

**If there is no parallel manual count, who will shine a light upon the results of the elections?**

**Join NAMFREL BILANG NG BAYAN and help verify the results.**

Elections are less than a week away and Comelec has ruled out a parallel manual count which allows voters to check if the PCOS machines are counting correctly.

But Comelec will be posting the results of the voting at the precinct level after voting ends, and these returns will be transmitted to canvassing centers. These results will be updated on the Comelec website periodically, but there will be no other tally to confirm these numbers.

NAMFREL Bilang ng Bayan will be an independent tally of the results of the elections. **NAMFREL welcomes more volunteers to collect or encode election returns on NAMFREL's secure, encrypted tabulation website to ensure the results of this historic election are accurate.**

NAMFREL has been fighting for clean and honest elections since 1983. Keep the flame burning.
