addition to their meal allowance and their transportation allowance.

SECTION 3. Section 5 is hereby amended to read as follows:

SECTION 5. *Selection Process of Areas to be Audited.* -

a) Random selection of the municipality/city from which the clustered precinct/s to be audited per legislative district shall be done at 12:00 o' clock noon on the day of the Elections. Random selection of the clustered precinct/s to be audited per legislative district shall be done at 6:00 o' clock in the morning the day after Elections by the RMA Committee.

The List of Specific Municipality/City shall be disclosed at 2:00 o'clock in the afternoon on the day of the Elections. The List of Specific Clustered Precinct/s per legislative district that will undergo RMA shall be disclosed at 7:00 o' clock in the morning the day after Elections.

xxx xxx xxx

c) The selection of the municipality/city and clustered precinct/s per legislative district will be open for observation of *bona fide* Candidates, Registered Political Parties and Accredited Citizens' Arm Groups.

d) The RMA Committee shall inform all Coordinators of the specific list of municipality/city and randomly selected clustered precinct/s per legislative

district to ensure the following: a) the effective dissemination of information to the Municipal/City Treasurer to turn-over the ballot box to the RMAT members at the RMA Center; and b) the effective conduct of RMA.

SECTION 4. Section 6 is hereby amended to read as follows:

SECTION 6. *Date, Time and Place of RMA.* –

a) The RMA shall take place in the RMA Center/s to be designated by the RMA Committee. The RMA Center/s shall, as far as practicable, be situated in a secure location within the city or municipality of the randomly selected clustered precinct/s. In exceptional circumstances, such as but not limited to peace and order considerations, the RMA Committee shall have the authority to designate an RMA Center in a secure location other than within the city/municipality of the randomly selected clustered precinct/s.

b) The RMA shall be conducted at 7:00 o' clock in the morning the day after Elections.

c) The RMA shall be conducted in the presence of Poll Watchers, Registered Political Parties Citizens' Arm Groups, Media and the Public.

d) Upon commencement of the RMA until the same is terminated, the regular BEI shall not be allowed inside the RMA Center or to communicate with RMAT in whatever manner.

The RMAT may choose, upon majority vote, to postpone the conduct of RMA only upon exceptional circumstances such as:

- a. the RMA Center is affected by a power interruption;
- b. fire and any other calamity in the RMA Center or within the immediate area;
- c. occurrence of violence in the RMA Center or within the immediate area; and
- d. other circumstances analogous to the foregoing.

In such event, the RMAT shall immediately conduct RMA upon cessation of the cause of postponement. The RMAT shall appraise the present Poll Watchers of their decision and notify the Coordinator, who shall make arrangements for the security of the sealed ballot box and the place for the RMA. The RMAT shall moreover submit a Report to the RMA Committee regarding their decision, the arrangements for the security of the sealed ballot box and the place for the RMA.

In the event of the existence of circumstances other than those enumerated above, which would negatively impact the conduct of RMA, the RMAT, upon majority vote, shall submit a Request to postpone conduct of the RMA for approval of the RMA Committee.

SECTION 5. Section 7 is hereby amended to read as follows:

SECTION 7. Deployment of the RMA and Turn-over of Ballot Boxes. –

- a) Not later than the end of the day of Elections, the Coordinator shall be responsible for the speedy dissemination of the Appointment Papers and RMA Kits to the Office of the Election Officers of the selected municipality/city for final distribution to the assigned RMA members in his/her jurisdiction. The Coordinator shall likewise assign the RMA members to a designated RMA Center within the same period of time.
- b) In the morning of the day after Elections, the RMA members shall accomplish their Appointment Papers and secure their RMA Kit at the Office of the Election Officer of the selected municipality/city.
- c) The RMA members shall proceed to the RMA Center immediately upon accomplishing their Appointment Papers and securing their RMA Kit. The RMA members shall await announcement of the list of specific clustered precinct/s to be audited per legislative district in the RMA Center.
- d) Upon arrival at the RMA Center, the RMA members shall organize their workstation/s in an orderly manner. The RMA members shall take out all forms in their RMA Kit.

The Chairman shall take in his/her possession the three (3) copies of the Minutes of the RMA. The Secretary shall hold the six (6) copies of the Audit Returns. The Third Member shall post the Tally Board in its proper place.

After receiving information on the randomly selected clustered precinct/s to be audited, the RMA, with the assistance of the Office of the Election Officer of the selected municipality/city, shall retrieve the ballot box of the randomly selected clustered precinct/s from the Municipal/City Treasurer. The Coordinator shall ensure proper coordination among the RMA, the Office of the Election Officer of the selected municipality/city and the Municipal/City Treasurer for the retrieval of the ballot box.

SECTION 6. Section 11(b) is hereby amended to read as follows:

SECTION 11. Minutes and Audit Returns of RMA. –

XXXXXXXXXX

Audit Returns:

- a) The Secretary shall accomplish six (6) copies of the Audit Returns by accurately entering therein the votes obtained by each candidate.
- b) Copies of the Audit Returns shall be signed by all RMA members and sealed in separate clearly labelled envelopes for distribution, as follows:
- b.1. The original copy shall be deposited inside the ballot box.
 - b.2. One (1) intended for the Commission shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.

b.3. One (1) intended for the RMA Committee shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of RMA Committee.

b.4. One (1) copy for the Dominant Majority Political Party.

b.5. One (1) copy for the Dominant Minority Political Party.

b.6. One (1) copy for the Accredited Citizens' Arm Group authorized to assist the Commission in conducting RMA.

The Accredited Citizens' Arm Group referred to in the preceding paragraph shall, upon request, furnish copies of the Audit Returns to the Accredited Citizens' Arm Group authorized by the Commission on Elections to receive one of the first eight copies of the Election Returns and to conduct an unofficial parallel count.

SECTION 7. Section 13(e) is hereby amended to read as follows:

SECTION 13. *Discrepancy Between AES and RMA.* - In the event of discrepancy between the AES and RMA results still exceeds the allowable margin of an aggregate difference of ten (10) votes, the RMA Committee, with the assistance of the Validation Personnel, shall:

xxxxxxxxxx

e. Return the box to the concerned City/Municipal Treasurer in case the finding is that the discrepancy does not actually exist or a mere mathematical error;

In the event of a finding that the discrepancy actually exists or is not due to mere mathematical error, the RMA Committee shall have the authority to resort to other available documents, such as but not limited to the picture images of the ballots or the Voter Verified Paper Audit Trail, for determination of the possible cause of discrepancy.

xxxxxxxxxx

SECTION 8. *Effectivity and Dissemination.* - This Resolution shall take effect immediately upon its publication in two (2) daily newspapers of general circulation in the Philippines.

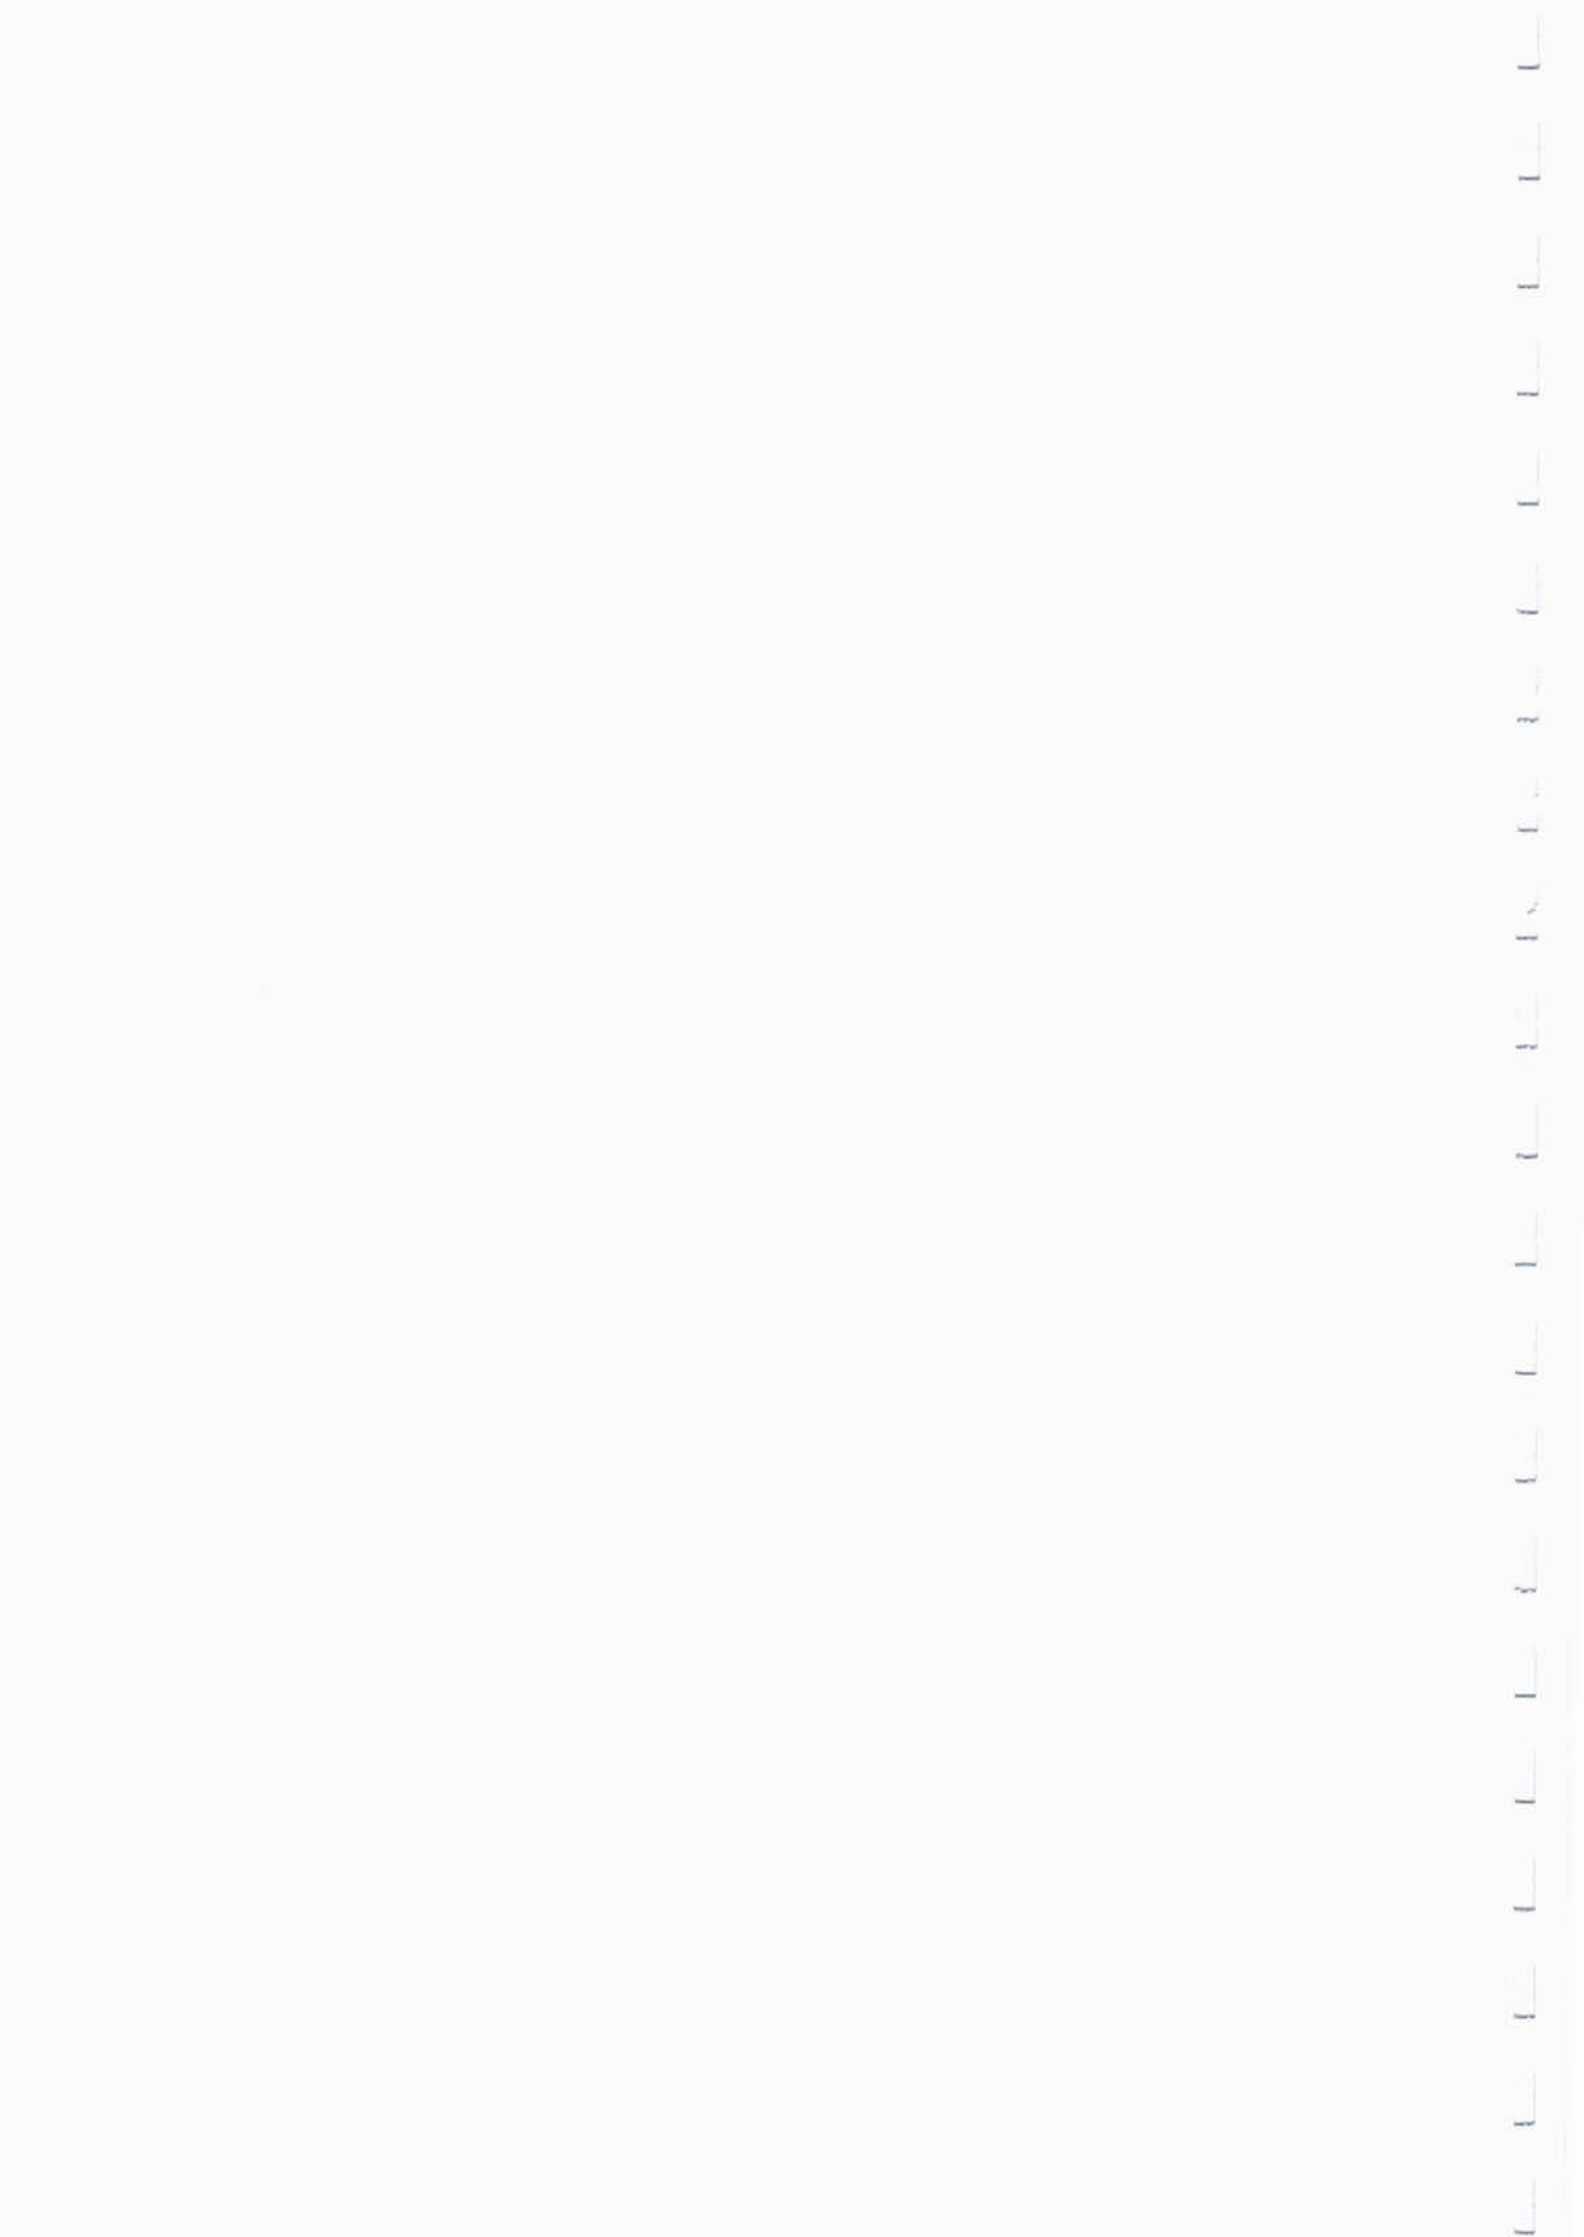

The Education and Information Department shall cause the publication of this Resolution and shall furnish copies thereof to all Regional Election Directors, Provincial Election Supervisors and Election Officers, as well as to Commission on Elections Accredited Citizens' Arm Group authorized to receive one of the first eight copies of the Election Returns and to conduct unofficial parallel count.

SO ORDERED.

Promulgated: April 13, 2016

RESOLUTION NO. 10090

WHEREAS, the Commission promulgated Resolution No. 10078 on 11 March 2016 entitled *In the Matter of the General Instructions for the Conduct of Random Manual Audit (RMA) for the 9 May 2016 Automated Synchronized National and Local Elections and Subsequent Elections Thereafter*;

WHEREAS, for purposes of encouraging increased public participation in the conduct of RMA, a change of venue from the polling place of the randomly selected clustered precinct to an RMA Center has been proposed and approved;

WHEREAS, there is a need to amend relevant parts of Resolution No. 10078 in order to implement the above-stated change of venue for the conduct of RMA;

NOW THEREFORE, pursuant to the powers vested in it by the Constitution and other existing laws, the Commission **RESOLVED**, as it hereby **RESOLVES** to promulgate the following **amendments** to the General Instructions for the conduct of Random Manual Audit relative to the 9 May 2016 National and Local Elections and subsequent elections thereafter:

SECTION 1. Section 5 is hereby amended to read as follows:

SECTION 5. *Selection Process of Arenas to be Audited.* -

- a) Random selection of the clustered precinct/s to be audited per legislative district will be done not later than four (4) days prior to the day of the Elections by the RMA Committee. The List of Specific Clustered Precinct/s per legislative district that will undergo RMA shall be disclosed at the close of the voting hours on the day of the Elections.

b) At least one (1) clustered precinct per legislative district shall be randomly selected for audit, the number of which shall be proportional to the total number of clustered precincts of the legislative district over the total number of clustered precincts nationwide. The random selection shall be done using an automated random selection program. The source code of the software used for the random selection may be reviewed by representatives of Registered Political Parties and Accredited Citizen's Arm Groups. The computation for the proportionate allocation of clustered precincts and the design of the automated random selection program shall be provided by the Philippine Statistics Authority (PSA).

b.1. Registered Political Parties and Accredited Citizens' Arm Groups interested in conducting a Source Code Review as herein provided shall signify their intent in writing and submit the methodologies, which they intend to use, as well as the names of their representative who will review the Source Code, on or before the 15th of March of the year of the Elections for approval of the Commission on Elections.

b.2. Registered Political Parties and Accredited Citizens' Arm Groups shall execute a Non-Disclosure Agreement before conducting a Source Code Review.

b.3. The Commission shall provide a secure and enclosed facility/ location for the conduct of the Source Code Review and shall properly record all entries to and exits from the said facility/ location.

b.4. The Commission shall provide only a read-only copy of the Source Code, which shall be viewed in a workstation inside the secured facility/ location.

b.5. Registered Political Parties and Accredited Citizens' Arm Group shall not take out any copy of the Source Code or any part thereof from the secured facility/ location.

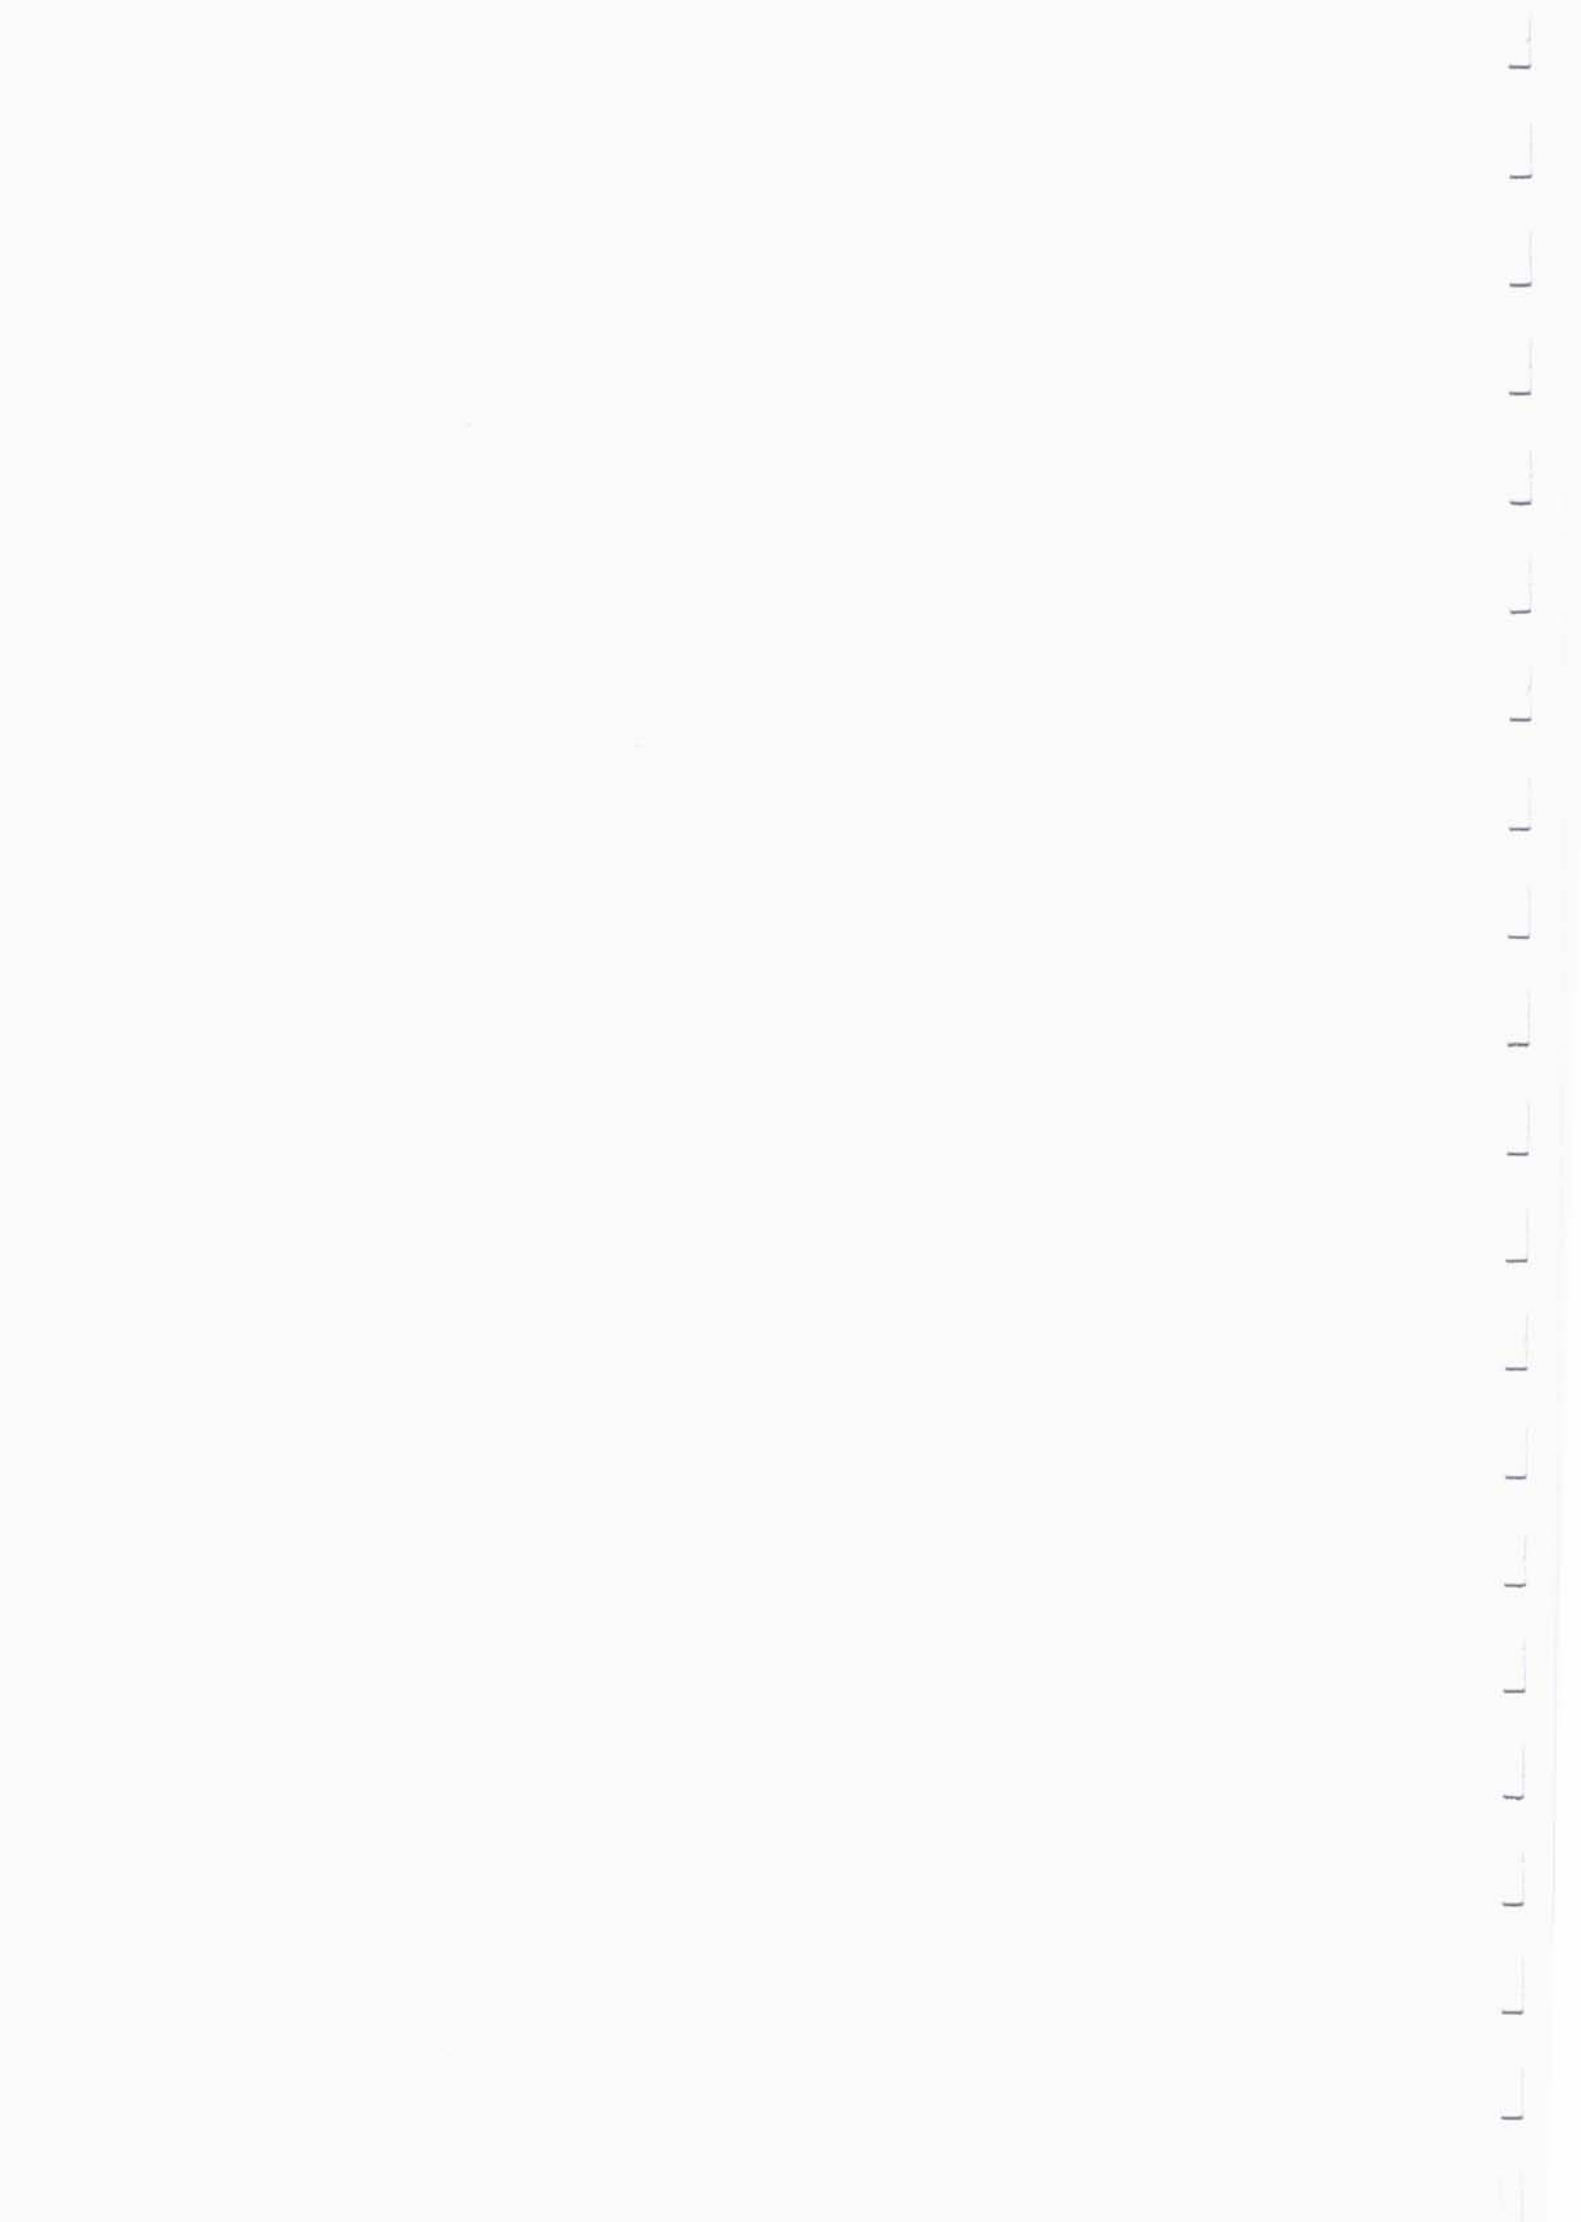

b.6. The Commission shall not permit any electronic device, including but not limited to laptops, mobile phones, camera, USB drives and other storage devices, inside the secure facility/ location.

b.7. Source Code Review must be initiated by the first week of April of the year of the Elections but must be finished within fifteen (15) days thereafter.

b.8. Each Registered Political Party or Accredited Citizens' Arm Group that conducted a Source Code Review shall submit a Report to the Commission within ten (10) days from completion of the review.

c) The selection of the clustered precinct/s per legislative district will be open for observation of *bona fide* Candidates, Registered Political Parties and Accredited Citizens' Arm Groups.

d) The RMA Committee shall inform all Coordinators of the specific list of randomly selected clustered precinct/s per legislative district to ensure the following: a) the effective dissemination of information to the Reception and Custody Group of the City/Municipal Board of Canvassers to turn-over the

ballot box to the RMAT members at the RMA Center; and b) the effective conduct of RMA.

SECTION 2. Section 6 is hereby amended to read as follows:

SECTION 6. *Date Time and Place of RMA.* -

a) The RMA shall take place in the RMA Center/s to be designated by the RMA Committee. The RMA Center/s shall, as far as practicable, be situated in a secure location within the city or municipality of the randomly selected clustered precinct/s.

b) The RMA shall be conducted immediately upon turn-over and proper endorsement of the ballot box of the randomly selected clustered precinct by the Reception and Custody Group of the City/Municipal Board of Canvassers to the RMAT at the RMA Center.

c) The RMA shall be conducted in the presence of Poll Watchers, Registered Political Parties Citizens' Arm Groups, Media and the Public.

d) Upon commencement of the RMA until the same is terminated, the regular BEI shall not be allowed inside the RMA Center or to communicate with RMAT in whatever manner.

The RMAT may choose, upon majority vote, to conduct the RMA at 7:00 o'clock in the morning the day after Elections only upon exceptional circumstances such as:

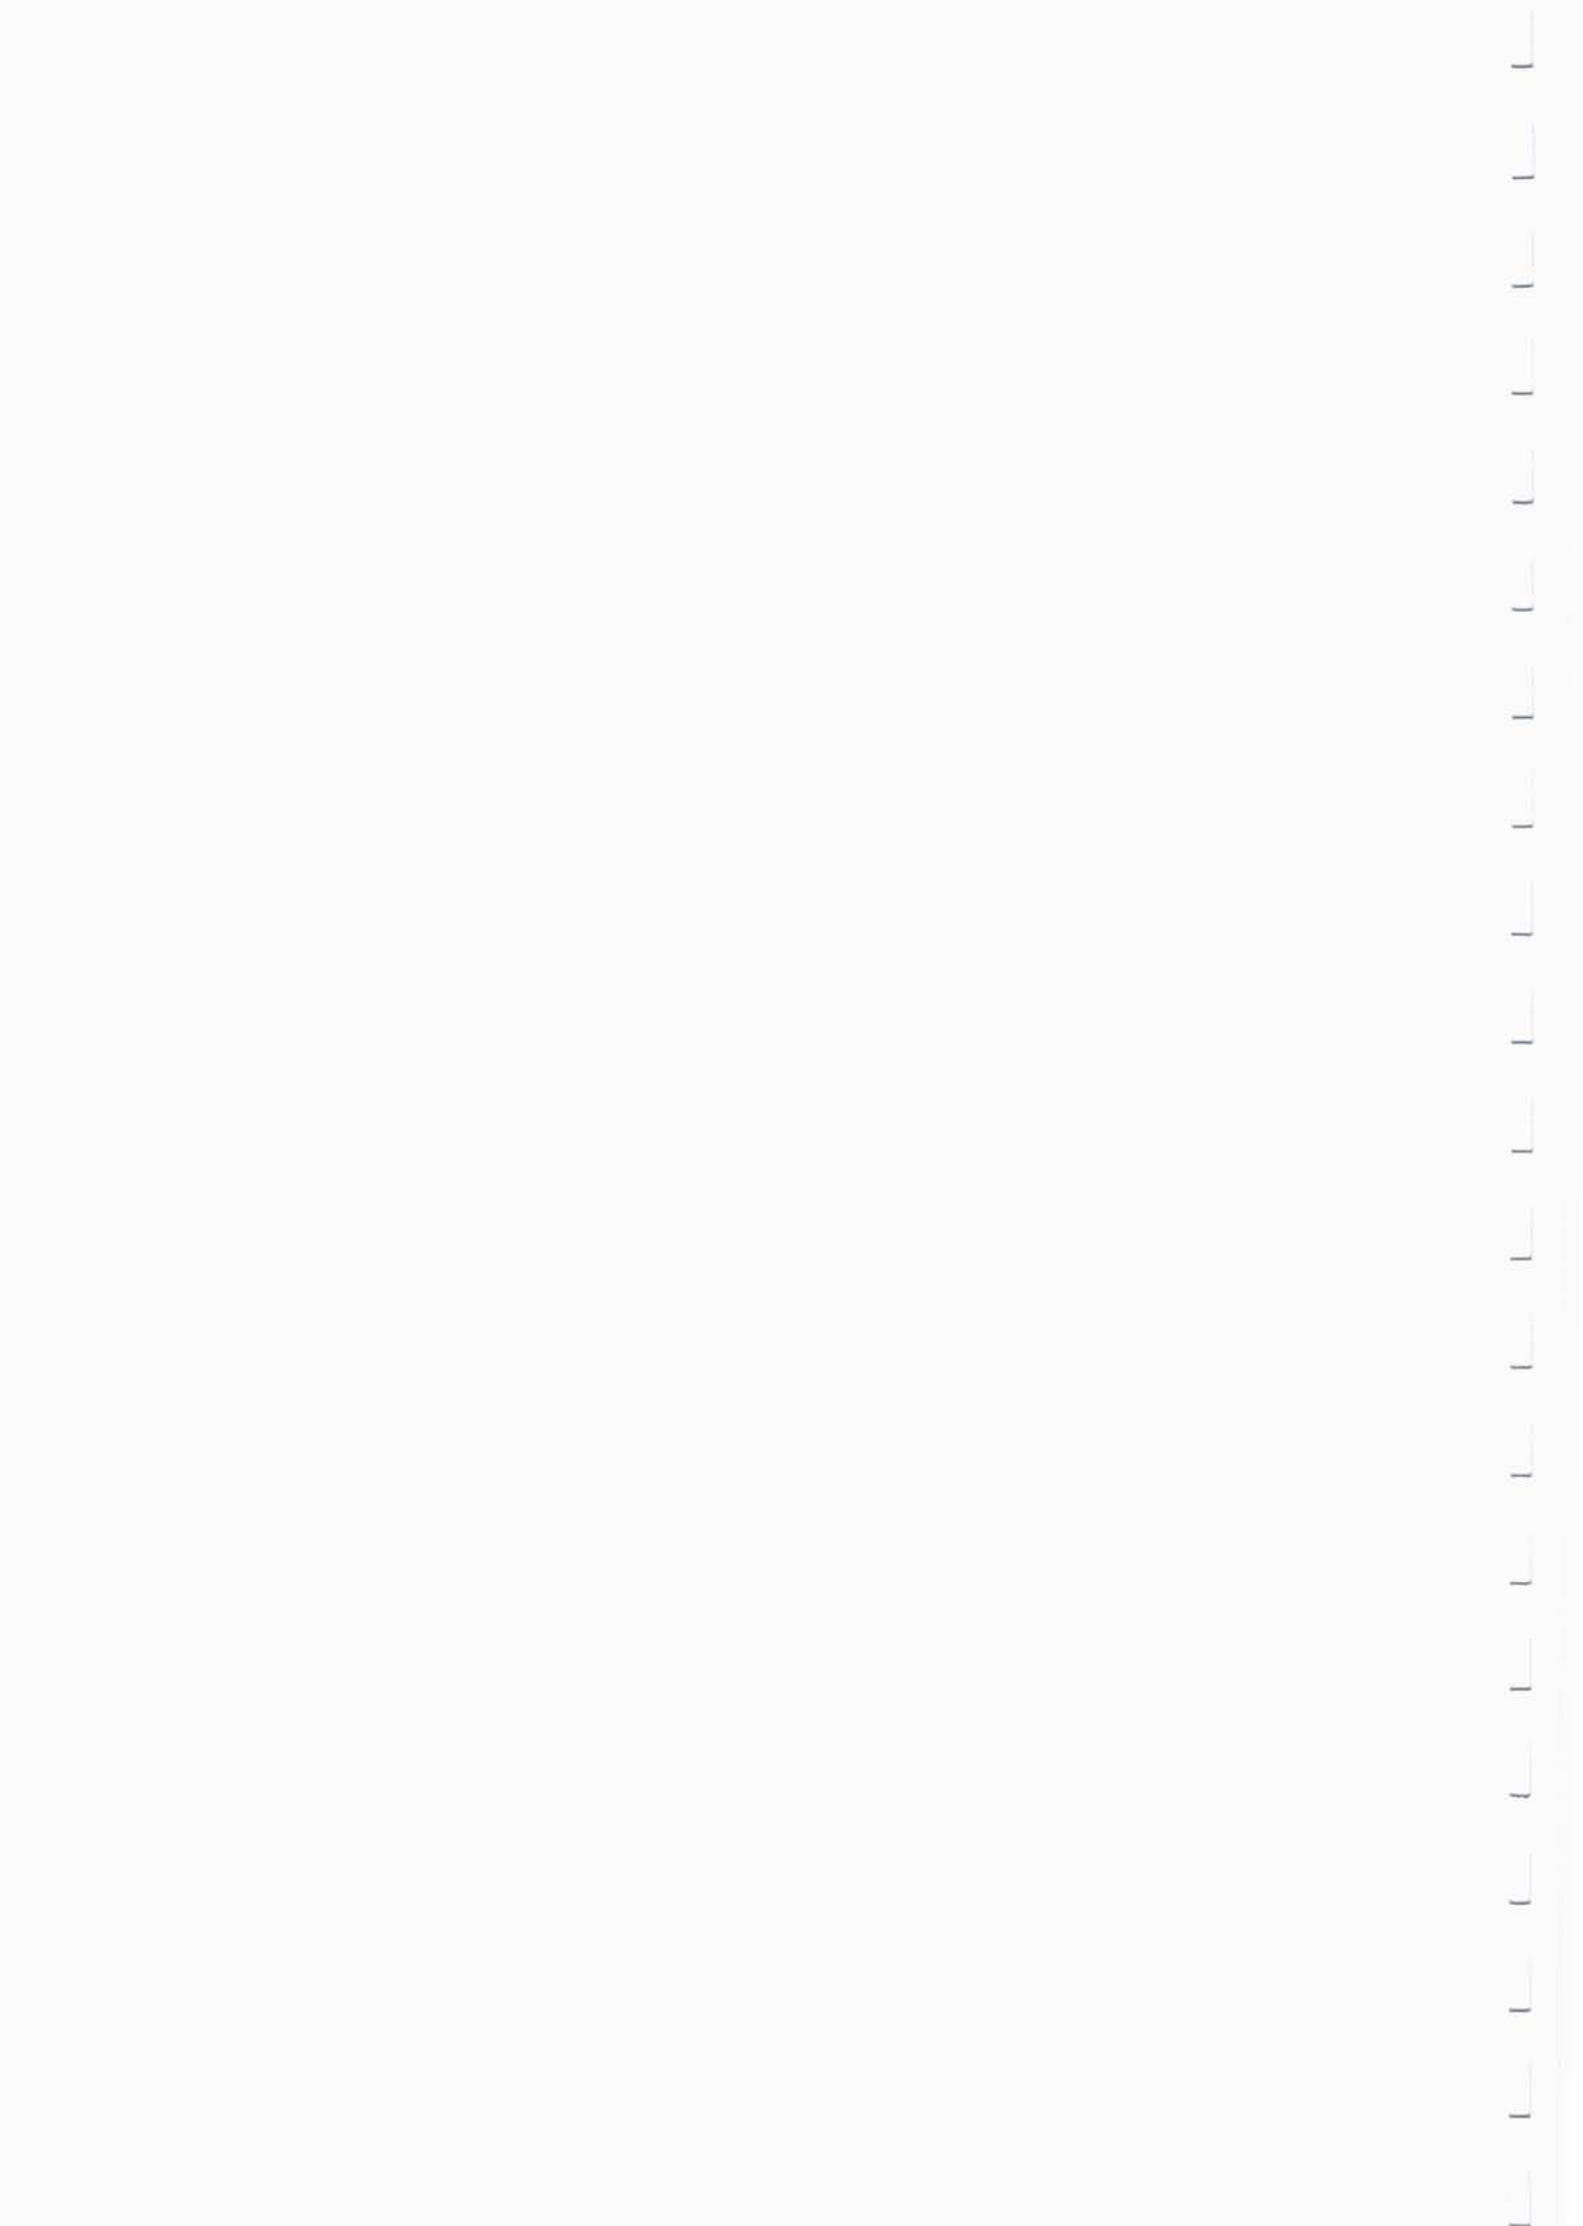

- a. the RMA Center is affected by a power interruption;
- b. fire and any other calamity in the RMA Center or within the immediate area;
- c. occurrence of violence in the RMA Center or within the immediate area; and
- d. other circumstances analogous to the foregoing.

In such event, RMAT should appraise the present Poll Watchers of their decision and notify the Coordinator, who shall make arrangements for the security of the sealed ballot box and the place for the RMA. The RMAT shall moreover submit a Report to the RMA Committee regarding their decision, the arrangements for the security of the sealed ballot box and the place for the RMA.

SECTION 3. Section 7 is hereby amended to read as follows:

SECTION 7. *Deployment of the RMAT and Turn-over of Ballot Boxes.* -

a) Not later than noon of the day of Elections, the Coordinator shall be responsible for the speedy distribution of the Appointment Papers and RMA Kits to the RMAT members within his/her jurisdiction.

b) After the RMA members have accomplished their Appointment Papers and received their RMA Kit, the Coordinator shall assign the RMA members to a designated RMA Center.

c) The RMA members shall proceed to the RMA Center immediately upon receipt of their assignment from the Coordinator.

c) Upon arrival at the RMA Center, the RMA members shall organize their workstation/s in an orderly manner. The RMA members shall take out all forms in their RMA Kit.

The Chairman shall take in his/her possession the three (3) copies of the Minutes of the RMA. The Secretary shall hold the six (6) copies of the Audit Returns. The Third Member shall post the Tally Board in its proper place.

After which, the RMA members shall wait for the turn-over and proper endorsement of the ballot box of the specific randomly selected clustered precinct assigned to them for audit by the Reception and Custody Group of the City/Municipal Board of Canvassers.

SECTION 4. Effectivity and Dissemination. - This Resolution shall take effect immediately upon its publication in two (2) daily newspapers of general circulation in the Philippines.

The Education and Information Department shall cause the publication of this Resolution and shall furnish copies thereof to all Regional Election Directors, Provincial Election Supervisors and Election Officers, as well as to Commission on Elections Accredited Citizens' Arm Group authorized to receive one of the first eight copies of the Election Returns and to conduct unofficial parallel count.

SO ORDERED.

x-----x Promulgated: March 11, 2016 *[Signature]*

RESOLUTION NO. 10078 *[Signature]*

WHEREAS, the Commission is mandated under Section 24 of Republic Act No. 9369, amending Section 29 of Republic Act No. 8436, to conduct random manual audit;

WHEREAS, the Commission promulgated Resolution No. 9595 dated 21 December 2012 and entitled "*In the Matter of the General Instructions for the Conduct of a Random Manual Audit for the 13 May 2013 National, Local & Elections and Subsequent Elections Thereafter*";

WHEREAS, the Commission subsequently amended the above-stated resolution through the promulgation of Resolution No. 9647 dated 22 February 2013;

WHEREAS, there is a need to amend the above-stated resolution primarily for the purpose of further advancing randomness in the selection of clustered precinct/s per legislative district and the effective implementation thereof;

NOW THEREFORE, pursuant to the powers vested in it by the Constitution and other existing laws, the Commission **RESOLVED**, as it hereby **RESOLVES** to promulgate the following General Instructions for the conduct of Random Manual Audit relative to the 9 May 2016 National and Local Elections and subsequent elections thereafter:

SECTION 1. *Composition and Appointment of the Random Manual Audit Team (RMAT) to Conduct the Random Manual Audit (RMA).* -

a) The Commission on Elections, through the RMA Committee, shall appoint the RMAT composed of five (5) members per randomly selected clustered precinct specifically designated to conduct the RMA and, in case of unavailability, a substitute member per legislative district shall be appointed by the RMA Committee not later than April of the year of the Elections.

[Signature]

b) All RMAT members shall be under the direct control and supervision of the RMA Committee. The RMA Committee will designate Election Officers, or in lieu thereof Provincial Election Supervisors or the Assistant Regional Election Director for NCR, as the case may be, as Coordinators for the conduct of the RMA.

c) The RMAT shall be composed of five (5) members:

- c.1. Chairman;
- c.2. Secretary;
- c.3. Third Member;
- c.4. Co-Chairman; and
- c.5. Assistant Secretary.

d) Each RMAT shall be subdivided into two (2) groups: 1) the Chairman, Secretary and Third Member shall comprise the Manual Count Group while 2) the Co-Chairman and Assistant Secretary comprise the Verification Group.

e) RMAT members shall be public school teachers, giving preference to those who have served as members of the Board of Elections Inspectors or the RMAT in past Elections.

f) The Department of Education (DepEd) shall submit a list of at least six (6) proposed RMAT members per randomly selected clustered precinct not later than the 15th of March of the year of the Election. Five (5) of the proposed RMAT members shall be pre-selected by the RMA Committee to serve in the randomly selected clustered precinct/s per legislative district. The other proposed member shall serve as substitute, if the need for it arises.

g) In case of absence or illness of an RMAT member, the RMAT members who are present shall call upon the substitute to perform the duties of the absent member.

g.1. If none is available, the RMAT members present shall appoint any of the following listed below in the order of priority to temporarily fill said vacancy until the absent members appears, provided that the substitute member is qualified, non-partisan and a registered voter in the province concerned:

- g.1.1. Teachers in public schools;
- g.1.2. Teachers in private schools;
- g.1.3. Employees in the civil service;
- g.1.4 Members of the non-partisan Commission on Elections accredited Citizens' Arm of the concerned legislative district; or

g.2. In case no substitution is made for the absent RMAT member and no person is qualified to be a temporary member as provided for in the preceding section, the present RMAT members shall proceed with the conduct of the RMA and shall decide only upon a unanimous vote.

✓

h) As soon as the selection of RMA members are finalized, the RMA Committee shall disseminate through the fastest means possible the corresponding appointment papers through the DepEd and the Coordinator concerned.

i) All RMA members shall accomplish their Appointment Papers and take their Oath no later than 12:00 noon of the day of the Elections.

SECTION 2. Qualifications of the RMA. - Members of the RMA, whether regular, substitute or temporary, must:

- a) be of good moral character, non-partisan and of irreproachable reputation;
- b) be a registered voter in the province where he or she is to serve;
- c) not be related up to the fourth (4th) degree of consanguinity and affinity to any candidate, to any member of the regular Board of Election Inspectors (BEI) who conducted the polls in the same clustered precinct, or to the other members of the RMA of which he/she is a part of;
- d) have never been convicted of any election offense or of any other crime punishable by more than six (6) months imprisonment;
- e) have no pending case against him/her filed before the Commission on Elections or Trial Court for any election offense;
- f) not be a member of a regular Board of Election Inspectors (BEI) serving in the same Elections;
- f) speak, read and write English or Filipino and the local dialect; and
- g) have undergone the required training for RMA members.

SECTION 3. Powers and Functions of the RMA. -

a) Conduct the RMA in the polling place of the randomly selected clustered precinct to which they were assigned by the Coordinator immediately after the Board of Election Inspectors seals the ballot box; provided that RMA may so choose upon majority vote conduct the RMA at 7:00 o'clock in the morning the day after Elections pursuant to Section 6 hereof.

The members of the RMA shall be held liable in the event of their failure to conduct RMA in accordance with the preceding paragraph. Without prejudice to any administrative, criminal or civil liability incurred, the Commission, through the RMA Committee, shall likewise have the authority to withhold the honoraria, meal allowance, and transportation allowance of the members of the RMA should they fail to conduct RMA in accordance with the preceding paragraph.

b) Act as deputies of the RMA Committee in the conduct, supervision and control of the RMA.

c) During the conduct of the RMA, maintain peace and order within the randomly selected clustered precinct and its premises, keep access thereto open and unobstructed, and enforce obedience to its lawful orders. If any person refuses to obey the lawful orders of the RMA, or conducts himself/herself in a disorderly manner in its presence

or within its proceeding, or interrupts or disturbs the same, RMA may issue an Order in writing directing any peace officer to take such person into custody until adjournment of the RMA.

d) Perform such other functions prescribed by the RMA Committee, or under the Omnibus Election Code or by any other rules and regulations promulgated by the Commission on Elections.

SECTION 4. *Honorarium of the RMA Members.* - The honorarium for each RMA member shall be Two Thousand Pesos (Php2,000.00) which shall cover their remuneration for services rendered in performing the RMA, in addition to their meal allowance and their transportation allowance.

SECTION 5. *Selection Process of Areas to be Audited.* -

a) Random selection of the clustered precinct/s to be audited per legislative district will be done not later than four (4) days prior to the day of the Elections by the RMA Committee. The List of Specific Clustered Precinct/s per legislative district that will undergo RMA shall be disclosed in the morning of the day of the Elections.

b) At least one (1) clustered precinct per legislative district will be drawn randomly based on the proportionate allocation of clustered precincts per legislative district *vis-à-vis* the total number of clustered precincts. The random selection shall be done using an automated random selection program, subject to Source Code Review by Registered Political Parties and Accredited Citizen's Arm Groups. The computation for the proportionate allocation of clustered precincts and the design of the automated random selection program shall be under the control of the Philippine Statistics Authority (PSA).

b.1. Registered Political Parties and Accredited Citizens' Arm Groups interested in conducting a Source Code Review shall signify their intent in writing and submit the methodologies, which they intend to use, as well as the names of their representative who will review the Source Code, on or before the 15th of March of the year of the Elections for approval of the Commission on Elections.

b.2. Registered Political Parties and Accredited Citizens' Arm Groups shall execute a Non-Disclosure Agreement before conducting a Source Code Review.

b.3. The Commission shall provide a secure and enclosed facility/ location for the conduct of the Source Code Review and shall properly record all entries to and exits from the said facility/ location.

b.4. The Commission shall provide only a read-only copy of the Source Code, which shall be viewed in a workstation inside the secured facility/ location.

b.5. Registered Political Parties and Accredited Citizens' Arm Group shall not take out any copy of the Source Code or any part thereof from the secured facility/ location.

b.6. The Commission shall not permit any electronic device, including but not limited to laptops, mobile phones, camera, USB drives and other storage devices, inside the secure facility/ location.

A

b.7. Source Code Review must be initiated by the first week of April of the year of the Elections but must be finished within fifteen (15) days thereafter.

b.8. Each Registered Political Party or Accredited Citizens' Arm Group that conducted a Source Code Review shall submit a Report to the Commission within ten (10) days from completion of the review.

c) The selection of the clustered precinct/s per legislative district will be open for observation of *bona fide* Candidates, Registered Political Parties and Accredited Citizens' Arm Groups.

d) The RMA Committee shall inform all concerned Coordinators having jurisdiction over the randomly selected clustered precinct/s per legislative district to ensure the effective deployment of RMA and conduct of RMA.

SECTION 6. Date Time and Place of RMA. -

a) The RMA shall take place in the polling place of the randomly selected clustered precinct/s per legislative district.

b) The RMA shall be conducted immediately after the sealing of the ballot box by the BEI.

c) The RMA shall be conducted in the presence of Poll Watchers, Registered Political Parties Citizens' Arm Groups, Media and the Public.

d) Upon commencement of the RMA until the same is terminated, the regular BEI shall not be allowed inside the polling place of the randomly selected clustered precinct/s or to communicate with RMA in whatever manner.

The RMA may choose, upon majority vote, to conduct the RMA at 7:00 o'clock in the morning the day after Elections only upon exceptional circumstances such as:

- a. the polling place is affected by a power interruption;
- b. fire and any other calamity in the polling place or within the immediate area;
- c. occurrence of violence in the polling place or within the immediate area; and
- d. other circumstances analogous to the foregoing.

In such event, RMA should appraise the present Poll Watchers of their decision and notify the Coordinator, who shall make arrangements for the security of the sealed ballot box and the place for the RMA. The RMA shall moreover submit a Report to the RMA Committee regarding their decision, the arrangements for the security of the sealed ballot box and the place for the RMA.

SECTION 7. Deployment of the RMA. -

a) Immediately after receiving information of the randomly selected clustered precinct/s per legislative district, the Coordinator shall assign the RMA members to a specific randomly selected clustered precinct.

b) The Coordinator shall be responsible for the speedy distribution of the Appointment Papers and RMA Kits to the RMA members within his/her jurisdiction, after he/she is informed of the randomly selected clustered precinct.

c) The RMA members shall proceed to the assigned polling place of the randomly selected clustered precinct on the day of the Elections as soon as they receive their Appointment Papers and RMA Kit. The RMA upon arrival at the assigned polling place of the randomly selected clustered precinct shall proceed to the BEI and inform the same of the clustered precinct selection for the RMA. The RMA shall witness the closing of the ballot box; provided that in the event that the counting machine fails to transmit the result, the RMA will follow the BEI and the aforementioned ballot box until the BEI transmits the results.

d) After the BEI has accomplished all of its duties and responsibilities, save for the delivery of the ballot boxes to the concerned City/Municipal Treasurers/Prosecutors, the BEI of the randomly selected clustered precinct who conducted the polls shall endorse the ballot box to the RMA; provided that, in the event that the BEI already turned over that ballot box to the RMA upon presentation of their Appointment Papers, who shall proceed to conduct the random manual audit pursuant to Section 6.

SECTION 8. Procedure for the Random Manual Audit. - In case the Commission decides to utilize Direct Recording Electronic (DRE) Voting Machines instead of the paper-based Optical Mark Reader (OMR) Counting Machines, receipts are taken to be the material equivalent of ballots for purpose of this Resolution.

At the start of the RMA, the Chairman shall:

a) Announce the commencement of the RMA and determine the presence of a quorum. In case of an absence or illness of an RMA member, the members present shall summon the substitute member. The RMA shall proceed with the RMA while waiting for the substitute, provided a quorum is present. The presence of two (2) Manual Count Group members and one (1) Verification Group member shall suffice to constitute a quorum.

b) Proceed with the RMA by presenting the ballot box to all those who are present.

c) Verify the condition of the following items to check if the integrity is maintained:

c.1. Ballot box; and

c.2. Fixed-lengths seals attached to the ballot box.

d) Break the fixed-length seals and open the ballot box.

e) Retrieve the sealed envelopes containing the Minutes of Testing and Sealing, the Minutes of Voting and Counting and the copy of the Election Returns from the ballot box.

f) Break the security seals and open the envelopes containing the Minutes of Testing and Sealing, the Minutes of Voting and Counting and the copy of the Election Returns.

The Assistant Secretary shall:

A

g) Verify if serial numbers of the fixed-length seals attached ballot box is the same as that indicated in the Minutes of Voting and Counting. The results of such verification or any discrepancy whatsoever shall be recorded in the RMA Minutes.

h) Ensure that every event is recorded in the RMA Minutes; provided that, if there is any article that the BEI should have placed inside the ballot box and that is found missing, the RMA should get a witness to attest to such fact by signing the RMA Minutes.

In the event that the copy of the Election Returns for the ballot box is missing therein, the RMA shall borrow one (1) of the twenty-two (22) copies of the Election Returns printed after the AES results have been transmitted.

Thereafter, the Secretary, with the aid of the Assistant Secretary, shall:

i) Retrieve the valid ballots from the ballot box, perform a physical count and compare if the number of valid ballots found inside the ballot box is equal to the number of valid ballots counted as indicated in the Election Returns.

The Third Member shall:

j) Do a recount if the total number of valid ballots contained inside the ballot box does not match with the number of valid ballots counted as indicated in the Election Returns as found by the Secretary, to confirm such finding. After the said recount and the total number of valid ballots still does not match the number of valid ballots counted, the Third Member shall determine whether valid ballots were mixed with rejected ballots by referring to the Minutes of Testing and Sealing and Minutes of Voting and Counting of the BEI and have the Assistant Secretary record the incident in the RMA Minutes.

SECTION 9. Guidelines on Readings of Votes. - The Chairman, prior to reading the votes cast, shall:

a) Check the number of votes for each position subject to RMA.

a.1. In case there is an over-vote, such fact shall be recorded in the Audit Returns by the Secretary but the vote shall not be counted for any candidate for that particular position. An over-vote is an incident when a voter selects more than the allowed number of seats allowed, i.e. an over-vote for senators is the fact of over-voting in any particular position will not invalidate the entire ballot or receipt. The ballot shall remain valid and votes for other positions (that are not over-voted) shall be counted.

a.2. In case there is an under-vote, such fact shall similarly be recorded in the Audit Returns by the Secretary. An under-vote pertains to the situation where the voter chooses less than the allowed maximum number of seats for a position, i.e. if there are twelve (12) seats for a position with only one (1) seat. The fact of under-voting in any particular position will not invalidate the votes for that position.

The Chairman shall set aside ballots with over-votes and those with under-votes in the respective envelopes so denominated. In the event that a ballot has an over-vote and an under-vote, the ballot should be placed in the Envelope for Ballots with Over-votes.

✓

b) In case the Elections utilize an OMR Counting Machine, if an oval of a ballot is not shaded properly, i.e. the shaded portion of the oval is below the approved threshold, or contains other questionable marks (such as checks or crosses), the appreciation of vote corresponding to the candidate shall be subject to the specific guidelines to be issued by the RMA Committee. The subject ballot shall then be placed in an RMA envelope for Ballots with Questionable Marks.

In the event that a ballot has an over-vote and/or under-vote and contains questionable marks, the said ballot should be placed in the Envelope for Ballots with Over-votes.

c) In case of the Elections utilize a DRE Voting Machine, the Chairman shall read the votes on the receipt as they are and make no appreciation thereof.

The Co-Chairman shall validate the finding of the Chairman. In case of dispute with the Chairman, the findings of the Co-Chairman will prevail. The Co-Chairman marks the ballot then places the same in an envelope for Disputed Ballots and directs the Assistant Secretary to record the incident in the RMA Minutes.

The RMA members are not permitted to mark the ballots in any manner except when Co-Chairman marks the ballot as "disputed."

SECTION 10. Manner of Counting of Votes. - a) The RMA shall proceed with the counting of votes for the following positions:

a.1. For Presidential Elections: President, Vice-President, Member House of Representatives, Governor and Mayor; and

a.2. For Midterm Election: Senators, Member House of Representatives and Mayor.

b) The Chairman and Co-Chairman shall form separate piles of one hundred (100) ballots.

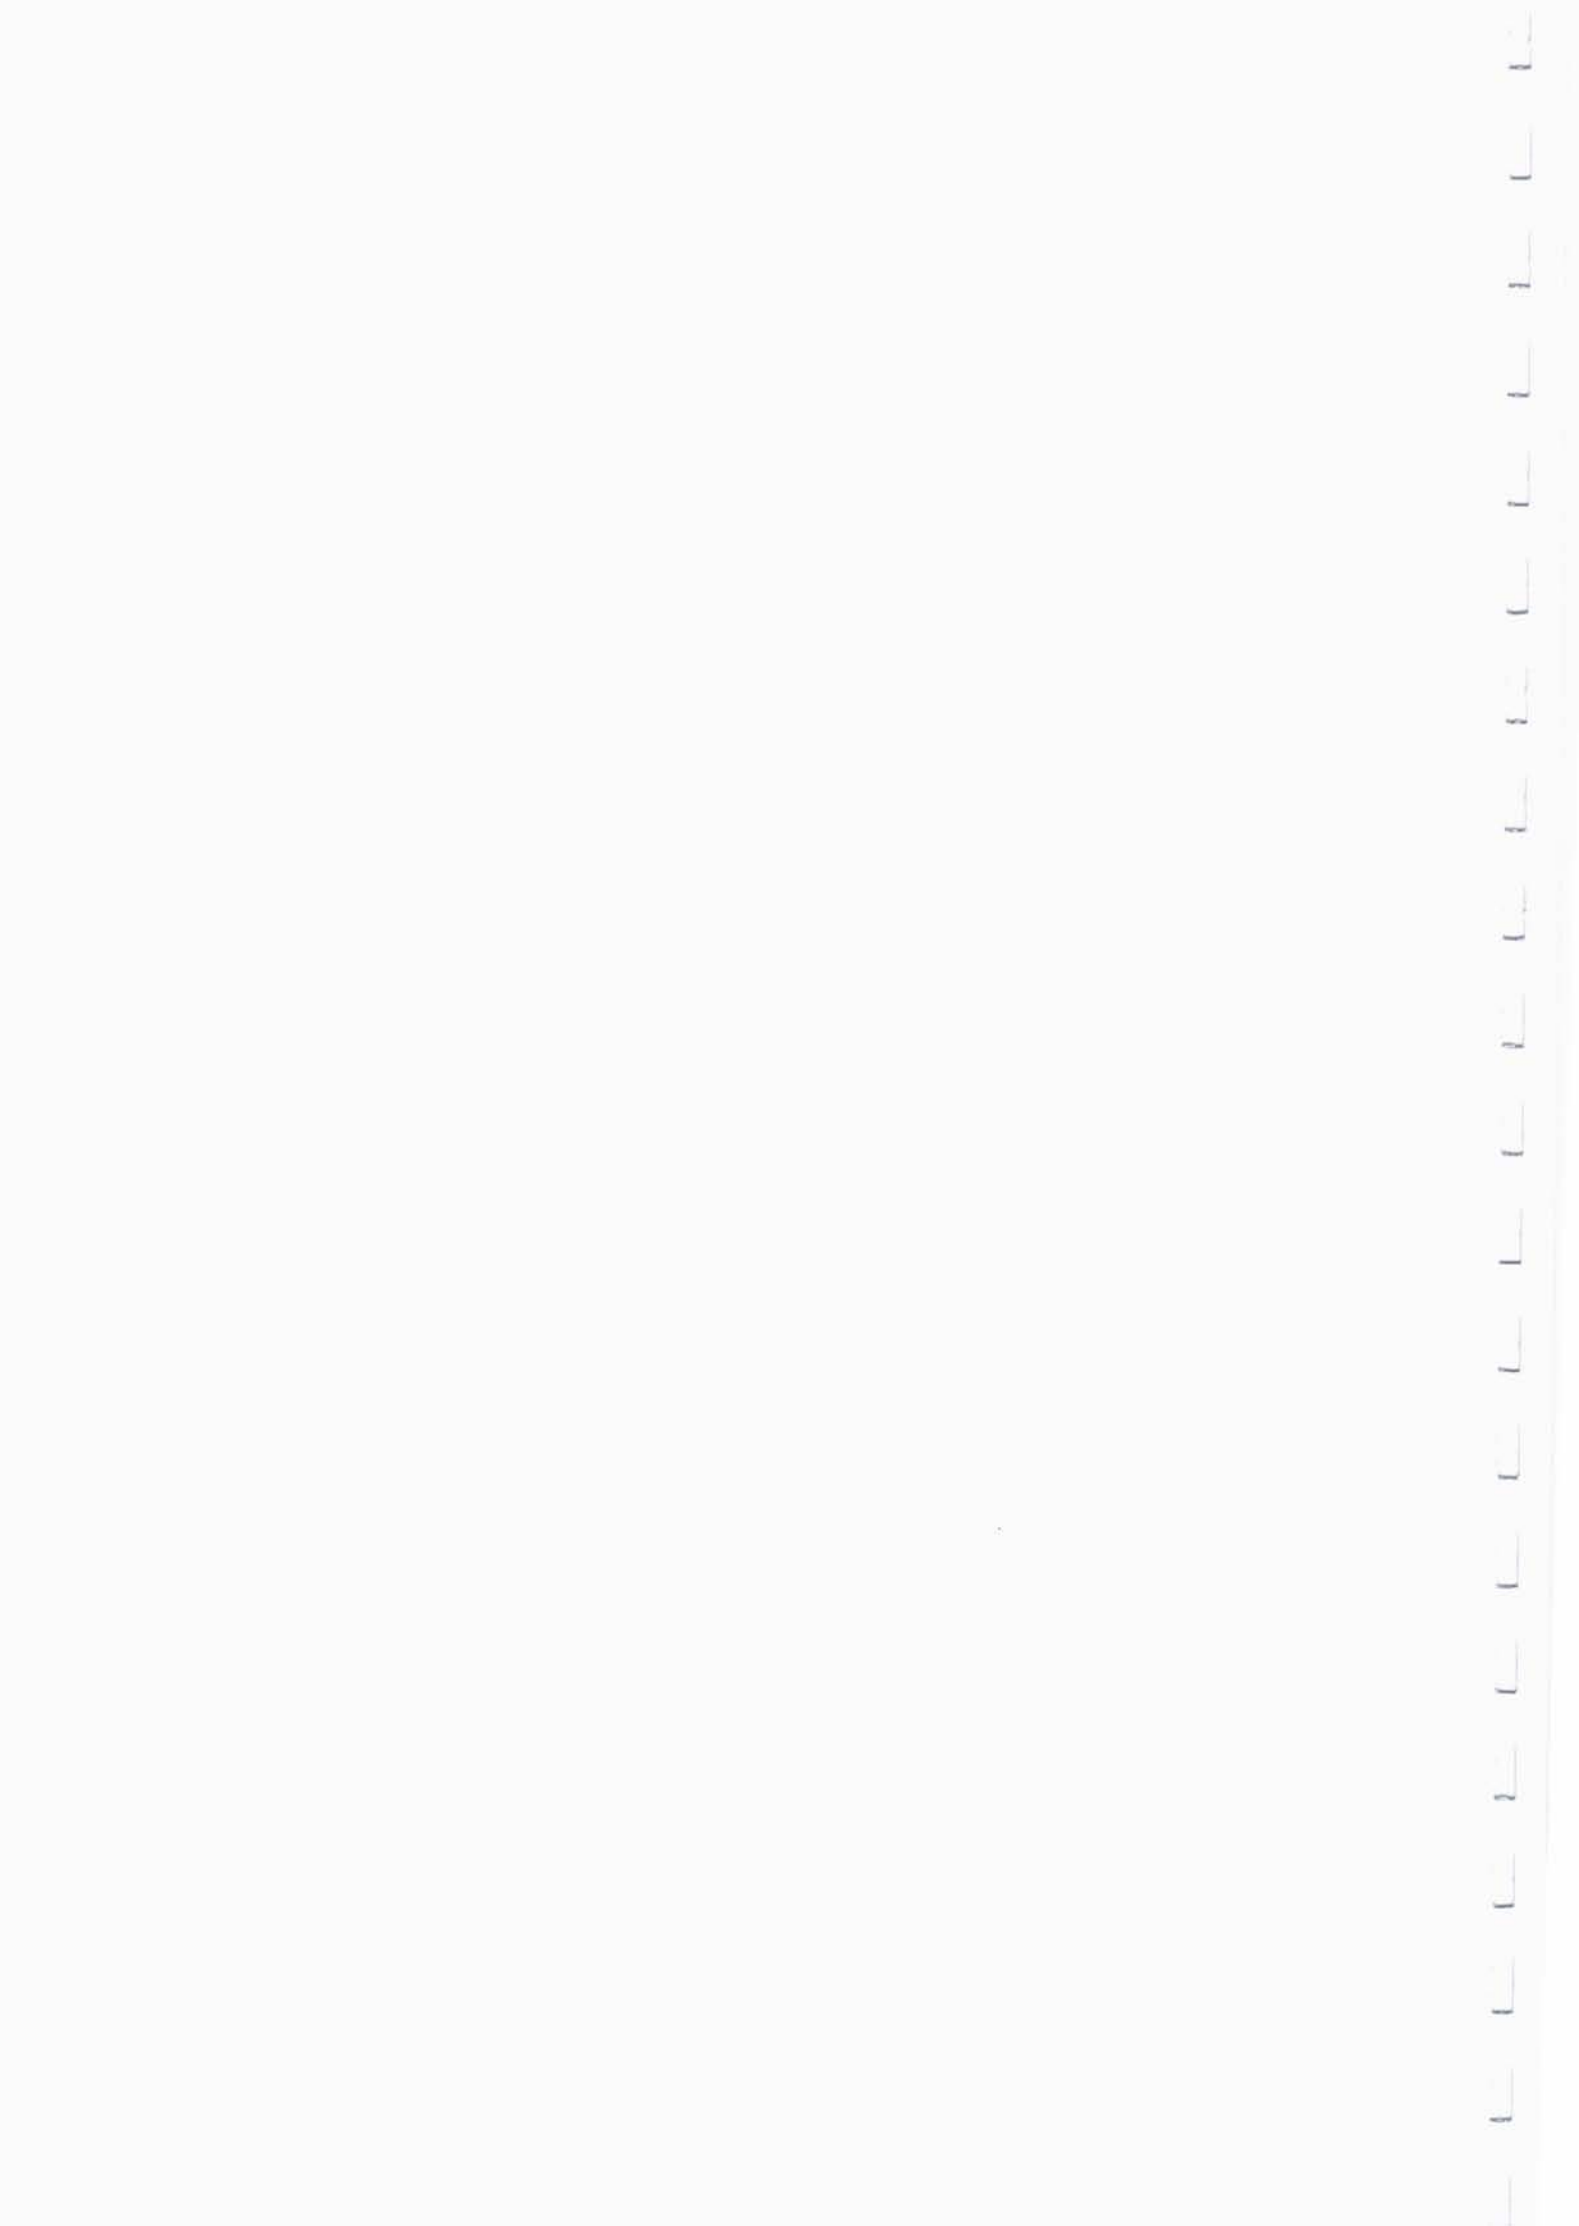

c) The Chairman shall take the ballots of the first pile one by one and read first the number assigned to the candidate followed by the candidate's name.

d) For every ballot, the Chairman shall announce the votes cast. The Co-Chairman shall closely observe the reading of the ballots and validate the votes cast. In case of dispute, the finding of the Co-Chairman shall prevail. The Co-Chairman marks the ballot then places the same in the envelope for Disputed Ballots and directs the Assistant Secretary to record the incident in the RMA Minutes.

The RMA members are not permitted to mark the ballots in any manner except when Co-Chairman marks the ballot as "disputed."

e) The Secretary shall accomplish the six (6) copies of the Audit Returns and respectively record thereon each vote read by the Chairman, while the Third Member does the same on the Tally Board. The Assistant Secretary shall confirm that the Secretary records each vote correctly. Each vote shall be recorded by a vertical line, except every fifth vote which shall be recorded by a diagonal line crossing the previous four (4) vertical lines (taras).

MF

f) After each pile has been read, the votes obtained by each candidate shall be added and the sum recorded on the space immediately after the last vote recorded.

g) The same procedure shall be followed with the succeeding piles.

h) After all the ballots or receipts have been read, the Secretary, the Assistant Secretary and Third Member shall compute and record, in words and figures, the total number of votes obtained by each candidate in the Audit Returns and the Tally Board. The Secretary, the Assistant Secretary and Third Member shall compare if their tallies are the same; otherwise, they shall repeat the counting procedure until their tallies are the same.

i) The Chairman shall enter the AES results for President, Vice-President, Senators, Member House of Representatives, Governor and Mayor as the case may be, in the Audit of Returns and compare the same with the RMA results to determine if discrepancy exists.

j) In case the number of votes counted by the RMA does not match the number of votes found in the Election Returns, the Chairman shall record such discrepancy in the RMA Minutes of Voting and Counting for any possible reason for such discrepancy, (i.e. rejected or spoiled ballots). The Co-Chairman and Assistant Secretary shall review the entries of the Audit Returns in order to exclude the possibility of human error.

k) If a discrepancy still exists, the RMA shall note this down and the probable reasons therefor in the RMA Minutes.

During the counting, the RMA shall position themselves in such a way as to give the Poll watchers and the Public an unimpeded view of the ballot or receipt, as the case may be, being read by the Chairman, as well as of the Audit Returns and Tally Board being simultaneously accomplished by the Secretary, Assistant Secretary and Third Member, respectively. The table to be used by the RMA shall be cleared of all unnecessary things.

Lawyers, Poll Watchers or Representatives of Political Parties and/or Candidates and the Public shall not touch any RMA documents/paraphernalia. Any violation hereof shall constitute an election offense and shall be penalized in accordance with Batas Pambansa Blg. 881. Lawyers, Poll Watchers or Representative of Political Parties and/or Candidates shall have no involvement in the proceedings of the RMA except as observers.

Upon conclusion of the RMA, all RMA members shall affix their signature on the RMA Minutes, Tally Board and Audit Returns attesting to the contents thereof. Poll Watchers shall witness the recording of entries and affixing of signatures of the RMA members. The Chairman shall immediately notify the concerned Coordinator of the results of the RMA, who in turn, shall report the same to the RMA Committee.

The RMA shall be provided with security personnel until the RMA is finished and shall ensure the safety and security of the RMA and its proceedings.

SECTION 11. Minutes and Audit Returns of RMA. -

Minutes of the RMA:

A

a) The Chairman shall accomplish three (3) copies of the Minutes of the RMA, accurately entering therein all data requires as they become available and all acts or events as they occur.

b) Copies of the Minutes shall be signed by all RMAT members and sealed in separate clearly labeled envelopes for distribution, as follows:

b.1. The original copy shall be deposited inside the ballot box.

b.2. One (1) intended for the Commission on Elections shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.

b.3. One (1) intended for the RMA Committee shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of RMA Committee.

Audit Returns:

a) The Secretary shall accomplish six (6) copies of the Audit Returns by accurately entering therein the votes obtained by each candidate.

b) Copies of the Audit Returns shall be signed by all RMAT members and sealed in separate clearly labeled envelopes for distribution, as follows:

b.1. The original copy shall be deposited inside the ballot box.

b.2. One (1) intended for the Commission shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.

b.3. One (1) intended for the RMA Committee shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of RMA Committee.

b.4. One (1) copy for the Dominant Majority Political Party.

b.5. One (1) copy for the Dominant Minority Political Party.

b.6. One (1) copy for the Accredited Citizens' Arm Group authorized by the Commission on Elections to receive one of the first eight copies of the Election Returns and to conduct an unofficial parallel count.

SECTION 12. Closing Procedure. - The following shall be observed:

a) The RMAT shall return the ballots in the ballot box.

b) All BEI reports, documents, forms, and the Minutes of Testing and Sealing and the Minutes of Voting and Counting previously opened shall be resealed using the seals provided in the RMA Kit.

c) One (1) copy of the Audit Returns used during the conduct of the RMA shall be sealed in a clearly labeled envelop and placed inside the ballot box. The Tally Board shall also be placed in the ballot box.

d) The Chairman shall lock the ballot box with fixed length seals. The serial number of the fixed-length seal shall be recorded in the RMA Minutes before closing the ballot box.

e) The Chairman shall turn over the ballot box to the City/Municipal Treasurer for safekeeping. Retrieval of the Box shall be under the custody and responsibility of the City/Municipal Treasurer and shall form part of the retrieval operations of the Treasurer's Office. However, in case the discrepancy exceeds the allowable margin of an aggregate difference of ten (10) votes, the ballot box in the question shall be turned over by RMAT to the Office of the Coordinator. The Chairman of RMAT shall inform all the watchers present that the ballot box will be submitted to the Coordinator for delivery to the RMA Committee. The Coordinator shall authorize a representative to personally deliver the said ballot box to the RMA Committee for verification within twenty-four (24) hours from receipt thereof.

SECTION 13. Discrepancy Between AES and RMA. - In the event of discrepancy between the AES and RMA results still exceeds the allowable margin of an aggregate difference of ten (10) votes, the RMA Committee, with the assistance of the Validation Personnel, shall:

a. Notify Candidates, Political Parties and their Watchers, who may observe the proceedings, through the Regional Election Director (for NCR) or the concerned Provincial Election Supervisor of the date and time of transport of the ballot boxes to the RMA Committee;

b. Open the boxes in observance of Section 8 hereof;

c. Perform manual counting of ballots or receipts for the position with discrepancy in the RMA and the AES count in observance of Sections 9 and 10 hereof;

d. Record manual counting activity in the RMA Minutes;

e. Return the box to the concerned City/Municipal Treasurer in case the finding is that the discrepancy does not actually exist or a mere mathematical error;

f. Turn over the ballot box to the Technical Evaluation Committee (TEC) for technical determination of the root cause in case the finding is that the discrepancy is valid; and

g. In all above procedure needing signature of the RMA Committee, the signatories shall be the Chairperson and one (1) of the two (2) other members of the RMA Committee.

To analyze the findings of the RMAT, the RMA Committee will constitute the Validation personnel at least four (4) days after the day of the Elections.

SECTION 14. *Effect of Discrepancy Between AES and RMA.* - In no way shall the results of the RMA delay the proclamation of the winning candidates based on the results reached by the AES.

SECTION 15. *Effectivity and Dissemination.* - This Resolution shall take effect immediately upon its publication in two (2) daily newspapers of general circulation in the Philippines.

The Education and Information Department shall cause the publication of this Resolution and shall furnish copies thereof to all Regional Election Directors, Provincial Election Supervisors and Election Officers, as well as to Commission on Elections Accredited Citizens' Arm Group authorized to receive one of the first eight copies of the Election Returns and to conduct unofficial parallel count.

SO ORDERED.

**IN THE MATTER OF THE GENERAL INSTRUCTIONS FOR THE CONDUCT OF A
RANDOM MANUAL AUDIT (RMA) FOR THE MAY 10, 2010 NATIONAL & LOCAL
ELECTIONS**

WHEREAS, under the Republic Act 9369 entitles "AN ACT AMENDING REPUBLIC ACT NO. 8436, ENTITLED AN ACT AUTHORIZING THE COMMISSION ON ELECTION TO USE AN AUTOMATED ELECTION SYSTEM IN THE MAY 11, 1998 NATIONAL OR LOCAL ELECTIONS AND IN SUBSEQUENT NATIONAL OR LOCAL ELECTION EXERCISES, TO ENCOURAGE TRANSPARENCY, CREDIBILITY, FAIRNESS AND ACCURACY OF ELECTIONS, AMENDING FOR THE PURPOSE BATAS PAMBANSA BLG. 881, AS AMENDED, REPUBLIC ACT NO. 7166 AND OTHER AND OTHER RELATED ELECTION LAWS PROVIDING FUNDS THEREFOR AND OFR OTHER PURPOSES", Section 24 provides:

A new Section 29 is hereby provided to read as follows:

Section 29, Random Manual Audit - Where the AES is used, there shall be a random manual audit in one precinct per congressional district randomly chosen by the Commission in each province and city, Any difference between the automated and manual count will result in the determination of the root cause and initiate a manual count for those precinct affected by the computer or procedural error."

WHEREAS, On the 10 November 2009, the commission on Election promulgated Minute Resolution No. 09-0765 entitled "IN THE MATTER OF THE TECHNICAL WORKING GROUP ON RANDOM MANUAL AUDIT" creating a Technical Working Group on Random Manual Audit (TWG-RMA) and directing the TWG-RMA "to immediately convene to study and recommend procedures for the conduct of random manual audit in accordance with the provision of R.A. 9369" in coordination with the Steering Commitment and Project Management Office,

WHEREAS, The TWG-RMA is composed of the following members:

1. Amb. Hanrietta Da Villa, Parish Pastoral Council for Responsible Voting and member Advisory Council - Chairperson;
2. Agnes Carreon, OIC, Internal Audit Office, Commission on Election - Member;
and
3. A representative of the National Statistics Office.

NOW THEREFORE, the Commission on Election resolved as it hereby resolved to promulgate the following General Instructions for the conduct of the Random Manual Audit:

Article I
Preparatory Activities

Section 1. COMPOSITION AND APPOINTMENT OF THE RANDOM MANUAL AUDIT TEAM (RMAT) TO CONDUCT THE RANDOM MANUAL AUDIT (RMA)

a) The Commission on Election through the TWG-RMA, shall appoint one thousand one hundred forty five (1,145) Random Manual Audit Teams (RMAT), or a total of three thousand four hundred thirty five (3,435) RMAT members, specifically designated to conduct the Random Manual Audit (RMA).

b) In Addition to foregoing, two hundred twenty nine (229) substitute members shall be appointed by the TWG-RMA.

c) All RMAT members shall be under the direct control and supervision of the TWG-RMA. TWG-RMA will designate the Provincial Election Officers (PES) as representative for the conduct of the RMA.

d) The RMAT shall be composed of three (3) members;

d.1 Chairman

d.2 Secretary; and

d.3 Member.

e) RMAT members shall be public school teachers, giving preference to those who served in May 14, 2007 Election but excluding those who are assigned to serve in May 10, 2010 National and Local Elections.

f) The Department of Education (DepEd) shall submit a list of sixteen (16) proposed RMAT members per legislative district not later than 3 May 2010. Fifteen (15) of the proposed RMAT members per legislative district shall be pre-selected by the TWG-RMA to serve in the five (5) randomly selected clustered polling precincts per legislative district. The sixteen (16) proposed member shall serve as substitute, if the need for arises.

g) In case of absence or illness of an RMAT member, the RMAT members who are present shall call upon the substitute to perform the duties of the absent member.

g. 1 If one is available, the RMAT members present shall appoint any of the following listed below in the order of priority to temporarily fill said vacancy until the absent member appears, provided that the substitute member in qualified, non-partisan and a registered voter in the province concerned:

f.1.1. Teacher in public schools;

f.1.2. Teacher in private schools;

f.1.3. Employees in the civil service; or

f.1.4. Representative from the private or the church sector.

g.2 In case no substitute is made for the absent RMAT member and no person is qualified to be a temporary member as provided for in the preceding section, the two (2) RMAT members present shall proceed with the conduct of the RMA and shall decide only upon a unanimous vote.

h) As soon as the selection of RMAT members are finalized, the TWG-RMA shall disseminate the fastest means possible the corresponding appointment papers through the DepEd and the PES concerned.

i) All RMAT members must accomplish their Appointment papers and their Oath not later than 12:00 noon May 10, 2010.

Section 2. QUALIFICATIONS OF THE RMAT

The Chairman, Secretary or Members of the RMAT, whether regular, substitute or temporary must:

- a) be of good moral character and of irreproachable reputation;
- b) be a registered voter in the province where he or she is to serve;
- c) not be related up to the 4th degree of consanguinity and affinity to any candidate, to any member of the regular BEI who convicted the polls in the same precinct, or and to the other members of the RMAT of which he/she is a part of;
- d) never been convicted of any election offense or of any other crime punishable by more than six (6) months imprisonment;
- e) have no pending case against him/her filed in Commission on Elections or court for any election offense; and
- f) speak, read and write English or Filipino and the local dialect.

Section 3. POWERS AND FUNCTION OF THE RMAT

- a) Conduct the RMA in the randomly selected clustered polling precincts.
 - b) Act as deputies of the TWG-RMA in the conduct, supervision and control the RMA.
 - c) During the conduct of the RMA, maintaining peace and order within the randomly selected clustered polling precinct and its premises, keep access thereto open and unobstructed, and enforce obedience to its lawful orders. If any person refuses to obey the lawful orders of the RMA, or conduct himself/herself in a disorderly manner
-

in its presence or within directing any peace officer to take such person into custody until adjournment of the RMA.

d) Perform such other functions prescribed by the TWG-RMA, or under the Omnibus Election Code or by any other rules and regulations promulgated by the Commission on Elections.

Section 4. PROCEEDINGS OF THE RMAT

a) On may 10, 2010, after the clustered polling precincts have been randomly selected and the affected municipalities identified, the PES exercising jurisdiction therein shall distributed the appointment papers and the RMA kits containing all RMA paraphernalia.

b) The PES shall be responsible for the speedy distribution of the appointment paper and RMK kits to the RMAT members within his/her jurisdiction, after he is informed of the randomly selected clustered polling precincts.

c) The RMAT shall proceeds to its assigned randomly selected clustered polling precinct as soon as it received its appointment papers and RMA kit. The RMAT, however, shall remain in separate holding room. In no case shall it be allowed to witness the electronic canvassing of the ballots conducted by the BEI or to inform itself of its result.

d) After BEI has accomplished all its duties and responsibilities as provided for in Resolution No. 8786, save for the delivery of the ballot boxes to the Municipal Treasurer, the BEI of the randomly selected clustered polling precinct who conducted the polls shall endorse the locked Ballot Box to the RMAT.

e) The meeting of the RMAT shall be public and shall be held in their respective randomly selected clustered polling precincts.

f) The RMAT shall act through its Chairman and shall decide without delay by majority vote, all questions which may arise in the performance of its duties or in the conduct of the RMA.

g) Lawyers, poll watcher or representatives of political parties and/or candidates shall have no involvement in the proceedings of the RMA except as observers.

h) The security personnel deployed at the randomly selected clustered polling precinct where the RMA will be conducted will be conducted shall extend their services until the RMA is finished and shall ensure the safety and security of the RMAT and its proceedings.

i) The RMA shall be conducted continuously until terminated. The RMAT may however take occasional fifteen (15) to thirty (30) minutes recess for meals and bathroom breaks.

Section 5. MINUTES AND AUDIT RETURNS OF RMA

Minutes of the RMA:

- a) The chairman shall accomplish three (3) copies of the Minutes of the RMA, accurately entering therein all data required as they become available and all acts or events as they occur.
- b) Copies of the minutes shall be signed by all RMA members and sealed in separate clearly labeled envelopes for distribution, as follows:
 - b.1. The original copy shall be deposited inside the ballot box.
 - b.2. One (1) intended for the Commission on Elections shall be delivered to the PES who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.
 - b.3. One (1) intended for the TWG-RMA shall be delivered to the PES who shall forward the same to the Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of TWG-RMA.

Audit Returns:

- a) The Secretary shall accomplish six (6) copies of the Audit Returns accurately entering therein all data required as they become available and all acts or events as they occur.
 - b) Copies of the Audit Return shall be signed by all RMA members and sealed in separate clearly labeled envelopes for distribution, as follows:
 - b.1. The original copy shall be deposited inside the ballot box.
 - b.2. One (1) intended for the Commission shall be delivered to the PES who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.
 - b.3. One (1) intended for the TWG-RMA shall be delivered to the PES who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of TWG-RMA.
 - b.4. One (1) copy for the Dominant Majority Political Party.
 - b.5. One (1) copy for the Dominant Majority Political Party.
-

b.6. One (1) copy for the Kapisanan ng mga Broadkaster ng Pilipinas (KBP).

Section 6. HONORARIA OF THE RMA MEMBERS

The honorarium for each RMA member shall be Two Thousand Pesos (Php 2,000.00) which shall cover their remuneration for services rendered in performing the RMA, their meal allowance and their transportation allowance.

Section 7. SELECTION PROCESS OF AREAS TO BE AUDITED

- a) Random selection of the clustered polling precincts to be audited will be done at the Philippine International Convention Center on May 10, 2010 starting at 12:00 noon by the TWG-RMA.
- b) Five (5) clustered polling precincts per legislative district will be drawn randomly using a tambol, with numbered balls corresponding to the precincts.
- c) Guests may be invited to draw the clustered polling precincts from the tambol. The selection of the clustered polling precinct will be open to the media, political parties and other election stakeholders to ensure speedy dissemination of information and for transparency.
- d) The TWG-RMA shall inform all concerned PES having jurisdiction over the clustered polling precincts randomly selected for the RMA.

Article II Random Manual Audit Proper

Section 8. DATE, TIME and PLACE of RMA

- a) The RMA shall take place in the randomly selected clustered polling precinct.
- b) The RMA shall be conducted on May 10, 2010, immediately after the shut down of the PCOS machine after completion of all its functions.
- c) The RMA shall be conducted in the presence of poll watchers, political parties, citizen's arm, media and the public.
- d) Upon commencement of the RMA until the same is terminated, the regular BEI shall not be allowed inside the randomly selected clustered polling precinct or to communicate with RMA in whatever manner.

Section 9. PROCEDURE FOR THE RANDOM MANUAL AUDIT (RMA)

The RMA upon arrival at the assigned randomly selected clustered polling precinct shall proceed to the BEI and inform the same of the clustered polling precincts selection for the RMA. The RMA members shall exhibit their appointment papers as proof of the clustered precincts selection for RMA. The RMA shall then proceed to the separate holding room

and wait for the closing of the polls and shut down of the PCOS machine after completion of its functions. At the start of the RMA, the Chairman shall:

- a) Announce the commencement of the RMA and determine the presence of a quorum. In cases of an absence or illness of an RMA member, the members present shall summon the substitute member. The RMA shall proceed with the RMA while waiting for the substitute, provided a quorum is present. The presence of two (2) members shall suffice to constitute a quorum.
- b) Proceed with the RMA by presenting the ballot box to all those who are present;
- c) Verify the condition of the following items to check if the integrity is maintained:
 - c.1. Ballot box;
 - c.2. Fixed-length seals attached to the ballot box; and
 - c.3. Padlocks of the ballot box.
- d) Break the fixed-length seal, unlock the padlocks and open the ballot box.
- e) Retrieve sealed envelop containing the Minutes of Voting and Counting from the ballot box.
- f) Break the security seal and open the envelope containing the Minutes of Voting and Counting.
- g) Verify if serial numbers of the fixed-length seals attached to ballot box is the same as that indicated in the minutes. The results of such verification or any discrepancy whatsoever shall be recorded in the minutes.
- h) Ensure every event is recorded in the RMA minutes.

Thereafter, the Secretary shall:

- i) Retrieve the ballots from the ballot box, perform a physical count of the ballots and compare if the number of ballots found inside the ballot box is equal to the number of votes cast as indicated in the Minutes of Voting and Counting.

The Member shall:

- j) Do a recount if the total number of ballots contained inside the ballot box does not match the number of votes cast indicated in the Minutes of Voting and Counting as found by the Secretary, to confirm such finding.

In case the number of ballots counted by the RMA do not match the number of votes found in the Minutes of Voting and Counting:

k) The Chairman shall record such discrepancy in the RMA minutes.

l) The Member shall refer to the Minutes of Voting and Counting for any possible reason for such discrepancy. (i.e. rejected or spoiled ballots).

m) In the event the number of ballots exceeds the number of votes cast indicated in the Minutes of Voting and Counting, all the ballots shall be returned to the ballot box and thoroughly mixed by the Chairman.

n) Without looking at the ballots, the Chairman shall randomly take out from the ballot box the number of ballots equal to the excess, and place them in the RMA envelope for excess ballots. The Chairman shall proceed to seal the envelope.

o) The RMA shall proceed with the counting of votes for the following positions: President, Vice-President, Member House of Representatives, Governor and Mayor.

Section 10. GUIDELINES ON READING THE BALLOTS

The Chairman, prior to reading the votes cast, shall:

a) Check for over-voting in each position subject to RMA. An over-vote is a situation where a voter selects more than the allowed number of candidate/s for a particular position.

b) In case there is an over-vote, such fact shall be recorded in the minutes by the Chairman but the vote shall not be counted for any candidate for that particular position. However, the fact of over-voting in any particular position will not invalidate the entire ballot. It shall remain valid and votes for other positions (that are not over-voted) shall be counted.

c) In case an oval is not shaded properly or contains other marks (such as checks or crosses), the vote corresponding to the said candidate shall be counted but such fact shall be recorded in the minutes. The subject ballot shall then be placed in an RMA envelope for Ballots with Ambiguous Marks.

d) The rules on appreciation of ballots in manual system of counting shall not apply for purposes of the RMA.

Section 11 MANNER OF COUNTING OF VOTES

a) The Chairman shall form separate piles of one hundred (100) ballots each.

b) The Chairman shall take ballots of the first pile one by one and read first the number assigned to the candidate followed by the candidate's name.

c) For every ballot, the Chairman shall first announce the vote cast for President, Vice-President, Member House of Representatives, Governor and finally the Mayor.

d) The Secretary and the Member shall simultaneously record each vote read by the Chairman in the Audit Return and in the Tally Board, respectively. Each vote shall be recorded by a vertical line, except every fifth vote which shall be recorded by a diagonal line crossing the previous four (4) vertical lines (Taras).

e) After each pile of one hundred (100) ballots have been read, the votes obtained by each candidate shall be added and the sum recorded on the space immediately after the last vote recorded.

f) The same procedure shall be followed with the succeeding piles of ballots.

g) After all the ballots have been read, the Secretary and the member shall record, in words and figures, the total number of votes obtained by each candidate in the Audit Return and the Tally Board, respectively.

h) The Chairman shall accomplish the Minutes and enter the RMA and AES results for President, Vice-President, Member House of Representatives, Governor and Mayor. The AES result shall be based on the Minutes of Voting and Counting.

i) The RMAT shall note down the variance and the probable reasons for such variance.

During the counting, the Chairman, Secretary and Member shall position themselves in such a way as to give the watchers and the public an unimpeded view of the ballot being read by the Chairman, as well as of the Audit Return and Tally Boards being simultaneously accomplished by the Secretary and Member, respectively.

The lawyers, poll watchers or representatives of political parties and/or candidates and the public shall not touch any RMA documents/ paraphernalia. The table used by the RMAT shall be cleared of all unnecessary things. Any violation hereof shall constitute an election offense and shall be penalized in accordance with BP Blg. 881.

Upon conclusion of the RMA, all RMAT members shall affix their signatures on the Minutes attesting to the contests thereof. Poll watchers shall witness the recording of entries and affixing of signatures of the RMAT members. The Chairman shall immediately notify the PES of the results of the RMA, who in turn, shall report the same to the TWG-RMA...

Section 12. EFFECTS OF DISCREPANCY BETWEEN AES AND RMA

a) In the event the results of the AES exceed the allowable margin of variance, Section 24 of RA 9369 shall apply.

b) In no way shall the results of the RMA delay the proclamation of the winning candidates based on the results reached by the AES.

Article III Post Random Manual Audit

Section 14. POST-AUDIT PROCEDURES

The following Post-Audit Procedures shall be observed:

- a) RMA shall return the ballots in the ballot box.
- b) All BEI reports, documents, forms, original minutes previously opened shall be resealed using the seals provided in the RMA Kit.
- c) One (1) copy of Audit Return and the tally board used during the conduct of RMA shall be sealed in a clearly labeled envelope and placed inside the ballot box.
- d) Chairman shall lock the ballot box.
- e) Chairman shall turn over the ballot box to the City/Municipal Treasurer for safekeeping. Retrieval of the ballot box shall be under the custody and responsibility of the City/Municipal Treasurer and shall form part of the retrieval operations of the Treasurer's Office.

Section 16. EFFECTIVITY AND DISSEMINATION

This resolution shall take effect on the seventh (7th) day after its publication in two (2) daily newspapers of general circulation in the Philippines.

The Education and Information Department shall cause the publication of this Resolution and shall furnish copies thereof to all Regional Election Directors, Provincial Election Supervisors and Election Officers.

SO ORDERED.

the random manual audit team

handbook

Foreword

The Commission on Elections, the National Citizens' Movement for Free Elections (NAMFREL) and the Philippine Statistics are joining hands as the Random Manual Audit Committee (RMAC) to implement the legal imperative of Republic Act 9369 to conduct the random manual audit.

The Random Manual Audit or RMA is a key safeguard in the Automated Election System to increase public confidence in the accuracy of the electronic vote counting machine and therefore, the credibility of the election results.

At the center of this mission are the Random Manual Audit Teams who are expected to do a manual count of the ballots. This duty demands not only precision and rigor in examining ballots, diligence to strict guidelines, endurance considering the time RMA is normally conducted, but also integrity and impartiality from the RMA Team or RMAT Members.

It is in this light that we came up with tools like this Handbook to help the RMAT effectively perform this tedious yet very significant responsibility.

This Handbook, together with the on-the-ground Training for RMAT, serves to equip the Team with the competence and provide information you will need in order to perform your duty confidently. This Handbook contains step-by-step instructions, reminders and checklists relative to the RMA conduct. You will also find in this Handbook copies of the forms, i.e. Minutes of RMA, the Audit Returns and the Tally Board, which you will use to record the counting, tallying and data, as well as incidences encountered during the conduct of the RMA. A copy of the General Instructions (GI) on the RMA is also included in the Manual to further arm you with details of rules and the entire process.

The Random Manual Audit is such an important feature to ensure credibility of election results, the fairness of elections, and ultimately the quality of democracy in our country. You, the RMA Team, help make this a reality.

What is random manual audit?

The COMELEC is mandated to conduct fair, free and honest elections. Beginning 2010, Filipinos experienced casting their votes through automated machines that produced unprecedented quick results.

No technology however expensive or up-to-date, is ever 101% fool-proof. To gain full confidence in the results of the election, we need a process to audit the system to verify the accuracy and correctness of election results as produced by the machine.

The Random Manual Audit or RMA is one of the safeguards of the AES, to validate the accuracy of the machine count and to ensure the integrity and acceptability of the election results. It is intended to assure the public that the results of the automated election is truly reflective of the voters' will as expressed in their ballots during election day.

The Random Manual Audit Committee or RMAC is composed of the COMELEC, the National Citizens' Movement for Free Elections (NAMFREL) and the Philippine Statistics Authority (PSA). The RMAC, with the RMA Team, carries out the random manual audit.

"RA 9369 or the Automated Elections System Law provided for the automation of elections and safeguards therein. Section 24 of the AES Law specifically mandates the conduct of a manual audit in one precinct per congressional district randomly chosen by the Commission in each province and city. Any difference between the automated and manual count will result in the determination of root cause and initiate a manual count for those precincts affected by the computer or procedural error"

Composition Of The RMA Team

The RMA Team is composed of FIVE members which is divided into two groups:

MANUAL COUNT GROUP

CHAIRMAN SECRETARY THIRD MEMBER

- tasked to do the manual appreciation and count of the ballots, tallying of the votes, and recording the proceedings

VERIFICATION GROUP

CO-CHAIR ASST SECRETARY

- tasked to closely observe and check whether the appreciation, count, and tallying done by the Manual Count Group is correct and accurate

Functions of the Random Manual Audit Team

- ⊗ Conduct RMA at the center designated by the RMA Committee and assigned by the PES IMMEDIATELY after turnover and proper endorsement of the ballot box. They may decide to conduct the manual audit the day after elections at 7:00 a.m. Failure to conduct the RMA, as agreed upon, shall result to consequences and liabilities.
- ⊗ Conduct the RMA in the presence of poll watchers, registered political parties, citizens' arm groups, media, and the public.
 - ⊗ Do not allow the regular BEI inside the venue or talk to them during the RMA.
 - ⊗ Enforce obedience among the observers
- ⊗ Maintain peace and order at the venue during the conduct of the RMA.
- ⊗ Keep access of the venue and premises open and

Becoming Familiar with the Tools and Forms and the Kit

1. Appointment Paper

2. RMA Kit

REMINDER: When you get the RMA kit and paraphernalia from the Coordinator (PES/EO), please don't forget the following.

- ☒ Make sure you have your appointment paper given to you by the Coordinator (PES/EO)
- ☒ Show this appointment paper to BEI Chair and inform her or him about the specific precinct assigned to you for audit.

PES

CHAIRMAN

How is the RMA Conducted?

☒ RMA utilizes manual counting of ballots

- ☒ RMA compares the manual count to the machine generated count
- ☒ RMA is open to public viewing .
- ☒ RMA process is thoroughly documented in a Minutes/Report

RMAT Preliminary Activity

CHAIRMAN

The Random Manual Audit is formally open and the RMA Team is in quorum.

- ☒ Announce the start of RMA and determine if there is quorum
- ☒ Present the ballot box to everyone at the venue
- ☒ Verify condition of the ballot box and fixed-length seal
- ☒ Break the fixed-length seal
- ☒ Retrieve sealed envelopes containing the Minutes of Testing and Sealing and Minutes of the Voting, and copy of the Election Returns from the ballot box

ASST. SECRETARY

- ☒ Verify if serial numbers of the fixed-length seals of the ballot box is the same as that indicated in the Minutes of Voting and Counting
- ☒ Ensure that every event is recorded in the RMA Minutes
- ☒ Record in the RMA Minutes any missing article that the BEI should have placed in the ballot box (RMA Team to get a witness to attest to the missing article)

SECRETARY and ASST. SECRETARY

- ☒ Retrieve valid votes from the ballot box
- ☒ Perform physical count of the valid ballots and compare the number of valid ballots in the ballot box and in the election returns

Is the number of valid ballots counted EQUAL to the number in the Election Returns?

If not:

THIRD MEMBER

- ☒ Do a RECOUNT.
- ☒ If still does not match, refer to the BEI Minutes and determine whether valid ballots were mixed with rejected ballots and ask the Asst. Secretary to record in the RMA Minutes.

"The nation counts on you to make a physical recount of the ballots, to examine, read and count the votes exactly as the machine would and to identify discrepancies, if there are any between the machine counted results and the manual count."

RMAT Procedure

SORTING BALLOTS

- Sort Ballots with Over Votes, Under Votes and Questionable Marks and Place in appropriate envelopes

What is an OVERVOTE?

An incident when a voter selects more than the allowed number of seats for one position, e.g. two or more votes for President, Vice-President, Representative, Governor or Mayor.

What is an UNDERVOTE?

It pertains to the situation when the voter chooses less than the allowed maximum number of seats for a position

In case of dispute on whether or not a vote is questionable, it is the findings of the Co-Chair that will prevail and the ballot shall be marked.

Place ballots with over vote, under votes and questionable marks in their respective envelopes labeled as such.

What is a QUESTIONABLE MARK?

An oval that is not shaded properly, such as check, cross or other partial shadings.

RMA PROPER : COUNTING THE VOTES

STEP 1: Form separate piles of 100 ballots

STEP 2a: Take one ballot and read first the number assigned to the candidate followed by the candidate's name, then the votes cast.

The Co-Chair closely observes the reading and validates the vote cast. In case of dispute, findings of the Co-Chair shall PREVAIL. The Co-Chair then marks the disputed ballot and places in envelope of Disputed Ballots.

Reminder:

No one, except the Co -Chairman, can mark the ballot.

STEP 2b: Recording the Votes

- ☒ Secretary records on the Audit Return each vote read by the Chair while Assistant Secretary checks whether the Secretary is correct.
- ☒ The Third Member, in the meantime, records each vote on the Tally Board.

STEP 3: Summing up the Votes

- ☒ After each pile of 100 has been read, add and record the sum on the space immediately after the last vote recorded.
- ☒ Repeat the same with the succeeding piles until finished.

RMA PROPER : COMPUTING THE TOTAL VOTES AFTER READING

STEP 1: Compute and record the total number of votes obtained by EACH CANDIDATE.

STEP 2: Compare tallies of the Audit Returns and the Tally Board.

If it does not match, repeat the counting until it matches.

STEP 3: The Chair enters the AES results for each position in the Audit Returns and compare the same with the results of the RMA to determine if discrepancy exists.

What to do in case of discrepancy?

The Chair records the discrepancy and possible reason in the RMA Minutes.

In the meantime, the Co-Chair and Assistant Secretary review the entries of the Audit Returns to exclude possibility of human error.

If discrepancy still exists, the RMA notes in the RMA Minutes.

Reminder: During the counting, give unimpeded view of the ballot or the Audit Returns and Tally Board.

What to do after the RMA proper?

MINUTES

STEP 1: Chairman notifies the PES of the results of the RMA.

STEP 2: Chairman accomplishes the Minutes of the RMA, with all data and all acts and events.

STEP 3a: Have the minutes, 3 copies, signed by all RMA team members, witnessed by poll watchers.

STEP 3b: Label each copy of the Minutes that will go to:

- Inside the Ballot Box
- The COMELEC to be given to the PES
- The RMAC to be given to the PES

AUDIT RETURNS

STEP 1: Secretary makes sure that there are six copies of the accomplished AR

STEP 2: Have 6 copies of the Audit Returns signed by all RMA team members witnessed by poll watchers.

STEP3: Seal each copy and place in each envelop labeled as such for distribution to the following:

- ☒ Inside the ballot box
- ☒ COMELEC to be given to the PES
- ☒ RMA Committee to be given to the PES
- ☒ One copy for the Dominant Majority Political Party
- ☒ One copy for the Dominant Minority Political Party
- ☒ One copy for the Citizens' Arm accredited by the COMELEC.

CLOSING AND TURNING OVER MATERIALS

- STEP 1: Return the ballots in the ballot box
- STEP 2: Reseal all reports, forms and documents that were opened at the start, using the seals provided in the RMA Kit.
- STEP 3: Seal one copy of used Audit Return, place in an envelop and place it inside the ballot box.
- STEP 4: Place the Tally Board inside the ballot box.
- STEP 5a: Lock the ballot box with fixed-length seals.
- STEP 5b: Record the serial number of the seal in the RMA Minutes before closing the box
- STEP 6: Chair turns over the ballot box to the City/ Municipal Treasurer.

Before the RMA

Coordinator PES/EO

- Assign RMA Team members to a specific randomly selected clustered precinct / RMA center
- Distribute the appointment papers and RMA kits to members

Collective

- Witness the closing of the ballot box; or follow the BEI and the ballot box until BEI transmits results.
- Decide, by majority votes, to conduct RMA at 7am of the day after elections upon exceptional cases; inform poll watchers and the coordinator regarding such change; and submit report to the RMA Committee.
- Summon substitute in case of absence or illness of an RMA member.
- Get a witness to attest to the fact that an article have been placed inside the ballot box by the BEI and that is found missing.

Chairman

- Announce the start of RMA and determine the presence of a quorum.
- Present the ballot box to all present at the start of RMA.
- Verify the condition/integrity of the ballot box and fixed-lengths seal attached to the ballot box.
- Break the fixed-length seal.
- Retrieve sealed envelopes containing the Minutes of Testing and Sealing, the Minutes of Voting and Counting, and the copy of Election Returns from the ballot box.
- Break the security seals and open envelopes containing the aforementioned minutes and the copy of the Election Returns.

Secretary

- Together with Assistant Secretary, retrieve valid votes from the ballot box, perform physical count, and compare if the number of valid ballots in the ballot box is EQUAL to the number of valid ballots counted as indicated in the election returns.

Assistant Secretary

- Ensure that every event is recorded in the RMA Minutes.
- Verify if serial numbers of the fixed-length seals attached to the ballot box is the same as that indicated in the Minutes of voting and counting.

Third Member

- After the recount and the total number of valid ballots still does not match the number of valid ballots counted, determine whether valid ballots were mixed with rejected ballots by referring to the Minutes of Testing and Sealing and Minutes of Voting and Counting.
- If the total number of valid ballots in the ballot box does not match with the number of valid ballots indicated in the election returns as found by the Secretary, do a recount to confirm such finding.

COLLECTIVE

Act as deputies of the RMA Committee in the conduct, supervision and control of the RMA.

Maintain peace and order during the conduct of the RMA, keep access thereto open and unobstructed, and enforce obedience to its lawful orders.

Issue an order in writing directing any peace officer to take any disobedient person who affects RMA proceedings into custody until adjournment of the RMA.

If a discrepancy exists between the number of votes in RMA and in the election returns, note the discrepancy and probable reasons in the RMA Minutes.

Provide unimpeded view of what they are doing to poll watchers and public, and clear the table used for RMA of all unnecessary things.

Affix their signatures on the RMA Minutes, Tally Board and Audit Returns.

While conducting the RMA

Chairman

While conducting the RMA

Check the number of votes for each position subject to RMA.

Set aside ballots with over-votes and under-votes in respective envelopes labeled as such.

Form separate piles of one hundred (100) ballots together with the Co-Chairman.

Take ballots of the first pile one by one and read first the number assigned to the candidate followed by the candidate's name.

Announce the votes cast.

Accomplish three (3) copies of the Minutes of the RMA by entering therein all data, acts or events as they occur.

Enter the AES results for President, Vice-President, Senator, House of Representatives, Governor and Mayor in the Audit Returns and compare the same with the RMA results to determine if discrepancy exists.

In case the number of votes counted by RMA does not match the number of votes found in the Election Returns, record such discrepancy in the RMA Minutes of Voting and Counting for any possible reason for such discrepancy.

Co-Chairman

Closely observe reading of the ballots and validate the votes cast.

In case of dispute in the reading of the ballots, findings of the Co-Chairman will prevail.

In case of such dispute, the Co-Chairman should mark the ballot as disputed and place in an envelope for Disputed Ballots, and direct the Assistant Secretary to record the incident in the RMA Minutes.

In case the number of votes in the RMA does not match the number of votes in the Election Return, review the entries of the Audit Returns to exclude the possibility of human error

While conducting the RMA

Secretary

While conducting the RMA

Record over-votes and under-votes in the Audit Returns.

Record disputed ballots in the RMA Minutes.

Accomplish six (6) copies of the Audit Returns and respectively record thereon each vote read by the Chairman.

Record each vote read by the Chairman in the Audit Returns.

Together with the Asst. Secretary and Third Member, compute and record, in words and figures, the total number of votes obtained by each candidate in the Audit Returns and the Tally Board, and then compare if their tallies are the same.

Repeat the counting procedure until their tallies are the same

Assistant Secretary

Together with the Secretary and Third Member, compute and record, in words and figures, the total number of votes obtained by each candidate in the Audit Returns and the Tally Board, and then compare if their tallies are the same.

Repeat the counting procedure until their tallies are the same.

In case the number of votes in the RMA does not match the number of votes in the Election Returns, review the entries of the Audit Returns to exclude the possibility of human error.

Record any incident of disputed ballots in the RMA minutes.

While conducting the RMA

Third Member

While conducting the RMA

Record each vote read by the Chairman on the Tally Board.

Together with the Secretary and Assistant Secretary, compute and record, in words and figures, the total number of votes obtained by each candidate in the Audit Returns and the Tally Board, and then compare if their tallies are the same.

Repeat the counting procedure until their tallies are the same.

Collective

Affix signature and thumbmark to the Audit Return, Tally Sheet and the Minutes of the RMA.

Sign and seal the copies of the Minutes in separate clearly labeled envelopes for distribution to the following: 1) Election Records and Statistics Department (ERSD), COMELEC; and 2) RMA Committee.

Sign and seal the copies of the Audit Returns in separate clearly labeled envelopes for distribution to the following: 1) Election Records and Statistics Department (ERSD), COMELEC; 2) RMA Committee; 3) Dominant Majority Political Party; 4) Dominant Minority Political Party; 5) Accredited Citizens' Arm Group authorized by the COMELEC.

Deposit the Minutes and the AR inside the ballot box.

Return the ballots in the ballot box.

Re-seal all the BEI reports, documents, forms, and Minutes of Testing and Sealing and the Minutes of Voting and Counting previously opened using the seals provided in the RMA Kit.

Place the Tally Board and one sealed copy of the Audit Returns in the ballot box.

Finishing the RMA

Chairman

- Notify the concerned coordinator of the results of the RMA.
- Lock the ballot box with fixed-length seals. Record the serial number of the fixed-length seal in the RMA Minutes.
- Turn over the ballot box to the City/Municipal Treasurer for safekeeping.
- In case the discrepancy exceeds the allowable margin of ten (10) votes, turn over the ballot box to the PES/RMA Coordinator and inform the watchers of this fact.

PES or Coordinator

- Report the RMA results to the RMA Committee
- Upon receipt of the ballot box in case of discrepancy exceeding the allowable margin of ten (10) votes, shall authorize a representative to personally deliver said ballot box to the RMA Committee for verification within twenty-four (24) hours from receipt thereof.

**General Instructions for the Conduct
of Random Manual Audit (RMA)**

Comelec Resolution No. 10078

General Instruction on RMA

COMM - GUIA

Republic of the Philippines
COMMISSION ON ELECTIONS
Manila

IN THE MATTER OF THE GENERAL INSTRUCTIONS FOR THE CONDUCT OF RANDOM MANUAL AUDIT (RMA) FOR THE 9 MAY 2016 AUTOMATED SYNCHRONIZED NATIONAL AND LOCAL ELECTIONS AND SUBSEQUENT ELECTIONS THEREAFTER.

BAUTISTA, J. Andres D., *Chairman*
LIM, Christian Robert S., *Commissioner*
PARREÑO, Al A., *Commissioner*
GUIA, Luie Tito F., *Commissioner*
LIM, Arthur D., *Commissioner*
GUANZON, Ma. Rowena Amelia V., *Commissioner*
ABAS, Sheriff M., *Commissioner*

-----x Promulgated: March 11, 2016 *[Signature]*

RESOLUTION NO. ¹⁰⁰⁷⁸ *[Signature]*

WHEREAS, the Commission is mandated under Section 24 of Republic Act No. 9369, amending Section 29 of Republic Act No. 8436, to conduct random manual audit;

WHEREAS, the Commission promulgated Resolution No. 9595 dated 21 December 2012 and entitled "*In the Matter of the General Instructions for the Conduct of a Random Manual Audit for the 13 May 2013 National, Local & Elections and Subsequent Elections Thereafter*";

WHEREAS, the Commission subsequently amended the above-stated resolution through the promulgation of Resolution No. 9647 dated 22 February 2013;

WHEREAS, there is a need to amend the above-stated resolution primarily for the purpose of further advancing randomness in the selection of clustered precinct/s per legislative district and the effective implementation thereof;

NOW THEREFORE, pursuant to the powers vested in it by the Constitution and other existing laws, the Commission **RESOLVED**, as it hereby **RESOLVES** to promulgate the following General Instructions for the conduct of Random Manual Audit relative to the 9 May 2016 National and Local Elections and subsequent elections thereafter:

SECTION 1. *Composition and Appointment of the Random Manual Audit Team (RMAT) to Conduct the Random Manual Audit (RMA).* -

a) The Commission on Elections, through the RMA Committee, shall appoint the RMAT composed of five (5) members per randomly selected clustered precinct specifically designated to conduct the RMA and, in case of unavailability, a substitute member per legislative district shall be appointed by the RMA Committee not later than April of the year of the Elections.

[Signature]

General Instruction on RMA

2

b) All RMA members shall be under the direct control and supervision of the RMA Committee. The RMA Committee will designate Election Officers, or in lieu thereof Provincial Election Supervisors or the Assistant Regional Election Director for NCR, as the case may be, as Coordinators for the conduct of the RMA.

c) The RMA shall be composed of five (5) members:

- c.1. Chairman;
- c.2. Secretary;
- c.3. Third Member;
- c.4. Co-Chairman; and
- c.5. Assistant Secretary.

d) Each RMA shall be subdivided into two (2) groups: 1) the Chairman, Secretary and Third Member shall comprise the Manual Count Group while 2) the Co-Chairman and Assistant Secretary comprise the Verification Group.

e) RMA members shall be public school teachers, giving preference to those who have served as members of the Board of Elections Inspectors or the RMA in past Elections.

f) The Department of Education (DepEd) shall submit a list of at least six (6) proposed RMA members per randomly selected clustered precinct not later than the 15th of March of the year of the Election. Five (5) of the proposed RMA members shall be pre-selected by the RMA Committee to serve in the randomly selected clustered precinct/s per legislative district. The other proposed member shall serve as substitute, if the need for it arises.

g) In case of absence or illness of an RMA member, the RMA members who are present shall call upon the substitute to perform the duties of the absent member.

g.1. If none is available, the RMA members present shall appoint any of the following listed below in the order of priority to temporarily fill said vacancy until the absent members appears, provided that the substitute member is qualified, non-partisan and a registered voter in the province concerned:

- g.1.1. Teachers in public schools;
- g.1.2. Teachers in private schools;
- g.1.3. Employees in the civil service;
- g.1.4. Members of the non-partisan Commission on Elections accredited Citizens' Arm of the concerned legislative district; or

g.2. In case no substitution is made for the absent RMA member and no person is qualified to be a temporary member as provided for in the preceding section, the present RMA members shall proceed with the conduct of the RMA and shall decide only upon a unanimous vote.

f

General Instruction on RMA

h) As soon as the selection of RMA members are finalized, the RMA Committee shall disseminate through the fastest means possible the corresponding appointment papers through the DepEd and the Coordinator concerned.

i) All RMA members shall accomplish their Appointment Papers and take their Oath no later than 12:00 noon of the day of the Elections.

SECTION 2. Qualifications of the RMA. - Members of the RMA, whether regular, substitute or temporary, must:

- a) be of good moral character, non-partisan and of irreproachable reputation;
- b) be a registered voter in the province where he or she is to serve;
- c) not be related up to the fourth (4th) degree of consanguinity and affinity to any candidate, to any member of the regular Board of Election Inspectors (BEI) who conducted the polls in the same clustered precinct, or to the other members of the RMA of which he/she is a part of;
- d) have never been convicted of any election offense or of any other crime punishable by more than six (6) months imprisonment;
- e) have no pending case against him/her filed before the Commission on Elections or Trial Court for any election offense;
- f) not be a member of a regular Board of Election Inspectors (BEI) serving in the same Elections;
- f) speak, read and write English or Filipino and the local dialect; and
- g) have undergone the required training for RMA members.

SECTION 3. Powers and Functions of the RMA. -

a) Conduct the RMA in the polling place of the randomly selected clustered precinct to which they were assigned by the Coordinator immediately after the Board of Election Inspectors seals the ballot box; provided that RMA may so choose upon majority vote conduct the RMA at 7:00 o'clock in the morning the day after Elections pursuant to Section 6 hereof.

The members of the RMA shall be held liable in the event of their failure to conduct RMA in accordance with the preceding paragraph. Without prejudice to any administrative, criminal or civil liability incurred, the Commission, through the RMA Committee, shall likewise have the authority to withhold the honoraria, meal allowance, and transportation allowance of the members of the RMA should they fail to conduct RMA in accordance with the preceding paragraph.

b) Act as deputies of the RMA Committee in the conduct, supervision and control of the RMA.

c) During the conduct of the RMA, maintain peace and order within the randomly selected clustered precinct and its premises, keep access thereto open and unobstructed, and enforce obedience to its lawful orders. If any person refuses to obey the lawful orders of the RMA, or conducts himself/herself in a disorderly manner in its presence

16

General Instruction on RMA

or within its proceeding, or interrupts or disturbs the same, RMA may issue an Order in writing directing any peace officer to take such person into custody until adjournment of the RMA.

d) Perform such other functions prescribed by the RMA Committee, or under the Omnibus Election Code or by any other rules and regulations promulgated by the Commission on Elections.

SECTION 4. Honoraria of the RMA Members. - The honorarium for each RMA member shall be Two Thousand Pesos (Php2,000.00) which shall cover their remuneration for services rendered in performing the RMA, in addition to their meal allowance and their transportation allowance.

SECTION 5. Selection Process of Areas to be Audited. -

a) Random selection of the clustered precinct/s to be audited per legislative district will be done not later than four (4) days prior to the day of the Elections by the RMA Committee. The List of Specific Clustered Precinct/s per legislative district that will undergo RMA shall be disclosed in the morning of the day of the Elections.

b) At least one (1) clustered precinct per legislative district will be drawn randomly based on the proportionate allocation of clustered precincts per legislative district *vis-à-vis* the total number of clustered precincts. The random selection shall be done using an automated random selection program, subject to Source Code Review by Registered Political Parties and Accredited Citizen's Arm Groups. The computation for the proportionate allocation of clustered precincts and the design of the automated random selection program shall be under the control of the Philippine Statistics Authority (PSA).

b.1. Registered Political Parties and Accredited Citizens' Arm Groups interested in conducting a Source Code Review shall signify their intent in writing and submit the methodologies, which they intend to use, as well as the names of their representative who will review the Source Code, on or before the 15th of March of the year of the Elections for approval of the Commission on Elections.

b.2. Registered Political Parties and Accredited Citizens' Arm Groups shall execute a Non-Disclosure Agreement before conducting a Source Code Review.

b.3. The Commission shall provide a secure and enclosed facility/ location for the conduct of the Source Code Review and shall properly record all entries to and exits from the said facility/ location.

b.4. The Commission shall provide only a read-only copy of the Source Code, which shall be viewed in a workstation inside the secured facility/ location.

b.5. Registered Political Parties and Accredited Citizens' Arm Group shall not take out any copy of the Source Code or any part thereof from the secured facility/ location.

b.6. The Commission shall not permit any electronic device, including but not limited to laptops, mobile phones, camera, USB drives and other storage devices, inside the secure facility/ location.

AF

General Instruction on RMA

5

b.7. Source Code Review must be initiated by the first week of April of the year of the Elections but must be finished within fifteen (15) days thereafter.

b.8. Each Registered Political Party or Accredited Citizens' Arm Group that conducted a Source Code Review shall submit a Report to the Commission within ten (10) days from completion of the review.

c) The selection of the clustered precinct/s per legislative district will be open for observation of *bona fide* Candidates, Registered Political Parties and Accredited Citizens' Arm Groups.

d) The RMA Committee shall inform all concerned Coordinators having jurisdiction over the randomly selected clustered precinct/s per legislative district to ensure the effective deployment of RMA and conduct of RMA.

SECTION 6. Date Time and Place of RMA. -

a) The RMA shall take place in the polling place of the randomly selected clustered precinct/s per legislative district.

b) The RMA shall be conducted immediately after the sealing of the ballot box by the BEI.

c) The RMA shall be conducted in the presence of Poll Watchers, Registered Political Parties Citizens' Arm Groups, Media and the Public.

d) Upon commencement of the RMA until the same is terminated, the regular BEI shall not be allowed inside the polling place of the randomly selected clustered precinct/s or to communicate with RMA in whatever manner.

The RMA may choose, upon majority vote, to conduct the RMA at 7:00 o'clock in the morning the day after Elections only upon exceptional circumstances such as:

- a. the polling place is affected by a power interruption;
- b. fire and any other calamity in the polling place or within the immediate area;
- c. occurrence of violence in the polling place or within the immediate area; and
- d. other circumstances analogous to the foregoing.

In such event, RMA should appraise the present Poll Watchers of their decision and notify the Coordinator, who shall make arrangements for the security of the sealed ballot box and the place for the RMA. The RMA shall moreover submit a Report to the RMA Committee regarding their decision, the arrangements for the security of the sealed ballot box and the place for the RMA.

SECTION 7. Deployment of the RMA. -

a) Immediately after receiving information of the randomly selected clustered precinct/s per legislative district, the Coordinator shall assign the RMA members to a specific randomly selected clustered precinct.

4

General Instruction on RMA

6

b) The Coordinator shall be responsible for the speedy distribution of the Appointment Papers and RMA Kits to the RMAT members within his/her jurisdiction, after he/she is informed of the randomly selected clustered precinct.

c) The RMAT members shall proceed to the assigned polling place of the randomly selected clustered precinct on the day of the Elections as soon as they receive their Appointment Papers and RMA Kit. The RMAT upon arrival at the assigned polling place of the randomly selected clustered precinct shall proceed to the BEI and inform the same of the clustered precinct selection for the RMA. The RMAT shall witness the closing of the ballot box; provided that in the event that the counting machine fails to transmit the result, the RMAT will follow the BEI and the aforementioned ballot box until the BEI transmits the results.

d) After the BEI has accomplished all of its duties and responsibilities, save for the delivery of the ballot boxes to the concerned City/Municipal Treasurers/Prosecutors, the BEI of the randomly selected clustered precinct who conducted the polls shall endorse the ballot box to the RMAT; provided that, in the event that the BEI already turned over that ballot box to the RMAT upon presentation of their Appointment Papers, who shall proceed to conduct the random manual audit pursuant to Section 6.

SECTION 8. *Procedure for the Random Manual Audit.* - In case the Commission decides to utilize Direct Recording Electronic (DRE) Voting Machines instead of the paper-based Optical Mark Reader (OMR) Counting Machines, receipts are taken to be the material equivalent of ballots for purpose of this Resolution.

At the start of the RMA, the Chairman shall:

a) Announce the commencement of the RMA and determine the presence of a quorum. In case of an absence or illness of an RMAT member, the members present shall summon the substitute member. The RMAT shall proceed with the RMA while waiting for the substitute, provided a quorum is present. The presence of two (2) Manual Count Group members and one (1) Verification Group member shall suffice to constitute a quorum.

b) Proceed with the RMA by presenting the ballot box to all those who are present.

c) Verify the condition of the following items to check if the integrity is maintained:

c.1. Ballot box; and

c.2. Fixed-lengths seals attached to the ballot box.

d) Break the fixed-length seals and open the ballot box.

e) Retrieve the sealed envelopes containing the Minutes of Testing and Sealing, the Minutes of Voting and Counting and the copy of the Election Returns from the ballot box.

f) Break the security seals and open the envelopes containing the Minutes of Testing and Sealing, the Minutes of Voting and Counting and the copy of the Election Returns.

The Assistant Secretary shall:

A

General Instruction on RMA

7

g) Verify if serial numbers of the fixed-length seals attached ballot box is the same as that indicated in the Minutes of Voting and Counting. The results of such verification or any discrepancy whatsoever shall be recorded in the RMA Minutes.

h) Ensure that every event is recorded in the RMA Minutes; provided that, if there is any article that the BEI should have placed inside the ballot box and that is found missing, the RMA should get a witness to attest to such fact by signing the RMA Minutes.

In the event that the copy of the Election Returns for the ballot box is missing therein, the RMA shall borrow one (1) of the twenty-two (22) copies of the Election Returns printed after the AES results have been transmitted.

Thereafter, the Secretary, with the aid of the Assistant Secretary, shall:

i) Retrieve the valid ballots from the ballot box, perform a physical count and compare if the number of valid ballots found inside the ballot box is equal to the number of valid ballots counted as indicated in the Election Returns.

The Third Member shall:

j) Do a recount if the total number of valid ballots contained inside the ballot box does not match with the number of valid ballots counted as indicated in the Election Returns as found by the Secretary, to confirm such finding. After the said recount and the total number of valid ballots still does not match the number of valid ballots counted, the Third Member shall determine whether valid ballots were mixed with rejected ballots by referring to the Minutes of Testing and Sealing and Minutes of Voting and Counting of the BEI and have the Assistant Secretary record the incident in the RMA Minutes.

SECTION 9. Guidelines on Readings of Votes. – The Chairman, prior to reading the votes cast, shall:

a) Check the number of votes for each position subject to RMA.

a.1. In case there is an over-vote, such fact shall be recorded in the Audit Returns by the Secretary but the vote shall not be counted for any candidate for that particular position. An over-vote is an incident when a voter selects more than the allowed number of seats allowed, i.e. an over-vote for senators is the fact of over-voting in any particular position will not invalidate the entire ballot or receipt. The ballot shall remain valid and votes for other positions (that are not over-voted) shall be counted.

a.2. In case there is an under-vote, such fact shall similarly be recorded in the Audit Returns by the Secretary. An under-vote pertains to the situation where the voter chooses less than the allowed maximum number of seats for a position, i.e. if there are twelve (12) seats for a position with only one (1) seat. The fact of under-voting in any particular position will not invalidate the votes for that position.

The Chairman shall set aside ballots with over-votes and those with under-votes in the respective envelopes so denominated. In the event that a ballot has an over-vote and an under-vote, the ballot should be placed in the Envelope for Ballots with Over-votes.

✓

General Instruction on RMA

8

b) In case the Elections utilize an OMR Counting Machine, if an oval of a ballot is not shaded properly, i.e. the shaded portion of the oval is below the approved threshold, or contains other questionable marks (such as checks or crosses), the appreciation of vote corresponding to the candidate shall be subject to the specific guidelines to be issued by the RMA Committee. The subject ballot shall then be placed in an RMA envelope for Ballots with Questionable Marks.

In the event that a ballot has an over-vote and/or under-vote and contains questionable marks, the said ballot should be place in the Envelope for Ballots with Over-votes.

c) In case of the Elections utilize a DRE Voting Machine, the Chairman shall read the votes on the receipt as they are and make no appreciation thereof.

The Co-Chairman shall validate the finding of the Chairman. In case of dispute with the Chairman, the findings of the Co-Chairman will prevail. The Co-Chairman marks the ballot then places the same in an envelope for Disputed Ballots and directs the Assistant Secretary to record the incident in the RMA Minutes.

The RMA members are not permitted to mark the ballots in any manner except when Co-Chairman marks the ballot as "disputed."

SECTION 10. Manner of Counting of Votes. - a) The RMA shall proceed with the counting of votes for the following positions:

a.1. For Presidential Elections: President, Vice-President, Member House of Representatives, Governor and Mayor; and

a.2. For Midterm Election: Senators, Member House of Representatives and Mayor.

b) The Chairman and Co-Chairman shall form separate piles of one hundred (100) ballots.

c) The Chairman shall take the ballots of the first pile one by one and read first the number assigned to the candidate followed by the candidate's name.

d) For every ballot, the Chairman shall announce the votes cast. The Co-Chairman shall closely observe the reading of the ballots and validate the votes cast. In case of dispute, the finding of the Co-Chairman shall prevail. The Co-Chairman marks the ballot then places the same in the envelope for Disputed Ballots and directs the Assistant Secretary to record the incident in the RMA Minutes.

The RMA members are not permitted to mark the ballots in any manner except when Co-Chairman marks the ballot as "disputed."

e) The Secretary shall accomplish the six (6) copies of the Audit Returns and respectively record thereon each vote read by the Chairman, while the Third Member does the same on the Tally Board. The Assistant Secretary shall confirm that the Secretary records each vote correctly. Each vote shall be recorded by a vertical line, except every fifth vote which shall be recorded by a diagonal line crossing the previous four (4) vertical lines (taras).

✓

General Instruction on RMA

f) After each pile has been read, the votes obtained by each candidate shall be added and the sum recorded on the space immediately after the last vote recorded.

g) The same procedure shall be followed with the succeeding piles.

h) After all the ballots or receipts have been read, the Secretary, the Assistant Secretary and Third Member shall compute and record, in words and figures, the total number of votes obtained by each candidate in the Audit Returns and the Tally Board. The Secretary, the Assistant Secretary and Third Member shall compare if their tallies are the same; otherwise, they shall repeat the counting procedure until their tallies are the same.

i) The Chairman shall enter the AES results for President, Vice-President, Senators, Member House of Representatives, Governor and Mayor as the case may be, in the Audit of Returns and compare the same with the RMA results to determine if discrepancy exists.

j) In case the number of votes counted by the RMA does not match the number of votes found in the Election Returns, the Chairman shall record such discrepancy in the RMA Minutes of Voting and Counting for any possible reason for such discrepancy, (i.e. rejected or spoiled ballots). The Co-Chairman and Assistant Secretary shall review the entries of the Audit Returns in order to exclude the possibility of human error.

k) If a discrepancy still exists, the RMA shall note this down and the probable reasons therefor in the RMA Minutes.

During the counting, the RMA shall position themselves in such a way as to give the Poll watchers and the Public an unimpeded view of the ballot or receipt, as the case may be, being read by the Chairman, as well as of the Audit Returns and Tally Board being simultaneously accomplished by the Secretary, Assistant Secretary and Third Member, respectively. The table to be used by the RMA shall be cleared of all unnecessary things.

Lawyers, Poll Watchers or Representatives of Political Parties and/or Candidates and the Public shall not touch any RMA documents/paraphernalia. Any violation hereof shall constitute an election offense and shall be penalized in accordance with Batas Pambansa Blg. 881. Lawyers, Poll Watchers or Representative of Political Parties and/or Candidates shall have no involvement in the proceedings of the RMA except as observers.

Upon conclusion of the RMA, all RMA members shall affix their signature on the RMA Minutes, Tally Board and Audit Returns attesting to the contents thereof. Poll Watchers shall witness the recording of entries and affixing of signatures of the RMA members. The Chairman shall immediately notify the concerned Coordinator of the results of the RMA, who in turn, shall report the same to the RMA Committee.

The RMA shall be provided with security personnel until the RMA is finished and shall ensure the safety and security of the RMA and its proceedings.

SECTION 11. Minutes and Audit Returns of RMA. -

Minutes of the RMA:

General Instruction on RMA

10

a) The Chairman shall accomplish three (3) copies of the Minutes of the RMA, accurately entering therein all data requires as they become available and all acts or events as they occur.

b) Copies of the Minutes shall be signed by all RMA members and sealed in separate clearly labeled envelopes for distribution, as follows:

b.1. The original copy shall be deposited inside the ballot box.

b.2. One (1) intended for the Commission on Elections shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.

b.3. One (1) intended for the RMA Committee shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of RMA Committee.

Audit Returns:

a) The Secretary shall accomplish six (6) copies of the Audit Returns by accurately entering therein the votes obtained by each candidate.

b) Copies of the Audit Returns shall be signed by all RMA members and sealed in separate clearly labeled envelopes for distribution, as follows:

b.1. The original copy shall be deposited inside the ballot box.

b.2. One (1) intended for the Commission shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.

b.3. One (1) intended for the RMA Committee shall be delivered to the Coordinator who shall forward the same to the Records and Statistics Division (RSD) of the Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila. ERSD shall then forward the same to the command center of RMA Committee.

b.4. One (1) copy for the Dominant Majority Political Party.

b.5. One (1) copy for the Dominant Minority Political Party.

b.6. One (1) copy for the Accredited Citizens' Arm Group authorized by the Commission on Elections to receive one of the first eight copies of the Election Returns and to conduct an unofficial parallel count.

SECTION 12. Closing Procedure. – The following shall be observed:

a) The RMA shall return the ballots in the ballot box.

General Instruction on RMA

11

b) All BEI reports, documents, forms, and the Minutes of Testing and Sealing and the Minutes of Voting and Counting previously opened shall be resealed using the seals provided in the RMA Kit.

c) One (1) copy of the Audit Returns used during the conduct of the RMA shall be sealed in a clearly labeled envelop and placed inside the ballot box. The Tally Board shall also be placed in the ballot box.

d) The Chairman shall lock the ballot box with fixed length seals. The serial number of the fixed-length seal shall be recorded in the RMA Minutes before closing the ballot box.

e) The Chairman shall turn over the ballot box to the City/Municipal Treasurer for safekeeping. Retrieval of the Box shall be under the custody and responsibility of the City/Municipal Treasurer and shall form part of the retrieval operations of the Treasurer's Office. However, in case the discrepancy exceeds the allowable margin of an aggregate difference of ten (10) votes, the ballot box in the question shall be turned over by RMAT to the Office of the Coordinator. The Chairman of RMAT shall inform all the watchers present that the ballot box will be submitted to the Coordinator for delivery to the RMA Committee. The Coordinator shall authorize a representative to personally deliver the said ballot box to the RMA Committee for verification within twenty-four (24) hours from receipt thereof.

SECTION 13. *Discrepancy Between AES and RMA.* – In the event of discrepancy between the AES and RMA results still exceeds the allowable margin of an aggregate difference of ten (10) votes, the RMA Committee, with the assistance of the Validation Personnel, shall:

a. Notify Candidates, Political Parties and their Watchers, who may observe the proceedings, through the Regional Election Director (for NCR) or the concerned Provincial Election Supervisor of the date and time of transport of the ballot boxes to the RMA Committee;

b. Open the boxes in observance of Section 8 hereof;

c. Perform manual counting of ballots or receipts for the position with discrepancy in the RMA and the AES count in observance of Sections 9 and 10 hereof;

d. Record manual counting activity in the RMA Minutes;

e. Return the box to the concerned City/Municipal Treasurer in case the finding is that the discrepancy does not actually exist or a mere mathematical error;

f. Turn over the ballot box to the Technical Evaluation Committee (TEC) for technical determination of the root cause in case the finding is that the discrepancy is valid; and

g. In all above procedure needing signature of the RMA Committee, the signatories shall be the Chairperson and one (1) of the two (2) other members of the RMA Committee.

To analyze the findings of the RMAT, the RMA Committee will constitute the Validation personnel at least four (4) days after the day of the Elections.

✓

General Instruction on RMA

12

Reso 10078

SECTION 14. *Effect of Discrepancy Between AES and RMA.* - In no way shall the results of the RMA delay the proclamation of the winning candidates based on the results reached by the AES.

SECTION 15. *Effectivity and Dissemination.* - This Resolution shall take effect immediately upon its publication in two (2) daily newspapers of general circulation in the Philippines.

The Education and Information Department shall cause the publication of this Resolution and shall furnish copies thereof to all Regional Election Directors, Provincial Election Supervisors and Election Officers, as well as to Commission on Elections Accredited Citizens' Arm Group authorized to receive one of the first eight copies of the Election Returns and to conduct unofficial parallel count.

SO ORDERED.

**AUDIT PROGRAM FOR VERIFICATION OF RANDOM MANUAL AUDIT (RMA) RESULTS
(WITH BALLOT BOX)**

OBJECTIVE: To guide the RMA Verifiers in validating/checking the results of the manual count done by the RMA Teams in the randomly selected Clustered Precincts. **INSTRUCTION:** Perform each step below and put a check mark (✓) on the appropriate space if done, and write NA, if step is not applicable. Note exceptions/remarks, where applicable.

- | | <input checked="" type="checkbox"/> / NA /
remarks |
|--|---|
| 1. Get the set of forms to be accomplished: | |
| a. Intake/Final Checklist of RMAC Verifiers (IFCRV) | _____ |
| b. Verification Worksheet | _____ |
| c. Tally Sheet (scratch paper – optional) | _____ |
| d. Summary of Final Count per Position | _____ |
| 2. Upon receipt of the Audit Returns and Audit Minutes Envelopes, check if the envelopes are properly sealed and the documents are complete, using the Initial Checklists section of the IFCRV as guide. | _____ |
| 3. Check with the Audit Minutes if the variance is more than 10. | |
| a. If YES, proceed to Step 10. | _____ |
| b. If NO, proceed to Step 4. | _____ |
| 4. Check/validate the information/data in the Audit Returns for each position: | |
| a. Precinct Nos. and locations | _____ |
| b. No. of valid ballots should equal the no. of voters actually voted | _____ |
| c. No. of valid ballots plus marked/spoiled/rejected/unused ballots should equal the no. of registered voters | _____ |
| d. Mathematical accuracy of the tallied votes for each candidate | _____ |
| e. Mathematical accuracy of the other votes (overvotes, undervotes/no vote, ambiguous marks not counted) for each position | _____ |
| f. The total tallied votes for each position plus overvotes, undervotes/no vote, ambiguous marks not counted should equal the total voters actually voted | _____ |
| g. Required signatures/thumbmarks are complete. | _____ |
| 5. After determining the correct data/figures, consult the supervisor and make the appropriate corrections on the Audit Returns (in red ink). | _____ |
| 6. Check Audit Minutes for completeness and accuracy of information and data/figures based on the corrected Audit Returns. | _____ |
| 7. After determining the correct data/figures, consult with the supervisor and make the appropriate corrections on the Audit Minutes (in red ink). | _____ |
| 8. After completing the checking/corrections, return the documents to the respective envelopes and accomplish the final section of the IFCRV. | _____ |
| 9. Turnover the Audit Returns//Minutes Envelopes to the Supervisor. | _____ |
| 10. If variance is more than 10, cut the seals of the ballot box and note the seal nos. in the Intake Section of the IFCRV. | _____ |
| 11. Open the ballot box and make an inventory of its contents and fill up the appropriate data in the Intake Section of the IFCRV. | _____ |
| 12. Count the valid ballots, including Over votes/No vote, and agree the total with the figures stated in the Audit Minutes. Note down any difference/exception. | _____ |

13. Count the marked, spoiled, rejected and unused (half side only) ballots and agree the total with that stated in the Audit Minutes. Note down any difference/exception. _____
14. Segregate the valid ballots for each candidate for President; while doing so, examine each ballot carefully and segregate ballots which are Over votes, No vote, Ambiguously or Inadequately Shaded, or have misplaced shadings (portion shaded is other than the oval). _____
15. Count the valid ballots and compare the total with the figures Per ER and Per RMA. If there is a variance, review the segregated ballots (Ambiguously or Inadequately Shaded, etc.) for possible votes that should be properly counted; use the sample shadings as guideline in determining the votes to be counted. (NOTE: The Optional Tally Sheet may be used as working paper, otherwise, other scratch papers may be used, whichever is convenient for the team.) _____
16. If despite diligent review of the ballots, a variance still exists, inform/consult supervisor for guidance and make the appropriate corrections in the Audit Minutes. _____
17. If there are other findings/exceptions/observations, note in the worksheet or additional sheets if needed. _____
18. Fill up the relevant sections/spaces of the Verification Worksheet. _____
19. Perform steps 13 and 17 above for each of the other positions:
 - a. Vice-President _____
 - b. Representative _____
 - c. Governor _____
 - d. Mayor _____
20. Fill up the Summary of Final Count for All Positions. _____
21. Have the supervisor check the Verification worksheet. _____
22. Return the Audit Returns and Minutes to their respective envelopes, ballots and other contents of the Ballot Box and accomplish the Final Checklist Section of the **IFCRV**. _____
23. Seal the ballot box and note down seal Nos. _____
24. Turnover the ballot box to the Supervisor. _____

REPORT OF THE TECHNICAL WORKING GROUP ON THE RANDOM MANUAL AUDIT

Executive Summary

The Automated Election System (AES) was used for the 10 May 2010 Synchronized National and Local Elections. The first time in the Philippines and in the world. It was a historic event in the way elections had been conducted in our country. In a sense it also served as the pilot case for the nationwide use of the AES in subsequent national and local elections, as well as for other countries who are thinking of automating their elections on a nationwide basis.

The AES posed quite a number of challenges for the Commission on Elections, for the other agencies involved in the polls, for the Comelec Accredited Citizen's Arm and various election stakeholders. Most especially challenged were the Filipino voters, as well as the attitude and behavior of the candidates of the 2010 Elections.

Among the challenges that confronted all aspects of the AES and made a significant impact on the outcome of the elections were the tight timeline for preparations and the transparency of all steps of the electoral process. This made the Random Manual Audit a crucial element in the AES.

The Random Manual Audit (RMA) as mandated by Section 29 of Republic Act No. 9369 *"an act authorizing the Commission on Elections to use an automated election system . . . in national and local electoral exercises to encourage the transparency, credibility, fairness and accuracy of elections. . ."* is precisely to check the fairness and accuracy of the AES. The RMA consequently should highlight the transparency and credibility of the 2010 Elections.

An article, entitled *"Checking Election Outcome Accuracy – Post Election Audit Sampling Methods"* authored by Ms. Kathy Dopp of the Rockefeller College of Public Affairs and Policy, State University of New York at Albany, defines post-election audit *"as a check of the accuracy of reported election results done by manually counting all the voter-verifiable paper ballots associated with randomly sampled reported initial vote counts, and checking such additional records as necessary to ensure the integrity of the electoral process."*

In a manual count, as observed by some audit and IT practitioners, as the number of things to count rises, and the number of people doing the count also increases, the less accurate the manual count becomes. This was proven in the close examination of material variance detected in many RMA Reports from the field. But the Random Manual Audit is also a practical way to discover if the automated count is rigged.

The Technical Working Group of the Random Manual Audit (TWG-RMA) was tasked by the Commission on Elections to conduct the implementation of the RMA. The original composition of the RMA as designated by the Commission En Banc included Ms. Agnes Carreon of the Comelec Internal Audit Office (IAO) and Atty. Resurreccion Quieta of the Commission on Audit

(COA) as members, and Ambassador Henrietta T. de Villa of the Parish Pastoral Council for Responsible Voting (PPCRV) and the Advisory Council as chairperson. At a later date, COA withdrew its membership in the TWG-RMA, and the Commission En Banc designated Ms. Carmelita Ericta, General Administrator of the National Statistics Office (NSO) to replace Atty. Quieta.

The TWG-RMA held several preliminary meetings, (nine in all) prior to submitting its recommendations to the Commission on the procedures for the conduct of the Random Manual Audit. Several personages known for their integrity and expertise in their chosen fields related to audit, statistics, and information technology were invited as resource persons. Suggestions from groups, i.e. SWS, Alyansa Agrikultura, as well as submitted materials from political parties, i.e. Liberal Party were also considered. Consulted often were various Comelec offices, i.e. Steering Committee, Project Management Office (PMO), Deputy Executive Director for Operations (DEDO), Internal Audit Office (IAO), Election and Barangay Affairs Department (EBAD), Election Records and Statistics Department (ERSD), Finance and Services Department (FSD), Personnel Department, Law Department and those of the Commissioners who acted as point persons of the Commission En Banc to the TWG-RMA. The Comelec Advisory Council also lent invaluable advice and assistance to the TWG-RMA.

The Random Manual Audit, just like the AES, suffered from a very tight timetable for its preparations. Adversely affected was the selection of the Random Manual Audit Team (RMAT) composed of teachers without assignments as BEIs in the 10 May 2010 elections. These RMATs with a total number of 3,435 teachers (each RMAT was composed of three teachers) were only given a one-day session of training, one week prior to elections. Some of those who were not reached by such session had to rely on a Training CD prepared by the Comelec Personnel Department. This lack of sufficient in-depth training was evident in the errors and flawed improvisations committed during the implementation of the RMA.

Another constraint the TWG-RMA experienced was in the area of funds. The Random Manual Audit did not have any allocation in the AES supplemental budget, nor in the Comelec's agency budget. It had to rely on the benevolence of various Comelec offices in terms of staff, space, supplies and other such contingencies, especially at the time when the TWG-RMA functioned without an official Secretariat. It is to the credit of the group whose creativity and commitment saw its way through in accomplishing its tasks with patient endurance and edifying enthusiasm.

The Provincial Election Supervisors (PES) who were designated to implement the Random Manual Audit in the field likewise lacked the briefing and the time to immediately conduct the RMA in their respective provinces, not to mention the distance and difficult terrain of quite a number of precincts selected for the RMA that they had to hurdle. Examples of the latter are the precincts selected for the RMA in Mapun and Turtle Islands in Tawi-Tawi which can only be reached by sea, and via commercial vessels that ply the route once a week in good weather. While many of the PES had their hands full during elections and immediately afterwards, and yet did their best to implement the RMA and submit their reports right after, still there were those who had to be entreated, cajoled, begged (short of being threatened) before they

seriously conducted the Random Manual Audit and sent their corresponding reports. A few were never heard from at all.

There were still several procedural obstacles that unduly delayed the Random Manual Audit and the public release of the TWG-RMA Report. This delay caused anxiety and speculations among the candidates, media, the keen observers of the AES, especially its detractors, the technology providers and even the Comelec itself. We have to make mention here, that through it all the Commission never intervened on how the TWG-RMA should go about its work, nor did it even try to influence the outcome of our findings and this Report. Our independence was respected. Not that the TWG-RMA would have had it otherwise.

As the wise book says, "all things shall come to pass", the TWG-RMA with relief and thankfulness likewise says, "just as in the AES that happened in the 2010 elections, and happened well, so, too, with God's grace, the RMA did happen, and happened considerably well.

Legal Background of the Random Manual Audit

Section 29 of Republic Act No. 9369 authorized the Random Manual Audit specifically stating, *"Where the AES is used, there shall be a random manual audit in one precinct per congressional district randomly chosen by the Commission in each province and city. Any difference between the automated and manual count will result in the determination of root cause and initiate a manual count for those precincts affected by the computer or procedural error."*

Minute Resolution No. 09-0765 during the Regular En Banc Meeting of the Commission on Elections held on 10 November 2009, *"In The Matter Of The Technical Working Group On Random Manual Audit"*, the Commission RESOLVED as it is hereby RESOLVES, as follows:

1. To create the Technical Working Group on the Random Manual Audit (TWG-RMA) which shall be comprised of the following:
 - 1) Amb. Henrietta T. de Villa, PPCRV and member Advisory Council - Chair
 - 2) Ms. Agnes Carreon, OIC, Internal Audit Office - Member
 - 3) Atty. Resurreccion Quieta, COA Resident Representative - Member
2. To direct the TWG-RMA to immediately convene to study and recommend procedures for the conduct of Random Manual Audit in accordance with the provisions of R.A. 9369. In connection, therewith, the TWG-RMA shall coordinate with the Steering Committee and Project Management Office in preparing their recommendations; and submit its preliminary proposal not later than November 2009.

In March 2010, COA withdrew its membership in the TWG-RMA citing possible conflict of interest. In April 2010, COA was replaced by the NSO with Ms. Carmelita Ericta, General Administrator, sitting in the TWG-RMA as member.

As gleaned from its mandate from R.A. 9369 and Minute Resolution No. 09-0765, the TWG-RMA considered as its basic recommendatory task to include:

1. how many clustered polling precincts are to be audited
2. what positions will be audited
3. when the random manual audit is to be conducted
4. where the random manual audit is to take place
5. who will conduct the Random Manual Audit

It likewise focused its attention in the process of the random selection of the precincts to be audited. At first, the TWG-RMA considered asking the National Statistics Office (NSO) or the Social Weather Station (SWS) to design a computerized program for the random selection of the precincts. This was, however, disregarded when some resource persons voiced the concern that those questioning the transparency of the AES wherein only the machine knows what is in its program, might also suspect an automated program of selection as subject to manipulation.

On hindsight, while the manual selection process used in choosing the 1,145 clustered polling precincts to undergo the Random Manual Audit was very transparent and visible, it took up a lot of time – from 10:30 AM to 7:00 PM (10 May 2010), not counting the time for decoding the numbers on the *pingpong* balls – which delayed the transmission of the selection results to the field.

Another aspect of the random manual audit that elicited prolonged discussion was the number of precincts to be audited. Suggestions for the basis of the selection ranged from per ballot face or per councilor district, total number of clustered precincts, total number of legislative (congressional) districts, total number of registered voters.

TWG-RMA Recommendations on the Conduct of the RMA

On 30 March 2010 the TWG-RMA chairperson sent a letter to the Commission En Banc through Chairman Jose A.R. Melo with the final recommendations of the group for the conduct of the Random Manual Audit. In its Minute Resolution No. 10-0453 *"In The Matter Of The Recommendation Of The Technical Working Group-Random Manual Audit (TWG-RMA) In Compliance With Comelec Minute Resolution No. 09-0765"* dated 05 April 2010, *"the Commission RESOLVED, as it hereby RESOLVES, to approve the following recommendations submitted by the Technical Working Group Random Manual Audit as embodied in its report dated March 30, 2010, to wit:*

1. On the Number of Precincts to be Audited

5 precincts per legislative district ($229 \times 5 = 1,145$ precincts since the creation of Malolos City as a separate legislative district of Bulacan was nullified by the Supreme Court). Section 29 of R.A. 9369 bases the selection of precincts on the legislative district.

2. On the time of the Random Manual Audit

At the Clustered Polling Precincts immediately after the shut down of the PCOS when all its functions have been completed.

Random selection of the clustered precincts will be done in Manila at the Comelec National Office and will start at 3:00 PM on 10 May 2010. Comelec is to provide the system for the dissemination of information regarding the selected clustered precincts to be audited and how this will be cascaded to the corresponding Election Officers and to the BEI-auditors concerned.

While R.A. 9369 is silent when the Random Manual Audit should be conducted, this arrangement debunks any perception that the integrity of the ballots has been compromised during the transfer of the ballot boxes from the precinct to the Treasurer's Office. The RMA done in the clustered polling precincts in the presence of pollwatchers – the Citizen's Arm (PPCRV), the political parties, media and the public – will invest invaluable credibility on the AES.

3. On the Manner of Random Selection of Precincts

The random selection of the precincts will be done manually through the traditional visual mode i.e. the fish bowl selection whereby 229 fish bowls representing 229 legislative districts with their corresponding numbers of the precincts in each bowl will undergo the raffle draw mode. This will be held in the Comelec (either at the PMO or the Session Hall), conducted by the Technical Working Group-Random Manual Audit, with the Joint Congressional Oversight Committee Chairmen as overseers.

Known personalities and/or Juan dela Cruz can be invited to do the draw per legislative district. The selection can be made a media event which augurs well for transparency and a positive climate for the start of the RMA.

4. On the Selection of Auditors

The auditors will be the BEIs themselves selected in the following manner:

- BEI from the clustered polling precinct immediately after the randomly selected precinct
- BEI from the clustered polling precinct immediately before the randomly selected precinct should this be the last precinct in the Voting Center
- BEI from the next barangay should the randomly selected precinct be the lone precinct in the Voting Center

The BEIs are used to counting the ballots manually, hence there is less need to familiarize them with this procedure. Selecting another set of BEIs to do the manual audit in the randomly selected precinct will ensure a blind audit which precludes the possibility of any attempt to "reconcile" the manual count with the AES count. The results of the manual audit should be announced by the watchers as soon as the counts

are completed. All BEIs should be informed in advance of the possibility of being assigned to do the traditional manual count in a nearby different precinct.

5. On the Positions to be Audited

All National Positions and 5 Local Positions: Representative (Congress), Governor, Vice Governor, Mayor, Vice Mayor

6. That the Comelec shall provide secretarial staff to the TWG-RMA headed by Atty. Divina Blas-Perez of EBAD and Ms. Celia Romero of ERSD;

7. That no interpretation of the voter's intent be done in the appreciation of ballots by the BEI-auditors. In the event of discrepancies the Comelec Advisory Council, assisted by the Technical Evaluation Committee, shall determine the root cause/s of the discrepancies;

8. That the Comelec shall design and provide the necessary forms and supplies the RMA will require for the efficient implementation of the RMA. In this connection, the TWG-RMA shall submit its budget for the implementation of the Random Manual Audit (RMA) for approval by the Commission En Banc;

9. That the RMA done in each and all randomly selected precincts be conducted with utmost integrity and transparency;

10. That the TWG-RMA shall coordinate with the Project Management Office Director in the preparation of the General Instructions on the conduct of the Random Manual Audit.

The Commission En Banc Resolution 8837 "In The Matter Of The General Instructions For The Conduct Of A Random Manual Audit (RMA) For the May 10, 2010 National And Local Elections" promulgated on 30 April 2010, the General Instructions that detailed the conduct of the RMA, to wit:

1. Composition and Appointment of the Random Manual Audit Team (RMAT) To Conduct The Random Manual Audit

Note: An RMAT is composed of three (3) public school teachers who were not assigned as BEIs in the elections on 10 May 2010.

2. Qualifications of the RMAT

3. Powers and Functions of the RMAT

4. Proceedings of the RMAT

5. Minutes and Audit Returns of RMA

6. Honoraria of the RMAT Members

7. Selection Process of Areas to be Audited

Note: Instead of the "fish bowl method", the draw for the random selection of the precincts will use the *tambolo* with numbered *pingpong* balls corresponding to the precincts. The draw will be done at the Philippine International Convention Center (PICC) on May 10, 2010 starting at 12:00 noon by the TWG-RMA. (The draw actually started at 10:30 AM.)

8. Date, Time, Place of RMA

9. Procedure for the Random Manual Audit (RMA)

Note: The Positions that will be included in the Random Manual Audit are President, Vice President, Member of the House of Representatives, Governor, Mayor

10. Guidelines on Reading the Ballots
11. Manner of Counting the Ballots
12. Effects of Discrepancy Between AES and RMA
13. Post-Audit Procedures
14. Effectivity and Dissemination

Implementation of the RMA in the Field

There was noticeable resistance to the RMA. This was reflected in the way the Random Manual Audit was implemented in the field. Due to a lack of information on the RMA, awareness of the general public, including the election officers, on its significance to the AES was stunted. This created not a few difficulties. The most recurring was the lack of understanding and appreciation of the fact that while the Random Manual Audit might be similar to the manual counting of votes, there are glaring differences, i.e. recognizing "over votes" and the shading of the ovals. Several instances occurred when variances were caused by the RMA due to misreading of shades, i.e. "under shading" was not counted or "over shading" was misunderstood as an "over vote". In the midst of all this, the RMA weathered through its birth pangs.

Outlined here is a chronological step by step procedure of how the Random Manual Audit was to be implemented in the selected clustered polling precincts.

1. The list of clustered polling precincts drawn from the *tambolalo* should be faxed immediately to all the Provincial Election Supervisors (PES).
2. The Provincial Election Supervisors (PES) will then give the different Random Manual Audit Teams (RMATs) their assignments. One RMAT consisted of three teachers, acting as Chairman, Secretary, and Member.
3. The RMATs are then to proceed either to the Voting Center of their assigned clustered polling precinct or to the office of the Municipal/City Treasurer, as the case may be, to conduct the Random Manual Audit.
4. In the presence of the pollwatchers of the different political parties and the accredited Citizen's Arm, the ballot box per selected polling precinct is to be opened and the ballots, prior to being counted, are batched in piles of 100 per pile. Any excess ballots, but less than one hundred would constitute the last pile.
5. Five (5) positions were to be subjected to the RMA: President, Vice President, Member House of Representatives, Governor, Mayor.
6. The RMAT Chairman would then read the names of the selected candidates written on the ballot and determine the "over votes" and "ambiguous marks", the Secretary is to record these in the Audit Return (AR) while the Member takes care of the Tally Board.
7. The procedure for the manual counting of the votes concerned consists of:
 - A) Tallying of votes:

- *Taras* method which records the vote for each candidate with a vertical line in the square or box provided for this, except that for every fifth vote for the same candidate is recorded with a diagonal line running through the four (4) previous vertical lines;
- After reading and tallying each pile of 100 ballots, the sub-total of the number of votes is recorded for each of the five candidates in the next empty square or box;
- All the sub-totals recorded for each candidate of the five positions under the RMA is summed up and the aggregate total recorded in words and figures in the column provided for this purpose. The results of both the Audit Return (AR) and the Tally Board should be compared, and in case of a discrepancy, a recount would then be necessary;
- Entry of the votes for each candidate should be closed with signatures of all the members of the RMA on the blank squares or boxes following the last sub-total. If a candidate did not receive any vote, the signatures should then be affixed in the square or box following said candidate's name;
- B) Making sure all entries are correct prior to closing the RMA:
 - That the number of votes in the *Taras* tallies are the same as those recorded in words and figures for the same candidate;
 - That all RMA members certify to the correctness of the entries by affixing their signatures and thumb marks at the bottom portion of each and every page of the Tally Board and the Audit Return (AR);
 - That every and all alterations and/or corrections are recorded and initialed;
 - That the Tally Board is deposited inside the ballot box;
 - That the results of the AR per candidate are recorded in the RMA Minutes/Reports in figures in the column marked "Per RMA" by the Secretary;
 - That the Automated Election System (AES) Results are taken from the Election Returns (ERs) from the envelope inside the ballot box. The figures written in the ER as votes for the candidates subjected to the RMA are to be copied in the "Per AES" column in the RMA Minutes/Report;
 - That the two figures "Per RMA" and "Per AES" be compared, and the difference (if any) should be noted in the third column marked "Variance";
- 8. A copy of the Minutes/Reports should be placed inside the envelope and deposited in the ballot box. Five copies of the Minutes/Reports are to be placed in envelopes intended for the Comelec (ERSD), the TWG-RMA, Majority Political Party, Dominant Minority Political Party and the KBP.
- 9. The first copy of the Audit Return (AR) shall be deposited inside the ballot box, the second copy for the Comelec (ERSD) and the third copy for the TWG-RMA are to be placed inside their corresponding envelopes as marked.

Reception and Verification of RMA Reports from the Field

The Random Manual Audit in the 1,145 selected clustered precincts did not happen simultaneously. Since the *rambiolo* system of randomly selecting the clustered polling precincts

took close to twelve hours, the transmission of the results to the PES in all provinces nationwide was, as a consequence, also delayed. Many of the RMA Ts waiting for their assignments had gone home. Many local Comelec offices no longer had their staff on duty. The Provincial Election Supervisors were busy with the canvassing of the votes. There were selected precincts whose ballot boxes had already been brought to the offices of the Municipal/City Treasurers. It was only in a few nearby places, or in precincts were voting ended early that the Random Manual Audit took place on election day itself.

The RMA Reports started coming in slowly. These were brought to the Comelec Command Center in the Philippine International Convention Center (PICC) during the first days after the May 10, 2010 elections. Later on, after the Comelec had proclaimed the twelve (12) winning senators, and before the National Canvassing of the votes for President and Vice President commenced in the Batasan Pambansa, the PICC Command Center was dismantled. The RMA Reports were then delivered and received at the Comelec Project Management Office in Intramuros.

Reception of the Random Manual Audit Reports from the field operationalized this system:

1. The copies of the RMA Report intended for the Comelec and the TWG-RMA upon delivery by the Provincial Election Supervisors (PES) or their representatives to the Comelec Central Office in Intramuros were received by the Election Records and Statistics Department (ERSD) of the Commission.
2. The Audit Returns (ARs) and the Minutes/Reports of legislative districts of the provinces were noted down by the secretariat of the Office of Commissioner Lucenito Tagle. These RMA reports were then assigned to "Verifiers" gathered from the offices of the Commissioners, ODEDO, EBAD, FSD and the IAO, and supervised by some staff from the Office of Commissioner Gregorio Larrazabal. PPCRV volunteers also assisted in the verification phase of RMA Reports.

3. Verification consisted of the following tasks:

- Checking the completeness of the RMA documents like the ARs and the Minutes/Reports.

Note: When there are no ARs, but the data needed can be found in the Minutes/Reports, the Verifier considered such RMA Report as complete. When there are no Minutes/Reports, but the ARs are there, the Verifier is to prepare an improvised Minutes/Reports by using the ARs for the "Per RMA" and the "Per AES" from the data downloaded from the Comelec website. This would render the RMA Report complete.

- Checking the correctness of the Taras, words and figures of the votes garnered as found in the ARs should tally.

- Checking the correctness of the transposition of the figures from the "Per AES" as found in the ERs and "Per RMA" as found in the ARs should be the same.

Note: If any difference were to be detected, the Verifier can correct the variances that are due to clerical and/or mathematical errors. Thirty-two (32) such variances were corrected.

- The Verifiers then submit their verified RMA Reports to an encoder from the Internal Audit Office (IAO) who will record the received and verified RMA Reports, after which these RMA Reports are passed on to the National Statistics Office (NSO) staff for the encoding of data, the computation of variances and the preparation of summary tables on these variances.

The Role of the NSO

The National Statistics Office (NSO) is one of the members of the Technical Working Group formed by the Commission on Elections (COMELEC) primarily to do the Random Manual Audit on the results of the national and local elections held recently. The audit process includes the comparison of the number of votes counted by Precinct Count Optical Scan (PCOS) machine or the Automated Election System (AES) against the number of votes manually counted by the Random Manual Audit Team (RMAT) for every sample clustered precinct for the positions of President, Vice-President, Member of House of Representatives, Governor and Mayor. The difference between the AES count and RMA count, which is also referred to as the "variance" was expected to be computed for each candidate from a total of 1,145 sample clustered precincts or an equivalent to 1.5 percent of 76,347 total clustered precincts in the Philippines.

As of July 7, 2010, about 1,046 complete reports or 91.3 percent of the 1,145 total sample clustered precincts were received. An RMA Minutes/Report for a given sample clustered precincts is considered complete if the number of votes per AES and per RMA are available. The percent distribution of sample clustered precincts with complete report by region is shown in Figure 1.

Figure 1. Percent Distribution of Sampled Cluster Precincts with Complete Report by Region: Philippines 2010

The activities done by the NSO team are the following: (1) actual sample selection of clustered precincts; (2) encoding of data and computation of "variances" for identified national and local positions (President, Vice-President, Member House of Representatives, Governor and Mayor); (3) preparation of summary tables on variances; (4) determination of allowable margin of "variance"; and (5) preparation of summary report.

1. Allowable Margin of "Variance"

Section 12 of COMELEC Resolution No. 8837 dated April 30, 2010 stated that "In the event the results of the AES exceed the allowable margin of variance, Section 24 of RA 9369 shall apply".

From 1,046 sample clustered precincts, a total of 540,942 persons voted using the AES. The results of the AES count were then compared to the results using the manual count. Ideally, the number of votes counted from the AES should be the same as the number of votes counted manually. However, discrepancies between the counts per AES and per RMA occurred which can be attributed to clerical errors (errors in transposition) and/or mathematical errors (errors in counting and adding of *taras*). Further manual validation of the RMA Minutes/Reports was done to address these errors.

Based on the ninety-nine percent (99%) accuracy rate, the allowable margin of "variance" was set at one percent (equivalent to less than 10 votes' difference in absolute value for every 1,000 valid ballots cast). Thus, for the 40 million votes counted, the allowable cumulative discrepancy at the national level should be less than 400,000 votes for each of the 10 presidential candidates and less than 50,000 votes for each of the 8 vice-presidential candidates.

Thus, from the given sample of 1,046 clustered precincts with 540,942 valid ballots cast, the allowable total cumulative discrepancy based from the sample should be less than 5,409 votes. The term "sample" here refers to the number of clustered precincts drawn randomly. At the

Table 1. Distribution of Sample Clustered Precincts and Persons Actually Voted by Region : Philippines 2020

Area	Clustered Precincts*	Sample		Allowable Margin of "Variance" (1 percent)
		Persons Actually Voted	Persons Actually Voted

ANMM	18	9,330	93	
Caraga	41	19,606	196	

* - with complete report

clustered precinct level, a candidate that is found to have a "variance" of 10 or more votes underwent further validation by the TWG-RMA.

2. Variance Summary Results

The term "variance" here refers to the absolute difference between the number of votes per AES and per RMA. Variance was computed at the sample clustered precinct level. The sum of variance at the legislative district level was computed by adding all the variances of the sample clustered precinct within the legislative district while the regional variance is equal to the sum of the variances of the legislative districts within the region. The national total variance is the sum of the variances of all the regions.

Large "variances" were then identified for further validation. For a given cluster of precincts, a "variance" is considered large if it is double-digit and exceeds the allowable margin of "variance". The validation was done by identifying the root cause of discrepancies. Variances found due to clerical/mathematical errors were immediately corrected and reflected in the variance summary results. However, errors other than clerical/mathematical were referred to the TWG-RMA. Table 2 below shows the summary of computed variance by stage of compilation done by NSO.

Table 2. Variance Summary Results for National and Local Positions: Philippines 2010

Position	Before Validation of Large Variances		After Initial Validation of Large Variances		After Final Validation of Large Variances	
	June 4		June 17		July 7	
	Total Variance	Percentage Variance	Total Variance	Percentage Variance	Total Variance	Percentage Variance
President	3,787	0.70	3,528	0.65	2,653	0.49
Vice President	2,835	0.52	2,529	0.47	2,180	0.40
Total (National)	6,622	0.61	6,057	0.56	4,833	0.45
Mayor	3,042	0.56	2,808	0.52	2,182	0.40
Member, House of Representatives	2,605	0.48	2,642	0.49	1,947	0.36
Governor	2,766	0.51	2,467	0.46	1,910	0.35
Total (Locals)	8,413	0.52	7,917	0.49	6,033	0.37

2.1 Variance for Presidential Position

The cumulative "variance" for presidential position was tallied at 2,653 votes. This figure was almost half of the allowable "variance" of 5,409 votes. The computed percentage variance was at 0.49 percent that resulted to 99.51 percent accuracy rate. Percentage variance is the ratio between total "variance" and the number of persons who actually voted. Among the regions, the National Capital Region (NCR) registered the largest share at 14 percent followed by Region 3, Region 4A and Region 6 with 9 percent share. The lowest variance of 2 percent share was noted in CAR and ARMM. The percent distribution of total variances for Presidential position is shown in Figure 2.

Figure 2. Percent Distribution of Total Variances for Presidential Position by Region: Philippines 2010

2.2 Variance for Vice-Presidential Position

For the vice-presidential position, the total "variance" of 2,180 votes resulted to 0.40 percentage variance or 4 votes' difference out of every 1,000 valid ballots casted. This figure was almost 0.1 percentage point lower than the percentage variance for the presidential position. Among the regions, NCR registered the largest share at 14 percent followed by Region 3 (10%), Regions 5 and 6 (9%). Meanwhile, the lowest variance of one percent share was posted in ARMM. Figure 3 below shows the percent distribution of total variances for Vice-Presidential position.

Figure 3. Percent Distribution of Total Variances for Vice-Presidential Position by Region: Philippines 2010

2.3 Variance for Member, House of Representatives Position

The "variance" for the Member of House representatives position that had a cumulative total of 1,947 votes resulted to 0.36 percentage variance. NCR contributed 16 percent share to the total variance. This was followed by Region 6 (10%), Region 4A and Region 7 (8%). However, Region 2 had the lowest variance share (1%). The percent distribution of total variances for Member of House of Representatives position is shown in Figure 4.

Figure 4. Percent Distribution of Total Variances for Member, House of Representative Position by Region: Philippines 2010

2.4 Variance for Mayoralty Position

A total cumulative "variance" of 2,182 votes seen from the mayoralty position resulted to 0.40 percentage variance. The biggest share of 18 percent was observed in NCR. This was followed by Region 3 (12%), Region 4A and Region 7 (8%). The lowest variance share was noted in CAR with only two percent (2%) from the total. The regional percent distribution of total variances for Mayoralty position is shown in Figure 5.

Figure 5. Percent Distribution of Total Variances for Mayor Position by Region: Philippines 2010

2.5 Variance for Gubernatorial Position

A national "variance" of 1,910 votes obtained from the gubernatorial position resulted to 0.35 percentage variance. Region IVA had the biggest share of 21 percent. This was followed by Region 6 (10%), Region 3 (9%) and Region 8 (8%). The lowest variance share (2%) was recorded in CAR. The regional percent distribution of total variances for gubernatorial position is in Figure 6.

Figure 6. Percent Distribution of Total Variances for Governor Position by Region: Philippines 2010

3. Accuracy Rate

The accuracy rate is computed as the complement of percentage variance. Thus, a 0.49 percentage variance would yield an accuracy rate of 99.51 percent. On the average, accuracy rate at the national level for all positions was at 99.60 percent. The highest accuracy rate was posted in Region 11 for presidential position (99.65) and CAR for vice-presidential position (99.74%). For the local positions, the highest rate was recorded in Region 2 for Member, House of Representatives (99.87%), CAR for Mayor (99.70%) and Region 11 for Governor (99.79%). The regional distribution of accuracy rate and the regional breakdown for total and percentage variances are shown in Table 3 and Table 4 respectively.

Table 3. Accuracy Rate by Region: Philippines 2010

Area	Sample Clustered Precincts*	Accuracy Rate (in Percent)					Governor Average
		President	Vice-President	Member, House of Representative	Mayor	Governor	
Philippines	1,046	99.51	99.60	99.64	99.60	99.65	99.60

Checking of Variances

Information on the clustered polling precincts with variances culled by the NSO as large variances, considered large would be double digit variances, were then passed on to the TWG-RMA. Ballot boxes of these precincts with large variances were then retrieved through and after directives from various Comelec offices had been issued to the Provincial Election Supervisors concerned. Validation Teams were formed composed of Comelec employees from the Office of Commissioner Lucenito Tagle, the Finance and Services Department (FSD), the Internal Audit Office (IAO) and the Election and Barangay Affairs Department (EBAD).

These Validation Teams randomly checked if the ballots contained the ultra violet security marking in order to verify the authenticity of the ballots. All ballots tested were found positive as authentic.

In most cases of large variances, errors were due to human factors such as the inability of the RMA to distinguish "over votes" and "ambiguous markings". There were also instances when the transposition errors were due to miscopying the numbers from the ARs to the Minutes/Reports, miscopying the Taras, as well as when numbers are mixed up or zeroes are dropped. Some RMAseven resorted to using "liquid paper" or snowpake" in trying to undo errors rendering the ARs and Minutes/Reports almost unreadable. Another case, upon close scrutiny revealed that only one RMA conducted the RMA in several precincts so that ARs and Minutes/Reports were mixed up resulting in the wrong computation of the manual counts. This happened in several selected precincts in Laguna. In Sias, Sulu and Sta. Rita, Laguna ballots from a wrong precinct were counted which of course did not tally with the AES ERs of the selected precinct, resulting in large variances

The cases of (3) clustered polling precincts which are outside the scope of the Technical Working Group on the Random Manual Audit (TWG-RMA) were elevated to the Commission En Banc for further action.

Conclusion

Root cause analysis of the variances in a majority of the clustered polling precincts manifested the difficulty of conducting parallel manual and machine counts. The manual count will always be subject to the discretion of the auditor in trying to interpret and/or appreciate voter's intent. The machine will only count in the way it is programmed to.

If the Random Manual Audit is to make sure of the accuracy of election results and preserve electoral integrity, then it must be clearly pointed out from the beginning that the margin of variance is a computation of the difference between the manual count and the machine count. Hence, it is a test between man and machine. While the tolerance level set for the accuracy of the machines is a test that involves only the machines. The margin of variance indicated by the NSO as equivalent to 1% based on the accuracy rate of 99% (the allowable rate used in

statistical analysis) cannot thus be used as the basis of comparison to the 99.995% accuracy rate of the PCOS machine set by the Request for Proposals (RFP) as a requirement for the Bidding Process of the AES technology.

As indicated in the NSO cumulative variances for the five positions subjected to the Random Manual Audit, none failed the accuracy rate of 99%. Nonetheless, since this is the first time that the Random Manual Audit was conducted, it must add, rather than subtract, value to the elections, ultimately to the nation. As such all variances must stand the scrutiny of the public, their clearance explained so that the RMA results may serve as some kind of trust fund for the AES at a time when trust in it is still in the building stage.

Recommendations on the Conduct of the RMA for Future AES

In the event that forthcoming elections will employ the Automated Election System (AES), which we hope will be the case, many things in the conduct of the Random Manual Audit will have to be revisited, improved and standardized. The same is true for the AES. In our initial attempt at the RMA, some realizations stand out. What appears to be neat on paper, even with attempts at time and motion setting, more often than not is very different from what happens in the field. Experiential knowledge can only be gained from actualization of the project/program and immersion in it.

From the learnings gained by the TWG-RMA, we offer to the Commission on Elections a number of recommendations, with a lot of humility and also with some sense of pride ^{budget}

1. For inclusion of the Random Manual Audit in the General Appropriations Act of the Commission;
 2. For setting a standard number of precincts to be audited;
 3. For more studies to be done on the process of the Random Manual Audit using as reference post-election audit methodologies employed by other countries and/or based on researches and theses on this subject;
 4. For better technical features to make voting machines more audit-able and accountable, provide more convenient methods to check vote count accuracy and to determine how, when, and where errors occur and the cause of errors;
 5. For wider information and promotion of the Random Manual Audit;
 6. For maintaining the place of audit as the polling precinct and the time of the RMA as immediately after the close of voting and the functions of the machine in the precinct;
 7. For commissioning the National Statistics Office (NSO) to come up with a standardized program of an automated random selection of the precincts to be audited;
 8. For the printing of an accurate and understandable Random Manual Audit handbook that includes instructions and procedures for conducting effective and efficient post-election audits with illustrations and using language accessible to ordinary lay persons, and an "easy to use tool kit" with standard RMA forms;
- For the integration of the training of RMA auditors (RMATs) in the regular training of the BEIs way before elections, as well as in the orientation for election field officers i.e.

*time of ?
indicator ?*

RED, PES, EO; likewise to include representatives of the Comelec accredited Citizen's Arm in such training/orientation;

10. For the Commission En Banc to designate early enough the members of the Technical Working Group on the Random Manual Audit (TWG-RMA) so that they can familiarize themselves not only with all aspects of the RMA, but especially with the AES, as well as to come up with the General instructions on the RMA months before elections;

Through the grace of God, we respectfully and gratefully submit this Report to the Commission En Banc on this 20th day of July in the Year of Our Lord 2010.

2013 RANDOM MANUAL AUDIT

FOREWORD

**Commissioner Christian Robert S. Lim
Ambassador Henrietta T. de Villa
Ms. Ma. Agnes T. Carreon**

June 24, 2013

Commissioner Christian Robert S. Lim
Commissioner-in-Charge
Random Manual Audit Committee

*"Our masters have not heard the people's voice for generations
and it is much, much louder than they care to remember."*

— Alan Moore, *V'far V'endetta*

Preparation and implementation of the Random Manual Audit ("RMA") for the 13 May 2013 Automated Synchronized National, Local and ARMM Elections cannot be called a piece of cake. The RMA Committee gingerly walked through a gauntlet of challenges and concerns.

The composition of RMA Committee was the same as that of 2010 RMA – Technical Working Group, but members of its previous complement have been assigned to other equally important projects and tasks.

In the 2013 Proposed Budget of the Commission on Elections, Thirty-Five Million Pesos (P35,000,000.00) was allotted for the conduct of the RMA for the 13 May 2013 Automated Synchronized National, Local and ARMM Elections. However, the Department of Budget and Management ("DBM") did not approve of the allotment and Congress adopted the recommendation of the DBM to zero the item; perhaps, Congress and the DBM did not believe in the value of the RMA. Fortunately, the Commission on Elections *En Banc* was of the position that Congress and the DBM cannot repeal a substantive provision in Republic Act No. 9369 by zeroing the budget for the same and that the RMA is an essential requirement for a truly honest, clean, transparent and orderly Elections; the Commission on Elections sourced a little over Twelve Million (P12,000,000.00) from its savings.

The General Instructions for the RMA Teams went through nine (9) draft versions and underwent four (4) major revisions before it was approved by the Commission on Elections *En Banc*. The General Instructions were amended after the same was given a dry run using the results of the Mock Elections. The RMA Committee nevertheless received criticism regarding the General Instructions; pressure from external and internal sources resulted in another alteration to the General Instructions.

Conflict in schedules and other developments constrained the RMA Committee to directly train RMA Team members and to request for a supplemental budget as opposed to the original plan and intention in the preparation of the RMA Committee's budget. With barely a month and a half and two hundred thirty-four (234) teams to train, the RMA Committee conducted three waves of trainings and had to repeat training for five (5) provinces in order to address substitution concerns.

Deployment of the RMA Teams was a logistical nightmare as the last amendment to the General Instructions pushed back the selection of precincts for audit. Security and transport for RMA Teams were affected due to diminished time for coordination with Commission on Elections officials in the field. Monitoring the progress and providing assistance to the concerns of RMA Team members proved herculean since the RMA Committee was understaffed for the tasks.

To say that validation of the RMA Team audit findings was difficult is an understatement. Volunteer validators were scarce and space to conduct validation was wanting. Retrieval of the RMA Minutes, Audit Returns and Ballot Boxes was hampered by financial considerations and lack of cooperation. It must be mentioned that the RMA Committee anticipated only forty (40) Ballot Boxes will be for retrieval, but the RMA Committee validated two hundred and three (203) Ballot Boxes.

Marie Antoinette, wife of Louis XVI and queen of France, on the eve of the French Revolution, is believed to have uttered the insensitive remark upon hearing peasants' complaints that there was not enough bread to go around: "Let them eat cake." She was beheaded in the end and her demise ushered a new era for a country.

Despite numerous challenges and upheavals in the preparation and implementation of the RMA for the 13 May 2013 Automated Synchronized National, Local and ARMM Elections, the RMA Committee made innovations in the audit and brought the same to the advent of a new system. The work of the RMA Committee was to inspect the accuracy of the voting machines used in the recent Elections; the RMA Committee ended confirming that the voice of the people was heard.

COMELEC

Ma. Agnes T. Carreon

Member

Random Manual Audit Committee

It is with great pleasure that I offer my congratulations to everyone for the very excellent Random Manual Audit for the 2013 National and Local Elections.

Foremost, to the Honorable Commissioner Christian Robert S. Lim, who is not just the Commissioner-in-Charge but also the person that had given us direction. We have Ambassador Henrierra de Villa, our inspiration and very able Chairperson. The Administrator of the National Statistics Office, Carmelita N. Encta, and her staff. They gave sense to our report.

We also had the 22 Trainers for the RMA 2013 Training Seminars. They handled 25 classes and 3 re-trainings (for the NCR, Region 1 and Region 8). We would also thank the six Provincial Election Supervisors that cascaded the trainings to their respective provinces (Camarines Norte, Romblon, Palawan, Batanes, Sulu and Tawi-Tawi).

We thank the teachers who did the RMA in the 234 precincts for each legislative districts. A lot of them had spent more than 24 hours in conducting the random audit.

We also thank the 68 validators and support staff in the main office that exerted in the analysis of each RMA Reports

Great thanks is also for the Honorable Chairman, Sixto S. Brillantes, Jr., who had given us support.

Indeed, the success of the Random Manual Audit came at much cost – extended hours and tasks that go beyond the call of duty became customary to those who were stationed in the front lines. But of course, the challenges and sacrifices we altogether faced pale in comparison to the nobility and significance of our undertaking. For what we have stood for, worked for and even fought for is nothing less than the protection and the upholding of the integrity of our country's elections – which in turn, stands for the integrity and honor of our very country itself.

It is humbling to remember that what we have embarked on has a significance that goes beyond ourselves, beyond our lifetime. Which is why, amidst the burden of the magnitude of our endeavor, it is a comforting reminder that there is, beyond us, the power of the Almighty who ensures that all will be well. "Blessed is the nation whose God is the Lord . . ." said the psalmist in Psalm 33:12. With that promise we can be rest assured that this country's integrity that we have sought to uphold, is in fact, in the powerful hands of the Almighty, whose plans for the Philippines are indeed good, pleasing and perfect.

Congratulations once again and God bless!

Ambassador Henrietta T. de Villa

Chairperson

Random Manual Audit Committee

The geography of the Automated Election System (AES) in the case of Philippine Elections is etched out from the shadow of the manual system. In fact the latter seems to be the benchmark for determining whether the former functions properly, securely and accurately. The Random Manual Audit (RMA), a stipulation of the law on the AES, Republic Act 9369 Section 29 is the post-election marker for this. It is also the final passing exam for the AES. The first ones being the Certification of an International Audit Agency with validation from the Technical Evaluation Committee, the Source Code Review, Final Testing and Scaling.

In the short history of the AES in Philippine Elections, only one regional and two national and local elections to date, there remains a crowd that is in doubt about its trustworthiness, and a hard-core handful who completely mistrust it, with some who are simply beyond a change of heart. But there is, as author-philosopher Anton Zijderveld puts it, "a virtuous use of doubt that allows us to move forward boldly with strong moral convictions", and to keep us also from looking at doubting Thomases as enemies. In a sense, they helped push us who conducted the RMA to do so with due diligence and patient determination so that truth will always surface.

Love of God and country impelled the following movers of the RMA to exert themselves:

- 1,170 teachers who composed the two hundred thirty-four (234) Random Manual Audit Teams (RMAT);
- 68 validators and support staff from the COMELEC;
- 22 RMA trainers who conducted and facilitated training for 25 regular classes plus 6 cascading (re-echo) classes and 3 re-training classes for a total of 34 training classes for the RMAT;
- 234 Provincial Election Supervisors and Election Officers who served as RMA coordinators;
- 20 NSO personnel
- 4 RMAC secretariat personnel
- 1 Commissioner-in-charge
- 3 members of the RMAC

All of them went beyond limits to conduct a clean, honest, accurate, meaningful, peaceful (CHAMP) 2013 Random Manual Audit. The Random Manual Audit Committee is bereft of adequate words to convey gratitude. The Lord who sees and knows all things will be their recompense.

was the decision of the RMAC to use this time a specially designed Automated Random Selection Program (ARSP). The ARSP was initially designed by the Information Technology Department (ITD) of the COMELEC, and later on enhanced and implemented by the National Statistics Office (NSO). To dispel doubts as to its fairness and randomness, the ARSP source code was opened for review as soon as it was tested by the RMAC.

A notable change also was conducting the RMA as per the dictate of the law: "in one precinct per congressional district randomly selected by the Commission in each province and city." For the 2013 RMA, in one clustered precinct in each of the 234 congressional/legislative districts.

The RMAC focused on stringent validation that will really be in chase of variances ... uncovering these ... scrutinizing their root causes, and once identified, if human error caused the variances immediate clearance; if unexplainable, refer the Ballot Box concerned to the Technical Evaluation Committee (TEC). The Internal Audit Office (IAO) must be credited for its valiant efforts in this aspect of the RMA. Support from the various COMELEC offices, i.e. Election Records and Statistics Department (ERSD), Election and Barangay Affairs Department (EBAD), Election Contests Adjudication Department (ECAD), Office of the Deputy Executive Director for Operations (ODEDO), Office of the Deputy Executive Director for Administration (ODEDA), Planning, Law, Personnel Departments, and of course the office of the Commissioner in charge of the RMA rendered the Random Manual Audit an *opus* of solidarity for the accuracy of the 2013 National and Local Automated Elections.

Some additional data referencing RMA narratives, charts and statistics that will be helpful in understanding these are the following:

- 234 Ballot Boxes from the 234 randomly selected clustered precincts that were subjected to the RMA;
- 1 Ballot Box (BB) from the clustered precinct in Basilan was excluded due to non-submission of any RMA report, hence only 233 BBs and their corresponding RMA Reports were considered;
- 19 BBs (the RMA reports from these) had less than 10 variances from the very start
- 12 BBs (the RMA reports from these) had 0 variance from the very start
- 203 BBs were retrieved by the RMAC for validation;
- 181 BBs (the ballots therein) were physically counted by the validators;
- 212 BBs were turned over to the NSO for processing and tabulation;
- 3 BBs had no AES and so excluded from the RMA final report;
- 4 BBs are the subject of election protests, hence excluded from the RMA final report;
- 1 BB excluded for probable cause of tampering;
- 3 BBs had lacking ballots, hence excluded from the RMA final report;
- 11 BBs were referred to the Technical Evaluation Committee (TEC) since exhaustive validation was unable to explain the variances therein, hence excluded from the RMA final report;

It took the Random Manual Audit Committee forty-three (43) days to complete its work, including the finalization of this 2013 Random Manual Audit Report. The RMA manpower was composed of the following:

- 330 from the COMELEC
- 1,170 teachers from the Department of Education (DepEd)
- 21 from the National Statistics Office (NSO)
- 1 from the Parish Pastoral Council for Responsible Voting (PPCRV)
- A total of one thousand five hundred twenty-two (1,522) persons were tasked to conduct the 2013 Random Manual Audit.

The RMA, in many ways, is the result of painstaking investigative work. Verification, validation, processing and analysing are important components of the RMA which boil down to detecting variances, investigating their root causes and determining their sources. And the road to its success depends largely on sharp eyes, analytical minds willing hands and generous hearts. While the RMA deals with machines (the PCOS), but conducted by people, many will aver that "never the twain shall meet." But machines and technology are powerful tools that give access to people, so aptly enunciated by Ron Suskind, a Pulitzer prize winning author: "to grab hold of what may be one of the most powerful forces on earth – moral energy – which flows, most often and most fully, from the varied and connected chambers of the human heart."

The RMAC dug deeply into this human potential through intimate relationships built and fostered in the process of conducting the RMA itself. Affirmation, encouragement, thankfulness expressed in words but more effectively by gestures and accompaniment perhaps could account for the increase of 0.3% in the accuracy rate of the 2013 RMA's 99.97% as compared to the 2010 RMA's 99.6%. Still .025% off the PCOS accuracy rate of 99.995%. But for the RMAC, any variance cleared, any increase in accuracy rate, no matter how small are akin to striking gold for the RMA. Again because of the improbability of a perfect match when bedding together the AES and the manual count.

While all 2013 RMA movers, led by Chairman Sixto S. Billantes, Jr. and the Commission en banc and all the directors heading the various COMELEC aforementioned departments and offices are written in the heart of the 2013 Random Manual Audit Committee chairperson, still there are those whose names are hyphenated as beacon light of the *Magis* (the more) of God ...

2013 RANDOM MANUAL AUDIT

Random Manual Audit Process

**Introduction
Procedures
Training Teams
Venues for Training
Validation Monitoring**

Introduction:

Section 24 of Republic Act No. 9369 inserted a new provision to Republic Act No. 8436, the same reads:

"Section 29. *Random Manual Audit.* - Where the AES is used, there shall be a random manual audit in one precinct per congressional district randomly chosen by the Commission in each province and city. Any difference between the automated and manual count will result in the determination of root cause and initiate a manual count for those precincts affected by the computer or procedural error."

The above provision is explicit: First, a randomly selected precinct in every congressional district where an Automated Election System ("AES") is utilized will undergo manual audit. Second, there should be a determination of root cause in the event that there is a difference between the AES results and the manual audit. Third, if it is determined that there is computer or procedural error, then all affected precincts will undergo manual count.

In view of the above-quoted provision, the 2013 Random Manual Audit ("RMA") Committee prepared a program for the audit of the 13 May 2013 Automated Synchronized National, Local and ARMM Elections. The Committee introduced improvements to the previous audit taking into consideration their experience as the 2010 Random Manual Audit - Technical Working Group ("RMA-TWG") during the 10 May 2010 Automated Synchronized National and Local Elections. The hard work of the Committee produced a number of innovations, such as:

1. Reduced the number of precincts to one per congressional legislative district in favor of a more stringent margin of variance;
2. Introduction of a simulation exercise as part of the training for Random Manual Audit Team (RMAT) members;
3. Use of an automated random selection program to choose precincts for audit before the day of the Elections;
4. Addition of two members to act as verifiers/ field auditors; and
5. Count and segregation of Ballots with Questionable Marks.

In 2010, five (5) clustered precincts per congressional district underwent RMA and only ballots of those precincts where there was a difference of ten (10) votes per candidate were sent to RMA-TWG for validation. This year, the number of clustered precincts that underwent RMA was reduced to one (1) in compliance with the above-cited provision. In the event that there was an aggregate of ten (10) votes' difference between the AES results and the manual audit in a clustered precinct this year, the ballots of that precinct were sent to the RMA Committee for validation. This resulted in a more accurate audit.

This year, RMAT members were given opportunity to further familiarize themselves with their function through a simulation exercise. RMAT members were exposed to an assortment of vote markings with the end goal of them understanding better how the voting machine works. This gave RMAT members more confidence and allowed them to gel as a team.

Precinct selection was completely random save for the requirement that one clustered precinct per congressional district shall be subjected to the RMA in compliance with the above-cited provision. Any suggestion or qualification as to precinct selection will undermine the requirement that the same is completely random. The use of an automated random selection program (ARSP), instead of an encoded ping-pong ball *tambolero* manual selection, was time efficient and convenient. The automated random selection was made in two (2) parts and ahead of the Elections; three (3) days before the Elections, specific provincial municipalities and component cities were identified while particular clustered precincts were identified one (1) day before the Elections. The RMA was conducted immediately after the close of the polls. Experience of the 2010 RMA-TWG proved that selecting precincts on Election Day caused mobilization issues for RMA Teams, especially those assigned to far-flung and remote clustered precincts. In 2010, some RMA Teams failed to reach the precincts on time and were constrained to conduct the RMA in the Municipal/City Hall. The ARSP sought to balance the necessities of maintaining the element of surprise while giving sufficient time for logistics preparations. True that some element of surprise might have been diminished, but the leeway allowed not only the Commission but Election Partners as well, such as the Philippine Armed Forces, Philippine National Police and Accredited Citizens' Arms Groups, for better coverage of the RMA.

It was also the experience of the 2010 RMA-TWG that RMA Team members committed clerical and/or transcription errors. In response to this, the RMAC saw it fit to add two members to the RMA Team whose functions were precisely to reduce such errors in the field and verify audit findings. The RMA Team Verification Group members perform routine checks and calculations to inspect the manual count of the other members of the RMA Team.

Another innovation to the RMA was the count and segregation of Ballots with Questionable Marks. One of the primary reasons for the variance during the 2010 RMA was human appreciation of the vote mark. Even with proper training, RMA Team members cannot be reasonably expected to match the perception of a voting machine. In order to address this issue, RMA Team members were instructed to count and segregate Ballots with Questionable Marks. The segregation of these Ballots aided the RMA Committee in validating variances.

Legal Background:

A. Composition

Through *Commission on Elections Resolution No. 9538 dated 09 October 2012*,¹ the Commission on Elections *En Banc* convened the Random Manual Committee comprised of the following: Amb. Henrietta T. De Villa as Chairperson; Carmelita N. Enicta and Ma. Agnes T. Carreon as Members. The Commission on Elections *En Banc* also designated Honorable Commissioner Christian Robert S. Lim as Commissioner in Charge.

Initially, Ms. Concordia Buniel of the Internal Audit Office was appointed as a temporary Disbursing Officer and the Committee was allocated Fifty Thousand Pesos (P50,000.00) for

¹ COMMISSION ON ELECTIONS, "In the matter of constituting the Random Manual Audit Committee (RMAC) in connection with the 13 May 2013 Automated Synchronized National, Local and ARMM Elections," promulgated 09 October 2012

miscellaneous expenses pending the submission and approval of the Committee's proposed budget pursuant to *Commission on Elections Resolution No. 9566 dated 04 December 2012*.²

B. Finances

On 11 December 2012, the Commission on Elections *En Banc* approved the Committee's proposed budget through *Commission on Elections Minute Resolution No. 12-1129*.³ On 24 January 2013, the Commission *En Banc* designated Ms. Concordia Buniel of the Internal Audit Office as the permanent Disbursement Officer of the Committee.⁴

The Committee prepared the foregoing budget with the intention to save, or at least reduce training expenses, by sharing costs with the Project Management Office. However, scheduling conflicts and developments made the plan impossible. The Committee thus requested a Supplemental Budget for the training of Random Manual Audit Team members, which the Commission *En Banc* approved through *Commission on Elections Minute Resolution No. 13-0357 dated 13 March 2013*.⁵

Review of the evaluations of the RMA training points out that the amount of honorarium for RMA Team members is inadequate. The RMA Committee sought from the Commission on Elections *En Banc* authority to use savings from its budget for RMA Team members Training to augment the budget for RMA Team members Honorarium and to substantially increase each member's Honorarium. The Commission on Elections *En Banc* issued *Minute Resolution No. 13-0564 dated 25 April 2013* approving the RMA Committee's foregoing request.⁶

Financial considerations hampered retrieval of the RMA Minutes, Audit Returns and Ballot Boxes. It must be mentioned that the RMA Committee, with regard to budget, anticipated only forty (40) Ballot Boxes would be for retrieval but the RMA Committee had to validate two hundred and three (203) Ballot Boxes. To address the concern, the RMA Committee once again sought authority from the Commission on Election *En Banc* to augment the allotment for transportation with the allotment for publication in its budget, which was approved through *Minute Resolution No. 13-0712 dated 28 May 2013*.⁷

² COMMISSION ON ELECTIONS, "Appointment of Ms. Concordia Buniel of the Internal Audit Office as Temporary Disbursing Officer of the Random Manual Audit Committee pending the appointment of a permanent disbursing officer in relation to the conduct of Random Manual Audits during the May 13, 2013 National and Local Elections," promulgated 04 December 2012.

³ COMMISSION ON ELECTIONS, "In the matter of the Proposed Budget of the Random Manual Audit Committee for the 13 May 2013 National, Local and ARMM Elections," promulgated 11 December 2012.

⁴ COMMISSION ON ELECTIONS, *Minute Resolution No. 13-0132*, "In the matter of the Appointment of Ms. Concordia Buniel as permanent Disbursing Officer of the Random Manual Audit Committee," promulgated 24 January 2013.

⁵ COMMISSION ON ELECTIONS, "In the matter of the Supplemental Budget for the Training of Random Manual Audit Team members," promulgated 13 March 2013.

⁶ COMMISSION ON ELECTIONS, "In the matter of the request for Authority to Realign Funds for Additional Honorarium of the Random Manual Audit Team members," promulgated 25 April 2013.

⁷ COMMISSION ON ELECTIONS, "In the matter of realigning the allocation for Publication to the allocation for provisions for Miscellaneous Expenses in the budget of the Random Manual Audit Committee," promulgated 28 May 2013.

The need to accelerate the pace of the validation process necessitated that the RMA Committee engage additional personnel and lease of work space. The Commission on Elections *En Banc* granted Commission Lim authority to realign funds in the existing budget of the RMA Committee to engage additional personnel and to acquire work space for the additional personnel through *Minute Resolution No.13-0748 dated 04 June 2013*.⁸

C. General Instructions

On 21 December 2012, the Commission on Elections *En Banc* promulgated the General Instructions for the conduct of the Random Manual Audit.⁹ These General Instructions introduced most of the innovations for this year's audit, such as reduction of the number of clustered precincts to one per congressional legislative district in favor of a more stringent margin of variance; automation in the random selection of clustered precincts for audit before the day of the Elections; addition of two members to act as verifiers/ field auditors; and count and segregation of Ballots with Questionable Marks.

These General Instructions were later amended giving due course to the RMA Committee's observations and experience during the 02 February 2013 Mock Elections. The RMA Committee submitted its proposed amendments to the Commission on Election *En Banc*, which were approved in *Commission Resolution No. 9647 dated 22 February 2013*.¹⁰

Some quarters from external and internal sources expressed apprehension regarding the time for the random selection of clustered precincts for audit. As a result the General Instructions went through another alteration. The Commission on Elections *En Banc* promulgated *Commission Resolution No. 9681 dated 02 May 2013* pushing back the selection of clustered precincts one day later.¹¹

⁸ COMMISSION ON ELECTIONS, "In the matter of the requests of the Random Manual Audit Committee (RMAC) for additional validators and work space, and general authority to realign funds in the RMAC Budget for the purpose," promulgated 04 June 2013.

⁹ COMMISSION ON ELECTIONS, *Commission Resolution No. 9595*, "In the matter of the General Instructions for the conduct of a Random Manual Audit (RMA) for the 13 May 2013 National, Local and ARMM Elections and subsequent elections thereafter," promulgated 21 December 2012.

¹⁰ COMMISSION ON ELECTIONS, "In the matter of amending Commission *En Banc* Resolution No. 9595, 'In the matter of the General Instructions for the conduct of a Random Manual Audit (RMA) for the 13 May 2013 National, Local and ARMM Elections and subsequent elections thereafter,' promulgated on 21 December 2012," promulgated 13 March 2013.

¹¹ COMMISSION ON ELECTIONS, "In the matter of the Selection of Clustered Precincts to undergo Random Manual Audit in the forthcoming Elections," promulgated 02 May 2013.

PROCEDURE FOR THE RANDOM MANUAL AUDIT TEAMS

Chairman:

- Announces the commencement of the Random Manual Audit and determines the Quorum – Two (2) Manual Counts members and one (1) Verifying member will be sufficient to constitute a quorum.
- Proceeds with the Random Audit by presenting the Ballot Box (BB) to all present.
- Checks the condition and integrity of the BB and plastic seal attached to the BB.
- Breaks seal & opens the BB.
- Retrieves sealed envelopes inside the BB, break seals and opens the envelopes containing: Minutes of Testing and Sealing, Minutes of Voting and Counting, and the copy of the Election Returns (ER).

Assistant Secretary:

- Verifies if Serial Numbers of plastic seal attached to BB is the same as indicated in the Minutes of Voting and Counting.
- Ensures that every event is recorded in the RMA Minutes, provided that if there is any article that the BEI should have placed in the BB is found missing, the RMA should get a witness to attest to such fact by signing the RMA Minutes.
- If the ER for the BB is missing therein, the RMA shall borrow one (1) of the Twenty-two (22) copies of the ER printed after the AES results have been transmitted.

Secretary:

- Performs physical count.
- Compares if number of valid ballots is equal to the number of valid ballots counted in the ER.

Third Member:

- Does a recount if the total number of valid ballots does not match the ballots counted as per ER.
- If after the recount, results still do not match, determine whether valid ballots were mixed with rejected ballots as referred to in Minutes of Voting and Counting.

Assistant Secretary:

- Records the said incident in the RMA Minutes.

GUIDELINES FOR READING OF VOTES

The Chairman checks for over-voting or under-voting in each position subject to RMA.

In case of over-vote:

- Secretary records such fact in the Audit Returns (RMA-AR) and Minutes;
- Vote shall not be counted for any candidate for that particular position;
- An over-vote is when a voter selects more than the allowed number of seats for a particular position;
- Over-voting shall not invalidate the entire ballot, votes for other positions (that are not over-voted) shall be counted;
- Ballots with over-votes shall be set aside in an envelope marked as "envelope for over-votes".

In case of under-vote:

- Secretary records such fact in the RMA-AR and Minutes;
- Vote shall be counted for the candidate voted upon for a particular position;
- An under-vote pertains to the situation where the voter chooses less than the allowed maximum number of seats for a position;
- Under-voting in any particular position will not invalidate the votes for that position;
- Ballots with under-votes shall be set aside in an envelope so denominated "envelope for under-vote".

In case of votes that are improperly shaded or with questionable marks:

- Secretary records such fact in the RMA-AR and Minutes and shall be counted as vote for the candidate;
- Subject ballots shall be placed in "Envelope for Ballots with Questionable Marks".

In the event of a ballot having an over-vote and under-vote, and contains questionable marks, this particular ballot should be placed in the "Envelope for Ballots with Over-votes".

The Co-Chairman shall validate the findings by the Chairman.

- In case of dispute with the Chairman, findings of the Co-Chairman shall prevail.
- The Co-Chairman then marks said ballot then places the same in the "Envelope for Disputed Ballots"
- Directs the Assistant Secretary to records the incident in the RMA ;
- RMA members are not permitted to mark the ballots in any manner except when the Co-Chairman marks the ballot as "disputed".

MANNER OF COUNTING OF VOTES

1. Chairman and Co-Chairman shall form separate files of 100 ballots;
2. Chairman shall take the ballots of the first pile one by one and read first the number assigned to the candidate followed by the candidate's name;
3. For every ballot, the Chairman shall announce the votes cast;
4. The Co-Chairman shall closely observe the reading and validate the votes cast.
5. In case of dispute between the Chairman and Co-Chairman, see procedures stated above.
6. Secretary shall accomplish the six (6) copies of the RMA-AR and respectively records thereon each vote read the Chairman, while the Third Member does the same on the Tally Board.
7. The Assistant Secretary confirms that the Secretary records each vote correctly.
8. Each vote shall be recorded by a vertical line, with every fifth (5th) vote by a diagonal line crossing the previous four (4) votes "taras".
9. For each pile read, the votes obtained for each candidate shall be added and the sum recorded on the space immediately after the last vote recorded.
10. The same procedure is done to all the succeeding piles.
11. After all the ballots are read, the Secretary, Assistant Secretary and Third Member shall compute and record the total votes for each candidate in the RMA-AR and Tally Board. They shall then compare if their tallies are the same, if not, they shall do a re-count until their tallies become the same.
12. The Chairman accomplishes three (3) copies of the RMA-Minutes, accurately entering therein all data required as they become available and all acts or events as they occur.
13. Copies of the RMA-Minutes are signed by all RMA members and sealed in separate clearly labeled envelope for distribution as follows:
 - 13.1 Original copy is deposited inside the BB;
 - 13.2 Second copy intended for COMELEC is delivered to the Coordinator who forwards the same to the Records and Statistics Division (RSD) of the

Election Records and Statistics Department (ERSD), COMELEC, Intramuros, Manila.

- 13.3 Third copy for the RMA Committee is delivered to the Coordinator, who forwards the same to RSD, ERSD, COMELEC, Intramuros, Manila. ERSD then forwards the same to the Command Center of the RMA Committee.
14. Six (6) copies of the RMA-AR are accomplished by the Secretary by accurately entering therein the votes obtained by each candidate. Copies are signed by all RMA members and sealed in separate clearly labeled envelopes for distribution, as follows:
 - 14.1 Original copy is deposited inside the BB;
 - 14.2 One intended for the COMELEC shall be delivered to the Coordinator who forwards the same to the RSD, ERSD, COMELEC, Intramuros, Manila.
 - 14.3 One intended for the RMA Committee is delivered to the Coordinator who forwards the same to the RSD, ERSD, COMELEC, Intramuros, Manila who then forwards the same to the Command Center of RMA Committee.
 - 14.4 One copy for the Dominant Majority Political Party;
 - 14.5 One copy for the Dominant Minority Political Party;
 - 14.6 One copy for the Accredited Citizen's Arm Group authorized by the Commission on Elections to receive one of the first eight copies of the ER and to conduct an unofficial parallel count.

CLOSING PROCEDURES

1. The RMA shall return the ballots in the BB;
2. All BEI reports, documents, forms, and the Minutes of Testing and Sealing and the Minutes of Voting and Counting previously opened are resealed using the seals provided in the RMA Kit.
3. One copy of the RMA-AR and RMA Minutes are to be sealed and placed inside the BB. Tally Board is also placed inside the BB.
4. The Chairman locks the BB with fixed length seals. The serial number is recorded in the RMA Minutes before closing the BB.
5. The Chairman turns over the BB to the City/Municipal Treasurer for safekeeping. Retrieval of the BB is under the custody and responsibility of the Treasurer concerned and forms part of the retrieval operations of the Treasurer's Office. In case the variance exceeds the allowable margin of 10 aggregate votes per BB, the BB will be turned over by the RMA to the Office of the Coordinator. The RMA Chairman informs all the watchers present that the BB is to be delivered to the RMA Committee for validation.

DISCREPANCY BETWEEN AES AND RMA

In the event that the variance between the AES and RMA results still exceeds the allowable margin of an aggregate variance of ten votes, the RMA Committee, with the assistance of the Validation Group, shall:

1. Notify Candidates, Political Parties and their Watchers, who will observe the opening of the BB to the RMA Committee;
2. Open the BB in observance of the procedures for RMA;
3. Perform manual counting of ballots for positions with variances in the RMA and AES count in observance of procedures for the reading and counting of votes;
4. Records manual counting activity in the RMA Minutes
5. Returns the BB to the concerned Treasurer in case the finding is that variance does not actually exist or a mere mathematical error.
6. Turns over BB to the Technical Evaluation Committee (TEC) for the determination of the root cause when the variance is valid;
7. In all the above procedures needing the signature of the RMA Committee, the signatories shall be the Chairperson and one of the two other members of the RMA Committee.

2013 Random Manual Audit

NSO Report

**Prepared by
2013 NSO-RMA Working Group
National Statistics Office**

June 20, 2013

Results of the 2013 Random Manual Audit

National Statistics Office Summary Report

1. Introduction

The National Statistics Office (NSO) is one of the three members of the Random Manual Audit Committee, the technical working group formed by the Commission on Elections (COMELEC) primarily assigned to do the Random Manual Audit (RMA) on the results of the 2013 midterm elections. The Random Manual Audit as mandated by law under Section 24 of Republic Act No. 9369 is the process of determining the accuracy of the results of Automated Election System (AES) for the National and Local elections in the country held last May 13, 2013. The manual audit process includes the comparison of the number of votes counted by Precinct Count Optical Scan (PCOS) machine or the Automated Election System (AES) against the number of votes manually counted by the Random Manual Audit Team (RMAT) for every sample clustered precinct for the positions of Senator, Member of the House of Representatives and Mayor. The difference between the AES count and RMA count, which is also referred to as the "variance" was expected to be computed for each candidate from a total of 234 sample clustered precincts or one clustered precinct for every legislative district in the Philippines.

2. The Role of the NSO

The NSO as a member of Random Manual Audit Committee (RMAC) was involved particularly in the following activities: (1) Sample selection of the 234 clustered precincts using the Automated Random Selection Program (ARSP); (2) Development of Data capture (with full verification feature) and RMA processing and tabulation systems to facilitate computation of "variance" for identified national and local positions (Senator, Member House of Representatives, and Mayor); (3) Preparation of summary tables on variances; (4) Determination of allowable margin of "variance"; and (5) Preparation of summary report.

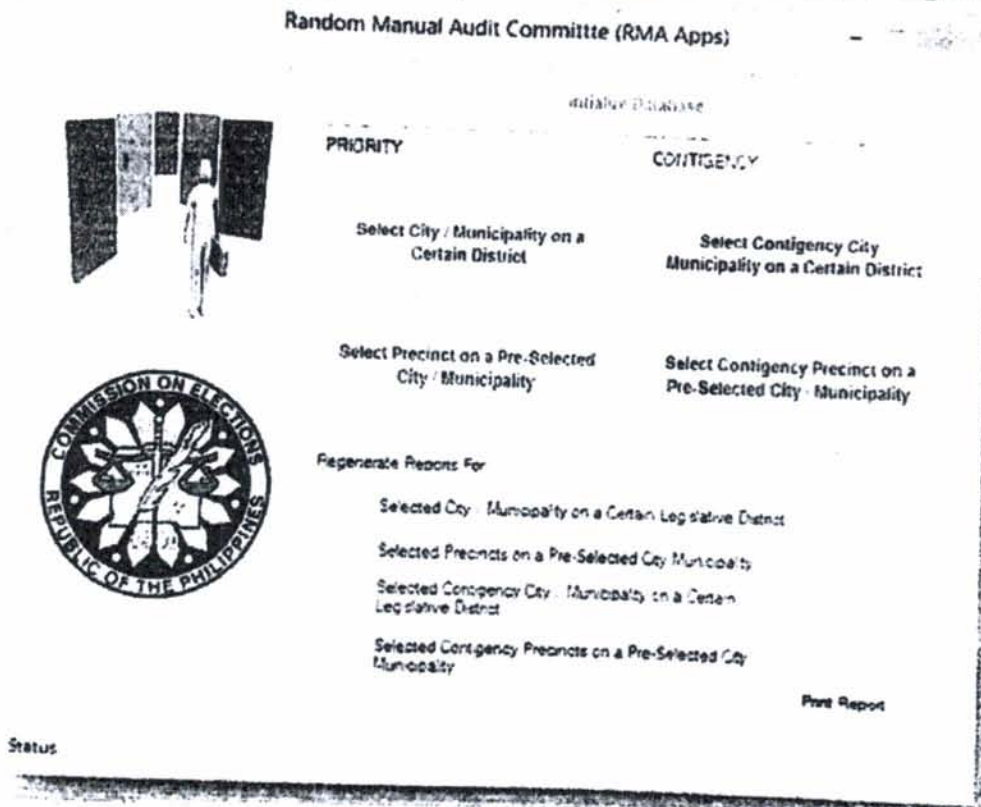

This report focused only on the results based on the activities done by the NSO team. Thus, this report does not represent the complete results of the Random Manual Audit as other activities specifically done by the other teams of the TWG-RMAC are not included in this report.

3. The Automated Random Selection Program (ARSP)

The random selection procedure was done in two stages; (1) Selection of cities/municipalities on May 10, 2013 at the COMELEC Session Hall and; (2) Selection of clustered precincts on May 12, 2013 at the Philippine International Convention Center (PICC). Using an automated random selection program (ARSP) developed by the Random Manual Audit Committee (RMAC), the 234 sample clustered precincts were successfully selected. The list of sample clustered precincts is shown in Annex A.

The ARSP is a computer application program that contains routines, functions, and algorithms developed in visual studio environment and MySQL database system. The same program was subjected to source code review by Registered Political Parties and Accredited Citizens' Arm Groups. The ARSP is developed to speed-up the sample selection process and to replace the previous manual method of random selection using "tambolo" in 2010. Figure 1 shows the screenshot of the program that was used to facilitate random selection.

Figure 1. Screenshot of Automated Random Selection Program (ARSP)

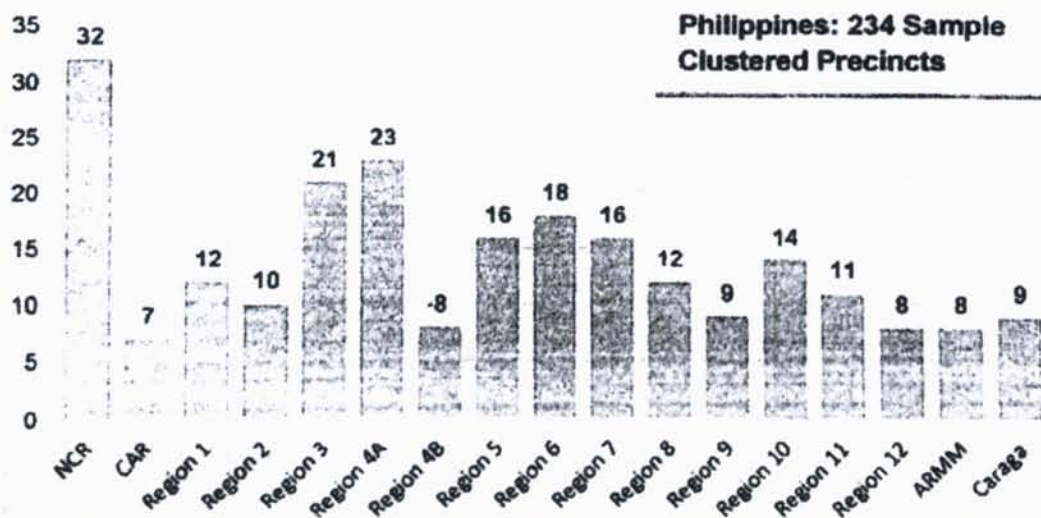

3.1. Sample Selection Procedure

In a simple random selection, every element in the population has an equal chance of being selected. In the initial stage of selection, the term "element" here refers to the "cities/municipalities" within a legislative district. Likewise, during the second and final stage of randomized selection, the term "element" can also refer to the "clustered precincts" within the selected city/municipality. The random selection procedure is designed to draw two sets of sample (i.e., (1) the priority list of sample and (2) the contingency list of sample).

The priority set of sample contains the list of randomly selected priority cities/municipalities and the corresponding priority list of 234 randomly selected clustered precincts. On the other hand, the contingency list of sample contains the list of randomly selected contingency cities/municipalities and the list of 234 randomly selected contingency clustered precincts. The contingency list of sample is used as replacement in case of a failure of random manual audit (RMA) in any of the priority sample due to accessibility and peace and order problems. The actual number of sample clustered precincts drawn from each region is shown in Figure 2.

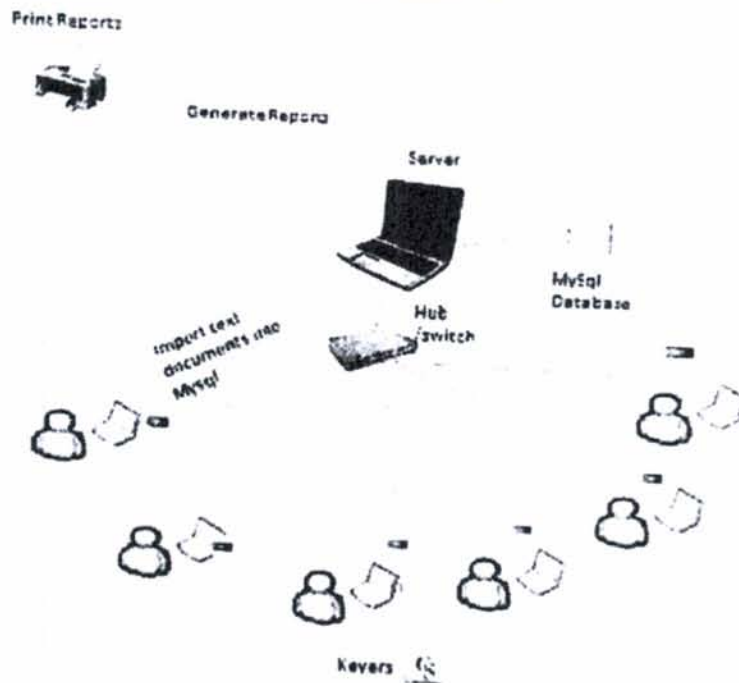

Figure 2. Frequency Distribution of Sample Clustered Precincts by Region: Philippines 2013

4. RMA Processing Network Configuration Setup

The 2013 RMA processing system was configured using a network environment with 1 MySQL server and 12 workstations. The RMA processing system consists of 3 (three) modules (i.e., (1) *Receipt, Control and Monitoring Module*, (2) *Data Capture and Verification Module*, and (3) *Query and Reports Module*). The data capture and verification module of the system utilized CPro version 3.3 (i.e., for 8 workstations) while the other 2 (two) system modules were developed using MySQL database system for the remaining workstations. Figure 3 illustrates the Network Configuration setup of the RMA processing system.

Figure 3. 2013 RMA Network Configuration

5. RMA Processing Flow

RMA reports coming from the RMA validation group of the COMELEC are transmitted to the NSO-RMA team for processing, tabulation and analysis. An internal unique control number is assigned to each RMA report received. The assigned NSO encoders and verifiers input the data with 100 percent key verification. These encoded data are then uploaded to MySQL Database. The uploaded data underwent internal validation to check for possible encoding errors. The system is capable of generating completeness report and tabulations to generate preliminary reports anytime. Figure 4 shows the detailed process flow of the RMA processing system.

Figure 4. 2013 RMA Processing Flow

6. Number of Sample Clustered Precincts with Complete and Validated RMA Reports

As of June 19, 2013, a total of 212 complete and validated RMA reports or 90.6 percent of the 234 total sample clustered precincts were received by the NSO for analysis and processing to generate "variance" summary report. An RMA minutes/report for a given sample clustered precincts is considered complete and validated if the number of votes per AES and per RMA are available and further validations have been made to review the initial audit results submitted by the RMAT to the COMELEC. The distribution of 212 sample clustered precincts with complete and validated RMA reports by region is shown in Table 1.

Table 1. Distribution of Sample Clustered Precincts with Complete and Validated RMA Reports by Region: Philippines 2013

Area	Number of Clustered Precincts		Completion Rate (In Percent)
	Sample	Complete and Validated RMA Reports	
Philippines	234	212	90.6
National Capital Region	32	29	90.6
CAR	7	7	100.0
Region I	12	9	75.0
Region II	10	10	100.0
Region III	21	20	95.2
Region IV-A	23	22	95.7
Region IV-B	8	7	87.5
Region V	16	15	93.8
Region VI	18	17	94.4
Region VII	16	14	87.5
Region VIII	12	11	91.7
Region IX	9	8	88.9
Region X	14	12	85.7
Region XI	11	11	100.0
ARMM	8	6	75.0
Caraga	8	6	75.0
	9	8	88.9

7. Allowable Margin of "Variance"

Section 12 of COMELEC Resolution No. 8837 dated April 30, 2010 stated that "In the event the results of the AES exceed the allowable margin of variance, Section 24 of RA 9369 shall apply".

From the 212 sample clustered precincts, a total of 111,251 persons voted using the AES. The results of the AES count were then compared to the results using the manual count. Ideally, the number of votes counted from the AES should not be different from the number of votes counted manually. However, discrepancies between the counts per AES and per RMA occurred which can be attributed to clerical errors (errors in transposition) and/or mathematical errors (errors in counting and adding of *taras*). Further manual validation of the RMA minutes/reports was done to address these errors.

Based on the ninety-nine percent (99%) accuracy rate, the allowable margin of "variance" is set at one percent (i.e., equivalent to less than 10 votes' difference in absolute value for every 1,000 valid votes counted). Since most of the "variance" can be attributed to human errors or clerical errors, aiming for a higher accuracy rate to as high as 99.995 percent (i.e., 1 vote difference in absolute value for every 20,000 valid votes counted) could be statistically improbable.

Table 2 shows the Allowable Margin of "Variance" for the positions Senator, Member of House of Representatives and Mayor based on the received RMA reports from 212 sample clustered precincts. The term "sample" here refers to the number of clustered precincts drawn randomly who have submitted complete and validated RMA reports.

**Table 2. Allowable Margin of "Variance" for National and Local Positions:
Philippines 2013**

Position	Number of Persons Actually Voted	Number of Valid Votes Counted as per Automated Election System (AES)	Allowable Margin of "Variance" (1.0 Percent)
Senator	111,251	817,729	8,177
Mayor	111,251	102,978	1,030
Member House of Representatives	111,251	96,155	962

Source: 2013 Random Manual Audit Results as of June 20, 2013

8. Variance Summary Results

The term "variance" here refers to the absolute difference between the number of votes per AES and per RMA. The "variance" was computed at the sample clustered precinct level. The sum of "variance" at the regional level was computed by adding all the "variance" computed at the legislative districts within the region. The national total "variance" is the sum of the "variance" of all the regions.

Large "variances" were then identified for further validation. For a given cluster of precincts, a "variance" is considered large if the cumulative variance for all candidates for all three positions (i.e., Senator, Member of House of Representatives, and Mayor) is 10 or more. The validation was done by identifying the root cause of discrepancies. Variances found due to clerical/mathematical errors were immediately corrected and reflected in the variance summary results. However, errors other than clerical/mathematical were referred to the Technical Evaluation Committee. *Table 3* shows the variance summary results.

Table 3. Variance Summary Results: Philippines, 2013

Area	Total Number of Valid Votes Counted as per Automated Election System (AES)			Total Variance (In Absolute Value)		
	Senator	Member, House of Representatives	Mayor	Senator	Member, House of Representatives	Mayor
Philippines	817 729	98 155	102 978	184	27	26

8.1 Variance for Senatorial Position

The cumulative "variance" or votes' difference for senatorial position at the national level was tallied at 184 votes. This figure was way below the allowable 8,177 votes' difference. The computed percentage variance was at 0.02 percent that resulted to 99.98 percent accuracy rate. Percentage variance is the ratio between total "variance" and the total number of valid votes counted using AES.

Among the regions, Region 3 registered the largest "variance" of 44 votes' difference. This was followed by Region 6 (20 votes' difference) and Regions 1 and 5 (16 votes' difference). No "variance" or no votes' difference between AES and RMA was noted in ARMM. Table 4a shows the regional distribution of total variances for senatorial position.

8.2 Voting Behavior

On the average, Filipino voters opted to vote for only 7 senatorial candidates out of 12 possible senatorial seats. Registered voters from NCR, on the average, had included 10 senators on their senatorial list while voters from ARMM and Caraga voted for an average of only 5 senatorial candidates.

Table 4a. Variance Summary Results for Senatorial Position: Philippines 2013

Area	Number of Voters		Number of Votes			Average Number of Senators Voted	Percentage Variance	Accuracy Rate

8.3 Variance for Member, House of Representatives Position

The "variance" for the Member of House representatives position that had a cumulative total of 27 votes' difference resulted to 0.03 percentage variance. Region 3 tallied 6 votes' difference while region 2 had 5 votes' variance. This was followed by Region 4A and Region 8, both with 4 votes share to total "variance". No variance or no votes' difference between AES and RMA was noted in seven regions: NCR; Region 1; Region IVB; Region 7; Region 9; Region 11; and Region 12. Table 4b shows the regional breakdown of total variances for Member of House of Representatives position.

Table 4b. Variance Summary Results for Members of House of Representatives Position: Philippines 2013

8.4 Variance for Mayoralty Position

A total cumulative "variance" of 26 votes seen from the mayoralty position out of the 102,976 valid votes counted resulted to 0.03 percentage variance. The highest tallied 7 votes' difference was observed in Region IV-A. This was followed by Region 11 (5 votes' difference), Region 3 (4 votes' difference) and Region 2 (3 votes' difference). No variance or no votes' difference between AES and RMA was noted in NCR, CAR, Region 1, Region IVB, Region 5, Region 9, and Region 12. Table 4c shows the distribution of total variances for mayoralty position by region.

Table 4c. Variance Summary Results for Mayoralty Position: Philippines 2013

Area	Number of Voters		Number of Votes			Percentage Variance	Accuracy Rate

9. Accuracy Rate

The accuracy rate is computed as the complement of percentage variance. Thus, at the national level, a 0.02 percentage variance would yield an accuracy rate of 99.98 percent. On the average, accuracy rate for all positions was at 99.97 percent. The highest accuracy rate for senatorial position was at 100 percent posted in ARMM. For the local positions, the highest accuracy rate for Member, House of Representatives was recorded at 100 percent in 6 regions: NCR; Region 1; Region 7; Region 9; Region 11; and Region 12; For the mayoralty position, high accuracy rates were seen from all regions ranging from 99.91 percent (Region 11) to 100 percent in seven (7) regions (i.e., NCR, C.A.R, Region 1, Region IV-B, Region 5, Region 9, Region 12). The average accuracy rate of all three positions at the national level was at 99.97 percent. The regional breakdown of accuracy rate for the three positions is shown in Table 5.

Table 5. Accuracy Rate by Region: Philippines, 2013

Area	Accuracy Rate (in Percent)			
	Senator	Member, House of Representatives	Mayor	Average
Philippines	99.9775	99.9719	99.9745	99.9747
National Capital Region	99.9929	100.0000	100.0000	99.9978
CAR	99.9319	99.9544	100.0000	99.9621
Region I	99.9645	100.0000	100.0000	99.9882

10. Problems Encountered and Action Taken

During RMA Sample Selection

- After the initial stage of sample selection on May 10, 2013 some areas selected by the Automated Random Selection Program (ARSP) (i.e., *Maconacon (priority sample) and Palanan (contingency sample) for the 1st legislative district of Isabela Province*) had to be replaced due to accessibility problem.

After the completion of second and final stage of sample selection on May 12, 2013, at the COMELEC Command Center in Philippine International Convention Center (PICC), the replacement (i.e., *Iligan City, Isabela*) was finally drawn using the ASRP.

During RMA Counting (Based on the submitted RMA minutes)

- No proper endorsement of the ballot box and data needed for the RMA. Minutes of voting were not endorsed/handed to the team upon endorsement of the ballot box (*Siasi, Sulu*)
- The serial numbers of the plastic seals attached to the ballot box were not indicated in the BEIs' minutes of voting and counting (*Bangar, La Union*).
- It took 2 days for the RMA to finish reading the ballots (*Sta. Fe, Leyte*)
- Counted ballots with overvotes and undervotes could not be placed in the envelope due to its limited size. Only a photocopy of the AES results was received by the RMA (*Borongan, Eastern Samar*)
- Overvotes and undervotes were not indicated in the result of AES (*Oton, Iloilo*)
- BEI's were not able to transmit data causing the delay in the RMA counting (*Buruanga, Aklan, Manatao, Davao del Sur*)
- The counting of votes was done at the district office of Poblacion since the precinct has no signal and the place is not safe for the team to stay overnight. (*Alicia, Zamboanga Sibugay*)
- The space/boxes provided for the undervotes in the tally board and audit return was not enough for the taras. Available spaces in the audit return and tally board were utilized instead (*Libertad, Misamis Oriental, Lilo-An Cebu*)
- The counting/auditing was held at the Municipal Hall because the machine cannot transmit the result (*Sta. Maria, Agusan del Sur*)
- No print-out statistics for undervotes and overvotes (*Paco, Manila*)
